BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS
(ISSN 0006-291X)

Published three times per month (except four times per month in April, August, and November) by Academic Press
Editorial and Production Offices: 525 B Street, Suite 1900, San Diego, CA 92101-4495
Accounting and Circulation Offices: 6277 Sea Harbor Drive, Orlando, FL 32887-4900
2000: Volumes 267–279. Price: $3495.00 U.S.A. and Canada; $4020.00 all other countries
All prices include postage and handling.

Information concerning personal subscription rates may be obtained by writing to the Publishers. All correspondence, permission requests, and subscription orders should be addressed to the office of the Publishers at 6277 Sea Harbor Drive, Orlando, FL 32887-4900 (telephone: 407-345-2000). Send notices of change of address to the office of the Publishers at least 6 to 8 weeks in advance. Please include both old and new addresses. POSTMASTER: Send change of address to *Biochemical and Biophysical Research Communications,* 6277 Sea Harbor Drive, Orlando, FL 32887-4900.

Periodicals postage paid at Orlando, FL, and at additional mailing offices.

2000 Cumulative Table of Contents, pp. v–clxvii

Cumulative Table of Contents for Volumes 267–279

Volume 267, Number 1, January 7, 2000

BREAKTHROUGHS AND VIEWS

Degradation of Ornithine Decarboxylase by the 26S Proteasome **Yasuko Murakami, Senya Matsufuji, Shin-ichi Hayashi, Nobuyuki Tanahashi, and Keiji Tanaka** 1

REGULAR ARTICLES

Activation of the Small G Protein Rap1 in Dog Thyroid Cells by Both cAMP-Dependent and -Independent Pathways **S. Dremier, F. Vandeput, F. J. T. Zwartkruis, J. L. Bos, J. E. Dumont, and C. Maenhaut** 7

Activation of Nuclear Protein Binding to the Antioxidant/Electrophile Response Element in Vascular Smooth Muscle Cells by Benzo(*a*)pyrene **Marc T. Holderman, Kimberly P. Miller, and Kenneth S. Ramos** 12

Purification and Characterization of Perlucin and Perlustrin, Two New Proteins from the Shell of the Mollusc *Haliotis laevigata* **Ingrid M. Weiss, Stefan Kaufmann, Karlheinz Mann, and Monika Fritz** 17

A Specific Inhibitor of Janus Kinase-3 Increases Survival in a Transgenic Mouse Model of Amyotrophic Lateral Sclerosis **Vuong N. Trieu, Rugao Liu, Xing-Ping Liu, and Fatih M. Uckun** 22

Glucose and Streptozotocin Stimulate p135 O-Glycosylation in Pancreatic Islets **Robert J. Konrad, Karen M. Janowski, and Jeffrey E. Kudlow** 26

Prevention of v-Ha-Ras-Dependent Apoptosis by PDGF Coordinates in Phosphorylation of ERK and Akt **Yoshiko Arase, Takaki Hiwasa, Ritsuko Hasegawa, Jun Nomura, Hisao Ito, and Nobuo Suzuki** 33

Characterization and Quantitation of Phospholamban and Its Phosphorylation State Using Antibodies **Ernest J. Mayer, William Huckle, Robert G. Johnson, Jr., and Edward McKenna** 40

The Binding *in Vitro* of Modified LDL to the Intermediate Filament Protein Vimentin **Anne K. Heidenthal, Peter C. Weber, Friedrich Lottspeich, and Nina Hrboticky** 49

Herbimycin A Induces G1 Arrest through Accumulation of $p27^{Kip1}$ in Cyclin D1-Overexpressing Fibroblasts **Naoko Endo, Etsu Tashiro, Kazuo Umezawa, Manabu Kawada, Yoshimasa Uehara, Yuichiro Doki, I. Bernard Weinstein, and Masaya Imoto** 54

Physical and Functional Interaction between the HCMV IE2 Protein and the Wilms' Tumor Suppressor WT1 **Jong-Mook Kim, Youngtae Hong, Kentaro Semba, and Sunyoung Kim** 59

Differential Role of the JNK and p38 MAPK Pathway in c-Myc- and s-Myc-Mediated Apoptosis	**Kohji Noguchi, Hironobu Yamana, Chifumi Kitanaka, Toshihiro Mochizuki, Akiko Kokubu, and Yoshiyuki Kuchino**	**221**
Tissue-Specific N-Terminal Isoforms from Overlapping Alternate Promoters of the Human AE2 Anion Exchanger Gene	**Juan F. Medina, Jon Lecanda, Alberto Acín, Pawel Ciesielczyk, and Jesús Prieto**	**228**
Degradation of *o*-Nitrobenzoate via Anthranilic Acid (*o*-Aminobenzoate) by *Arthrobacter protophormiae:* A Plasmid-Encoded New Pathway	**Ashvini Chauhan and Rakesh K. Jain**	**236**
Thromboxane A_2 Regulation of Endothelial Cell Migration, Angiogenesis, and Tumor Metastasis	**Daotai Nie, Mario Lamberti, Alex Zacharek, Li Li, Karoly Szekeres, Keqin Tang, YuChyu Chen, and Kenneth V. Honn**	**245**
Tat Mediates Apoptosis *in Vivo* in the Rat Central Nervous System	**Eleftherios S. Gavriil, Ryan Cooney, and Benjamin S. Weeks**	**252**
Thrombospondin-1, a Natural Inhibitor of Angiogenesis, Is Present in Vitreous and Aqueous Humor and Is Modulated by Hyperglycemia	**Nader Sheibani, Christine M. Sorenson, Lynn A. Cornelius, and William A. Frazier**	**257**
Identification of a Novel Human Voltage-Gated Sodium Channel α Subunit Gene, *SCN12A*	**Seon-Yong Jeong, Jun Goto, Hideji Hashida, Takashi Suzuki, Katsuhisa Ogata, Naoki Masuda, Momoki Hirai, Kyoko Isahara, Yasuo Uchiyama, and Ichiro Kanazawa**	**262**
Cloning and Expression Study of the Mouse Tetrodotoxin-Resistant Voltage-Gated Sodium Channel α Subunit NaT/Scn11a	**Katsuhisa Ogata, Seon-Yong Jeong, Hiroo Murakami, Hideji Hashida, Takashi Suzuki, Naoki Masuda, Momoki Hirai, Kyoko Isahara, Yasuo Uchiyama, Jun Goto, and Ichiro Kanazawa**	**271**
Hepatitis C NS3 Protease: Restoration of NS4A Cofactor Activity by N-Biotinylation of Mutated NS4A Using Synthetic Peptides	**Nancy J. Butkiewicz, Nanhua Yao, Jacquelyn Wright-Minogue, Rumin Zhang, Lata Ramanathan, Johnson Y. N. Lau, Zhi Hong, and Bimal Dasmahapatra**	**278**
Molecular Recognition Templates of Peptides: Driving Force for Molecular Evolution of Peptide Transporters	**John W. Payne, Barry M. Grail, and Neil J. Marshall**	**283**
Enhanced Interstitial Collagenase (Matrix Metalloproteinase-13) Production of Kupffer Cell by Gadolinium Chloride Prevents Pig Serum-Induced Rat Liver Fibrosis	**Koji Hironaka, Isao Sakaida, Yasuhiro Matsumura, Seiji Kaino, Koji Miyamoto, and Kiwamu Okita**	**290**
A Water-Soluble Analogue of Glucosaminylphosphatidylinositol Distinguishes Two Activities That Palmitoylate Inositol on GPI Anchors	**William T. Doerrler and Mark A. Lehrman**	**296**
Effect of Electrostatic Interactions on the Binding of Charged Substrate to GroEL Studied by Highly Sensitive Fluorescence Correlation Spectroscopy	**Chan-Gi Pack, Katsuhiko Aoki, Hideki Taguchi, Masasuke Yoshida, Masataka Kinjo, and Mamoru Tamura**	**300**

Downregulation of Phospholipase D by Protein Kinase A in a Cell-Free System of Human Neutrophils	**Jong-Young Kwak and David J. Uhlinger**	**305**
Involvement of Nuclear Receptor Coactivator SRC-1 in Estrogen-Dependent Cell Growth of MCF-7 Cells	**Hitoshi Tai, Naoki Kubota, and Shigeaki Kato**	**311**
Sequence, Organization, and Expression of the Human FEM1B Gene	**Tereza Ventura-Holman and Joseph F. Maher**	**317**
A Novel Cryptic Exon in Intron 2 of the Human Dystrophin Gene Evolved from an Intron by Acquiring Consensus Sequences for Splicing at Different Stages of Anthropoid Evolution	**Zacharias Aloysius Dwi Pramono, Yasuhiro Takeshima, Agus Surono, Takafumi Ishida, and Masafumi Matsuo**	**321**
Parthenolide Inhibits Activation of Signal Transducers and Activators of Transcription (STATs) Induced by Cytokines of the IL-6 Family	**Radoslaw Sobota, Marcin Szwed, Aneta Kasza, Marcin Bugno, and Tomasz Kordula**	**329**
Hypoxia-Induced Transcriptional Activation of Vascular Endothelial Growth Factor Is Inhibited by Serum	**Gisela D'Angelo, Annie Ladoux, and Christian Frelin**	**334**
A Human Common Nuclear Matrix Protein Homologous to Eukaryotic Translation Initiation Factor 4A	**Klaus Holzmann, Christopher Gerner, Angelika Pöltl, Romana Schäfer, Peter Obrist, Christian Ensinger, Rudolf Grimm, and Georg Sauermann**	**339**
Activation of PPARα or γ Reduces Secretion of Matrix Metalloproteinase 9 but Not Interleukin 8 from Human Monocytic THP-1 Cells	**Henry Shu, Birming Wong, Gaochao Zhou, Ying Li, Joel Berger, John W. Woods, Samuel D. Wright, and Tian-Quan Cai**	**345**
Contortrostatin, a Homodimeric Disintegrin, Binds to Integrin $\alpha v\beta 5$	**Qing Zhou, Marian T. Nakada, Peter C. Brooks, Stephen D. Swenson, Matthew R. Ritter, Svetlana Argounova, Catherine Arnold, and Francis S. Markland, Jr.**	**350**
Synthesis and Biochemical Evaluation of Novel Inhibitors of Aromatase (AR) Using an Enhanced Representation of the Active Site of AR Derived from the Consideration of the Reaction Mechanism	**Sabbir Ahmed and Yonas Amanuel**	**356**
Production of Recombinant Salmon Calcitonin by Amidation of Precursor Peptide Using Enzymatic Transacylation and Photolysis *in Vitro*	**Dou Hong, Zhuang Mingqiang, Li Min, Chen Changqing, and Mao Jifang**	**362**
Multiple Ramp Domains Are Required for Generation of Amylin Receptor Phenotype from the Calcitonin Receptor Gene Product	**Emma T. Zumpe, Nanda Tilakaratne, Neil J. Fraser, George Christopoulos, Steven M. Foord, and Patrick M. Sexton**	**368**
Lens Epithelium-Derived Growth Factor: Effects on Growth and Survival of Lens Epithelial Cells, Keratinocytes, and Fibroblasts	**Dhirendra P. Singh, Nobuyuki Ohguro, Takanobu Kikuchi, Toshiharu Sueno, Venkat N. Reddy, Kenshi Yuge, Leo T. Chylack, Jr., and Toshimichi Shinohara**	**373**

Osteoinduction by Bone Morphogenetic Protein-2 via Adenoviral Vector under Transient Immunosuppression	**Yasunori Okubo, Kazuhisa Bessho, Kazuma Fujimura, Tadahiko Iizuka, and Shin-Ichi Miyatake**	382
Cdk4 Activation Is Dependent on the Subunit Rearrangement in the Complexes	**Hiroyuki Takahashi, Masafumi Menjo, Yoko Kaneko, Kyoji Ikeda, Hitoshi Matsushime, and Makoto Nakanishi**	388
A Cysteine-Free Firefly Luciferase Retains Luminescence Activity	**Janet R. Kumita, Lily Jain, Ekaterina Safroneeva, and G. Andrew Woolley**	394
The Octapeptide Repeat Region of Prion Protein Binds Cu(II) in the Redox-Inactive State	**Noriyuki Shiraishi, Yuriko Ohta, and Morimitsu Nishikimi**	398
Binding Properties of ^{3}H-PbTx-3 and ^{3}H-Saxitoxin to Brain Membranes and to Skeletal Muscle Membranes of Puffer Fish *Fugu pardalis* and the Primary Structure of a Voltage-Gated Na^+ Channel α-Subunit (fMNa1) from Skeletal Muscle of *F. pardalis*	**Mari Yotsu-Yamashita, Katsuhiko Nishimori, Yoko Nitanai, Masako Isemura, Atsuko Sugimoto, and Takeshi Yasumoto**	403
EC3, a Heterodimeric Disintegrin from *Echis carinatus,* Inhibits Human and Murine α4 Integrin and Attenuates Lymphocyte Infiltration of Langerhans Islets in Pancreas and Salivary Glands in Nonobese Diabetic Mice	**Clara Brando, Cezary Marcinkiewicz, Bruce Goldman, Mary Ann McLane, and Stefan Niewiarowski**	413
NXP-1, a Human Protein Related to Rad21/Scc1/Mcd1, Is a Component of the Nuclear Matrix	**Hiroyuki Sadano, Hiroaki Sugimoto, Fumie Sakai, Nobuo Nomura, and Takashi Osumi**	418
Increased Carbon Monoxide in Exhaled Air of Critically Ill Patients	**Marion Scharte, Hans-Georg Bone, Hugo Van Aken, and Jörg Meyer**	423
pCMB Treatment Reveals the Essential Role of Cysteinyl Residues in Conferring Functional Competence to the Regulatory Subunit of Protein Kinase CK2	**Flavio Meggio, Maria Ruzzene, Stefania Sarno, Mario A. Pagano, and Lorenzo A. Pinna**	427
Blood–Brain Barrier Controls Carnitine Level in the Brain: A Study on a Model System with RBE4 Cells	**Joanna E. Mroczkowska, Françoise S. Roux, Maciej J. Nałęcz, and Katarzyna A. Nałęcz**	433
Effects of Ceramide on Apoptosis, Proteoglycan Degradation, and Matrix Metalloproteinase Expression in Rabbit Articular Cartilage	**Massimo Sabatini, Gaëlle Rolland, Stéphane Léonce, Marie Thomas, Christophe Lesur, Valérie Pérez, Guillaume de Nanteuil, and Jacqueline Bonnet**	438
The Effect of Cysteine Mutations on Recombinant Deacetoxycephalosporin C Synthase from *S. clavuligerus*	**Hwei-Jen Lee, Matthew D. Lloyd, Karl Harlos, and Christopher J. Schofield**	445
Analysis of Ras-Dependent Signals That Prevent Caspase-3 Activation and Apoptosis Induced by Cytokine Deprivation in Hematopoietic Cells	**Koji Terada, Yoshito Kaziro, and Takaya Satoh**	449

Identification of Tyrosine Hydroxylase as an Autoantigen in Autoimmune Polyendocrine Syndrome Type I — **H. Hedstrand, O. Ekwall, J. Haavik, E. Landgren, C. Betterle, J. Perheentupa, J. Gustafsson, E. Husebye, F. Rorsman, and O. Kämpe** — **456**

Genomic Organization and Amplification of the Human Keratin 15 and Keratin 19 Genes — **Neil V. Whittock, Robin A. J. Eady, and John A. McGrath** — **462**

Growth Efficiency in Transgenic Tilapia (*Oreochromis* sp.) Carrying a Single Copy of an Homologous cDNA Growth Hormone — **R. Martínez, J. Juncal, C. Zaldívar, A. Arenal, I. Guillén, V. Morera, O. Carrillo, M. Estrada, A. Morales, and M. P. Estrada** — **466**

The Regulation of Activity of Main Mevalonic Acid Pathway Enzymes: Farnesyl Diphosphate Synthase, 3-Hydroxy-3-methylglutaryl-CoA Reductase, and Squalene Synthase in Yeast *Saccharomyces cerevisiae* — **Anna Szkopińska, Ewa Świeżewska, and Francis Karst** — **473**

ERRATUM

Volume **264,** Number 1 (1999), in Article ID bbrc.1999.1354, "Molecular Cloning of the Gene for p85 That Regulates the Initiation of Cytokinesis in *Tetrahymena,*" by Kohsuke Gonda, Kimiko Nishibori, Hiroyoshi Ohba, Atsushi Watanabe, and Osamu Numata, pages 112–118 — **478**

Number 2, January 19, 2000

BREAKTHROUGHS AND VIEWS

Formin Family Proteins in Cytoskeletal Control — **Kazuma Tanaka** — **479**

REGULAR ARTICLES

Methylation Patterns of Human Parathyroid Hormone (PTH)/PTH-Related Peptide Receptor Gene Promoters Are Established Several Weeks Prior to Onset of Their Function — **J. David Bettoun, Mei Yee Kwan, Masanori Minagawa, Lesley C. Alpert, Cynthia G. Goodyer, Geoffrey N. Hendy, David Goltzman, and John H. White** — **482**

Human Vitamin C (L-Ascorbic Acid) Transporter SVCT1 — **Yangxi Wang, Bryan Mackenzie, Hiroyasu Tsukaguchi, Stanislawa Weremowicz, Cynthia C. Morton, and Matthias A. Hediger** — **488**

Effect of μ-Calpain on m-Calpain — **Valery F. Thompson, Kathryn Lawson, and Darrel E. Goll** — **495**

Histidine Modifying Agents Abolish Pyruvate Dehydrogenase Kinase Activity — **Brian P. Mooney, Nancy R. David, Jay J. Thelen, Jan A. Miernyk, and Douglas D. Randall** — **500**

The Gene Expression of Ubiquitin Ligase E3α Is Upregulated in Skeletal Muscle during Sepsis in Rats—Potential Role of Glucocorticoids — **David Fischer, Xiaoyan Sun, Gyu Gang, Tim Pritts, and Per-Olof Hasselgren** — **504**

Requirement of Both Tyrosine Residues 1330 and 1337 in the C-Terminal Tail of the RON Receptor Tyrosine Kinase for Epithelial Cell Scattering and Migration	**Z.-Q. Xiao, Y.-Q. Chen, and M.-H. Wang**	**669**

ERRATUM

Volume **264,** Number 2 (1999), in Article ID bbrc.1999.1524, “Identification of Two Serine Residues Involved in Catalysis by Fatty Acid Amide Hydrolase,” by Romelda L. Omeir, Gladys Arreaza, and Dale G. Deutsch, pages 316–320 **676**

Number 3, January 27, 2000

BREAKTHROUGHS AND VIEWS

Could Nef and Vpr Proteins Contribute to Disease Progression by Promoting Depletion of Bystander Cells and Prolonged Survival of HIV-Infected Cells?	**Ahmed A. Azad**	**677**

REGULAR ARTICLES

Two Peptides from CD23, Including the Inverse RGD Sequence and Its Related Peptide, Interact with the MHC Class II Molecule	**Shigeko Kijimoto-Ochiai and Atsutaka Noguchi**	**686**
Interferon-α Signaling Promotes Nucleus-to-Cytoplasmic Redistribution of p95Vav, and Formation of a Multisubunit Complex Involving Vav, Ku80, and Tyk2	**Liana Adam, Debdutta Bandyopadhyay, and Rakesh Kumar**	**692**
CYRL, a Novel Cytokine Receptor-like Protein Expressed in Testis, Lung, and Spleen	**Stewart L. Chritton and Morgan Sheng**	**697**
Identification of the Promoter Region of Human Placental 6-Phosphofructo-2-kinase/Fructose-2,6-bisphosphatase Gene	**Masashi Fukasawa, Eiji Takayama, Nariyoshi Shinomiya, Atsushi Okumura, Makoto Rokutanda, Naoki Yamamoto, and Ryuzo Sakakibara**	**703**
Direct Interaction between Emerin and Lamin A	**L. Clements, S. Manilal, D. R. Love, and G. E. Morris**	**709**
A Conditioning Lesion Promotes *in Vivo* Nerve Regeneration in the Contralateral Sciatic Nerve of Rats	**Koji Ryoke, Mitsuo Ochi, Atsushi Iwata, Yuji Uchio, Soichiro Yamamoto, and Hidetoshi Yamaguchi**	**715**
Internalization and Processing of Human Angiogenin by Cultured Aortic Smooth Muscle Cells	**Elissavet Hatzi, Yann Bassaglia, and Josette Badet**	**719**

Tumor Antigen HuR Binds Specifically to One of Five Protein-Binding Segments in the 3′-Untranslated Region of the Neurofibromin Messenger RNA	**Juergen Haeussler, Juergen Haeusler, Andrea M. Striebel, Guenter Assum, Walther Vogel, Henry Furneaux, and Winfrid Krone**	726
Implication of Novel Biochemical Property of β-Amyloid	**Danek Elbaum, Maria Brzyska, Andrzej Bacia, and Daniel L. Alkon**	733
Differential Signaling Pathways Following Oxidative Stress in Mutant Myotonin Protein Kinase cDNA-Transfected C2C12 Cell Lines	**Fusako Usuki, Nobuhiro Takahashi, Noboru Sasagawa, and Shoichi Ishiura**	739
Localization of Exercise- and Denervation-Responsive Elements in the Mouse GLUT4 Gene	**Nobuyo Tsunoda, Kayo Maruyama, David W. Cooke, Daniel M. Lane, and Osamu Ezaki**	744
Hyperleptinemia in Female Patients with Ossification of Spinal Ligaments	**Yoshiharu Shirakura, Toshihiro Sugiyama, Hiroshi Tanaka, Toshihiko Taguchi, and Shinya Kawai**	752
Quantitative Analysis of Constitutive and Inducible CYPs mRNA Expression in the HepG2 Cell Line Using Reverse Transcription-Competitive PCR	**Akihiko Sumida, Shuichi Fukuen, Isamu Yamamoto, Hideyasu Matsuda, Masakazu Naohara, and Junichi Azuma**	756
Variants of NOS1, NOS2, and NOS3 Genes in Asthmatics	**P-S. Gao, H. Kawada, T. Kasamatsu, X-Q. Mao, M. H. Roberts, Y. Miyamoto, M. Yoshimura, Y. Saitoh, H. Yasue, K. Nakao, C. N. Adra, J. F. Kun, S. Moro-oka, H. Inoko, L. P. Ho, T. Shirakawa, and J. M. Hopkin**	761
A Regulated Interaction between $\alpha5\beta1$ Integrin and Osteopontin	**Simon T. Barry, Steven B. Ludbrook, Elaine Murrison, and Carmel M. T. Horgan**	764
Differential Regulation of FGF-1 and -2 Mitogenic Activity Is Related to Their Kinetics of Binding to Heparan Sulfate in MDA-MB-231 Human Breast Cancer Cells	**David G. Fernig, Hai-Lan Chen, Hassan Rahmoune, Simon Descamps, Benoni Boilly, and Hubert Hondermarck**	770
A Novel Method for Expression and Large-Scale Production of Human Brain L-Glutamate Decarboxylase	**Kathleen M. Davis, Todd Foos, C. Sean Bates, Erin Tucker, Che-Chang Hsu, Weiqing Chen, Hong Jin, John B. Tyburski, John V. Schloss, Alan J. Tobin, and Jang-Yen Wu**	777
Marked Increase in Membranolytic Selectivity of Novel Cyclic Tachyplesins Constrained with an Antiparallel Two-β Strand Cystine Knot Framework	**James P. Tam, Yi-An Lu, and Jin-Long Yang**	783
Cathepsin Q, a Novel Lysosomal Cysteine Protease Highly Expressed in Placenta	**Katia Sol-Church, Jennifer Frenck, and Robert W. Mason**	791
Human Membrane Type-2 Matrix Metalloproteinase Is Defective in Cell-Associated Activation of Progelatinase A	**Hisashi Miyamori, Takahisa Takino, Motoharu Seiki, and Hiroshi Sato**	796
Up-Regulation of Endothelin-Converting Enzyme-1 in Gastric Mucosal Inflammatory Responses to *Helicobacter pylori* Lipopolysaccharide	**Bronislaw L. Slomiany, Jerzy Piotrowski, and Amalia Slomiany**	801

Molecular Cloning of Neonate/Infant-Specific Pepsinogens from Rat Stomach Mucosa and Their Expressional Change during Development	**Takashi Kageyama, Masao Ichinose, Shinko Tsukada-Kato, Masao Omata, Yuichi Narita, Akihiko Moriyama, and Satoshi Yonezawa**	**806**
Biochemical Evidence for a 170-Kilodalton, AF-2-Dependent Vitamin D Receptor/Retinoid X Receptor Coactivator That Is Highly Expressed in Osteoblasts	**Peter W. Jurutka, Lenore S. Remus, G. Kerr Whitfield, Michael A. Galligan, Carol A. Haussler, and Mark R. Haussler**	**813**
Tyrosine Phosphorylation of Myelin P_0 and Its Implication in Signal Transduction	**Ming-jiang Xu, Runxiang Zhao, Xingwei Sui, Fengping Xu, and Zhizhuang Joe Zhao**	**820**
The Effect of Apoptosis Inhibitors on Experimental Autoimmune Encephalomyelitis: Apoptosis as a Regulatory Factor	**Yoshinobu Okuda, Saburo Sakoda, Harutoshi Fujimura, and Takehiko Yanagihara**	**826**
Abundant Expression of 150-kDa Oxygen-Regulated Protein in Mouse Pancreatic Beta Cells Is Correlated with Insulin Secretion	**Tomohiro Kobayashi, Satoshi Ogawa, Takashi Yura, and Hideki Yanagi**	**831**
Electric Field-Mediated DNA Encapsulation into Large Liposomes	**Paul F. Lurquin and Kleovoulos Athanasiou**	**838**
Hydrophilic Residues at the Apical Domain of GroEL Contribute to GroES Binding but Attenuate Polypeptide Binding	**Fumihiro Motojima, Tadashi Makio, Katsuhiko Aoki, Yoshihide Makino, Kunihiro Kuwajima, and Masasuke Yoshida**	**842**
Structure-Based Development of Pyridoxal Propionate Derivatives as Specific Inhibitors of Cathepsin K *in Vitro* and *in Vivo*	**N. Katunuma, A. Matsui, T. Inubushi, E. Murata, H. Kakegawa, Y. Ohba, D. Turk, V. Turk, Y. Tada, and T. Asao**	**850**
The C1orf9 Gene Encodes a Putative Transmembrane Member of a Novel Protein Family	**Øystein Røsok, Florence Pedeutour, Jacob Odeberg, Joakim Lundeberg, and Hans-Christian Aasheim**	**855**
Rapid Gene Repression Triggered by Interleukin-6 at the Onset of Monocyte Differentiation	**Thomas G. Graeber and Ke Shuai**	**863**
Coordinate Recruitment of E-Cadherin and ALCAM to Cell–Cell Contacts by α-Catenin	**Kyoichi Tomita, Adrie van Bokhoven, Cornelius F. J. Jansen, Marion J. G. Bussemakers, and Jack A. Schalken**	**870**
Molecular Mechanisms of Platelet Exocytosis: Requirements for α-Granule Release	**Paula P. Lemons, Dong Chen, and Sidney W. Whiteheart**	**875**
The Internalization and Endosomal Trafficking of the EGF Receptor in Response to EGF Is Delayed in the waved-2 Mouse Liver	**Brendan P. Keegan, Lowell G. Sheflin, and Stephen W. Spaulding**	**881**
Cloning and Characterization of an α-Neurotoxin-Type Protein Specific for the Coral Snake *Micrurus corallinus*	**Jane Silveira de Oliveira, Álvaro Rossan de Brandão Prieto da Silva, Marcelo Bento Soares, Marco Antonio Stephano, Waldely de Oliveira Dias, Isaías Raw, and Paulo Lee Ho**	**887**

Involvement of Extracellular Signal-Regulated Protein Kinase in Gliosis Induced during Recovery from Metabolic Inhibition	**Kanji Masuhara, Masahide Ohmichi, Hirohisa Kurachi, Keiichi Tasaka, Tohru Kanzaki, Akiko Kimura, Jun Hayakawa, Koji Hisamoto, Koji Koike, and Yuji Murata**	**892**
The Lipid Component of Lipoproteins from *Borrelia burgdorferi:* Structural Analysis, Antigenicity, and Presentation via Human Dendritic Cells	**Christopher Beermann, Günter Lochnit, Rudolf Geyer, Peter Groscurth, and Luis Filgueira**	**897**
BERP, a Novel Ring Finger Protein, Binds to α-Actinin-4	**Alaa El-Din El-Husseini, Dorota Kwasnicka, Tesshi Yamada, Setsuo Hirohashi, and Steven R. Vincent**	**906**
Role of Troponin I Isoform Switching in Determining the pH Sensitivity of Ca^{2+} Regulation in Developing Rabbit Cardiac Muscle	**Sachio Morimoto and Takako Goto**	**912**
Novel Functions of Human α_1-Protease Inhibitor after S-Nitrosylation: Inhibition of Cysteine Protease and Antibacterial Activity	**Yoichi Miyamoto, Takaaki Akaike, M. Samiul Alam, Katsuhisa Inoue, Takayoshi Hamamoto, Norisato Ikebe, Jun Yoshitake, Tatsuya Okamoto, and Hiroshi Maeda**	**918**
Biological Activity of Human Granulocyte Colony Stimulating Factor with a Modified C-Terminus	**Yasuo Oshima, Arinobu Tojo, Yoshiyuki Niho, and Shigetaka Asano**	**924**
Heterooligomer of Type 1 and Type 2 Inositol 1, 4, 5-Trisphosphate Receptor Expressed in Rat Liver Membrane Fraction Exists as Tetrameric Complex	**Hitoshi Onoue, Hiroyuki Tanaka, Kiyoshi Tanaka, Naoko Doira, and Yushi Ito**	**928**
Specific Modulation of p53 Binding to Consensus Sequence within Supercoiled DNA by Monoclonal Antibodies	**Václav Brázda, Jan Paleĉek, Šárka Posp̂íšilová, Borp̂ivoj Vojtêšek, and Emil Paleĉek**	**934**
Structure–Function Analysis of the 7B2 CT Peptide	**Ekaterina V. Apletalina, Maria A. Juliano, Luiz Juliano, and Iris Lindberg**	**940**
CFU-GM-Derived Cells Form Osteoclasts at a Very High Efficiency	**Cheikh Menaa, Noriyoshi Kurihara, and G. David Roodman**	**943**
β3-Endonexin as a Novel Inhibitor of Cyclin A-Associated Kinase	**Akihira Ohtoshi, Tatsuya Maeda, Hideaki Higashi, Satoshi Ashizawa, Masafumi Yamada, and Masanori Hatakeyama**	**947**
The Oxidative Stress-Sensitive *yap1* Null Strain of *Saccharomyces cerevisiae* Becomes Resistant Due to Increased Carotenoid Levels upon the Introduction of the *Chlamydomonas reinhardtii* cDNA, Coding for the 60S Ribosomal Protein L10a	**Sebastián Méndez-Álvarez, Karin Rüfenacht, and Rik I. L. Eggen**	**953**
Interferon-γ Mediates Gene Expression of IL-18 Binding Protein in Nonleukocytic Cells	**Heiko Mühl, Heiko Kämpfer, Markus Bosmann, Stefan Frank, Heinfried Radeke, and Josef Pfeilschifter**	**960**
Author Index for Volume 267		**964**

Volume 268, Number 1, February 5, 2000

BREAKTHROUGHS AND VIEWS

Alternative Forms of β-pol mRNA Are Not Tumor-Specific and Are Not the Result of Mutations in the DNA	**Radoslawa Nowak, Pawel Bieganowski, Ryszard Konopinski, and Janusz A. Siedlecki**	1

REGULAR ARTICLES

Activin A Is an Essential Cofactor for Osteoclast Induction	**K. Fuller, K. E. Bayley, and T. J. Chambers**	2
Comparative Analysis of Artificial Antisense RNA Regulation in Fission Yeast and Human Cells	**Marilyn L. Clarke, Margaret Patrikakis, and David Atkins**	8
Acetylation at the N-Terminus of Actin Strengthens Weak Interaction between Actin and Myosin	**Akinobu Abe, Kimiko Saeki, Takuo Yasunaga, and Takeyuki Wakabayashi**	14
A *REIC* Gene Shows Down-Regulation in Human Immortalized Cells and Human Tumor-Derived Cell Lines	**Toshiya Tsuji, Masahiro Miyazaki, Masakiyo Sakaguchi, Yusuke Inoue, and Masayoshi Namba**	20
Linkage between α_1 Adrenergic Receptor and the Jak/STAT Signaling Pathway in Vascular Smooth Muscle Cells	**Toshiyuki Sasaguri, Hiroshi Teruya, Akio Ishida, Takeo Abumiya, and Jun Ogata**	25
Molecular Mechanism of Detectable Catalase-Containing Particles, Peroxisomes, in Fibroblasts from a *PEX2*-Defective Patient	**Nobuyuki Shimozawa, Zhongyi Zhang, Atsushi Imamura, Yasuyuki Suzuki, Yukio Fujiki, Toshiro Tsukamoto, Takashi Osumi, Patrick Aubourg, Ronald J. A. Wanders, and Naomi Kondo**	31
Morphological Assessment of the Effect of Growth Hormone on Preantral Follicles from 11-Day-Old Mice in an *in Vitro* Culture System	**Junro Kobayashi, Hideki Mizunuma, Nobumasa Kikuchi, Xiaowei Liu, Kazumichi Andoh, Yumiko Abe, Hidemi Yokota, Kiyohiko Yamada, Yoshito Ibuki, and Haruo Hagiwara**	36
The Rat Asialoglycoprotein Receptor Binds the Amino-Terminal Domain of Thyroglobulin	**Nunzia Montuori, Francesco Pacifico, Stefano Mellone, Domenico Liguoro, Bruno Di Jeso, Silvestro Formisano, Fabrizio Gentile, and Eduardo Consiglio**	42
Sphingosine 1-Phosphate Stimulates Tyrosine Phosphorylation of Focal Adhesion Kinase and Chemotactic Motility of Endothelial Cells via the G_i Protein-Linked Phospholipase C Pathway	**Ok-Hee Lee, Doo-Jae Lee, Young-Mi Kim, Yong Sun Kim, Ho Jeong Kwon, Kyu-Won Kim, and Young-Guen Kwon**	47
Possible Involvement of Shc in IL-4-Induced Germline ϵ Transcription in a Human B Cell Line	**Koichi Ikizawa and Yukiyoshi Yanagihara**	54
Effect of Interleukin-1β on Aromatase Activity and Cell Proliferation in Human Osteoblast-like Cells (HOS)	**Miki Morioka, Kazuhisa Shimodaira, Yuzuru Kuwano, Hiroshi Fujikawa, Hiroshi Saito, and Takumi Yanaihara**	60

A Bacterial High-Affinity GABA Binding Protein: Isolation and Characterization	**George D. Guthrie, Catherine S. Nicholson-Guthrie, and H. Lee Leary, Jr.**	**65**
Purification and Characterization of a Growth Factor-like Which Increases Capillary Permeability from *Vipera lebetina* Venom	**Ammar Gasmi, Ferid Abidi, Najet Srairi, Adel Oijatayer, Habib Karoui, and Mohamed Elayeb**	**69**
Investigation of Fanconi Anemia Protein Interactions by Yeast Two-Hybrid Analysis	**Pia A. J. Huber, Annette L. Medhurst, Hagop Youssoufian, and Christopher G. Mathew**	**73**
Redox Control of Caspase-3 Activity by Thioredoxin and Other Reduced Proteins	**Amanda Baker, Betty Dos Santos, and Garth Powis**	**78**
Concentration of Caveolin-1 in the Cleavage Furrow as Revealed by Time-Lapse Analysis	**Hiroshi Kogo and Toyoshi Fujimoto**	**82**
Differential Regulation of Melanin-Concentrating Hormone and Orexin Genes in the Agouti-Related Protein/Melanocortin-4 Receptor System	**Reiko Hanada, Masamitsu Nakazato, Shigeru Matsukura, Noboru Murakami, Hironobu Yoshimatsu, and Toshiie Sakata**	**88**
Real-Time Monitoring of the Hybridization Reaction: Application to the Quantification of Oligonucleotides in Biological Samples	**Valérie Boutet, Valérie Delaunay, Monica Cristina De Oliveira, Didier Boquet, Jean-Marc Grognet, Jacques Grassi, and Jean-Robert Deverre**	**92**
Differential Expression of the Transcription Factor NF-κB during Human Mononuclear Phagocyte Differentiation to Macrophages and Dendritic Cells	**Christoph Ammon, Krishna Mondal, Reinhard Andreesen, and Stefan W. Krause**	**99**
Peptide Mimicking Sialyl-Lewis^{a} with Anti-inflammatory Activity	**Insug O, Thomas Kieber-Emmons, Laszlo Otvos, and Magdalena Blaszczyk-Thurin**	**106**
The Yeast Retrotransposons Ty1 and Ty3 Require the RNA Lariat Debranching Enzyme, Dbr1p, for Efficient Accumulation of Reverse Transcripts	**Stephanie M. Karst, Marie-Louise Rütz, and Thomas M. Menees**	**112**
Effects of Terminal Deletions in C5 Protein on Promoting RNase P Catalysis	**Meehyein Kim, Bo Hyun Park, and Younghoon Lee**	**118**
Ligation of the T Cell Receptor Complex Results in Phosphorylation of Smad2 in T Lymphocytes	**Mizuko Mamura, Atsuhito Nakao, Daisuke Goto, Mitsuyasu Kato, Yasushi Saito, and Itsuo Iwamoto**	**124**
Activation of Human Progelatinase A/Promatrix Metalloproteinase 2 by *Escherichia coli*-Derived Serine Proteinase	**Mitsushi Takeda, Keisuke Imada, Takashi Sato, and Akira Ito**	**128**
Inhibitors of β-Amyloid Formation Based on the β-Secretase Cleavage Site	**G. Abbenante, D. M. Kovacs, D. L. Leung, D. J. Craik, R. E. Tanzi, and D. P. Fairlie**	**133**
Effects of C5 Protein on *Escherichia coli* RNase P Catalysis with a Precursor tRNA^{Phe} Bearing a Single Mismatch in the Acceptor Stem	**Bo Hyun Park, June Hyung Lee, Meehyein Kim, and Younghoon Lee**	**136**
Activation of the Guanine Nucleotide Exchange Factor Dbl Following ACK1-Dependent Tyrosine Phosphorylation	**Juran Kato, Yoshito Kaziro, and Takaya Satoh**	**141**

Involvement of Intracellular Labile Zinc in Suppression of DEVD-Caspase Activity in Human Neuroblastoma Cells — **Lien H. Ho, Ranjit N. Ratnaike, and Peter D. Zalewski** — **148**

Fluorescein Fluorescence Hyperpolarization as an Early Kinetic Measure of the Apoptotic Process — **Naomi Zurgil, Zeev Schiffer, Yana Shafran, Menachem Kaufman, and Mordechai Deutsch** — **155**

Rhythmic Expression of *BMAL1* mRNA Is Altered in *Clock* Mutant Mice: Differential Regulation in the Suprachiasmatic Nucleus and Peripheral Tissues — **Katsutaka Oishi, Hiromi Fukui, and Norio Ishida** — **164**

Regulatory Roles for CD14 and Phosphatidylinositol in the Signaling via Toll-like Receptor 4-MD-2 — **Sachiko Akashi, Hirotaka Ogata, Fumiko Kirikae, Teruo Kirikae, Kiyoshi Kawasaki, Masahiro Nishijima, Rintaro Shimazu, Yoshinori Nagai, Kenji Fukudome, Masao Kimoto, and Kensuke Miyake** — **172**

Inhibitory Effect of a Proline-to-Alanine Substitution at Codon 12 of Peroxisome Proliferator-Activated Receptor-γ 2 on Thiazolidinedione-Induced Adipogenesis — **Jiro Masugi, Yoshikazu Tamori, Hiroyuki Mori, Takashi Koike, and Masato Kasuga** — **178**

Endostatin Inhibits Microvessel Formation in the *ex Vivo* Rat Aortic Ring Angiogenesis Assay — **Erwin A. Kruger, Paul H. Duray, Maria G. Tsokos, David J. Venzon, Steven K. Libutti, Shannon C. Dixon, Michelle A. Rudek, James Pluda, Carmen Allegra, and William D. Figg** — **183**

17β-Estradiol Prevents Programmed Cell Death in Cardiac Myocytes — **Theo Pelzer, Michael Schumann, Manfred Neumann, Tertia deJager, Michael Stimpel, E. Serfling, and Ludwig Neyses** — **192**

Specific Antagonists of NMDA Receptors Prevent Osteoclast Sealing Zone Formation Required for Bone Resorption — **Cécile Itzstein, Léon Espinosa, Pierre D. Delmas, and Chantal Chenu** — **201**

Identification and Characterization of the *rhp23*$^+$ DNA Repair Gene in *Schizosaccharomyces pombe* — **Marcel Lombaerts, Jerrelyne I. Goeloe, Hans den Dulk, Jourica A. Brandsma, and Jaap Brouwer** — **210**

Anabolic Response of Mouse Bone-Marrow-Derived Stromal Cell Clone ST2 Cells to Low-Intensity Pulsed Ultrasound — **Kouji Naruse, Yuko Mikuni-Takagaki, Yoshiaki Azuma, Masaya Ito, Tomohiro Oota, Koh-zoh Kameyama, and Moritoshi Itoman** — **216**

Regulation of Genes for Inducible Nitric Oxide Synthase and Urea Cycle Enzymes in Rat Liver in Endotoxin Shock — **Shoko Tabuchi, Tomomi Gotoh, Kei Miyanaka, Kimio Tomita, and Masataka Mori** — **221**

Molecular Cloning, Expression, and Chromosomal Localization of a Human Tubulointerstitial Nephritis Antigen — **Masaru Ikeda, Tsukasa Takemura, Satoshi Hino, and Kazuo Yoshioka** — **225**

Role of Cytosolic Phospholipase A_2 as a Downstream Mediator of Rac in the Signaling Pathway to *JNK* Stimulation	**Chang-Hoon Woo, Byung-Chul Kim, Ki-Wan Kim, Min-Hyuk Yoo, Young-Woo Eom, Eui-Ju Choi, Doe Sun Na, and Jae-Hong Kim**	**231**
The Flavonoid Apigenin Suppresses Vitamin D Receptor Expression and Vitamin D Responsiveness in Normal Human Keratinocytes	**Siegfried Segaert, Stéphane Courtois, Marjan Garmyn, Hugo Degreef, and Roger Bouillon**	**237**

Number 2, February 16, 2000

BREAKTHROUGHS AND VIEWS

Regulation of β-Catenin Signaling in the Wnt Pathway	**Akira Kikuchi**	**243**

REGULAR ARTICLES

Evidence for the Carboxyl Methylation of Nuclear Lamin-B in the Pancreatic β Cell	**Anjaneyulu Kowluru**	**249**
Evidence for Translational Repression of the SOCS-1 Major Open Reading Frame by an Upstream Open Reading Frame	**Gregor Schlüter, Dagmara Boinska, and Susanne-Christine Nieman-Seyde**	**255**
Mode of Molecular Recognition of L-Fucose by Fucose-Binding Legume Lectins	**Celestine J. Thomas and Avadhesha Surolia**	**262**
Retinoic Acid Extends the *in Vitro* Life Span of Normal Human Oral Keratinocytes by Decreasing p16^{INK4A} Expression and Maintaining Telomerase Activity	**Yong-Ouk You, Gene Lee, and Byung-Moo Min**	**268**
Vomeroglandin/CRP-Ductin Is Strongly Expressed in the Glands Associated with the Mouse Vomeronasal Organ: Identification and Characterization of Mouse Vomeroglandin	**Fumio Matsushita, Atsushi Miyawaki, and Katsuhiko Mikoshiba**	**275**
Isolation and Characterization of dcw Cluster from *Streptomyces collinus* Producing Kirromycin	**Karel Mikulík, Elena Zhulanova, Martin Krátký, Olga Kofroňová, and Oldřich Benada**	**282**
Vectors of Shannon Information from Fourier Signals Characterizing Base Periodicity in Genes and Genomes	**Julius H. Jackson, Roy George, and Patricia A. Herring**	**289**
Purification, Cloning, and Three-Dimensional Structure Prediction of *Micrococcus luteus* FAD-Containing Tyramine Oxidase	**Jung Hyeob Roh, Johan Wouters, Eric Depiereux, Hideaki Yukawa, Masayuki Inui, Hiromichi Minami, Hideyuki Suzuki, and Hidehiko Kumagai**	**293**
Cloning and Characterization of a Putative Human D-2-Hydroxyacid Dehydrogenase in Chromosome 9q	**Taosheng Huang, Wenxue Yang, Alexander C. Pereira, William J. Craigen, and Vivian E. Shih**	**298**

Deficiency of Current Methods in Assaying Endochitinase Activity	**Yan Ren, Kevin E. Wee, and F. N. Chang**	302
Molecular Characterization Reveals Identity of Microtubule-Associated Proteins MAP3 and MAP4	**Naoto Kobayashi, Hans W. Heid, Tatsuo Sakai, Wilhelm Kriz, Gerda Huber, and Peter Mundel**	306
Inhibition of Protein Tyrosine Phosphatases by Low-Molecular-Weight *S*-Nitrosothiols and S-Nitrosylated Human Serum Albumin	**Ming Xian, Kun Wang, Xinchao Chen, Yongchun Hou, Andrea McGill, Xi Chen, Bo Zhou, Zhong-Yin Zhang, Jin-Pei Cheng, and Peng George Wang**	310
PKB Inhibition Prevents the Stimulatory Effect of Insulin on Glucose Transport and Protein Translocation but Not the Antilipolytic Effect in Rat Adipocytes	**Ulf Smith, Eugenia Carvalho, Erifili Mosialou, Francesco Beguinot, Pietro Formisano, and Cristina Rondinone**	315
Cloning and Characterization of a Novel Adaptor Protein, CIN85, That Interacts with c-Cbl	**Hitoshi Take, Shinji Watanabe, Kazuyo Takeda, Zu-Xi Yu, Nobuhisa Iwata, and Sachiko Kajigaya**	321
Effect of Hypoxia on Nitric Oxide Production and Its Synthase Gene Expression in Rat Smooth Muscle Cells	**Ying Hong, Seiji Suzuki, Shigeru Yatoh, Masakazu Mizutani, Toshiaki Nakajima, Shiro Bannai, Hideyo Sato, Masaaki Soma, Yukichi Okuda, and Nobuhiro Yamada**	329
Antimicrobial Peptide of Korean Native Goat Lactoferrin and Identification of the Part Essential for This Activity	**Michito Kimura, Myoung-Soo Nam, Yoshifumi Ohkouchi, Haruto Kumura, Kei-ichi Shimazaki, and Dea-Youl Yu**	333
Constitutive and Inducible Expression of Hepatic CYP2E1 in Leptin-deficient *ob/ob* Mice	**Isabelle A. Leclercq, Jacqueline Field, Annabelle Enriquez, Geoffrey C. Farrell, and Graham R. Robertson**	337
Cloning and Characterization of the Cytochrome P450 Oxidoreductase Gene from the Zygomycete Fungus *Cunninghamella*	**Jagjit S. Yadav and John C. Loper**	345
Alternative Splicing of *gar-1,* a *Caenorhabditis elegans* G-Protein-Linked Acetylcholine Receptor Gene	**Yang-Seo Park, Yong-Seok Lee, Nam Jeong Cho, and Bong-Kiun Kaang**	354
Restoration of mRNA Splicing by a Second-Site Intragenic Suppressor in the T4 Ribonucleotide Reductase (Small Subunit) Self-Splicing Intron	**Asad U. Khan, Masood Ahmad, and Sunil K. Lal**	359
The Metal Dependence of *Bacillus subtilis* Phytase	**Janne Kerovuo, Ilkka Lappalainen, and Tapani Reinikainen**	365
X-Linked Juvenile Retinoschisis Associated with a 4-Base Pair Insertion at Codon 55 of the XLRS1 Gene	**Miki Hiraoka, Michael T. Trese, and Barkur S. Shastry**	370
Expression of the *Aspergillus fumigatus* Phytase Gene in *Pichia pastoris* and Characterization of the Recombinant Enzyme	**Eric Rodriguez, Edward J. Mullaney, and Xin Gen Lei**	373
Characterization of a New Phenoloxidase Inhibitor from the Cuticle of *Manduca sexta*	**Manickam Sugumaran and Kalliappan Nellaiappan**	379

Computational Design of New Cyclic Urea Inhibitors for Improved Binding of HIV-1 Aspartic Protease	**Bhanuprakash Kotamarthi, Irena Bonin, Fabio Benedetti, and Stanislav Miertus**	384
Light Chain of Natural Antibody Plays a Dominant Role in Protein Antigen Binding	**Mi-Kyung Song, Mal-Sun Oh, Jeong-Hwa Lee, Jeong-Nyeo Lee, Jun-Ho Chung, Sae-Gwang Park, and In-Hak Choi**	390
Interactions of Cytochrome *c* Peroxidase with Lysine Peptides	**Shun Hirota, Tomoya Tsukazaki, and Osamu Yamauchi**	395
High Affinity ScFvs from a Single Rabbit Immunized with Multiple Haptens	**Yi Li, William Cockburn, John B. Kilpatrick, and Garry C. Whitelam**	398
A Novel Function of Serum Amyloid A: A Potent Stimulus for the Release of Tumor Necrosis Factor-α, Interleukin-1β, and Interleukin-8 by Human Blood Neutrophil	**Cristiane Jaciara Furlaneto and Ana Campa**	405
Physiological Evidence for an Interaction between Helix XI and Helices I, II, and V in the Melibiose Carrier of *Escherichia coli*	**Ping Z. Ding and T. Hastings Wilson**	409
Differential Stimulation of Prostaglandin G/H Synthase-2 in Osteocytes and Other Osteogenic Cells by Pulsating Fluid Flow	**I. Westbroek, N. E. Ajubi, M. J. Alblas, C. M. Semeins, J. Klein-Nulend, E. H. Burger, and P. J. Nijweide**	414
Characterization of *Erwinia chrysanthemi* PY35 *cel* and *pel* Gene Existing in Tandem and Rapid Identification of Their Gene Products	**Sang Ryeol Park, Min Keun Kim, Jong Ok Kim, Dong Won Bae, Soo Jeong Cho, Yong Un Cho, and Han Dae Yun**	420
Correlation between the Chaperone-like Activity and Aggregate Size of α-Crystallin with Increasing Temperature	**Michael R. Burgio, Carin J. Kim, Christopher C. Dow, and Jane F. Koretz**	426
Kassinatuerin-1: A Peptide with Broad-Spectrum Antimicrobial Activity Isolated from the Skin of the Hyperoliid Frog, *Kassina senegalensis*	**Beverly Mattute, Floyd C. Knoop, and J. Michael Conlon**	433
Human 3′-Phosphoadenosine 5′-Phosphosulfate Synthetase 1 (PAPSS1) and PAPSS2: Gene Cloning, Characterization and Chromosomal Localization	**Zhen-Hua Xu, Diane M. Otterness, Robert R. Freimuth, Edward J. Carlini, Thomas C. Wood, Steve Mitchell, Eunpyo Moon, Ung-Jin Kim, Jing-Ping Xu, Michael J. Siciliano, and Richard M. Weinshilboum**	437
Number of Glomeruli Is Increased in the Kidney of Transgenic Mice Expressing the Truncated Type II Activin Receptor	**Akito Maeshima, Shuichi Shiozaki, Tomoko Tajima, Yoichi Nakazato, Takuji Naruse, and Itaru Kojima**	445
Multipotency of a Bone Marrow Stromal Cell Line, TBR31-2, Established from ts-SV40 T Antigen Gene Transgenic Mice	**Yoichi Negishi, Akihiko Kudo, Akiko Obinata, Kohtaro Kawashima, Hiroshi Hirano, Nobuaki Yanai, Masuo Obinata, and Hiroyoshi Endo**	450
Human Hepatitis B Virus X Protein Is a Possible Mediator of Hypoxia-Induced Angiogenesis in Hepatocarcinogenesis	**Sae-Won Lee, You Mie Lee, Soo-Kyung Bae, Seishi Murakami, Yungdae Yun, and Kyu-Won Kim**	456

Engineered Metal Binding Sites on Green Fluorescence Protein	**Todd A. Richmond, Terry T. Takahashi, Riti Shimkhada, and Jennifer Bernsdorf**	**462**
Characterization of a Novel Gene Encoding a Phytocyanin-Related Protein in Morning Glory (*Pharbitis nil*)	**Miwa Yoshizaki, Tsuyoshi Furumoto, Shingo Hata, Masateru Shinozaki, and Katsura Izui**	**466**
Enhancement of the Migration of Metastatic Human Breast Cancer Cells by Phosphatidic Acid	**Daniel Sliva, Rebekah Mason, Hongyan Xiao, and Denis English**	**471**
Nicotine Binding to Native and Substituted Peptides Comprising Residues 188–207 of Nicotinic Acetylcholine Receptor $\alpha1$, $\alpha2$, $\alpha3$, $\alpha4$, $\alpha5$, and $\alpha7$ Subunits	**Thomas L. Lentz**	**480**
Pancreatic Acinar Cells Submitted to Stress Activate TNF-α Gene Expression	**María I. Vaccaro, Alejandro Ropolo, Daniel Grasso, Ezequiel L. Calvo, Marcela Ferreria, Juan L. Iovanna, and Gustavo Lanosa**	**485**
The Role of Glucose and Its Metabolism in the Regulation of Glucokinase Expression in Isolated Human Pancreatic Islets	**Rosa Gasa, Marta E. Fabregat, and Ramon Gomis**	**491**
Peridinin as the Major Biological Carotenoid Quencher of Singlet Oxygen in Marine Algae *Gonyaulax polyedra*	**Ernani Pinto, Luiz Henrique Catalani, Norberto Peporine Lopes, Paolo Di Mascio, and Pio Colepicolo**	**496**
Histone H1 Variants Play Individual Roles in Transcription Regulation in the DT40 Chicken B Cell Line	**Yasunari Takami, Ryoko Nishi, and Tatsuo Nakayama**	**501**
Identification of a Nuclear Ribonucleoprotein Particle Which Contains Incompletely Spliced HIV-1 RNAs	**Stig Ove Bøe and Karl-Henning Kalland**	**509**
Activation of Caspase-3 in Molt4 Cells by Apoptosis-Inducing Nucleosides from CD57$^+$HLA-DR^{bright} Natural Suppressor Cell Line	**Xiang Li, Maowu Guo, Etsuko Mori, and Tsuneatsu Mori**	**514**
Duality Monomer–Dimer of the Pheromone-Binding Protein from *Bombyx mori*	**Walter Soares Leal**	**521**
Human p55^{CDC}/Cdc20 Associates with Cyclin A and Is Phosphorylated by the Cyclin A–Cdk2 Complex	**Akihira Ohtoshi, Tatsuya Maeda, Hideaki Higashi, Satoshi Ashizawa, and Masanori Hatakeyama**	**530**
Genome-Wide Detection of Unknown Subtle Mutations in Bacteria by Combination of MutS and RDA	**Koshichi Gotoh, Mitsumi Hata, Maiko Miyajima, and Hiroshi Yokota**	**535**
Signaling through the p38 and p42/44 Mitogen-Activated Families of Protein Kinases in Pancreatic β-Cell Proliferation	**Chris J. Burns, Paul E. Squires, and Shanta J. Persaud**	**541**
E-Selectin Expression in a Murine Model of Chronic Colitis	**Shigeyuki Kawachi, Zenichi Morise, Elaine Conner, F. Stephen Laroux, Laura Gray, John Fuseler, and Matthew B. Grisham**	**547**

Growth Suppression of *Escherichia coli* by Induction of Expression of Mammalian Genes with Transmembrane or ATPase Domains — **Shinichi Inoue, Hideki Sano, and Masataka Ohta** — **553**

Identification of Casein Kinase I Substrates by *in Vitro* Expression Cloning Screening — **Zhong-Hua Gao, James Metherall, and David M. Virshup** — **562**

Effect of Somatostatin and Octreotide on Proliferation and Vascular Endothelial Growth Factor Secretion from Murine Endothelial Cell Line (HECa10) Culture — **H. Ławnicka, H. Stępień, J. Wyczółkowska, B. Kolago, J. Kunert-Radek, and J. Komorowski** — **567**

Rapid Agonist-Induced Phosphorylation of the Human CRF Receptor, Type 1: A Potential Mechanism for Homologous Desensitization — **Richard L. Hauger, Roger D. Smith, Sandra Braun, Frank M. Dautzenberg, and Kevin J. Catt** — **572**

Characterization of a Postreceptor Signaling Defect That Impairs cfos Expression in Cultured Fibroblasts of a Patient with Insulin Resistance — **Birgit Knebel, Jörg Kotzka, Haluk Avci, Martina Schiller, Jens C. Brüning, Martin Hafner, Wilhelm Krone, and Dirk Müller-Wieland** — **577**

Edg-6 as a Putative Sphingosine 1-Phosphate Receptor Coupling to Ca^{2+} Signaling Pathway — **Yuji Yamazaki, Junko Kon, Koichi Sato, Hideaki Tomura, Motoko Sato, Takashi Yoneya, Hiroshi Okazaki, Fumikazu Okajima, and Hideo Ohta** — **583**

The Oocyte-Specific Methylated Region of the *U2afbp-rs/U2af1-rs1* Gene Is Dispensable for Its Imprinted Methylation — **Shoichi Sunahara, Kenji Nakamura, Kazuki Nakao, Yoichi Gondo, Yukihiro Nagata, and Motoya Katsuki** — **590**

Identification of Three Alternative First Exons and an Intronic Promoter of Human PDE5A Gene — **Ching-Shwun Lin, Angie Lau, Richard Tu, and Tom F. Lue** — **596**

Sphingomyelin Potentiates Chemotherapy of Human Cancer Xenografts — **David E. Modrak, Walter Lew, David M. Goldenberg, and Rosalyn Blumenthal** — **603**

Transforming Growth Factors β_1 (TGF-β_1) and TGF-β_2 Promote Glioma Cell Migration via Up-Regulation of $\alpha_v\beta_3$ Integrin Expression — **Michael Platten, Wolfgang Wick, Christine Wild-Bode, Steffen Aulwurm, Johannes Dichgans, and Michael Weller** — **607**

Missense Variations of the Gene Responsible for Wolfram Syndrome (*WFS1/wolframin*) in Japanese: Possible Contribution of the Arg456His Mutation to Type 1 Diabetes as a Nonautoimmune Genetic Basis — **Takuya Awata, Kiyoaki Inoue, Susumu Kurihara, Tomoko Ohkubo, Ikuo Inoue, Takahiro Abe, Hirofumi Takino, Yasunori Kanazawa, and Shigehiro Katayama** — **612**

Cloning and Characterization of mRNA Capping Enzyme and mRNA (Guanine-7-)-methyltransferase cDNAs from *Xenopus laevis* — **Jun'ichi Yokoska, Toshihiko Tsukamoto, Kin-ichiro Miura, Koichiro Shiokawa, and Kiyohisa Mizumoto** — **617**

ATP Synthesis in Rod Outer Segments of Bovine Retina by the Reversal of the Disk Ca^{2+} Pump — **I. M. Pepe, I. Panfoli, L. Notari, and A. Morelli** — **625**

Expression of Three Isoforms of cGMP-Binding cGMP-Specific Phosphodiesterase (PDE5) in Human Penile Cavernosum — **Ching-Shwun Lin, Angie Lau, Richard Tu, and Tom F. Lue** — **628**

C2-Ceramide Increases Cytoplasmic Calcium Concentrations in Human Parathyroid Cells — **Radu Mihai, Teresa Lai, George Schofield, and John R. Farndon** — **636**

Oxidative Stress Induces Increase in Intracellular Amyloid β-Protein Production and Selective Activation of βI and βII PKCs in NT2 Cells	**Dimitri Paola, Cinzia Domenicotti, Mariapaola Nitti, Antonella Vitali, Roberta Borghi, Damiano Cottalasso, Damiano Zaccheo, Patrizio Odetti, Paola Strocchi, Umberto M. Marinari, Massimo Tabaton, and Maria A. Pronzato**	**642**
Inhibition of MAP Kinase Kinase (MEK) Results in an Anti-inflammatory Response *in Vivo*	**Bruce D. Jaffee, Elizabeth J. Manos, Robert J. Collins, Phillip M. Czerniak, Margaret F. Favata, Ronald L. Magolda, Peggy A. Scherle, and James M. Trzaskos**	**647**
Zinc Induces the Accumulation of Hypoxia-Inducible Factor (HIF)-1α, but Inhibits the Nuclear Translocation of HIF-1β, Causing HIF-1 Inactivation	**Yang-Sook Chun, Eunjoo Choi, Gi-Tae Kim, Min-Jae Lee, Min-Joung Lee, Sang-Eun Lee, Myung-Suk Kim, and Jong-Wan Park**	**652**
Lipopolysaccharide Augments Expression and Secretion of Vascular Endothelial Growth Factor in Rat Ventricular Myocytes	**Yasuyuki Sugishita, Tatsuya Shimizu, Atsushi Yao, Koh-ichiro Kinugawa, Takefumi Nojiri, Kazumasa Harada, Hiroshi Matsui, Ryozo Nagai, and Toshiyuki Takahashi**	**657**

ERRATUM

Volume **265,** Number 3 (1999) in the Breakthroughs and Views article “Mitochondrial Processing Peptidase: Multiple-Site Recognition of Precursor Proteins,” by Akio Ito, pages 611–616 **663**

Age-Related Decline in Osteoprotegerin Expression by Human Bone Marrow Cells Cultured in Three-Dimensional Collagen Sponges	**Huda A. Makhluf, Stefan M. Mueller, Shuichi Mizuno, and Julie Glowacki**	**669**
Dramatic Magnesium Efflux Induced by High Potassium in Rat Thymocytes	**Jean-Claude Féray, Karima Guerrouache, and Ricardo P. Garay**	**673**
Cloning and Expression of Cytochrome P450 Genes Belonging to the CYP4 Family and to a Novel Family, CYP48, in Two Hymenopteran Insects, *Trichogramma cacœciae* and *Apis mellifera*	**S. Tarès, J.-B. Bergé, and M. Amichot**	**677**
The Effect of Water on the Fe^{3+}/Fe^{2+} Reduction Potential of Heme	**O. Edholm, P. Norlander, W. Chen, P. I. Ohlsson, M. L. Smith, and J. Paul**	**683**

Expression of a *Desulfovibrio* Tetraheme Cytochrome *c* in *Escherichia coli*	**Patrícia N. da Costa, Cristiano Conte, and Lígia M. Saraiva**	**688**
Human Glial Cell-Line-Derived Neurotrophic Factor: A Structure–Function Analysis	**Zhe-Yu Chen, Zhi-Yong He, Cheng He, Chang-Lin Lu, and Xiang-Fu Wu**	**692**
Molecular Cloning of Murine STAP-1, the Stem-Cell-Specific Adaptor Protein Containing PH and SH2 Domains	**Masaaki Masuhara, Kenji Nagao, Mitsuo Nishikawa, Mika Sasaki, Akihiko Yoshimura, and Masatake Osawa**	**697**
The Human *PEX3* Gene Encoding a Peroxisomal Assembly Protein: Genomic Organization, Positional Mapping, and Mutation Analysis in Candidate Phenotypes	**Ania C. Muntau, Andreas Holzinger, Peter U. Mayerhofer, Jutta Gärtner, Adelbert A. Roscher, and Stefan Kammerer**	**704**
Apoaequorin Monitors Degradation of Endoplasmic Reticulum (ER) Proteins Initiated by Loss of ER Ca^{2+}	**J. Jeffery, J. M. Kendall, and A. K. Campbell**	**711**
Fungal Gliotoxin Targets the Onset of Superoxide-Generating NADPH Oxidase of Human Neutrophils	**Lucia S. Yoshida, Shigeru Abe, and Shohko Tsunawaki**	**716**
3-Methyladenine–DNA Glycosylase I from *Escherichia coli*—Computer Modeling and Supporting Experimental Evidence	**Danuta Płochocka, Andrzej Kierzek, Tomasz Obtułowicz, Barbara Tudek, and Piotr Zielenkiewicz**	**724**
In Situ Demonstration of Inhibitory Effects of Hammerhead Ribozymes That Are Targeted to the Hepatitis Bx Sequence in Cultured Cells	**Marc Passman, Marc Weinberg, Michael Kew, and Patrick Arbuthnot**	**728**
Receptor-Mediated Gene Delivery Approach Demonstrates the Role of 5′-Proximal DNA Region in Conferring Phenobarbitone Responsiveness to CYP2B2 Gene in Rat Liver *in Vivo*	**S. A. Mani, S. Harish, P. G. Vathsala, P. N. Rangarajan, and G. Padmanaban**	**734**
Clay-Bridged Electron Transfer between Cytochrome $P450_{cam}$ and Electrode	**Chenghong Lei, Ulla Wollenberger, Christiane Jung, and Frieder W. Scheller**	**740**
Biochemical/Spectroscopic Characterization and Preliminary X-Ray Analysis of a New Aldehyde Oxidoreductase Isolated from *Desulfovibrio desulfuricans* ATCC 27774	**Rui O. Duarte, Margarida Archer, João M. Dias, Sergey Bursakov, Robert Huber, Isabel Moura, Maria J. Romão, and José J. G. Moura**	**745**
Amyloid-β Peptides Interact with Plasma Proteins and Erythrocytes: Implications for Their Quantitation in Plasma	**Yu-Min Kuo, Tyler A. Kokjohn, Walter Kalback, Dean Luehrs, Douglas R. Galasko, Nathalie Chevallier, Edward H. Koo, Mark R. Emmerling, and Alex E. Roher**	**750**
Involvement of ERK in BMP-2 Induced Osteoblastic Differentiation of Mesenchymal Progenitor Cell Line C3H10T1/2	**Jueren Lou, Yizheng Tu, Shi Li, and Paul R. Manske**	**757**
Enhanced Expression of Cellular Prion Protein Gene by Insulin or Nerve Growth Factor in Immortalized Mouse Neuronal Precursor Cell Lines	**Chieko Kuwahara, Atsutaka Kubosaki, Takuya Nishimura, Yukiko Nasu, Yuko Nakamura, Keiichi Saeki, Yoshitsugu Matsumoto, and Takashi Onodera**	**763**

Green Tea Polyphenols: Novel and Potent Inhibitors of Squalene Epoxidase — **Ikuro Abe, Takahiro Seki, Kaoru Umehara, Toshio Miyase, Hiroshi Noguchi, Jun Sakakibara, and Teruo Ono** — **767**

Selective Activation of Antitumor Activity of Macrophages by the Delivery of Muramyl Dipeptide Using a Novel Polynucleotide-Based Carrier Recognized by Scavenger Receptors — **S. Srividya, Rajendra P. Roy, Sandip K. Basu, and Amitabha Mukhopadhyay** — **772**

Expression of 5-Lipoxygenase by Human Colorectal Carcinoma Caco-2 Cells during Butyrate-Induced Cell Differentiation — **Astrid Wächtershäuser, Dieter Steinhilber, Stefan M. Loitsch, and Jürgen Stein** — **778**

Ras-Related GTPase RhoB Forces Alkylation-Induced Apoptotic Cell Death — **Gerhard Fritz and Bernd Kaina** — **784**

Intracellular Supply of Phospholipids for Biliary Secretion: Evidence for a Nonvesicular Transport Component — **Hartwig Jaeger, Henry G. Wilcox, Thomas Bitterle, Joachim Mössner, and Frieder Berr** — **790**

De Novo RNA Synthesis Catalyzed by HCV RNA-Dependent RNA Polymerase — **Xin-Lai Sun, Robert B. Johnson, Michelle A. Hockman, and Q. May Wang** — **798**

A Two-Hit Model for Development of Multiple Endocrine Neoplasia Type 2B by *RET* Mutations — **Toshihide Iwashita, Hideki Murakami, Kei Kurokawa, Kumi Kawai, Akira Miyauchi, Hitoyasu Futami, Shanlou Qiao, Masatoshi Ichihara, and Masahide Takahashi** — **804**

In Vitro Remodeling of Tumor Vascular Endothelial Cells Using Conditioned Medium from Various Tumor Cells and Their Sensitivity to TNF-α — **Haruhiko Kamada, Yasuo Tsutsumi, Tetsunari Kihira, Shin-ichi Tsunoda, Yoko Yamamoto, and Tadanori Mayumi** — **809**

N-Glycan Structures of an Osteopontin from Human Bone — **Katsuyoshi Masuda, Noriko Takahashi, Yoshinori Tsukamoto, Hideki Honma, and Kenjiro Kohri** — **814**

The Kinetics of Copper-Induced LDL Oxidation Depend upon Its Lipid Composition and Antioxidant Content — **Francesco Visioli, Roberta Bordone, Cristina Perugini, Marco Bagnati, Cristiana Cau, and Giorgio Bellomo** — **818**

Frequency and Markov Chain Analysis of Amino-Acid Sequences of Human Glutathione Reductase — **Guang Wu** — **823**

Cardiac Type cGMP-Inhibited Phosphodiesterase (PDE3A) Gene Structure: Similarity and Difference to Adipocyte Type PDE3B Gene — **Junko Kasuya, Shu-Jian Liang, Hideki Goko, Sun-Hee Park, Komei Kato, Zhao-Dong Xu, Steve Hockman, Vincent C. Manganiello, and Yoko Fujita-Yamaguchi** — **827**

Apolipoprotein E and Apolipoprotein D Expression in a Murine Model of Singlet Oxygen-Induced Cerebral Stroke — **Vuong N. Trieu and Fatih M. Uckun** — **835**

Survival and Differentiation of Cultured Retinal Progenitors Transplanted in the Subretinal Space of the Rat — **David M. Chacko, Jim A. Rogers, James E. Turner, and Iqbal Ahmad** — **842**

An Evaluation of the Expression, Subcellular Localization, and Function of rab4 in the Exocrine Pancreas	**Jack A. Valentijn, Lilian T. Gien, Karine M. Valentijn, and James D. Jamieson**	847
A Non-Transmembrane Form of Jagged-1 Regulates the Formation of Matrix-Dependent Chord-like Structures	**Michael K. K. Wong, Igor Prudovsky, Calvin Vary, Christina Booth, Lucy Liaw, Shaker Mousa, Deena Small, and Thomas Maciag**	853
Association of EXT1 and EXT2, Hereditary Multiple Exostoses Gene Products, in Golgi Apparatus	**Shin-ichiro Kobayashi, Ko-ichi Morimoto, Takahiko Shimizu, Mayumi Takahashi, Hisashi Kurosawa, and Takuji Shirasawa**	860
Direct Detection of Apoptotic Cells in Peripheral Blood from Highly Pathogenic SHIV-Inoculated Monkey	**Naoto Yoshino, Tomiko Ryu, Masao Sugamata, Tomomi Ihara, Yasushi Ami, Katsuaki Shinohara, Fumio Tashiro, and Mitsuo Honda**	868
Human Growth Hormone Stimulates Proteinase Activities of Rabbit Bone Cells via IGF-I	**Rousselle Anne-Valérie, Damiens Christelle, Fortun Yannick, Passuti Norbert, Padrines Marc, and Heymann Dominique**	875
Binding Domain for $p21^{WAF1}$ on the Polypeptide Chain of the Protein Kinase CK2 β-Subunit	**Claudia Götz, Sabine Kartarius, Petra Scholtes, and Mathias Montenarh**	882
Promoter Usage for Insulin-like Growth Factor-II in Cancerous and Benign Human Breast, Prostate, and Bladder Tissues, and Confirmation of a 10th Exon	**Rossana Mineo, Epifanio Fichera, Shu-Jian Liang, and Yoko Fujita-Yamaguchi**	886
Three Rat Brain Alternative Splicing Dynamin-like Protein Variants: Interaction with the Glycogen Synthase Kinase 3β and Action as a Substrate	**Chang-Han Chen, Shiuh-Lin Hwang, Shen-Long Howng, Chen-Kung Chou, and Yi-Ren Hong**	893
High Extracellular Calcium Concentrations Directly Stimulate Osteoclast Apoptosis	**F. Lorget, S. Kamel, R. Mentaverri, A. Wattel, M. Naassila, M. Maamer, and M. Brazier**	899
Characterization of Endopeptidase Activity of Tripeptidyl Peptidase-I/CLN2 Protein Which Is Deficient in Classical Late Infantile Neuronal Ceroid Lipofuscinosis	**Junji Ezaki, Mitsue Takeda-Ezaki, Kohei Oda, and Eiki Kominami**	904
In Vitro Binding of Nucleolin to Double-Stranded Telomeric DNA	**Alessandra Pollice, Maria Pia Zibella, Thomas Bilaud, Thierry Laroche, John F. Pulitzer, and Eric Gilson**	909
MPP^+-Induced Mitochondrial Dysfunction Is Potentiated by Dopamine	**Jordi Boada, Blanca Cutillas, Teresa Roig, Jordi Bermúdez, and Santiago Ambrosio**	916
Mouse Peroxiredoxin V Is a Thioredoxin Peroxidase That Inhibits p53-Induced Apoptosis	**Yuan Zhou, K. H. Kok, Abel C. S. Chun, Chi-Ming Wong, Hing Wan Wu, Marie C. M. Lin, Peter C. W. Fung, Hsiang-fu Kung, and Dong-Yan Jin**	921
Induction of COX-2 Expression by Nitric Oxide in Rheumatoid Synovial Cells	**Seiyo Honda, Kiyoshi Migita, Yasuko Hirai, Yukitaka Ueki, Satoshi Yamasaki, Satoshi Urayama, Yojiro Kawabe, Takaaki Fukuda, Atsushi Kawakami, Makoto Kamachi, Masako Kita, Hiroaki Ida, Takahiko Aoyagi, and Katsumi Eguchi**	928

Cloning and Characterization of a Gene, *mpsA*, Encoding a Protein Associated with Intracellular Magnetic Particles from *Magnetospirillum* sp. Strain AMB-1 — **Tadashi Matsunaga, Noriyuki Tsujimura, Yoshiko Okamura, and Haruko Takeyama** **932**

Identification of Viral Macrophage Inflammatory Protein (vMIP)-II as a Ligand for GPR5/XCR1 — **LiXin Shan, Xudong Qiao, Elizabeth Oldham, Daniel Catron, Heather Kaminski, Daniel Lundell, Albert Zlotnik, Eric Gustafson, and Joseph A. Hedrick** **938**

Pyrrolidine Dithiocarbamate Induces Apoptosis by a Cytochrome *c*-Dependent Mechanism — **Fulvio Della Ragione, Valeria Cucciolla, Adriana Borriello, Valentina Della Pietra, Caterina Manna, Patrizia Galletti, and Vincenzo Zappia** **942**

Xenopus and Chicken Sperm Contain a Cytosolic Soluble Protein Factor Which Can Trigger Calcium Oscillations in Mouse Eggs — **Jian-Bo Dong, Tie-Shan Tang, and Fang-Zhen Sun** **947**

ERRATUM

Volume **256,** Number 1 (1999), in the article “Tctex2-Related Outer Arm Dynein Light Chain Is Phosphorylated at Activation of Sperm Motility,” by Kazuo Inaba, Osamu Kagami, and Kazuo Ogawa, pp. 177–183 (doi:10.1006/bbrc.1999.0309) **952**

Author Index for Volume 268 **953**

Volume 269, Number 1, March 5, 2000

BREAKTHROUGHS AND VIEWS

SAP Family Proteins	**Akikazu Fujita and Yoshihisa Kurachi**	1

REGULAR ARTICLES

Molecular and Immunochemical Evidences Demonstrate That Endooligopeptidase A Is the Predominant Cytosolic Oligopeptidase of Rabbit Brain	**Mirian A. F. Hayashi, Fernanda C. V. Portaro, Denise V. Tambourgi, Mauro Sucupira, Tetsuo Yamane, Beatriz L. Fernandes, Emer S. Ferro, Nancy A. Rebouças, and Antonio C. M. de Camargo**	7
Characterization of Pen n 13, a Major Allergen from the Mold *Penicillium notatum*	**Lu-Ping Chow, Shyh-Horng Chiou, Meng-Chin Hsiao, Chia-Jung Yu, and Bor-Luen Chiang**	14
Markedly Decreased Binding of Vincristine to Tubulin in Vinca Alkaloid-Resistant Chinese Hamster Cells Is Associated with Selective Overexpression of α and β Tubulin Isoforms	**F. M. Sirotnak, Kathleen D. Danenberg, Jing Chen, Frederike Fritz, and Peter V. Danenberg**	21
Digital Fluorescence Imaging of Trafficking of Endosomes Containing Low-Density Lipoprotein in Brain Astroglial Cells	**Tomomitsu Ichikawa, Makoto Yamada, Daisaku Homma, Richard J. Cherry, Ian E. G. Morrison, and Suguru Kawato**	25
Activation of the Human $p27^{Kip1}$ Promoter by IFNα 2b	**Alejandro Moro, Alicia Santos, Manuel J. Araña, and Silvio E. Perea**	31
*Ban*I Restriction Endonuclease Binds in the Major Groove of DNA: An Inhibition Kinetic Study Using Substrates with Mismatch Basepairs	**Sonia Advani and Kunal B. Roy**	35
Leptin Regulation of Prepro-orexin and Orexin Receptor mRNA Levels in the Hypothalamus	**Miguel López, Luisa Seoane, María del Carmen García, Francisca Lago, Felipe F. Casanueva, Rosa Señarís, and Carlos Diéguez**	41
Serum-Free, Long-Term Cultures of Human Hepatocytes: Maintenance of Cell Morphology, Transcription Factors, and Liver-Specific Functions	**Dieter Runge, Dorothee M. Runge, Dana Jäger, Kimberly A. Lubecki, Donna Beer Stolz, Sotirios Karathanasis, Thomas Kietzmann, Stephen C. Strom, Kurt Jungermann, Wolfgang E. Fleig, and George K. Michalopoulos**	46
Cloning and Characterization of the Human Retinoid X Receptor α Gene: Conservation of Structure with the Mouse Homolog	**G. Li, E. Walch, X. Yang, S. M. Lippman, and J. L. Clifford**	54
Engineering His(E7) Affects the Control of Heme Reactivity in *Aplysia limacina* Myoglobin	**Luca Federici, Carmelinda Savino, Raffaella Musto, Carlo Travaglini-Allocatelli, Francesca Cutruzzolà, and Maurizio Brunori**	58
Characterization of Mutations Induced by Ethyl Methanesulfonate, UV, and Trimethylpsoralen in the Nematode *Caenorhabditis elegans*	**Keiko Gengyo-Ando and Shohei Mitani**	64

Regulation of Rheumatoid Synovial Cell Growth by Ceramide	**Kiyoshi Migita, Seiyo Honda, Satoshi Yamasaki, Yasuko Hirai, Takaaki Fukuda, Takahiko Aoyagi, Masako Kita, Hiroaki Ida, Toshiaki Tsukada, Atsushi Kawakami, Yojiro Kawabe, and Katsumi Eguchi**	**70**
Assignment of Overlapping ^{1}H NMR Signals in Carp Seminal Plasma by Proton-Detected 2D C,H Correlation Spectroscopy	**Marianne Kalic, Jürgen Lauterwein, Gero Büsselmann, and Günter Kamp**	**76**
Design, Chemical Synthesis and Kinetic Studies of Trypsin Chromogenic Substrates Based on the Proteinase Binding Loop of *Cucurbita maxima* Trypsin Inhibitor (CMTI-III)	**Adam Lesner, Krzysztof Brzozowski, Gotfryd Kupryszewski, and Krzysztof Rolka**	**81**
Flow Cytometric Parameters for Characterizing Platelet Activation by Measuring P-Selectin (CD62) Expression: Theoretical Consideration and Evaluation in Thrombin-Treated Platelet Populations	**Valery Leytin, Meera Mody, John W. Semple, Bernadette Garvey, and John Freedman**	**85**
Molecular Cloning and Genomic Organization of a Novel Receptor from *Drosophila melanogaster* Structurally Related to Mammalian Galanin Receptors	**Camilla Lenz, Leif Søndergaard, and Cornelis J. P. Grimmelikhuijzen**	**91**
Cerivastatin Suppresses Lipopolysaccharide-Induced ICAM-1 Expression through Inhibition of Rho GTPase in BAEC	**Shigeto Takeuchi, Seinosuke Kawashima, Yoshiyuki Rikitake, Tomomi Ueyama, Nobutaka Inoue, Ken-ichi Hirata, and Mitsuhiro Yokoyama**	**97**
Molecular Cloning and Genomic Structure of the *βTRCP2* Gene on Chromosome 5q35.1	**Jun Koike, Norihiko Sagara, Hiroyuki Kirikoshi, Atsushi Takagi, Takeshi Miwa, Momoki Hirai, and Masaru Katoh**	**103**
Comprehensive Gene Expression Profile of a Normal Human Liver	**Taro Yamashita, Shin-ichi Hashimoto, Shuichi Kaneko, Shigenori Nagai, Nobuaki Toyoda, Takuji Suzuki, Kenichi Kobayashi, and Kouji Matsushima**	**110**
Chemotaxis of a *Ralstonia* sp. SJ98 toward Different Nitroaromatic Compounds and Their Degradation	**Sudip K. Samanta, Bharat Bhushan, Ashvini Chauhan, and Rakesh K. Jain**	**117**
Structural Basis for SH2D1A Mutations in X-Linked Lymphoproliferative Disease	**Ilkka Lappalainen, Silvia Giliani, Roberta Franceschini, Jean-Yves Bonnefoy, Colin Duckett, Luigi D. Notarangelo, and Mauno Vihinen**	**124**
Chemiluminescent Detection and Imaging of Reactive Oxygen Species in Live Mouse Skin Exposed to UVA	**Hiroyuki Yasui and Hiromu Sakurai**	**131**
Translocation of HSP27 to Sarcomere Induced by Ischemic Preconditioning in Isolated Rat Hearts	**Kenji Sakamoto, Tetsuro Urushidani, and Taku Nagao**	**137**

Aminopeptidase N/CD13 Is Associated with Raft Membrane Microdomains in Monocytes	**Alexander Navarrete Santos, Jana Roentsch, E. Michael Danielsen, Juergen Langner, and Dagmar Riemann**	143
Cre-Mediated Cerebellum- and Hippocampus-Restricted Gene Mutation in Mouse Brain	**Huailian Guo, Chengjian Mao, Xiao-Lu Jin, Hong Wang, Yen-Te Tu, Prachee Pradeep Avasthi, and Yuqing Li**	149
Dolichin, a New Chitinase-like Antifungal Protein Isolated from Field Beans (*Dolichos lablab*)	**X. Y. Ye, H. X. Wang, and T. B. Ng**	155
Attenuated Nitric Oxide Synthase Activity and Protein Expression Accompany Intestinal Ischemia/Reperfusion Injury in Rats	**Ashish Khanna, Jon E. Rossman, Ho-Leung Fung, and Michael G. Caty**	160
Nitric-Oxide-Dependent Pial Arteriolar Dilation in the Female Rat: Effects of Chronic Estrogen Depletion and Repletion	**Dale A. Pelligrino, Shuhua Ye, Fulong Tan, Roberto A. Santizo, Douglas L. Feinstein, and Qiong Wang**	165
Microvascular Pericytes Express Aggrecan Message Which Is Regulated by BMP-2	**David L. Diefenderfer and Carl T. Brighton**	172
p21$^{\mathrm{WAF1/CIP1}}$ Inhibits Initiator Caspase Cleavage by TRAIL Death Receptor DR4	**Shi-Qiong Xu and Wafik S. El-Deiry**	179
Localization of HSP90 Binding Sites in the Human Hepatitis B Virus Polymerase	**Ginam Cho, Sung-Gyoo Park, and Guhung Jung**	191
Identification of a Novel Retinoic Acid-Responsive Element within the Lamin A/C Promoter	**Koichi Okumura, Kazuhiko Nakamachi, Yuko Hosoe, and Noboru Nakajima**	197
Quinqueginsin, a Novel Protein with Anti-Human Immunodeficiency Virus, Antifungal, Ribonuclease and Cell-Free Translation-Inhibitory Activities from American Ginseng Roots	**H. X. Wang and T. B. Ng**	203
Progestins and Androgens Increase Expression of Spot 14 in T47-D Breast Tumor Cells	**Hannelore Heemers, Frank Vanderhoydonc, Walter Heyns, Guido Verhoeven, and Johannes V. Swinnen**	209
Molecular Mechanism of the Nacreous Layer Formation in *Pinctada maxima*	**Makiko Kono, Nakanobu Hayashi, and Tetsuro Samata**	213
Suppressive Effects of Swainsonine and *N*-Butyldeoxynojirimycin on Human Bone Marrow Neutrophil Maturation	**Masahiro Misago, Junichi Tsukada, Michiko N. Fukuda, and Sumiya Eto**	219
Enhanced Prenyltransferase Activity and Rab Content in Rat Liver Regeneration	**Giovannella Bruscalupi, Charles M. Allen, Barbara Barbaro, and Anna Trentalance**	226
Paraoxonase Activity Is Reduced by a Pro-atherosclerotic Diet in Rabbits	**Michael Mackness, Agnes Bouiller, Nathalie Hennuyer, Bharti Mackness, Maxine Hall, Anne Tailleux, Patrick Duriez, Bernard Delfly, Paul Durrington, Jean-Charles Fruchart, Nicolas Duverger, Jean-Michel Caillaud, and Graciela Castro**	232
Structure-Function Relationships of the Two Surface Loops of Myosin Heavy Chain Isoforms from Thermally Acclimated Carp	**Yasushi Hirayama, Kazuo Sutoh, and Shugo Watabe**	237

The Cyclic AMP-Protein Kinase A Pathway Restrains Islet Phospholipase A_2 Activation — **Erik Simonsson, Sven Karlsson, and Bo Ahrén** 242

Helicobacter pylori Induces Formation of Stress Fibers and Membrane Ruffles in AGS Cells by rac Activation — **Riitta Palovuori, Annina Perttu, Ying Yan, Riitta Karttunen, Sinikka Eskelinen, and Tuomo J. Karttunen** 247

Binding of Six Chimeric Analogs of ω-Conotoxin MVIIA and MVIIC to N- and P/Q-Type Calcium Channels — **Kazuki Sato, Cecile Raymond, Nicole Martin-Moutot, Toru Sasaki, Atsuko Ohtake, Kazushi Minami, Catherine Van Renterghem, Masami Takahashi, and Michael J. Seagar** 254

Effects of Shear Stress on Eicosanoid Gene Expression and Metabolite Production in Vascular Endothelium as Studied in a Novel Biomechanical Perfusion Model — **Roya Doroudi, Li-ming Gan, Lena Selin Sjögren, and Sverker Jern** 257

yam8$^+$, a *Schizosaccharomyces pombe* Gene, Is a Potential Homologue of the *Saccharomyces cerevisiae MID1* Gene Encoding a Stretch-Activated Ca^{2+}-Permeable Channel — **Yasushi Tasaka, Yuko Nakagawa, Chikara Sato, Masanobu Mino, Nobuyuki Uozumi, Norio Murata, Shoshi Muto, and Hidetoshi Iida** 265

Involvement of Hepatic Nuclear Factor I Binding Motif in Transcriptional Regulation of Ca^{2+}-Binding Protein Regucalcin Gene — **Hiroyuki Misawa and Masayoshi Yamaguchi** 270

Tyrosine Phosphatase SHP-2 Binding to CTLA-4: Absence of Direct YVKM/YFIP Motif Recognition — **Helga Schneider and Christopher E. Rudd** 279

Induction of Leukemia Cell Differentiation and Apoptosis by Recombinant P48, a Modulin Derived from *Mycoplasma fermentans* — **Robert E. Hall, Sujata Agarwal, and Daniel P. Kestler** 284

Identification of Benzodiazepines in *Artemisia dracunculus* and *Solanum tuberosum* Rationalizing Their Endogenous Formation in Plant Tissue — **Dominique Kavvadias, Ahmed A. Abou-Mandour, Franz-C. Czygan, Helmut Beckmann, Philipp Sand, Peter Riederer, and Peter Schreier** 290

Number 2, March 16, 2000

BREAKTHROUGHS AND VIEWS

Novel Priming Compounds of Cystathionine Metabolites on Superoxide Generation in Human Neutrophils — **Hiroyuki Kodama, Jianying Zhang, and Kazunori Sugahara** 297

REGULAR ARTICLES

Artificial Recruitment of Sp1 or TBP Can Replace the Role of IE1 in the Synergistic Transactivation by IE1 and IE2 — **Jong-Mook Kim, Youngtae Hong, and Sunyoung Kim** 302

Cell to Cell Interaction between Mesangial Cells and Macrophages Induces the Expression of Monocyte Chemoattractant Protein-1 through Nuclear Factor-κB Activation **Yutaka Hisada, Hiroaki Sakurai, and Takeshi Sugaya** 309

Effect of Elcatonin on Osteoinduction by Recombinant Human Bone Morphogenetic Protein-2 **Yasunori Okubo, Kazuhisa Bessho, Kazuma Fujimura, Kenji Kusumoto, Yutaka Ogawa, and Tadahiko Iizuka** 317

Up-Regulation of p21- and RhoA-Activated Protein Kinases in Human Pregnant Myometrium **Frances Moore, Craig Da Silva, Jonathan I. Wilde, Alex Smarason, Steve P. Watson, and Andrés López Bernal** 322

Preconditioning of Human Smooth Muscle Cells via Cyclopentenone Prostaglandins Protects against Toxic Effects of Oxidized Low-Density Lipoprotein **Linda Hamel, Margaret Kenney, Kenneth Clark, Linda Merkel, and Camilo Rojas** 327

Effect of Leptin on Hypothalamic GLP-1 Peptide and Brain-Stem Pre-proglucagon mRNA **Anthony P. Goldstone, Irene Morgan, Julian G. Mercer, David G. A. Morgan, Kim M. Moar, Mohammad A. Ghatei, and Stephen R. Bloom** 331

Glucose Starvation Reduces IGF-I mRNA in Tumor Cells: Evidence for an Effect on mRNA Stability **Lai Wang, Huan Yang, and Martin L. Adamo** 336

The Peroxisome Proliferator Response Element (PPRE) Present at Positions −681/−669 in the Rat Liver 3-Ketoacyl-CoA Thiolase B Gene Functionally Interacts Differently with PPARα and HNF-4 **Valérie Nicolas-Frances, Vijay Kumar Dasari, Elric Abruzzi, Takashi Osumi, and Norbert Latruffe** 347

Polo-like kinase1, a New Target for Antisense Tumor Therapy **Robert Elez, Albrecht Piiper, Claudio D. Giannini, Martin Brendel, and Stefan Zeuzem** 352

Antioxidant Effects of an Aqueous Extract of *Ilex paraguariensis* **G. R. Schinella, G. Troiani, V. Dávila, P. M. de Buschiazzo, and H. A. Tournier** 357

Tumor Necrosis Factor-α Upregulates Angiopoietin-2 in Human Umbilical Vein Endothelial Cells **Injune Kim, Ji-Hye Kim, Young Shin Ryu, Mingzhu Liu, and Gou Young Koh** 361

Structural Organization of the Human Glutathione Reductase Gene: Determination of Correct cDNA Sequence and Identification of a Mitochondrial Leader Sequence **Michael J. Kelner and Mark A. Montoya** 366

E-Cadherin at the Cell Periphery Is a Determinant of Keratinocyte Differentiation *in Vitro* **Dewi W. Owens, Valerie G. Brunton, E. Kenneth Parkinson, and Margaret C. Frame** 369

Induction of Endothelin-Converting Enzyme-1 in Gastric Mucosal Injury by Idomethacin **Bronislaw L. Slomiany and Amalia Slomiany** 377

ATP Synthesis in Lipoamide Dehydrogenase Deficiency **Ann Saada, Iris Aptowitzer, Gaby Link, and Orly N. Elpeleg** 382

Unfolding Kinetics of Tryptophan Side Chains in the Dimerization and Hinge Regions of HIV-1 Protease Tethered Dimer by Real Time NMR Spectroscopy	**S. C. Panchal and R. V. Hosur**	**387**
A High-Level Expression of CYP2A in the Lung of the Suncus (*Suncus murinus*) and Its Role in the Activation of 4-(Methylnitrosamino)-1-(3-pyridyl)-1-butanone	**Taisei Mushiroda, Noritaka Ariyoshi, Kanzo Kimura, Eiji Takahara, Osamu Nagata, Hideo Kato, and Tetsuya Kamataki**	**393**
HSP70 Induction in the Brain Following Ethanol Administration in the Rat: Regulation by Glutathione Redox State	**Vittorio Calabrese, Giuseppe Testa, Agrippino Ravagna, Timothy Edward Bates, and Anna Maria Giuffrida Stella**	**397**
Lipopolysaccharide Activates Matrix Metalloproteinase-2 in Endothelial Cells through an NF-κB-Dependent Pathway	**Hwan Gyu Kim and Gou Young Koh**	**401**
Cleavage of DNA Induced by 9-Anilinoacridine Inhibitors of Topoisomerase II in the Malaria Parasite *Plasmodium falciparum*	**Saranya Auparakkitanon and Prapon Wilairat**	**406**
p300/CBP Acts as a Coactivator of the Cone-Rod Homeobox Transcription Factor	**Yasuo Yanagi, Yoshikazu Masuhiro, Mikiro Mori, Junn Yanagisawa, and Shigeaki Kato**	**410**
Selective Inhibition of Cyclooxygenase-2 with Antisense Oligodeoxynucleotide Restricts Induction of Rat Adjuvant-Induced Arthritis	**Ryoji Yamada, Hajime Sano, Timothy Hla, Akira Hashiramoto, Yutaka Kawahito, Shigehiko Mukai, Masataka Kohno, Yasunori Tsubouchi, Miki Inoue, Akiko Komatsu, Ken-ichiro Inoue, and Motoharu Kondo**	**415**
Possible Involvement of the $p57^{Kip2}$ Gene in Bone Metabolism	**Tomohiko Urano, Takayuki Hosoi, Masataka Shiraki, Hideo Toyoshima, Yasuyoshi Ouchi, and Satoshi Inoue**	**422**
Extracellular Calcium-Sensing Receptor (CaR) Expression and Its Potential Role in Parathyroid Hormone-Related Peptide (PTHrP) Secretion in the H-500 Rat Leydig Cell Model of Humoral Hypercalcemia of Malignancy	**Jennifer L. Sanders, Naibedya Chattopadhyay, Olga Kifor, Toru Yamaguchi, and Edward M. Brown**	**427**
Gene-Specific Repair of γ-Ray-Induced DNA Strand Breaks in Colon Cancer Cells: No Coupling to Transcription and No Removal from the Mitochondrial Genome	**Alfred May and Vilhelm A. Bohr**	**433**
Inhibition of Adipocyte Differentiation by cMyc Is Not Accompanied by Alterations in Cell Cycle Control	**Victoria J. Heath, David A. F. Gillespie, and Dorothy H. Crouch**	**438**
Molecular Cloning and Expression Analysis of a Putative Nuclear Protein, SR-25	**Kenji Sasahara, Takashi Yamaoka, Maki Moritani, Masaki Tanaka, Hiroyuki Iwahana, Katsuhiko Yoshimoto, Jun-ichiro Miyagawa, Yasuhiro Kuroda, and Mitsuo Itakura**	**444**

Pyruvate Formate-Lyase-Activating Enzyme: Strictly Anaerobic Isolation Yields Active Enzyme Containing a [3Fe–4S]$^+$ Cluster	**Joan B. Broderick, Timothy F. Henshaw, Jennifer Cheek, Kristi Wojtuszewski, Sheila R. Smith, Matthew R. Trojan, Ryan M. McGhan, Amy Kopf, Megan Kibbey, and William E. Broderick**	451
The Growth Regulatory Fibroblast IK Channel Is the Prominent Electrophysiological Feature of Rat Prostatic Cancer Cells	**Stanley G. Rane**	457
Cyclosporin A Induces an Atypical Heat Shock Response	**Liliana Paslaru, Murielle Rallu, Martine Manuel, Sean Davidson, and Michel Morange**	464
Chloride Fluxes Activated by Parathyroid Hormone in Human Erythrocytes	**Laura Soldati, Donatella Adamo, Renato Spaventa, Giuseppe Bianchi, and Giuseppe Vezzoli**	470
Identification of a Family of Noncanonical Ubiquitin-Conjugating Enzymes Structurally Related to Yeast UBC6	**Douglas Lester, Colin Farquharson, George Russell, and Brian Houston**	474
Mammalian Deoxyribonucleases I Are Classified into Three Types: Pancreas, Parotid, and Pancreas-Parotid (Mixed), Based on Differences in Their Tissue Concentrations	**Haruo Takeshita, Kouichi Mogi, Toshihiro Yasuda, Tamiko Nakajima, Yoshimitsu Nakashima, Shinjiro Mori, Toshie Hoshino, and Koichiro Kishi**	481
Identification of the Up- and Down-Regulated Genes in Vancomycin-Resistant *Staphylococcus aureus* Strains Mu3 and Mu50 by cDNA Differential Hybridization Method	**Makoto Kuroda, Kyoko Kuwahara-Arai, and Keiichi Hiramatsu**	485
The N-Terminal Tandem Repeat Region of Human Prion Protein Reduces Copper: Role of Tryptophan Residues	**Francisca H. Ruiz, Eduardo Silva, and Nibaldo C. Inestrosa**	491
Partial Leptin Receptor Gene Deletion in Transgenic Mice Prevents Expression of the Membrane-Bound Isoforms Except for Ob-Rc	**Ursula Reichart, Roland Kappler, Harry Scherthan, Eckhard Wolf, Mathias Müller, Gottfried Brem, and Bernhard Aigner**	496
Contrasting Obesity Phenotypes Uncovered by Partial Leptin Receptor Gene Deletion in Transgenic Mice	**Ursula Reichart, Ingrid Renner-Müller, Andreas Höflich, Oliver J. Müller, Wolfgang M. Franz, Eckhard Wolf, Mathias Müller, Gottfried Brem, and Bernhard Aigner**	502
Enhancing Activity of ε in *Escherichia coli* and *Agrobacterium tumefaciens* Cells	**Ashkan Golshani, Vihren Kolev, Rumyana Mironova, Mounir G. AbouHaidar, and Ivan G. Ivanov**	508
Quantitative Analysis of Glioma Cell Invasion by Confocal Laser Scanning Microscopy in a Novel Brain Slice Model	**Hirotaka Matsumura, Takanori Ohnishi, Yonehiro Kanemura, Motohiko Maruno, and Toshiki Yoshimine**	513
p62 Functions as a p38 MAP Kinase Regulator	**Tatsuhiko Sudo, Masumi Maruyama, and Hiroyuki Osada**	521

Cloning and Characterization of the UDP-Sugar Hydrolase Gene (*ushA*) of *Enterobacter aerogenes* IFO 12010	**Ki-Sung Lee, Seok Bean Song, Kyoon Eon Kim, Young-Ho Kim, Soo-Ki Kim, Byung Hoon Kho, Dong-Kyu Ko, Yong-Keel Choi, Young-Keun Lee, Chi-Kyung Kim, Young-Chang Kim, Jai-Yun Lim, Youngsoo Kim, Kyung-Hee Min, and Barry L. Wanner**	**526**
Cancer Cells Responsible for Humoral Hypercalcemia Express mRNA Encoding a Secreted Form of ODF/TRANCE That Induces Osteoclast Formation	**Masazumi Nagai, Seiko Kyakumoto, and Nobuko Sato**	**532**
Association of Estrogen Receptor β Gene Polymorphism with Bone Mineral Density	**Sumito Ogawa, Takayuki Hosoi, Masataka Shiraki, Hajime Orimo, Mitsuru Emi, Masami Muramatsu, Yasuyoshi Ouchi, and Satoshi Inoue**	**537**
Mitochondria and Caspases in Induced Apoptosis in Human Luteinized Granulosa Cells	**Shah M. Khan, Lisa M. Dauffenbach, and John Yeh**	**542**
Cell-Type-Dependent Induction of *eotaxin* and *CCR3* by Ionizing Radiation	**Margit A. Huber, Norbert Kraut, Torsten Addicks, and Ralf U. Peter**	**546**
Cytoplasmic Inhibitor of eEF-2 ADP-Ribosylation Catalyzed by Diphtheria Toxin or Endogenous Transferase in Rat Liver Cells	**Anna Galicka, Krystyna Średzińska, and Andrzej Gindzieński**	**553**
cDNA Cloning of an Alternative Splicing Variant of Protein Kinase C δ (PKD δIII), a New Truncated Form of PKCδ, in Rats	**Takehiko Ueyama, Yi Ren, Shiho Ohmori, Kazuo Sakai, Norihiko Tamaki, and Naoaki Saito**	**557**
MDP77: A Novel Neurite-Outgrowth-Promoting Protein Predominantly Expressed in Chick Muscles	**Atsuko Uyeda, Iwao Fukui, Kazuhiro Fujimori, Kazuyuki Kiyosue, Hiroshi Nishimune, Michiki Kasai, and Takahisa Taguchi**	**564**
Effects of CTx and 8-Bromo-cAMP on LPS-Induced Gene Expression of Cytokines in Murine Peritoneal Macrophages	**Weiguo Feng, Yibing Wang, Jingsong Zhang, Xingyu Wang, Changlin Li, and Zongliang Chang**	**570**
Spectinomycin Inhibits the Self-Splicing of the Group 1 Intron RNA	**In Kook Park, Jae Young Kim, Eun Hee Lim, and Sook Shin**	**574**
A Novel 5′-Carboxychroman Metabolite of γ-Tocopherol Secreted by HepG2 Cells and Excreted in Human Urine	**Robert S. Parker and Joy E. Swanson**	**580**
CBP: A Target Molecule of HTLV-1 Tax in Synoviocyte Activation	**Minako Nakazawa, Tomoko Hasunuma, Takayuki Ohshima, Yuetsu Tanaka, Kusuki Nishioka, and Toshihiro Nakajima**	**584**
Combinatorial Chemistry Defines General Properties of Linkers for the Optimal Display of Peptide Ligands for Binding Soluble Protein Targets to TentaGel Microscopic Beads	**David S. Thorpe and Stefan Walle**	**591**
Kinetic Study of Porcine Kidney Betaine Aldehyde Dehydrogenase	**Ciria G. Figueroa-Soto and Elisa M. Valenzuela-Soto**	**596**

Regulation of the Quiescence-Induced Genes: Quiescin Q6, Decorin, and Ribosomal Protein S29 — **Donald Coppock, Cynthia Kopman, Jean Gudas, and Deborah A. Cina-Poppe** 604

Genomic Structure of Murine Rab11 Family Members — **Sheela G. Bhartur, Benjamin C. Calhoun, Julie Woodrum, Joseph Kurkjian, Sanjay Iyer, Fang Lai, and James R. Goldenring** 611

Regulation of ATP-Sensitive Potassium Channel mRNA Expression in Rat Kidney Following Ischemic Injury — **F. Sgard, C. Faure, C. Drieu la Rochelle, D. Graham, S. E. O'Connor, P. Janiak, and F. Besnard** 618

Development of Bacterial Expression System with High Yield of CYP3A7, a Human Fetus-Specific Form of Cytochrome P450 — **Eri Inoue, Yoshiki Takahashi, Yoshio Imai, and Tetsuya Kamataki** 623

Bovine Milk Kininogen Fragment 1·2 Promotes the Proliferation of Osteoblastic MC3T3-E1 Cells — **Jun-ichi Yamamura, Yukihiro Takada, Masaaki Goto, Masayoshi Kumegawa, and Seiichiro Aoe** 628

The Suppression of Small GTPase Rho Signal Transduction Pathway Inhibits Angiogenesis *in Vitro* and *in Vivo* — **Shigeki Uchida, Go Watanabe, Yutaka Shimada, Masato Maeda, Atsushi Kawabe, Akira Mori, Shigeki Arii, Masayoshi Uehata, Takuji Kishimoto, Tsutomu Oikawa, and Masayuki Imamura** 633

Number 3, March 24, 2000

BREAKTHROUGHS AND VIEWS

Development of HIV Entry Inhibitors Targeted to the Coiled-Coil Regions of gp41 — **Shibo Jiang and Asim K. Debnath** 641

REGULAR ARTICLES

Enhanced Lipid Oxidation by Oxidatively Modified Myoglobin: Role of Protein-Bound Heme — **Jennifer L. Vuletich, Yoichi Osawa, and Michael Aviram** 647

Rho-Kinase Inhibitor Retards Migration and *in Vivo* Dissemination of Human Prostate Cancer Cells — **Avril V. Somlyo, Dawn Bradshaw, Susan Ramos, Cheryl Murphy, Charles E. Myers, and Andrew P. Somlyo** 652

Genetic Dissection of the Syndrome X in the Rat — **Peter Kovács, Jens van den Brandt, and Ingrid Klöting** 660

Expression of Monocyte Chemoattractant Protein-1 by Nonenzymatically Glycated Albumin (Amadori Adducts) in Vascular Smooth Muscle Cells — **Toshihiro Ichiki, Yuko Funakoshi, Kiyoko Ito, and Akira Takeshita** 666

Recognition of Human Activated CD44 by Tumor Vasculature-Targeted Antibody — **Kenji Taniguchi, Naoki Harada, Iwao Ohizumi, Yasuo Tsutsumi, Shinsaku Nakagawa, Shin-ichi Kaiho, and Tadanori Mayumi** 671

GSTM1 and mEPHX Polymorphisms in Parkinson's Disease and Age of Onset	**A. Ahmadi, M. Fredrikson, H. Jerregård, A. Åkerbäck, P. A. Fall, A. Rannug, O. Axelson, and P. Söderkvist**	676
Pressure Effects on Tryptophan and Its Derivatives	**Kangcheng Ruan, Shaoming Tian, Reinhard Lange, and Claude Balny**	681
Pharmacological Concentrations of Arginine Influence Human Whole Blood Viscosity Independent of Nitric Oxide Synthase Activity *in Vitro*	**Roland Walter, Michael Mark, and Walter H. Reinhart**	687
Studies on the Relationships between the Synonymous Codon Usage and Protein Secondary Structural Units	**S. K. Gupta, S. Majumdar, T. K. Bhattacharya, and T. C. Ghosh**	692
Diabetes Enhances Acetaldehyde-Induced Depression of Cardiac Myocyte Contraction	**Jun Ren, Loren E. Wold, and Paul N. Epstein**	697
Neurotensin-Mediated Activation of MAPK Pathways and AP-1 Binding in the Human Pancreatic Cancer Cell Line, MIA PaCa-2	**Richard A. Ehlers, Yujin Zhang, Mark R. Hellmich, and B. Mark Evers**	704
Acrylamide Quenching of *apo*- and *holo-α*-Lactalbumin in Guanidine Hydrochloride	**Richard M. France and Steven H. Grossman**	709
Endothelin-1 Induces NAD(P)H Oxidase in Human Endothelial Cells	**Nicole Duerrschmidt, Nico Wippich, Winfried Goettsch, Hans-Juergen Broemme, and Henning Morawietz**	713
Expression of $p16^{INK4A}$ Induces Dominant Suppression of Glioblastoma Growth *in Situ* through Necrosis and Cell Cycle Arrest	**Kuo-Sheng Hung, Chi-Yuan Hong, Jihjong Lee, Sze-Kwan Lin, Shen C. Huang, Tong-Mei Wang, Victor Tse, Gerald D. Sliverberg, Su-Chuan Weng, and Michael Hsiao**	718
Copper Has Differential Effect on Prion Protein with Polymorphism of Position 129	**Boon-Seng Wong, Christine Clive, Stephen J. Haswell, Ian M. Jones, and David R. Brown**	726
Equistatin, a Protease Inhibitor from the Sea Anemone *Actinia equina,* Is Composed of Three Structural and Functional Domains	**Borut Štrukelj, Brigita Lenarčič, Kristina Gruden, Jože Pungerčar, Boris Rogelj, Vito Turk, Dirk Bosch, and Maarten A. Jongsma**	732
Substrate Binding to 15β-Hydroxylase (CYP106A2) Probed by FT Infrared Spectroscopic Studies of the Iron Ligand CO Stretch Vibration	**Birgit Simgen, Jörg Contzen, Rolf Schwarzer, Rita Bernhardt, and Christiane Jung**	737
Identification and Analysis of the *sap* Genes from *Vibrio fischeri* Belonging to the ATP-Binding Cassette Gene Family Required for Peptide Transport and Resistance to Antimicrobial Peptides	**Hui-Yi Chen, Shu-Fen Weng, and Juey-Wen Lin**	743
Function of Murine Adenosine Deaminase in the Gastrointestinal Tract	**Ping A. Xu and Rodney E. Kellems**	749
Tip60 Inhibits Activation of CREB Protein by Protein Kinase A	**Sunitha Gavaravarapu and James Kamine**	758

A Genome-Wide Screening in *Saccharomyces cerevisiae* for Genes That Confer Resistance to the Anticancer Agent Cisplatin	**Herman Burger, Astrid Capello, Paul W. Schenk, Gerrit Stoter, Jaap Brouwer, and Kees Nooter**	**767**
Oxidized Monocyte-Derived Macrophages in Aortic Atherosclerotic Lesion from Apolipoprotein E-Deficient Mice and from Human Carotid Artery Contain Lipid Peroxides and Oxysterols	**Irit Maor, Marielle Kaplan, Tony Hayek, Jacob Vaya, Aaron Hoffman, and Michael Aviram**	**775**
Viscoelastic Properties of the Cell Nucleus	**Farshid Guilak, John R. Tedrow, and Rainer Burgkart**	**781**
Expression of Cold-Adapted β-Tubulins Confer Cold-Tolerance to Human Cellular Microtubules	**Carina Modig, Margareta Wallin, and Per-Erik Olsson**	**787**
Effects of an Inhibitor of Myosin Light Chain Kinase on Amylase Secretion from Rat Pancreatic Acini	**Nobumasa Mizuno, Satoru Naruse, Motoji Kitagawa, Hiroshi Ishiguro, and Tetsuo Hayakawa**	**792**
Autocrine/Paracrine Secretion of IL-6 Family Cytokines Causes Angiotensin II-Induced Delayed STAT3 Activation	**Motoaki Sano, Keiichi Fukuda, Hiroaki Kodama, Toshiyuki Takahashi, Takahiro Kato, Daihiko Hakuno, Toshihiko Sato, Tomohiro Manabe, Satoko Tahara, and Satoshi Ogawa**	**798**
Trichoplusia ni Lebocin, an Inducible Immune Gene with a Downstream Insertion Element	**Gang Liu, Daiwu Kang, and Håkan Steiner**	**803**
Induction and Regulation of Matrix Metalloproteinase-12 by Cytokines and CD40 Signaling in Monocyte/Macrophages	**Lihua Wu, Jianglin Fan, Shun-ichiro Matsumoto, and Teruo Watanabe**	**808**
Metabolism and Function of 3-D-Phosphorylated Phosphoinositides in C5a-Stimulated Eosinophils	**Clemens Hofmann, Stefan Dichmann, Ulrich Zimpfer, Wolfgang Czech, Yared Herouy, Edgar Wagner, and Johannes Norgauer**	**816**
Author Index for Volume 269		**822**

Volume 270, Number 1, April 2, 2000

BREAKTHROUGHS AND VIEWS

Estrogen Receptors: How Do They Control Reproductive and Nonreproductive Functions?	**Masami Muramatsu and Satoshi Inoue**	1

REGULAR ARTICLES

Prostaglandin $F_{2\alpha}$ ($PGF_{2\alpha}$) Induces Cyclin D1 Expression and DNA Synthesis via Early Signaling Mechanisms in Swiss Mouse 3T3 Cells	**Moira Sauane, Laura Correa, Florencia Rogers, Martín Krasnapolski, Roger Barraclough, Philip S. Rudland, and Luis Jiménez de Asúa**	11
Expression of Retinoid Receptors during Human Monocyte Differentiation *in Vitro*	**Jana Fritsche, Timothy J. Stonehouse, David R. Katz, Reinhard Andreesen, and Marina Kreutz**	17
Viral Interferon Regulatory Factor 1 of Kaposi's Sarcoma-Associated Herpesvirus (Human Herpesvirus 8) Binds to, and Inhibits Transactivation of, CREB-Binding Protein	**Taegun Seo, Daeyoup Lee, Bona Lee, Jae Hoon Chung, and Joonho Choe**	23
Differential Interaction of CrkII Adaptor Protein with Platelet-Derived Growth Factor α- and β-Receptors Is Determined by Its Internal Tyrosine Phosphorylation	**Taro Matsumoto, Koutaro Yokote, Ayako Take, Minoru Takemoto, Sunao Asaumi, Yuko Hashimoto, Michiyuki Matsuda, Yasushi Saito, and Seijiro Mori**	28
Molecular Cloning and Characterization of *Xenopus* RGS5	**Osamu Saitoh, Megumi Odagiri, Ikuo Masuho, Satoshi Nomoto, and Noriyuki Kinoshita**	34
Identification of cDNAs Encoding Two Subtypes of Vitamin D Receptor in Flounder, *Paralichthys olivaceus*	**Tohru Suzuki, Nobuo Suzuki, Anand S. Srivastava, and Tadahide Kurokawa**	40
Localization of the Type I Restriction–Modification Enzyme *Eco*KI in the Bacterial Cell	**Inge Holubová, Štepánka Vejsadová, Marie Weiserová, and Keith Firman**	46
Purification, Identification, and Characterization of an Osmotic Response Element Binding Protein	**Ben C. B. Ko, Christoph W. Turck, Karen W. Y. Lee, Yinqing Yang, and Stephen S. M. Chung**	52
High Density Lipoprotein Inhibits Assembly of Amyloid β-Peptides into Fibrils	**Ole F. Olesen and Lone Dagø**	62
Isolation of a Novel PDZ-Containing Myosin from Hematopoietic Supportive Bone Marrow Stromal Cell Lines	**Tadashi Furusawa, Shuntaro Ikawa, Nobuaki Yanai, and Masuo Obinata**	67
Induction of Apoptosis by All-*trans*-Retinoic Acid and C2-Ceramide Treatment in Rat Stromal–Vascular Cultures	**H. S. Kim, D. B. Hausman, M. M. Compton, R. G. Dean, R. J. Martin, G. J. Hausman, D. L. Hartzell, and C. A. Baile**	76
Operon Structure and Functional Analysis of the Genes Encoding Thermophilic Desulfurizing Enzymes of *Paenibacillus* sp. A11-2	**Yoshitaka Ishii, Jin Konishi, Hideki Okada, Kazuaki Hirasawa, Toshimitu Onaka, and Masanori Suzuki**	81

Rat Receptor-Activity-Modifying Proteins (RAMPs) for Adrenomedullin/CGRP Receptor: Cloning and Upregulation in Obstructive Nephropathy	**Tetsuya Nagae, Masashi Mukoyama, Akira Sugawara, Kiyoshi Mori, Kensei Yahata, Masato Kasahara, Takayoshi Suganami, Hisashi Makino, Yuriko Fujinaga, Tetsuro Yoshioka, Issei Tanaka, and Kazuwa Nakao**	**89**
DNA Induces Apoptosis in Electroporated Human Promonocytic Cell Line U937	**Toshibumi Shimokawa, Ko Okumura, and Chisei Ra**	**94**
Expression, Purification, and Crystallization of the *Escherichia coli* Selenomethionyl β-Ketoacyl–Acyl Carrier Protein Synthase III	**Sanjay S. Khandekar, Alex K. Konstantinidis, Carol Silverman, Cheryl A. Janson, Dean E. McNulty, Silas Nwagwu, Glenn S. Van Aller, Michael L. Doyle, James F. Kane, Xiayang Qiu, and John Lonsdale**	**100**
Different Regulation of Vascular Endothelial Growth Factor Expression by the ERK and p38 Kinase Pathways in v-*ras,* v-*raf,* and v-*myc* Transformed Cells	**Eijiro Okajima and Unnur P. Thorgeirsson**	**108**
The Effects of *RAD52* Epistasis Group Genes on Various Types of Spontaneous Mitotic Recombination in *Saccharomyces cerevisiae*	**Ji Chang You**	**112**
A Mouse Fibroblast Cell Model to Study Human Papillomavirus-Associated Tumorigenesis	**Patricia Hernández, Nelson Merino, Omar Lopez-Ocejo, and Manuel de Jesus Araña**	**119**
Physicochemical Modeling of the Role of Free Radicals in Photodynamic Therapy. V. Quantification of Spin-Trapping Kinetics	**Tatjana Shutova, Tamás Kriska, András Németh, Vladimir Agabekov, and Dezso Gál**	**125**
Cysteine 3 Is Not the Site of *in Vitro* Palmitoylation on $G_{S\alpha}$	**Klaus Scholich, Yinges Yigzaw, and Tarun B. Patel**	**131**
Potent and Selective Inhibition of Squalene Epoxidase by Synthetic Galloyl Esters	**Ikuro Abe, Takahiro Seki, and Hiroshi Noguchi**	**137**
Homologous Expression of Recombinant Cellobiose Dehydrogenase in *Phanerochaete chrysosporium*	**Bin Li, Frederik A. J. Rotsaert, Michael H. Gold, and V. Renganathan**	**141**
The Molecular Structure of the Fastest Myosin from Green Algae, *Chara*	**Miki Morimatsu, Akio Nakamura, Hiroki Sumiyoshi, Nana Sakaba, Hisaaki Taniguchi, Kazuhiro Kohama, and Sugie Higashi-Fujime**	**147**
A Salt Bridge between an N-terminal Coiled Coil of gp41 and an Antiviral Agent Targeted to the gp41 Core Is Important for Anti-HIV-1 Activity	**Shibo Jiang and Asim K. Debnath**	**153**
Interferon-Dependent Activation of the Serine Kinase PI 3′-Kinase Requires Engagement of the IRS Pathway but Not the Stat Pathway	**Shahab Uddin, Beata Majchrzak, Pu-Chen Wang, Sanjiv Modi, Mohammad K. Khan, Eleanor N. Fish, and Leonidas C. Platanias**	**158**

In Vivo Gene Gun-Mediated DNA Delivery into Rodent Brain Tissue	**Hidemitsu Sato, Satoshi Hattori, Susumu Kawamoto, Ichidai Kudoh, Akimune Hayashi, Isao Yamamoto, Masahiro Yoshinari, Mutsuhiko Minami, and Hiroshi Kanno**	163
Nuclear Localization Signals of the BRCA2 Protein	**Ken-ichi Yano, Keiko Morotomi, Hiroko Saito, Masahiro Kato, Fumie Matsuo, and Yoshio Miki**	171
In Situ Localization of Agouti Signal Protein in Murine Skin Using Immunohistochemistry with an ASP-Specific Antibody	**Naoko Matsunaga, Victoria Virador, Chie Santis, Wilfred D. Vieira, Minao Furumura, Jun Matsunaga, Nobuhiko Kobayashi, and Vincent J. Hearing**	176
An N-Terminal 33-Amino-Acid-Deletion Variant of hsp25 Retains Oligomerization and Functional Properties	**Zhanying Guo and Lyndon F. Cooper**	183
Mapping of a Protective Helper T Cell Epitope of Human Influenza A Virus Hemagglutinin	**Péter Gogolák, Ágnes Simon, Attila Horváth, Bence Réthi, István Simon, Katalin Berkics, Éva Rajnavölgyi, and Gábor K. Tóth**	190
EPR Spin-Trapping of a Myeloperoxidase Protein Radical	**Olivier M. Lardinois and Paul R. Ortiz de Montellano**	199
Modification of Adipocyte Membrane Adenylyl Cyclase Activity by NAD: Evidence against NAD-Induced Endogenous ADP-Ribosylation of Gsα Protein	**Karim Dib, Bernard Lambert, and Claude Corrèze**	203
Blockade of JAK2 by Tyrphostin AG-490 Inhibits Antigen-Induced Eosinophil Recruitment into the Mouse Airways	**Kotaro Kumano, Atsuhito Nakao, Hiroshi Nakajima, Satoshi Miike, Kazuhiro Kurasawa, Yasushi Saito, and Itsuo Iwamoto**	209
Sepsis-Induced Muscle Proteolysis Is Prevented by a Proteasome Inhibitor *in Vivo*	**David Fischer, Gyu Gang, Timothy Pritts, and Per-Olof Hasselgren**	215
FYVE-DSP1, a Dual-Specificity Protein Phosphatase Containing an FYVE Domain	**Runxiang Zhao, Ying Qi, and Zhizhuang Joe Zhao**	222
Substance P Regulates PTH Secretion through the Neurokinin-1 Receptor	**Rachelle J. Sells Galvin, Lael E. Babbey, Philip A. Hipskind, Tiffanie Lamar, Carolyn A. George, Melvyn Baez, and Bruce D. Gitter**	230
Role of Hepatocyte Nuclear Factor 1α and 1β in the Transcriptional Regulation of Human Dipeptidyl Peptidase IV during Differentiation of Caco-2 Cells	**Roger H. Erickson, Roy S. Lai, and Young S. Kim**	235
The Mevalonate/Isoprenoid Pathway Inhibitor Apomine (SR-45023A) Is Antiproliferative and Induces Apoptosis Similar to Farnesol	**Jean Flach, Isabelle Antoni, Pascal Villemin, Craig L. Bentzen, and Eric J. Niesor**	240
Firefly Luciferase Generates Two Low-Molecular-Weight Light-Emitting Species	**Frédéric Brau, Jean-Claude Bernengo, Kyung-Lyum Min, and Jean-Paul Steghens**	247

p-Aminohippuric Acid Transport at Renal Apical Membrane Mediated by Human Inorganic Phosphate Transporter NPT1	**Hiroshi Uchino, Ikumi Tamai, Katsumi Yamashita, Yuzuru Minemoto, Yoshimichi Sai, Hikaru Yabuuchi, Ken-ichi Miyamoto, Eiji Takeda, and Akira Tsuji**	254
Sex Steroid Influence on Cannabinoid CB$_1$ Receptor mRNA and Endocannabinoid Levels in the Anterior Pituitary Gland	**S. González, T. Bisogno, T. Wenger, J. Manzanares, A. Milone, F. Berrendero, V. Di Marzo, J. A. Ramos, and J. J. Fernández-Ruiz**	260
A Novel Protein MAJN Binds to Jak3 and Inhibits Apoptosis Induced by IL-2 Deprival	**Hongbin Ji, Qiwei Zhai, Jinfang Zhu, Minda Yan, Langyin Sun, Xinyuan Liu, and Zhongcheng Zheng**	267
CD39 Modulates IL-1 Release from Activated Endothelial Cells	**Masato Imai, Christian Goepfert, Elzbieta Kaczmarek, and Simon C. Robson**	272
Engineering of a Mini-Trichosanthin That Has Lower Antigenicity by Deleting Its C-Terminal Amino Acid Residues	**Siu-Hong Chan, Pang-Chui Shaw, Sandrine F. C. Mulot, Li-Hui Xu, Wah-Lun Chan, Siu-Cheung Tam, and Kam-Bo Wong**	279
Molecular Cloning and Partial Characterization of a Plant VAP33 Homologue with a Major Sperm Protein Domain	**Franck Laurent, Gilles Labesse, and Pierre de Wit**	286
Characterization of the Functionally Related Sites in the Neural Inducing Gene Noggin	**Weidong Liu, Caiping Ren, Jianling Shi, Xiangling Feng, Zhiwei He, Liangguo Xu, Ke Lan, Lu Xie, Ying Peng, Jing Fan, Hsiang-fu Kung, Kai-Tai Yao, and Ren-He Xu**	293
Activation of Protease-Activated Receptor-2 (PAR-2) Triggers Mucin Secretion in the Rat Sublingual Gland	**Atsufumi Kawabata, Nao Morimoto, Hiroyuki Nishikawa, Ryotaro Kuroda, Yasuo Oda, and Kazuaki Kakehi**	298
Transcriptional Repression of p21$^{(Waf1/Cip1/Sdi1)}$ Gene by c-jun through Sp1 Site	**Chih-Hung Wang, Yeou-Ping Tsao, Huei-Jane Chen, Hui-Ling Chen, Hsing-Won Wang, and Show-Li Chen**	303
Inhibition of the 26S Proteasome Induces Expression of GLCLC, the Catalytic Subunit for γ-Glutamylcysteine Synthetase	**Konjeti R. Sekhar, Syrus R. Soltaninassab, Michael J. Borrelli, Zhi-Qi Xu, Michael J. Meredith, Frederick E. Domann, and Michael L. Freeman**	311
Possible Involvement of Orexin in the Stress Reaction in Rats	**Takanori Ida, Keiko Nakahara, Takayuki Murakami, Reiko Hanada, Masamitsu Nakazato, and Noboru Murakami**	318
Induction of Heme Oxygenase-1 Modulates *cis*-Aconitase Activity in Lens Epithelial Cells	**Danuta M. Rzymkiewicz, John R. Reddan, and Usha P. Andley**	324

ERRATUM

Volume **268,** Number 2 (2000), in the article “Mode of Molecular Recognition of L-Fucose by Fucose-Binding Legume Lectins,” by Celestine J. Thomas and Avadhesha Surolia, pages 262–267 (doi:10.1006/bbrc.2000.2110) 329

Number 2, April 13, 2000

Serum Amyloid A Is a Chemotactic Agonist at FPR2, a Low-Affinity *N*-Formylpeptide Receptor on Mouse Neutrophils	**Thomas S. Liang, Ji-Ming Wang, Philip M. Murphy, and Ji-Liang Gao**	**331**
Functional Analysis of the Domain Organization of *Trypanosoma brucei* RNase HI	**Jessica H. Kobil and Andrew G. Campbell**	**336**
Stimulation by Eicosapentaenoic Acids of Leptin mRNA Expression and Its Secretion in Mouse 3T3-L1 Adipocytes *in Vitro*	**Masahiro Murata, Hidesuke Kaji, Yutaka Takahashi, Keiji Iida, Ishikazu Mizuno, Yasuhiko Okimura, Hiromi Abe, and Kazuo Chihara**	**343**
High Level of Ferritin Light Chain mRNA in Lens	**Quifang Cheng, Pedro Gonzalez, and J. Samuel Zigler, Jr.**	**349**
Molecular Cloning and Characterization of the Mouse *Peroxiredoxin V* Gene	**Tae-Hoon Lee, Sun Jung Kim, Sang Won Kang, Kyung-Kwang Lee, Sue Goo Rhee, and Dae-Yeul Yu**	**356**
Pyrimidine Morpholino Oligonucleotides Form a Stable Triple Helix in the Absence of Magnesium Ions	**Laurent Lacroix, Paola B. Arimondo, Masashi Takasugi, Claude Hélène, and Jean-Louis Mergny**	**363**
Molecular Cloning of a Novel Form (Two-Repeat) Protein Related to Voltage-Gated Sodium and Calcium Channels	**Kenichi Ishibashi, Makoto Suzuki, and Masashi Imai**	**370**
Glycoprotein Ibα-Bound Thrombin Functions as a Serine Protease to Produce Macromolecular Activators of Phagocytosis from Platelets	**Haruhiko Sakamoto, Masaki Ueno, Wu Yanghong, Rafiza Khatun, Sumiko Tanaka, Kazunori Miyabe, Yoshitada Ogawa, and Masayuki Onodera**	**377**
Borato-1,2-diaminocyclohexane Platinum (II), a Novel Anti-Tumor Drug	**Adnan Dibas, Jeremy Howard, Shehab Anwar, David Stewart, and Amanullah Khan**	**383**
A Conserved Residue at the Extreme C-Terminus of FtsZ Is Critical for the FtsA-FtsZ Interaction in *Staphylococcus aureus*	**Kang Yan, Kenneth H. Pearce, and David J. Payne**	**387**
An ARE-Selective DNA Minor Groove Binder from a Combinatorial Approach	**François Hamy, Geneviève Albrecht, Andreas Flörsheimer, and Christian Bailly**	**393**
Inhibition of Human Lung Cancer Cell Growth by the Peroxisome Proliferator-Activated Receptor-γ Agonists through Induction of Apoptosis	**Yasunori Tsubouchi, Hajime Sano, Yutaka Kawahito, Shigehiko Mukai, Ryoji Yamada, Masataka Kohno, Ken-ichiro Inoue, Timothy Hla, and Motoharu Kondo**	**400**
Induction of Apoptosis and Mitosis Inhibition by Degraded DNA Lipotransfection Mimicking Genotoxic Drug Effects	**Nicola Schiavone, Laura Papucci, Paola Luciani, Andrea Lapucci, Martino Donnini, and Sergio Capaccioli**	**406**
Resistance to Apoptosis Is Correlated with the Reduced Caspase-3 Activation and Enhanced Expression of Antiapoptotic Proteins in Human Cervical Multidrug-Resistant Cells	**Zhihu Ding, Xiaolong Yang, Alan Pater, and Shou-Ching Tang**	**415**

Plicatamide: A Lead to the Biosynthetic Origins of the Tunichromes?	**J. Andy Tincu, A. Grey Craig, and Steven W. Taylor**	421
Estrogen Receptor β mRNA in Colon Cancer Cells: Growth Effects of Estrogen and Genistein	**Naoya Arai, Anders Ström, Joseph J. Rafter, and Jan-Åke Gustafsson**	425
Mapping of the Human *CP49* Gene and Identification of an Intragenic Polymorphic Marker to Allow Genetic Linkage Analysis in Autosomal Dominant Congenital Cataract	**Jane M. Carter, W. H. Irwin McLean, Sarah West, and Roy A. Quinlan**	432
Nitric Oxide Inhibits Cruzipain, the Major Papain-like Cysteine Proteinase from *Trypanosoma cruzi*	**Giorgio Venturini, Luca Salvati, Massimo Muolo, Marco Colasanti, Luigi Gradoni, and Paolo Ascenzi**	437
Properties of Ryanodine Receptor in Rat Muscles Submitted to Unloaded Conditions	**B. Bastide, A. Conti, V. Sorrentino, and Y. Mounier**	442
Lipid Oxidation Deletes the Nanodomain Organization of Artificial Membranes	**Umberto Muscatello, Andrea Alessandrini, Giovanni Valdré, Vanio Vannini, and Ugo Valdré**	448
Trichosanthin Interacts with and Enters Cells via LDL Receptor Family Members	**Wah-Lun Chan, Pang-Chui Shaw, Siu-Cheung Tam, Christian Jacobsen, Jørgen Gliemann, and Morten S. Nielsen**	453
Metallothionein-Null Mice Express Altered Genes during Development	**Tomoki Kimura, Ikuyo Oguro, Junya Kohroki, Miyako Takehara, Norio Itoh, Tsuyoshi Nakanishi, and Keiichi Tanaka**	458
Two Functionally Distinct Forms of NKX2.1 Protein Are Expressed in the Pulmonary Epithelium	**Changgong Li, Jiaxin Cai, Quping Pan, and Parviz Minoo**	462
ADP-Ribosyl Cyclase in Rat Salivary Glands	**Wataru Masuda and Tomoo Noguchi**	469
In Vitro Translation Extracts Prepared from *Drosophila* Ovaries and Embryos	**Yung S. Lie and Paul M. Macdonald**	473
Adhesion-Dependent Tyrosine Phosphorylation of Enabled in *Drosophila* Neuronal Cell Line	**Yasumitsu Takagi, Kumiko Ui-Tei, and Setsuo Hirohashi**	482
Skeletal Muscle CaMKII Enriches in Nuclei and Phosphorylates Myogenic Factor SRF at Multiple Sites	**Martin Flück, Frank W. Booth, and M. Neal Waxham**	488
Increased Aquaporin-4 Immunoreactivity in Rat Brain in Response to Systemic Hyponatremia	**Z. Vajda, D. Promeneur, T. Dóczi, E. Sulyok, J. Frøkiær, O. P. Ottersen, and S. Nielsen**	495
The Carboxyl Terminal Domain of Phosducin Functions as a Transcriptional Activator	**Xuemei Zhu and Cheryl M. Craft**	504
Expression of Myostatin Gene in Regenerating Skeletal Muscle of the Rat and Its Localization	**Keitaro Yamanouchi, Chie Soeta, Kunihiko Naito, and Hideaki Tojo**	510
Identification of Neural Progenitors in the Adult Mammalian Eye	**Iqbal Ahmad, Lin Tang, and Hao Pham**	517

Meltrin β (ADAM19) Gene: Cloning, Mapping, and Analysis of the Regulatory Region	**Kazuto Kurohara, Yoichi Matsuda, Akira Nagabukuro, Atsushi Tsuji, Teruo Amagasa, and Atsuko Fujisawa-Sehara**	**522**
Genomic Structures of Synaptotagmin II Protein: Comparison of Exon–Intron Organization of the *Synaptotagmin* Gene Family	**Mitsunori Fukuda and Katsuhiko Mikoshiba**	**528**
DNA Fragmentation Occurs in Skeletal Muscle during Tumor Growth: A Link with Cancer Cachexia?	**Martin van Royen, Neus Carbó, Sílvia Busquets, Belén Alvarez, LeBris S. Quinn, Francisco J. López-Soriano, and Josep M. Argilés**	**533**
Association of Membrane-Associated Guanylate Kinase-Interacting Protein-1 with Raf-1	**Ikuko Yao, Toshihisa Ohtsuka, Hiroshi Kawabe, Yoshiharu Matsuura, Yoshimi Takai, and Yutaka Hata**	**538**
Mutation of the Toxin Binding Site of PP-1c: Comparison with PP-2B	**John F. Dawson, Hue Anh Luu, John R. Bagu, and Charles F. B. Holmes**	**543**
Cell Adhesion Is a Prerequisite for Osteoclast Survival	**Hideaki Sakai, Yasuhiro Kobayashi, Eiko Sakai, Mitsue Shibata, and Yuzo Kato**	**550**
Two Acidic Amino Acid Residues, Asp(470) and Glu(471), Contained in the Carboxyl Cytoplasmic Tail of a Major Lysosomal Membrane Protein, LGP85/LIMP II, Are Important for Its Accumulation in Secondary Lysosomes	**Norihiko Tabuchi, Kenji Akasaki, and Hiroshi Tsuji**	**557**
LMW-PTP Exerts a Differential Regulation on PDGF- and Insulin-Mediated Signaling	**Maria Letizia Taddei, Paola Chiarugi, Paolo Cirri, Doriana Talini, Guido Camici, Giampaolo Manao, Giovanni Raugei, and Giampietro Ramponi**	**564**
Interaction between HIV-1 NEF and G_o Proteins in Transfected COS-7 Cells	**Francesca Guzzi, Elisa Celano, Giulio Levi, and Marco Parenti**	**570**
Rates of Evolution of Pyridoxal-5′-Phosphate-Dependent Enzymes	**Daniel Salzmann, Philipp Christen, Perdeep K. Mehta, and Erika Sandmeier**	**576**
Modulation of the Ca^{2+}-Activated Cl^- Channel by 14-3-3ϵ	**H. C. Chan, W. L Wu, S. C. So, Y. W. Chung, L. L. Tsang, X. F. Wang, Y. C. Yan, S. C. W. Luk, S. S. Siu, S. K. W. Tsui, K. P. Fung, C. Y. Lee, and M. M. Y. Waye**	**581**
Enzymatic Reconstruction of Dermatan Sulfate	**Keiichi Takagaki, Hidekazu Munakata, Ikuko Kakizaki, Mitsuo Majima, and Masahiko Endo**	**588**
Growth Hormones Reverse Desensitization of $P2Y_2$ Receptors in Rat Mesangial Cells	**Antonio M. Gutierrez, Xiaofen Lou, A. Erik G. Persson, and Avi Ring**	**594**
The Kinetics and Magnesium Requirements for the Folding of Antigenomic δ Ribozymes	**Sirinart Ananvoranich and Jean-Pierre Perreault**	**600**
Functional Comparison between YCF1 and MRP1 Expressed in Sf21 Insect Cells	**Xiao-Qin Ren, Tatsuhiko Furukawa, Zhe-Sheng Chen, Hiroshi Okumura, Shunji Aoki, Tomoyuki Sumizawa, Ayako Tani, Masaharu Komatsu, Xiao-Dong Mei, and Shin-ichi Akiyama**	**608**

Shear-Stress Effect on Mitochondrial Membrane Potential and Albumin Uptake in Cultured Endothelial Cells	**Susumu Kudo, Ryoma Morigaki, Junichi Saito, Mariko Ikeda, Kotaro Oka, and Kazuo Tanishita**	**616**
Effect of a Novel Vasoconstrictor Endothelin-1 (1-31) on Human Umbilical Artery	**Takashi Takeji, Yutaka Nakaya, Masaharu Kamada, Kazuhisa Maeda, Yoshika Saijo, Ryuji Mitani, Minoru Irahara, and Toshihiro Aono**	**622**
Heterogeneity of Catecholamine-Containing Vesicles in PC12 Cells	**Remco H. S. Westerink, Aart de Groot, and Henk P. M. Vijverberg**	**625**
Polarized Secretion of the Regulated Secretory Protein Chromogranin A	**Ulrike Kühn, David V. Cohn, and Sven-Ulrik Gorr**	**631**
Ectopic Expression of Active Processed Form of Atrial Natriuretic Peptide in Skeletal Myoblasts	**Jonghoe Byun, Suhn Hee Kim, Sung Zoo Kim, Jean-Michel Heard, Jeoung-Eun Huh, Yoon-Hyuk Choe, Sun-Jin Park, Eun-A Jung, and Duk-Kyung Kim**	**637**
Fluid Shear Stress Stimulates Prostaglandin and Nitric Oxide Release in Bone Marrow-Derived Preosteoclast-like Cells	**T. N. McAllister, T. Du, and J. A. Frangos**	**643**
Do Conjugated Eicosapentaenoic Acid and Conjugated Docosahexaenoic Acid Induce Apoptosis via Lipid Peroxidation in Cultured Human Tumor Cells?	**Miki Igarashi and Teruo Miyazawa**	**649**
Replicative Forms of TT Virus DNA in Bone Marrow Cells	**Hiroaki Okamoto, Masaharu Takahashi, Tsutomu Nishizawa, Akio Tawara, Yoshiki Sugai, Toshiaki Sai, Takeshi Tanaka, and Fumio Tsuda**	**657**
A Potent Inhibitor of Inducible Nitric Oxide Synthase, ONO-1714, a Cyclic Amidine Derivative	**Masao Naka, Toshiyuki Nanbu, Kaoru Kobayashi, Yoshihisa Kamanaka, Masaharu Komeno, Ryo Yanase, Tatsushi Fukutomi, Shinsei Fujimura, Han Geuk Seo, Noriko Fujiwara, Shuichi Ohuchida, Keiichiro Suzuki, Kigen Kondo, and Naoyuki Taniguchi**	**663**
Further Evidence for the Presence of "Septide-Sensitive" Tachykinin Binding Sites in Tissues Possessing Solely NK_1 Tachykinin Receptors	**Yvette Torrens, Jean-Claude Beaujouan, Monique Saffroy, and Jacques Glowinski**	**668**
Identification of Regulatory Regions of the Putative Tumor Suppressor Gene *DMBT1*	**E. Lualdi, E. Chiariello, and G. Finocchiaro**	**673**

ERRATUM

Volume **269,** Number 1 (2000), in the article "Paraoxonase Activity is Reduced by a Pro-atherosclerotic Diet in Rabbits," by Michael Mackness, Agnes Boullier, Nathalie Hennuyer, Bharti Mackness, Maxine Hall, Anne Tailleux, Patrick Duriez, Bernard Delfly, Paul Durrington, Jean-Charles Fruchart, Nicolas Duverger, Jean-Michel Caillaud, and Graciela Castro, pages 232–236 (doi:10.1006/bbrc.2000.2265) **676**

Number 3, April 21, 2000

BREAKTHROUGHS AND VIEWS

Muscle Force Arises by Actin Filament Rotation and Torque in the Z-Filaments **Robert Jarosch** 677

REGULAR ARTICLES

Surface and Interface β-Chain Residues Synergistically Affect Hemoglobin Assembly **Takamasa Yamaguchi, Yi Yang, Melisenda J. McDonald, and Kazuhiko Adachi** 683

Purification of the Newly Found Selenium-Containing Proteins in the Arterial Wall and Brain of the Rat **Xianghu Qu, Kaixun Huang, Zhengxing Wu, Shan Zhong, Zexian Chen, and Huibi Xu** 688

The Homeodomain of Nkx2.2 Carries Two Cooperatively Acting Nuclear Localization Signals **Behnam Hessabi, Ines Schmidt, and Reinhard Walther** 695

Potent Inhibition of Dendritic Cell Differentiation and Maturation by Vitamin D Analogs **Matthew D. Griffin, Ward H. Lutz, Vy A. Phan, Lori A. Bachman, David J. McKean, and Rajiv Kumar** 701

Expression of Vascular Endothelial Growth Factor mRNA in GI-101A and HL-60 Cell Lines **Ramugounder Ramakrishnan, Jason A. Zell, Andres Malavé, and Appu Rathinavelu** 709

Improvement in Circulating Superoxide Dismutase Levels: Role of Nonsteroidal Anti-inflammatory Drugs in Rheumatoid Arthritis **Manish Nivsarkar** 714

A Missense Mutation in the RING Finger Motif of PEX2 Protein Disturbs the Import of Peroxisome Targeting Signal 1 (PTS1)-Containing Protein but Not the PTS2-Containing Protein **Yuan Huang, Ritsu Ito, Satoshi Miura, Takashi Hashimoto, and Masaki Ito** 717

Disulfide-Bound Proteolytic Fragments of Gastric Mucin Are 100- and 140-kDa Proteins **Iwona Minkiewicz-Radziejewska, Andrzej Gindzieński, and Krzysztof Zwierz** 722

Characterization of 5′-Flanking Region of Human MRP3 **Tappei Takada, Hiroshi Suzuki, and Yuichi Sugiyama** 728

Plasmid-Encoded Degradation of *p*-Nitrophenol and 4-Nitrocatechol by *Arthrobacter protophormiae* **Ashvini Chauhan, Asit K. Chakraborti, and Rakesh K. Jain** 733

Ca^{2+}-Modulated Phosphorylation of a Low-Molecular-Mass Polypeptide in Rat Liver Mitochondria: Evidence That It Is Identical with Subunit c of F_0F_1-ATPase **Tamara S. Azarashvily, Jaana Tyynelä, Marc Baumann, Yuri V. Evtodienko, and Nils-Erik L. Saris** 741

Magnetic Field Exposure Stimulates Transposition through the Induction of DnaK/J Synthesis **King-Chuen Chow and Wai Lin Tung** 745

Protein Degradation by Peroxide Catalyzed by Chromium (III): Role of Coordinated Ligand **H. Yamini Shrivastava and Balachandran Unni Nair** 749

Targeting of Liposomes Carrying Recombinant Fragments of Platelet Membrane Glycoprotein Ibα to Immobilized von Willebrand Factor under Flow Conditions	**Takako Nishiya, Mitsuru Murata, Makoto Handa, and Yasuo Ikeda**	755
PYK2/CAKβ Represents a Redox-Sensitive Tyrosine Kinase in Vascular Smooth Muscle Cells	**Gerald D. Frank, Evangeline D. Motley, Tadashi Inagami, and Satoru Eguchi**	761
Identification of an Upstream Promoter in the Human Gonadotropin-Releasing Hormone Receptor Gene	**Elly S. W. Ngan, Peter C. K. Leung, and Billy K. C. Chow**	766
Analysis of *Drosophila yellow-B* cDNA Reveals a New Family of Proteins Related to the Royal Jelly Proteins in the Honeybee and to an Orphan Protein in an Unusual Bacterium *Deinococcus radiodurans*	**R. Maleszka and R. Kucharski**	773
Residue 285 in Cytochrome P450 2B4 Lacking the NH_2-Terminal Hydrophobic Sequence Has a Role in the Functional Association of NADPH–Cytochrome P450 Reductase	**Johannes Schulze, Katharina Tschöp, Michael Lehnerer, and Peter Hlavica**	777
Methylene Blue Photosensitized Oxidation of Cysteine Sulfinic Acid and Other Sulfinates: The Involvement of Singlet Oxygen and the Azide Paradox	**Laura Pecci, Mara Costa, Antonio Antonucci, Gabriella Montefoschi, and Doriano Cavallini**	782
Characterization of the Human Porin Isoform 1 (HVDAC1) Gene by Amplification on the Whole Human Genome: A Tool for Porin Deficiency Analysis	**Angela Messina, Francesca Guarino, Marta Oliva, Lambert P. van den Heuvel, Jan Smeitink, and Vito De Pinto**	787
Involvement of Caspase-3 in Epigallocatechin-3-gallate-Mediated Apoptosis of Human Chondrosarcoma Cells	**Shabana Islam, Najmul Islam, Timothy Kermode, Brian Johnstone, Hasan Mukhtar, Roland W. Moskowitz, Victor M. Goldberg, Charles J. Malemud, and Tariq M. Haqqi**	793
Wortmannin, a PI3-Kinase Inhibitor: Promoting Effect on Insulin Secretion from Pancreatic β Cells through a cAMP-Dependent Pathway	**Kumiko Nunoi, Koichiro Yasuda, Hisako Tanaka, Akira Kubota, Yoshimasa Okamoto, Tetsuya Adachi, Nobuyuki Shihara, Mika Uno, Li ming Xu, Shinji Kagimoto, Yutaka Seino, Yuichiro Yamada, and Kinsuke Tsuda**	798
Activation of Neuroendocrine L-Type Channels (α1D Subunits) in Retinal Pigment Epithelial Cells and Brain Neurons by $pp60^{c\text{-}src}$	**Olaf Strauss, Foline Buss, Rita Rosenthal, Dirk Fischer, Stefan Mergler, Friederike Stumpff, and Hagen Thieme**	806
Paradoxical Effects of Mineralocorticoids on the Ion Gated Sodium Channel in Embryologically Diverse Cells	**M. Mirshahi, N. Golestaneh, F. Valamanesh, and M. K. Agarwal**	811
Bcl-2 Antibodies Induce Hemoglobin Release by Red Blood Cells Loaded with *in Vitro* Translated Bcl-2 and Its Cleaved Fragment	**Catheryne Chen, Hong Lin, and Ben D. Chen**	816

Lysine Residues 162 and 340 Are Involved in the Catalysis and Coenzyme Binding of $NADP^+$-Dependent Malic Enzyme from Pigeon	**Chen-Chin Kuo, Li-Chu Tsai, Ting-Yu Chin, Gu-Gang Chang, and Wei-Yuan Chou**	**821**
Evaluation of Boar Sperm as a Model System to Study the Mechanism of Spermicidal Activity of Vanadocenes	**Osmond J. D'Cruz, Alexei Vassilev, and Fatih M. Uckun**	**826**
Surfactant Protein A Exhibits Inhibitory Effect on Eosinophils IL-8 Production	**Gang Cheng, Takashi Ueda, Hirokazu Nakajima, Akiko Nakajima, Masafumi Arima, Syunichi Kinjyo, and Takeshi Fukuda**	**831**
Electrogenic Nature of Rat Sodium-Dependent Multivitamin Transport	**Puttur D. Prasad, Sonne R. Srinivas, Haiping Wang, Frederick H. Leibach, Lawrence D. Devoe, and Vadivel Ganapathy**	**836**
Quantification of SNARE Protein Levels in 3T3-L1 Adipocytes: Implications for Insulin-Stimulated Glucose Transport	**Gilles R. X. Hickson, Luke H. Chamberlain, Valerie H. Maier, and Gwyn W. Gould**	**841**
Retinoic Acid Inhibits Nitric Oxide Synthase-2 Expression through the Retinoic Acid Receptor-α	**Allan Sirsjö, Andreas C. Gidlöf, Anneli Olsson, Hans Törmä, Mikko Ares, Hartmut Kleinert, Ulrich Förstermann, and Göran K. Hansson**	**846**
Measurement of 5-Hydroxy-2-aminovaleric Acid as a Specific Marker of Iron-Mediated Oxidation of Proline and Arginine Side-Chain Residues of Low-Density Lipoprotein Apolipoprotein B-100	**Jens Pietzsch**	**852**
Neutrophil β2-Integrin Upregulation Is Blocked by a p38 MAP Kinase Inhibitor	**Rajnish Tandon, Ramadan I. Sha'afi, and Roger S. Thrall**	**858**
NifH and NifM Proteins Interact as Demonstrated by the Yeast Two-Hybrid System	**Nina Petrova, Liliana Gigova, and Pencho Venkov**	**863**
Characterization of Bax-σ, a Cell Death-Inducing Isoform of Bax	**Estelle Schmitt, Claudie Paquet, Myriam Beauchemin, Jessica Dever-Bertrand, and Richard Bertrand**	**868**
Reduction of Organic Nitrites to Nitric Oxide Catalyzed by Xanthine Oxidase: Possible Role in Metabolism of Nitrovasodilators	**Justin J. Doel, Ben L. J. Godber, Tracey A. Goult, Robert Eisenthal, and Roger Harrison**	**880**
Anabolic Function of the Type II Isozyme of Hexokinase in Hepatic Lipid Synthesis	**Siby Sebastian, Jay D. Horton, and John E. Wilson**	**886**
Regulation of Urokinase Receptor Transcription by Ras- and Rho-Family GTPases	**Silke M. Muller, Emel Okan, and Peter Jones**	**892**
α-Galactosidase Stimulates Acetylcholine Receptor Aggregation in Skeletal Muscle Cells via PNA-Binding Carbohydrates	**Natasha Parkhomovskiy and Paul T. Martin**	**899**

MAGI-1 Interacts with β-Catenin and Is Associated with Cell–Cell Adhesion Structures	**Irina Y. Dobrosotskaya and Guy L. James**	903
Evidence for Tryptophan in Proximity to Histidine and Cysteine as Essential to the Active Site of an Alkaline Protease	**Aparna M. Tanksale, Jui V. Vernekar, Mohini S. Ghatge, and Vasanti V. Deshpande**	910
Estrogen Receptor-Mediated Effects of a Xenoestrogen, Bisphenol A, on Preimplantation Mouse Embryos	**Yasushi Takai, Osamu Tsutsumi, Yumiko Ikezuki, Hisahiko Hiroi, Yutaka Osuga, Mikio Momoeda, Tetsu Yano, and Yuji Taketani**	918
CYP2D6 Polymorphism and the Presence of Anti-LKM-1 in Patients with Chronic Hepatitis C	**Minako Hijikata, Hiroshi Miyakawa, Masanao Matsushita, Makoto Kako, Yasuhiko Ohta, and Shunji Mishiro**	922
Phosphorylation of the 105-kDa Heat Shock Proteins, HSP105α and HSP105β, by Casein Kinase II	**Keiichi Ishihara, Kunihiko Yasuda, and Takumi Hatayama**	927
Role of the Recombinant Non-Integrin Platelet Collagen Receptor P65 on Platelet Activation Induced by Convulxin	**Ivo M. B. Francischetti, Thomas M. Chiang, Jorge A. Guimarães, and Cassian Bon**	932
LDL Receptor-Related Protein as a Component of the Midkine Receptor	**Hisako Muramatsu, Kun Zou, Nahoko Sakaguchi, Shinya Ikematsu, Sadatoshi Sakuma, and Takashi Muramatsu**	936
Evidence for Production of Hydroxyl Radicals by Pentachlorophenol Metabolites and Hydrogen Peroxide: A Metal-Independent Organic Fenton Reaction	**Ben-Zhan Zhu, Nahum Kitrossky, and Mordechai Chevion**	942
Activation of Akt during Simulated Ischemia/Reperfusion in Cardiac Myocytes	**James W. Mockridge, Michael S. Marber, and Richard J. Heads**	947
Inhibition of HIV-1 Replication by a New Type of Circular Dumbbell RNA/DNA Chimeric Oligonucleotides	**Wee-Sung Park, Naoko Miyano-Kurosaki, Takayuki Abe, Kazuyuki Takai, Naoki Yamamoto, and Hiroshi Takaku**	953
Air Exposure Promotes Fibroblast Growth with Increased Expression of Mitogen-Activated Protein Kinase Cascade	**Shuji Toda, Fumiaki Yokoi, Shoichiro Yamada, Nobuhisa Yonemitsu, Tomohisa Nishimura, Keiko Watanabe, and Hajime Sugihara**	961
NMR Observation of a Novel C-Tetrad in the Structure of the SV40 Repeat Sequence GGGCGG	**P. K. Patel, Neel S. Bhavesh, and R. V. Hosur**	967
Localization of Active Form of Caspase-8 in Mouse L929 Cells Induced by TNF Treatment and Polyglutamine Aggregates	**Yoriko Kouroku, Eriko Fujita, Atushi Jimbo, Takeshi Mukasa, Tomohiko Tsuru, Mariko Y. Momoi, and Takashi Momoi**	972
Emx1-Specific Expression of Foreign Genes Using "Knock-in" Approach	**Xiao-Lu Jin, Huailian Guo, Chengjian Mao, Norman Atkins, Hong Wang, Prachee Pradeep Avasthi, Yen-Te Tu, and Yuqing Li**	978

Arginines 97 and 108 in CYP2C9 Are Important Determinants of the Catalytic Function — **Marianne Ridderström, Collen Masimirembwa, Susanne Trump-Kallmeyer, Maria Ahlefelt, Charlotta Otter, and Tommy B. Andersson** — **983**

Conformational Changes in the Human Estrogen Receptor Observed by ^{19}F NMR — **Linda A. Luck, Jessica L. Barse, Amanda M. Luck, and Colleen H. Peck** — **988**

Inhibition of CXCR4-Dependent HIV-1 Infection by Extracellular HIV-1 Tat — **Silvia Ghezzi, Douglas M. Noonan, Maria Grazia Aluigi, Giuliana Vallanti, Manuela Cota, Roberto Benelli, Monica Morini, Jacqueline D. Reeves, Elisa Vicenzi, Guido Poli, and Adriana Albini** — **992**

Increased Intracellular Triglyceride in C_2C_{12} Muscle Cells Transfected with Human Lipoprotein Lipase — **Paul Poirier, Tere Marcell, Patricia Uelmen Huey, Isabel R. Schlaepfer, Geoffrey C. Owens, Dalan R. Jensen, and Robert H. Eckel** — **997**

Identification of Tranilast-Binding Protein as 36-kDa Microfibril-Associated Glycoprotein by Drug Affinity Chromatography, and Its Localization in Human Skin — **Hiromi Furuichi, Kayoko Yamashita, Miki Okada, Tetsuhiko Toyoshima, Yuirou Hata, Shigehiko Suzuki, Toshifumi Itano, Tsuyoshi Shishibori, Hiroshi Tokumitsu, and Ryoji Kobayashi** — **1002**

Functional Characterization of Jurkat T Cells Rescued from CD95/Fas-Induced Apoptosis through the Inhibition of Caspases — **S. C. W. Ko, V. L. Johnson, and S. C. Chow** — **1009**

Characterization of P5, a Novel NFAT/AP-1 Site in the Human IL-4 Promoter — **Thomas F. Burke, Vincenzo Casolaro, and Steve N. Georas** — **1016**

Comparative Studies of Two Transthyretin Variants with Protective Effects on Familial Amyloidotic Polyneuropathy: TTR R104H and TTR T119M — **M. R. Almeida, I. L. Alves, H. Terazaki, Y. Ando, and M. J. Saraiva** — **1024**

IGF-1 Regulates Apoptosis of Cardiac Myocyte Induced by Osmotic-Stress — **María Paz Morales, Anita Gálvez, José Miguel Eltit, Paula Ocaranza, Guillermo Díaz-Araya, and Sergio Lavandero** — **1029**

Stimulation of Yeast 3-Phosphoglycerate Kinase Gene Promoter by Paraquat — **Neville Vassallo, Dolores R. Galea, William H. Bannister, and Rena Balzan** — **1036**

Characterization of Rat OX40 Ligand by Monoclonal Antibody — **Yoshiyuki Satake, Hisaya Akiba, Kazuyoshi Takeda, Machiko Atsuta, Hideo Yagita, and Ko Okumura** — **1041**

The Regulatory Expression of Procollagen COOH-Terminal Proteinase Enhancer in the Proliferation of Vascular Smooth Muscle Cells — **Tatsuro Kanaki, Nobuhiro Morisaki, Hideaki Bujo, Kazuo Takahashi, Itsuko Ishii, and Yasushi Saito** — **1049**

Intranuclear Binding by the HIV-1 Regulatory Protein VPR Is Dependent on Cytosolic Factors — **David A. Jans, Patricia Jans, Torsten Jülich, Lyndall J. Briggs, Chong-Yun Xiao, and Sabine C. Piller** — **1055**

Dexamethasone Increases RAMP1 and CRLR mRNA Expressions in Human Vascular Smooth Muscle Cells — **Stéphane Frayon, Carine Cueille, Sédami Gnidéhou, Marie-Christine de Vernejoul, and Jean-Michel Garel** — **1063**

Functional Expression of Four PDH-E$_1\alpha$ Recombinant Histidine Mutants in a Human Fibroblast Cell Line with Zero Endogenous PDH Complex Activity	**Agnieszka Seyda and Brian H. Robinson**	**1068**
Up-regulation of Natriuretic Peptides in the Ventricle of Csx/Nkx2-5 Transgenic Mice	**Eiki Takimoto, Takehiko Mizuno, Fumio Terasaki, Masaki Shimoyama, Hiroaki Honda, Ichiro Shiojima, Yukio Hiroi, Toru Oka, Doubun Hayashi, Hisamaru Hirai, Sumiyo Kudoh, Haruhiko Toko, Keishiro Kawamura, Ryozo Nagai, Yoshio Yazaki, and Issei Komuro**	**1074**
Differential Stimulation by PGE$_2$ and Calcemic Hormones of IL-6 in Stromal/Osteoblastic Cells	**Reinhard Gruber, Gudrun Nothegger, Guan-Min Ho, Martin Willheim, and Meinrad Peterlik**	**1080**
Myeloperoxidase-Catalyzed Phenoxyl Radicals of Vitamin E Homologue, 2,2,5,7,8-Pentamethyl-6-hydroxychromane, Do Not Induce Oxidative Stress in Live HL-60 Cells	**Valerian E. Kagan, Alexander I. Kuzmenko, Anna A. Shvedova, Elena R. Kisin, Yulia Y. Tyurina, and Jack C. Yalowich**	**1086**
Modification of Cullin-1 by Ubiquitin-like Protein Nedd8 Enhances the Activity of SCF^{skp2} toward p27^{kip1}	**Mitsuru Morimoto, Tamotsu Nishida, Reiko Honda, and Hideyo Yasuda**	**1093**
Breast Cancer Cell Line MDA-231 Stimulates Osteoclastogenesis and Bone Resorption in Human Osteoclasts	**Maria Grano, Giorgio Mori, Vincenza Minielli, Francesco P. Cantatore, Silvia Colucci, and Alberta Zambonin Zallone**	**1097**
Molecular Cloning and Expression of Human L-Pipecolate Oxidase	**Lodewijk IJlst, Isabella de Kromme, Wendy Oostheim, and Ronald J. A. Wanders**	**1101**
Structure of the Human Ubiquitin Fusion Gene Uba80 (RPS27a) and One of Its Pseudogenes	**Lawrence S. Kirschner and Constantine A. Stratakis**	**1106**
TUBA8: A New Tissue-Specific Isoform of α-Tubulin That Is Highly Conserved in Human and Mouse	**Fabio Stanchi, Valerio Corso, Paolo Scannapieco, Chiara Ievolella, Enrico Negrisolo, Natascia Tiso, Gerolamo Lanfranchi, and Giorgio Valle**	**1111**
Depolarizing Stimuli Reduce Ca^{2+}/Calmodulin-Dependent Protein Kinase II Activity in Islets of Langerhans	**Tracey E. Harris, Shanta J. Persaud, Paul E. Squires, and Peter M. Jones**	**1119**
A CD36-Binding Peptide from Thrombospondin-1 Can Stimulate Resorption by Osteoclasts *in Vitro*	**J. A. Carron, S. C. Wagstaff, J. A. Gallagher, and W. B. Bowler**	**1124**
Antibody Binding of Deletion Mutants of Asp f 2, the Major *Aspergillus fumigatus* Allergen	**Bin Tang, Banani Banerjee, Paul A. Greenberger, Jordan N. Fink, Kevin J. Kelly, and Viswanath P. Kurup**	**1128**
Sense Codon-Dependent Introduction of Unnatural Amino Acids into Multiple Sites of a Protein	**Takayuki Kanda, Kazuyuki Takai, Takahiro Hohsaka, Masahiko Sisido, and Hiroshi Takaku**	**1136**

Hepatic Zinc Response via Metallothionein Induction after Tumor Transplantation	**Haruna Tamano, Emi Igasaki, Shuichi Enomoto, Naoto Oku, Norio Itoh, Tomoki Kimura, Keiichi Tanaka, and Atsushi Takeda**	**1140**
The Orphan Receptor COUP-TFII Regulates G2/M Progression of Breast Cancer Cells by Modulating the Expression/Activity of p21$^{WAF1/CIP1}$, Cyclin D1, and cdk2	**Harikrishna Nakshatri, Marc S. Mendonca, Poornima Bhat-Nakshatri, Nikhil M. Patel, Robert J. Goulet, Jr., and Kenneth Cornetta**	**1144**
Author Index for Volume 270		**1154**

Volume 271, Number 1, April 29, 2000

Zinc Increases the Activity of Vitamin D-Dependent Promoters in Osteoblasts	**Ward Lutz, Mary F. Burritt, David E. Nixon, Pai Chih Kao, and Rajiv Kumar**	1
Molecular Cloning and Genomic Structure of Human *Frizzled-3* at Chromosome 8p21	**Hiroyuki Kirikoshi, Jun Koike, Norihiko Sagara, Tetsuroh Saitoh, Makoto Tokuhara, Katsuaki Tanaka, Hisahiko Sekihara, Momoki Hirai, and Masaru Katoh**	8
Contribution of the Carboxy-Terminal Domain of Lipoprotein Lipase to Interaction with Heparin and Lipoproteins	**Aivar Lookene, Morten S. Nielsen, Jørgen Gliemann, and Gunilla Olivecrona**	15
Oligosaccharide Trimming Plays a Role in the Endoplasmic Reticulum-Associated Degradation of Tyrosinase	**Ye Wang and Matthew J. Androlewicz**	22
Cloning and Initial Characterization of the Human *DPYD* Gene Promoter	**E. S. R. Collie-Duguid, S. J. Johnston, R. H. Powrie, G. Milano, M. C. Etienne, B. Rochat, G. C. Watson, and H. L. McLeod**	28
Rat Basophilic Leukemia Cells Express Syntaxin-3 and VAMP-7 in Granule Membranes	**Terumasa Hibi, Naohide Hirashima, and Mamoru Nakanishi**	36
The Product of the ABC Half-Transporter Gene *ABCG2* (BCRP/MXR/ABCP) Is Expressed in the Plasma Membrane	**Emmanuelle Rocchi, Alexey Khodjakov, Erin L. Volk, Chih-Hsin Yang, Thomas Litman, Susan E. Bates, and Erasmus Schneider**	42
Interrelations Between Plasma Homocysteine and Intracellular *S*-Adenosylhomocysteine	**Weiyu Fu, Nicholas P. B. Dudman, Michael A. Perry, Kenny Young, and Xing Li Wang**	47
Cry1Ac Protoxin from *Bacillus thuringiensis* sp. *kurstaki* HD73 Binds to Surface Proteins in the Mouse Small Intestine	**Roberto I. Vázquez-Padrón, Joel Gonzáles-Cabrera, Carlos García-Tovar, Leticia Neri-Bazan, Rubén Lopéz-Revilla, Manuel Hernández, Leticia Moreno-Fierro, and Gustavo A. de la Riva**	54
Tyrosine 50 at the Subunit Interface of Dimeric Human Glutathione Transferase P1-1 Is a Structural Key Residue for Modulating Protein Stability and Catalytic Function	**Gun Stenberg, Abdel-Monem Abdalla, and Bengt Mannervik**	59
The β_2 Subunit of Soluble Guanylyl Cyclase Contains a Human-Specific Frameshift and Is Expressed in Gastric Carcinoma	**Sönke Behrends and Kai Vehse**	64
IgG-Coated Erythrocytes Augment LPS-Stimulated TNF-α Secretion, TNF-α mRNA Levels, and TNF-α mRNA Stability in Macrophages	**Craig A. H. Richard, Brian D. Wilcox, and Daniel J. Loegering**	70
Involvement of Tail Domains in Regulation of *Dictyostelium* Myosin II	**Xiong Liu, Kohji Ito, Randall J. Lee, and Taro Q. P. Uyeda**	75

Effect of Estradiol on Neuronal Swedish-Mutated β-Amyloid Precursor Protein Metabolism: Reversal by Astrocytic Cells	**Bruno Vincent and Jonathan D. Smith**	**82**
Decreased ADP-Ribosylation of the $G\alpha_{olf}$ and $G\alpha_s$ Subunits by High Glucose in Pancreatic B-Cells	**H. H. Phan, C. Boissard, M. Pessah, K. Regnauld, S. Emami, C. Gespach, and G. Rosselin**	**86**
An SP1-like *cis*-Element Is the Major DNA Motif for Differential Expression Regulation of the Adipocyte Amino Acid Transporter	**Qingwei Zhu, Jiang Zhu, and Kan Liao**	**91**
Differential Expression of the Adipocyte Amino Acid Transporter Is Transactivated by SP1 and SP3 during the 3T3-L1 Preadipocyte Differentiation Process	**Qingwei Zhu and Kan Liao**	**100**
Direct Immunization of Malaria DNA Vaccine into the Liver by Gene Gun Protects against Lethal Challenge of *Plasmodium berghei* Sporozoite	**Shigeto Yoshida, Shin-Ichiro Kashiwamura, Yoshinori Hosoya, Enjie Luo, Hiroyuki Matsuoka, Akira Ishii, Akio Fujimura, and Eiji Kobayashi**	**107**
Nestin-Expressing Cells in the Pancreatic Islets of Langerhans	**Eric Hunziker and Maria Stein**	**116**
Enhanced Detection of Deleterious and Other Germline Mutations of hMSH2 and hMLH1 in Japanese Hereditary Nonpolyposis Colorectal Cancer Kindreds	**Sachio Nomura, Kokichi Sugano, Hidefumi Kashiwabara, Takahiro Taniguchi, Noriko Fukayama, Shin Fujita, Takayuki Akasu, Yoshihiro Moriya, Seiji Ohhigashi, Tadao Kakizoe, and Takao Sekiya**	**120**
In Situ RT-PCR Detection of CYP1A mRNA in Pharyngeal Epithelium and Chondroid Cells from Chemically Untreated Fish: Involvement in Vertebrate Craniofacial Skeletal Development?	**Hisato Iwata and John J. Stegeman**	**130**
Expression of Interleukin-1β, Interleukin-1 Receptor, and Interleukin-1 Receptor Antagonist mRNA in Rat Carotid Artery after Balloon Angioplasty	**Xinkang Wang, Anne M. Romanic, Tian-Li Yue, Giora Z. Feuerstein, and Eliot H. Ohlstein**	**138**
Human Adrenoleukodystrophy Protein and Related Peroxisomal ABC Transporters Interact with the Peroxisomal Assembly Protein PEX19p	**Christian J. Gloeckner, Peter U. Mayerhofer, Pablo Landgraf, Ania C. Muntau, Andreas Holzinger, Josef-Karl Gerber, Stefan Kammerer, Jerzy Adamski, and Adelbert A. Roscher**	**144**
XSIP1, a Member of Two-Handed Zinc Finger Proteins, Induced Anterior Neural Markers in *Xenopus laevis* Animal Cap	**Akira Eisaki, Hiroki Kuroda, Akimasa Fukui, and Makoto Asashima**	**151**
The Inhibitory Effects of Vasoactive Intestinal Peptide and Pituitary Adenylate Cyclase-Activating Polypeptide on Osteoclast Formation Are Associated with Upregulation of Osteoprotegerin and Downregulation of RANKL and RANK	**Hitoshi Mukohyama, Maria Ransjö, Hisashi Taniguchi, Takashi Ohyama, and Ulf H. Lerner**	**158**

Small Heat Shock Protein 27 (HSP27) Associates with Tubulin/Microtubules in HeLa Cells	**Mizuki Hino, Kazuki Kurogi, Masa-Aki Okubo, Maki Murata-Hori, and Hiroshi Hosoya**	**164**
Differential Expression of Sense and Antisense Transcripts of the Mitochondrial DNA Region Coding for ATPase 6 in Fetal and Adult Porcine Brain: Identification of Novel Unusually Assembled Mitochondrial RNAs	**Uwe Michel, Argyrios K. Stringaris, Roland Nau, and Peter Rieckmann**	**170**
Monoamine Oxidase B Induces ERK-Dependent Cell Mitogenesis by Hydrogen Peroxide Generation	**Cécile Vindis, Marie-Hélène Séguélas, Pascale Bianchi, Angelo Parini, and Claudie Cambon**	**181**
Silkworm Hemolymph Inhibits Baculovirus-Induced Insect Cell Apoptosis	**Won Jong Rhee and Tai Hyun Park**	**186**
Animal and Plant Members of a Gene Family with Similarity to Alkaloid-Synthesizing Enzymes	**Marco Fabbri, Gabriele Delp, Otto Schmidt, and Ulrich Theopold**	**191**
Decreased Gene Expression of Adrenomedullin Receptor in Mouse Lungs during Sepsis	**Yukari Ono, Ichiro Okano, Masayasu Kojima, Kazuo Okada, and Kenji Kangawa**	**197**
Mechanism of Regulation of HGF/SF Gene Expression in Fibroblasts by TGF-β1	**Phillip Harrison, Lara Bradley, and Adrian Bomford**	**203**
The Pro12Ala Polymorphism in PPAR γ2 May Confer Resistance to Type 2 Diabetes	**Kazuo Hara, Terumasa Okada, Kazuyuki Tobe, Kazuki Yasuda, Yasumichi Mori, Hiroko Kadowaki, Ryoko Hagura, Yasuo Akanuma, Satoshi Kimura, Chikako Ito, and Takashi Kadowaki**	**212**
Enhancement of S-Nitrosylation in Glycosylated Hemoglobin	**Julio Padrón, Concepción Peiró, Elena Cercas, José L. Llergo, and Carlos F. Sánchez-Ferrer**	**217**
In Vivo Metabolic Imaging of Cardiac Bioenergetics in Transgenic Mice	**E. Omerovic, M. Basetti, E. Bollano, M. Bohlooly, J. Törnell, J. Isgaard, Å. Hjalmarson, B. Soussi, and F. Waagstein**	**222**
Chitinous Materials Inhibit Nitric Oxide Production by Activated RAW 264.7 Macrophages	**Shiaw-Min Hwang, Chiung-Yun Chen, Shan-Shan Chen, and Jian-Chyi Chen**	**229**
Drug-Induced Desensitization of Insulinotropic Actions of Sulfonylureas	**Andrew J. Ball, Jane T. McCluskey, Peter R. Flatt, and Neville H. McClenaghan**	**234**
Light Chain Determines the Binding Property of Human Anti-dsDNA IgG Autoantibodies	**Motohiro Suzuki, Hiroyuki Takemura, Hiroshi Suzuki, and Takayuki Sumida**	**240**
ADP Modulates the Dynamic Behavior of the Glycolytic Pathway of *Escherichia coli*	**Juan C. Diaz Ricci**	**244**
Zinc-Deficient Rat Embryos Have Increased Caspase 3-like Activity and Apoptosis	**Margaret A. Jankowski-Hennig, Michael S. Clegg, George P. Daston, John M. Rogers, and Carl L. Keen**	**250**
The Differential Expression of Apoptosis Factors in the Alveolar Epithelium Is Redox Sensitive and Requires NF-κB (RelA)-Selective Targeting	**John J. E. Haddad and Stephen C. Land**	**257**

Direct Evidence for Decreased Sialylation and Galactosylation of Human Serum IgA1 Fc O-Glycosylated Hinge Peptides in IgA Nephropathy by Mass Spectrometry — **Hiroko Odani, Yoshiyuki Hiki, Mami Takahashi, Akeyo Nishimoto, Yoshinari Yasuda, Hitoo Iwase, Toru Shinzato, and Kenji Maeda** 268

Number 2, May 10, 2000

BREAKTHROUGHS AND VIEWS

Structure of O-Linked GlcNAc Transferase: Mediator of Glycan-Dependent Signaling — **Mark D. Roos and John A. Hanover** 275

REGULAR ARTICLES

An O-Acetylated Sialyl-Tn Is Involved in Ovarian Cancer-Associated Antigenicity — **Shinya Toba, Mari Tenno, and Akira Kurosaka** 281

Glycosaminoglycan-Binding Properties and Secondary Structure of the C-Terminus of Netrin-1 — **Joachim Kappler, Sebastian Franken, Ulrich Junghans, Ralf Hoffmann, Thomas Linke, Hans Werner Müller, and Karl-Wilhelm Koch** 287

Stable Interdomain Interaction within the Cytoplasmic Domain of CD45 Increases Enzyme Stability — **Jackie Felberg and Pauline Johnson** 292

Phosphorylation of Cdc20/Fizzy Negatively Regulates the Mammalian Cyclosome/APC in the Mitotic Checkpoint — **Yana Yudkovsky, Michal Shteinberg, Tamar Listovsky, Michael Brandeis, and Avram Hershko** 299

PCCX1, a Novel DNA-Binding Protein with PHD Finger and CXXC Domain, Is Regulated by Proteolysis — **Tadahiro Fujino, Mayumi Hasegawa, Shinsuke Shibata, Taishiro Kishimoto, Shin-ichiro Imai, and Toshiya Takano** 305

Differential Involvement of Vacuolar H^+-ATPase in the Refilling of Thapsigargin- and Agonist-Mobilized Ca^{2+} Stores — **C. Camello-Almaraz, J. A. Pariente, G. Salido, and P. J. Camello** 311

Suppression of Endothelin-Converting Enzyme-1 during Buccal Mucosal Ulcer Healing: Effect of Chronic Alcohol Ingestion — **Bronislaw L. Slomiany, Jerzy Piotrowski, and Amalia Slomiany** 318

Exposure to Extremely Low Frequency Magnetic Fields Suppresses X-Ray-Induced Transformation in Mouse C3H10T1/2 Cells — **Junji Miyakoshi, Masami Yoshida, Hiroko Yaguchi, and Gui-Rong Ding** 323

Ras GTPase Is Essential for Fas-Mediated Activation of Phospholipase D in A20 Cells — **Incheol Shin and Joong-Soo Han** 328

Cloning and Expression of β,β-Carotene 15,15′-Dioxygenase — **A. Wyss, G. Wirtz, W.-D. Woggon, R. Brugger, M. Wyss, A. Friedlein, H. Bachmann, and W. Hunziker** 334

Susceptibility of the Prion Protein to Enzymic Phosphorylation	**Alessandro Negro, Flavio Meggio, Alessandro Bertoli, Roberto Battistutta, M. Catia Sorgato, and Lorenzo A. Pinna**	337
PI3-K/AKT Regulation of NF-κB Signaling Events in Suppression of TNF-Induced Apoptosis	**Matthew E. Burow, Christopher B. Weldon, Lilia I. Melnik, Bich N. Duong, Bridgette M. Collins-Burow, Barbara S. Beckman, and John A. McLachlan**	342
The Ovine CCAAT-Enhancer Binding Protein δ Gene: Cloning, Characterization, and Species-Specific Autoregulation	**Gareth E. Davies, Georgios Sabatakos, Anthony Cryer, and Dipak P. Ramji**	346
Nitric Oxide Inhibits Inducible Nitric Oxide Synthase mRNA Expression in RAW 264.7 Macrophages	**Burkhard Hinz, Kay Brune, and Andreas Pahl**	353
Mutation Analysis of Cadherin-4 Reveals Amino Acid Residues of EC1 Important for the Structure and Function	**Michihiro Kitagawa, Michiya Natori, Sachiko Murase, Shinji Hirano, Shigeru Taketani, and Shintaro T. Suzuki**	358
Dexamethasone Inhibits Tumor Necrosis Factor-α-Induced Expression of Macrophage Inflammatory Protein-2 and Adhesion of Neutrophils to Endothelial Cells	**Qing Liu, Yusheng Wang, and Henrik Thorlacius**	364
Hyperosmotic NaCl and Urea Synergistically Regulate the Expression of the UT-A2 Urea Transporter *in Vitro* and *in Vivo*	**Christine Leroy, Gilles Basset, Gaëtan Gruel, Pierre Ripoche, Marie-Marcelle Trinh-Trang-Tan, and Germain Rousselet**	368
Natriuretic Peptide Receptor-A Negatively Regulates Mitrogen-Activated Protein Kinase and Proliferation of Mesangial Cells: Role of cGMP-Dependent Protein Kinase	**Kailash N. Pandey, Houng T. Nguyen, Ming Li, and John W. Boyle**	374
The Nuclear-Encoded SDH2-RPS14 Precursor Is Proteolytically Processed between SDH2 and RPS14 to Generate Maize Mitochondrial RPS14	**Pablo Figueroa, Loreto Holuigue, Alejandro Araya, and Xavier Jordana**	380
Enhanced Macrophage Uptake of Elastase-Modified High-Density Lipoproteins	**Angela Pirillo and Giancarlo Ghiselli**	386
Overexpression of Human UDP-Glucose Pyrophosphorylase Rescues Galactose-1-Phosphate Uridyltransferase-Deficient Yeast	**Kent Lai and Louis J. Elsas**	392
Structure of the Cytoplasmic Domain of p23 in Solution: Implications for the Formation of COPI Vesicles	**Marcus Weidler, Constanze Reinhard, Gabi Friedrich, Felix T. Wieland, and Paul Rösch**	401
Enhanced Expression of *Silencer of Death Domains* (SODD/BAG-4) in Pancreatic Cancer	**Fumiaki Ozawa, Helmut Friess, Arthur Zimmermann, Jörg Kleeff, and Markus W. Büchler**	409
Neuregulin Induces the Rapid Association of Focal Adhesion Kinase with the erbB2–erbB3 Receptor Complex in Schwann Cells	**Timothy Vartanian, Andrew Goodearl, Sharon Lefebvre, Song-Kyu Park, and Gerald Fischbach**	414

Neuronal Differentiation of Cryopreserved Neural Progenitor Cells Derived from Mouse Embryonic Stem Cells	**Christopher R. Hancock, Jonathon P. Wetherington, Nevin A. Lambert, and Brian G. Condie**	**418**
Sustained Enhancement of Ca^{2+} Influx by Glibenclamide Induces Apoptosis in RINm5F Cells	**Toshio Iwakura, Shimpei Fujimoto, Shinji Kagimoto, Akari Inada, Akira Kubota, Yoshimichi Someya, Yu Ihara, Yuichiro Yamada, and Yutaka Seino**	**422**
Osmomechanical Regulation of Membrane Trafficking in Polarized Cells	**Jan M. Reid and Roger G. O'Neil**	**429**
Recombinant Expression of a Selective Blocker of M_1 Muscarinic Receptors	**Johnny Näsman, Mikael Jolkkonen, Sylwia Ammoun, Evert Karlsson, and Karl E. O. Åkerman**	**435**
Transient Expression of Megakaryocyte-Derived Protein Immunoreactive with an Antiserum to Cartilage Oligomeric Matrix Protein in Developing Rat Liver	**Satoshi Onodera, Yukio Tonozuka, and Shin-ichi Tashiro**	**440**
Fenofibrate and Rosiglitazone Lower Serum Triglycerides with Opposing Effects on Body Weight	**Evelyne Chaput, Régis Saladin, Martine Silvestre, and Alan D. Edgar**	**445**
Analysis of hABC1 Gene 5′ End: Additional Peptide Sequence, Promoter Region, and Four Polymorphisms	**Clive R. Pullinger, Hideki Hakamata, Philippe N. Duchateau, Celeste Eng, Bradley E. Aouizerat, Min H. Cho, Christopher J. Fielding, and John P. Kane**	**451**
Characterization of hPRP4 Kinase Activation: Potential Role in Signaling	**Yong Huang, Tiliang Deng, and Brent W. Winston**	**456**
Purification and Polymerization Properties of Two Lethal Yeast Actin Mutants	**Carl Frieden, Jinyan Du, Lawrence Schriefer, and Jenny Buzan**	**464**
The N-Terminal Domains of Cyclin-Dependent Kinase Inhibitory Proteins Block the Phosphorylation of cdk2/Cyclin E by the CDK-Activating Kinase	**Kenneth B. Rank, David B. Evans, and Satish K. Sharma**	**469**
Cloning, Characterization, and Expression of the Human TIN-ag-RP Gene Encoding a Novel Putative Extracellular Matrix Protein	**Natascha C. Brömme, Thomas Wex, Heike Wex, Brynn Levy, Alex Lipyansky, and D. Brömme**	**474**
Differential Regulation of the Carbonic Anhydrase II Gene Expression by Hormonal Nuclear Receptors in Monocytic Cells: Identification of the Retinoic Acid Response Element	**Isabelle Quélo and Pierre Jurdic**	**481**
Binding of Human Mitochondrial Transcription Factor A, an HMG Box Protein, to a Four-Way DNA Junction	**Tetsuji Ohno, Shuyo Umeda, Naotaka Hamasaki, and Dongchon Kang**	**492**
Endothelial Proliferation, Migration, and Differentiation Are Blunted by Conditionally Expressed Protein Kinase C Pseudosubstrate Peptides	**Elizabeth O. Harrington, Kevin E. Doyle, Jodi L. Brunelle, and J. Anthony Ware**	**499**

Inhibitory Effect of Nitric Oxide on Voltage-Dependent Calcium Currents in Rat Dorsal Root Ganglion Cells — **Sang Jeong Kim, Sook-Keun Song, and Jun Kim** — **509**

Identification of Six CAG Repeat Domains into the Human Chromosomic Region 12q24.1 — **Jorge Aguiar** — **515**

ATP Hydrolysis by a CFTR Domain: Pharmacology and Effects of G551D Mutation — **L. Daniel Howell, Roy Borchardt, and Jonathan A. Cohn** — **518**

Mouse Myosin X: Molecular Architecture and Tissue Expression as Revealed by Northern Blot and *in Situ* Hybridization Analyses — **Satoshi Yonezawa, Atsushi Kimura, Seizo Koshiba, Shigeo Masaki, Takao Ono, Atsuko Hanai, Shinichi Sonta, Takashi Kageyama, Takayuki Takahashi, and Akihiko Moriyama** — **526**

Vectors with Hidden Cloning Sites — **Ervin Welker and András Váradi** — **534**

Elevated Levels of RanBP7 mRNA in Colorectal Carcinoma Are Associated with Increased Proliferation and Are Similar to the Transcription Pattern of the Proto-oncogene *c-myc* — **Shu-Rui Li, Valerie G. Gyselman, Sina Dorudi, and Stephen A. Bustin** — **537**

Adenovirus-Mediated Transfer of Caspase-8 in Combination with Superrepressor of NF-κB Drastically Induced Apoptosis in Gliomas — **Nobusada Shinoura, Naoki Yamamoto, Yoko Yoshida, Akio Asai, Takaaki Kirino, and Hirofumi Hamada** — **544**

Kinetic Determination of Focal Adhesion Protein Formation — **Wolfgang H. Goldmann** — **553**

ERRATUM

Volume **268,** Number 2 (2000), in the article "Signaling through the p38 and p42/44 Mitogen-Activated Families of Protein Kinases in Pancreatic β-Cell Proliferation," by Chris J. Burns, Paul E. Squires, and Shanta J. Persaud, pages 541–546 (doi:10.1006/bbrc.2000.2179) — **558**

Number 3, May 19, 2000

BREAKTHROUGHS AND VIEWS

Polyamines: Mysterious Modulators of Cellular Functions — **Kazuei Igarashi and Keiko Kashiwagi** — **559**

REGULAR ARTICLES

Neprilysin II: A Putative Novel Metalloprotease and Its Isoforms in CNS and Testis — **Ouimet Tanja, Patricia Facchinetti, Christiane Rose, Marie-Chantal Bonhomme, Claude Gros, and Jean-Charles Schwartz** — **565**

Peroxisome Proliferator-Activated Receptor-γ Agonists Increase Vascular Endothelial Growth Factor Expression in Human Vascular Smooth Muscle Cells — **Kenjiro Yamakawa, Masayuki Hosoi, Hidenori Koyama, Shinji Tanaka, Shinya Fukumoto, Hirotoshi Morii, and Yoshiki Nishizawa** — **571**

Identification of Human PDE7B, a cAMP-Specific Phosphodiesterase	**Takashi Sasaki, Jun Kotera, Keizo Yuasa, and Kenji Omori**	**575**
Integrin-Associated Protein and Thrombospondin-1 as Endothelial Mechanosensitive Death Mediators	**Mark-Andre Freyberg, Dirk Kaiser, Rüdiger Graf, Peter Vischer, and Peter Friedl**	**584**
Phenotypic Effects of CD3ζ Targeting into Glycosphingolipid-Enriched Membrane Microdomains (GEMs) of T Cells	**Marek Cebecauer and Jan Černý**	**589**
Role of Raf-1 Conserved Region 2 in Regulation of Ras-Dependent Raf-1 Activation	**Hiroyoshi Sendoh, Chang-Deng Hu, Dongmei Wu, Chunhua Song, Yuriko Yamawaki-Kataoka, Joji Kotani, Tomoyo Okada, Fumi Shima, Ken-ichi Kariya, and Tohru Kataoka**	**596**
Novel Mix-Family Homeobox Genes in Zebrafish and Their Differential Regulation	**Tsutomu Hirata, Yojiro Yamanaka, Seung-Lim Ryu, Takashi Shimizu, Taijiro Yabe, Masahiko Hibi, and Toshio Hirano**	**603**
Poliovirus Induces an Early Impairment of Mitochondrial Function by Inhibiting Succinate Dehydrogenase Activity	**Anna Koundouris, George E. N. Kass, Christopher R. Johnson, Angela Boxall, Peter G. Sanders, and Michael J. Carter**	**610**
Putative P-Glycoprotein Expression in Arsenite-Resistant *Leishmania donovani* Down-Regulated by Verapamil	**Jaspreet Kaur and Chinmoy S. Dey**	**615**
Increase in Phospholipase C-δ1 Protein Levels in Aluminum-Treated Rat Brains	**Hiroko Tanino, Shun Shimohama, Yoshinori Sasaki, Yasuo Sumida, and Sadaki Fujimoto**	**620**
Rho Small G-Protein-Dependent Binding of mDia to an Src Homology 3 Domain-Containing IRSp53/BAIAP2	**Takeshi Fujiwara, Akiko Mammoto, Yongman Kim, and Yoshimi Takai**	**626**
Involvement of SPARC in *in Vitro* Differentiation of Skeletal Myoblasts	**Won Jin Cho, Eun Ju Kim, Soo Jung Lee, Han Do Kim, Hae Ja Shin, and Woon Ki Lim**	**630**
Phosphofructokinase C Isozyme from Ascites Tumor Cells: Cloning, Expression, and Properties	**Cristina Sánchez-Martínez, Antonio M. Estévez, and Juan J. Aragón**	**635**
Squamous Differentiation Downregulates Muc1 Mucin in Hamster Tracheal Surface Epithelial Cell	**Chan Young Shin, Kyu Hwan Park, Byung Kwon Ryu, Eui Yul Choi, Kwang Chul Kim, and Kwang Ho Ko**	**641**
Importance of the Region Including Aspartates 57 and 60 of Ferredoxin on the Electron Transfer Complex with Photosystem I in the Cyanobacterium *Synechocystis* sp. PCC 6803	**Isabelle Guillouard, Bernard Lagoutte, Gwénaëlle Moal, and Hervé Bottin**	**647**
Generation of 2-Arachidonoylglycerol, an Endogenous Cannabinoid Receptor Ligand, in Picrotoxinin-Administered Rat Brain	**Takayuki Sugiura, Naoki Yoshinaga, Sachiko Kondo, Keizo Waku, and Yoshio Ishima**	**654**

Surface Expression of the Cystic Fibrosis Transmembrane Conductance Regulator Mutant ΔF508 Is Markedly Upregulated by Combination Treatment with Sodium Butyrate and Low Temperature	**Ghanshyam D. Heda and Christopher R. Marino**	659
Repression of Heme Oxygenase-1 by Hypoxia in Vascular Endothelial Cells	**Masaharu Nakayama, Kazuhiro Takahashi, Tomomi Kitamuro, Ken-ichi Yasumoto, Dai Katayose, Kunio Shirato, Yoshiaki Fujii-Kuriyama, and Shigeki Shibahara**	665
A Retroviral Vector Capable of Targeted Gene Transfer into Cells Expressing HIV Envelope Glycoprotein	**Satoru Suzuki and Takashi Shimada**	672
Expression of Isolated C-Type Carbohydrate Recognition Domains	**Qiang Xu, Rong Zeng, Xiang-Fu Wu, and Ke-Yi Wang**	677
Mouse Smad8 Phosphorylation Downstream of BMP Receptors ALK-2, ALK-3, and ALK-6 Induces Its Association with Smad4 and Transcriptional Activity	**Shinji Kawai, Chi Faucheu, Sylvie Gallea, Sylviane Spinella-Jaegle, Azeddine Atfi, Roland Baron, and Sergio Roman Roman**	682
Compactin and Simvastatin, but Not Pravastatin, Induce Bone Morphogenetic Protein-2 in Human Osteosarcoma Cells	**Masako Sugiyama, Tohru Kodama, Kyoko Konishi, Keiichi Abe, Sumio Asami, and Shinzo Oikawa**	688
Isolation of Two Novel Genes, DSCR5 and DSCR6, from Down Syndrome Critical Region on Human Chromosome 21q22.2	**Kazunori Shibuya, Jun Kudoh, Shinsei Minoshima, Kazuhiko Kawasaki, Shuichi Asakawa, and Nobuyoshi Shimizu**	693
Evidence of Hepatic Endogenous Hydrogen Peroxide in Bile of Selenium-Deficient Rats	**Yukiyo Ueda, Ken-ichiro Matsumoto, and Kazutoyo Endo**	699
Differential Regulation of Leptin Receptor Expression by Insulin and Leptin in Neuroblastoma Cells	**Minoru Hikita, Hideaki Bujo, Satoshi Hirayama, Kazuo Takahashi, Nobuhiro Morisaki, and Yasushi Saito**	703
Insulin Sensitizer, Troglitazone, Directly Inhibits Aromatase Activity in Human Ovarian Granulosa Cells	**Yi-Ming Mu, Toshihiko Yanase, Yoshihiro Nishi, Naoko Waseda, Tanaka Oda, Atsushi Tanaka, Ryoichi Takayanagi, and Hajime Nawata**	710
Translational Defects of *Escherichia coli* Mutants Deficient in the Um_{2552} 23S Ribosomal RNA Methyltransferase RrmJ/FTSJ	**Teresa Caldas, Emmanuelle Binet, Philippe Bouloc, and Gilbert Richarme**	714
Adaptor γ Ear Homology Domain Conserved in γ-Adaptin and GGA Proteins That Interact with γ-Synergin	**Hiroyuki Takatsu, Kaori Yoshino, and Kazuhisa Nakayama**	719
Melanin Binds Reversibly to Thermostable DNA Polymerase and Inhibits Its Activity	**Leopold Eckhart, Jürgen Bach, Jozef Ban, and Erwin Tschachler**	726
DNA Cleavage by a Chromium(III) Complex	**Rajamanickam Vijayalakshmi, Mookandi Kanthimathi, Venkatesan Subramanian, and Balachandran Unni Nair**	731

Seasonal Adaptation Modulates the Expression of the Protein Kinase CK2 β Subunit Gene in the Carp	**María Inés Vera, Gudrun Kausel, Rodrigo Barrera, Sergio Leal, Jaime Figueroa, and Claudia Quezada**	**735**
An Air–Liquid Interface Promotes the Differentiation of Gastric Surface Mucous Cells (GSM06) in Culture	**Akifumi Ootani, Shuji Toda, Kazuma Fujimoto, and Hajime Sugihara**	**741**
Apoptosis Induced by Hydrogen Peroxide under Serum Deprivation and Its Inhibition by Antisense c-*jun* in F-MEL Cells	**Yon Hui Kim, Mareyuki Takahashi, Eiji Suzuki, and Etsuo Niki**	**747**
The Insulin-Dependent Glucose Transporter Isoform 4 Is Expressed in Bovine Blastocysts	**Anne Navarrete Santos, Robert Augustin, Giovanna Lazzari, Cesare Galli, Joseph M. Sreenan, and Bernd Fischer**	**753**
Cloning of a Novel G-Protein-Coupled Receptor from the Sea Anemone Nervous System	**David C. New, Yung Hou Wong, and Joseph T. Y. Wong**	**761**
Effect of Halothane on the Oligomerization of the Sarcoplasmic Reticulum Ca^{2+}-ATPase	**Louise K. Brennan, Gabriele R. Froemming, and Kay Ohlendieck**	**770**
Rat Histidine Decarboxylase Is a Substrate for m-Calpain *in Vitro*	**Daniel Rodríguez-Agudo, María Teresa Olmo, Francisca Sánchez-Jiménez, and Miguel Angel Medina**	**777**
Xeroderma Pigmentosum Complementation Group A Protein Acts as a Processivity Factor	**Muriel W. Lambert and Liming Yang**	**782**
NADH-Ferric Reductase Activity Associated with Dihydropteridine Reductase	**Pauline L. Lee, Carol Halloran, Andrew R. Cross, and Ernest Beutler**	**788**
A Possible Interaction of Thioredoxin with VDUP1 in HeLa Cells Detected in a Yeast Two-Hybrid System	**Hajime Yamanaka, Fusako Maehira, Minoru Oshiro, Tsuyoshi Asato, Yuchio Yanagawa, Hiroshi Takei, and Yasutsugu Nakashima**	**796**
Structural and Functional Role of Cysteinyl Residues in Tobacco Acetolactate Synthase	**Hee-Jee Shin, Chom-Kyu Chong, Soo-Ik Chang, and Jung-Do Choi**	**801**
Endothelin-1 Chronically Inhibits Na/H Exchanger-3 in ET$_B$-Overexpressing OKP Cells	**Tzong-Shinn Chu, Kwan-Dun Wu, Ming-Shiou Wu, and Bor-Shen Hsieh**	**807**
Roles of Cytosolic Phospholipase A$_2$ and Platelet-Activating Factor Receptor in the Ca-Induced Biosynthesis of PAF	**Hideo Shindou, Satoshi Ishii, Naonori Uozumi, and Takao Shimizu**	**812**
Nucleotide Binding and Sulfation Catalyzed by Phenol Sulfotransferase	**En-Shyh Lin and Yuh-Shyong Yang**	**818**
Volitional Ethanol Consumption Affects Overall Serotonin Metabolism in Syrian Golden Hamsters (*Mesocricetus auratus*)	**Wing Ming Keung, Lisa Kunze, Dian-Jun Li, and Oscar Lazo**	**823**
PCR Cloning and Baculovirus Expression of Human Lactoperoxidase and Myeloperoxidase	**Kouichirou Shin, Hirotoshi Hayasawa, and Bo Lönnerdal**	**831**

Complete Sequences of Two Highly Divergent European Isolates of TT Virus — **Philippe Biagini, Houssam Attoui, Pierre Gallian, Mhammed Touinssi, Jean-François Cantaloube, Philippe de Micco, and Xavier de Lamballerie** — **837**

Anthony Williamson, Dennis R. Burton, Pierluigi Gambetti, Man-Sun Sy, Ian M. Jones, and David R. Brown, pages 726–731 (doi:10.1006/bbrc.2000.2355) **842**

Author Index for Volume 271 **843**

Volume 272, Number 1, May 27, 2000

Antithrombin III, a Serpin Family Protease Inhibitor, Is a Major Heparin Binding Protein in Porcine Aqueous Humor	**P. Vasantha Rao, R. Rand Allingham, Leon W. Herndon, and David L. Epstein**	**1**
Characterization of Large Plasmids Encoding Resistance to Toxic Heavy Metals in *Salmonella abortus equi*	**Anjali Ghosh, Amarika Singh, P. W. Ramteke, and V. P. Singh**	**6**
Distinctive Structural and Kinetic Properties of an Unusual Juvenile Hormone-Hydrolyzing Esterase	**Keiko Kadono-Okuda, Bettye Ridley, Davy Jones, and Grace Jones**	**12**
Apomorphine Up-Regulates NGF and GDNF Synthesis in Cultured Mouse Astrocytes	**Mitsuhiro Ohta, Ikuko Mizuta, Kiyoe Ohta, Masataka Nishimura, Eiji Mizuta, Kyozo Hayashi, and Sadako Kuno**	**18**
Analogs of Lactam Derivatives of α-Melanotropin with Basic and Acidic Residues	**Maria A. Bednarek, Tanya MacNeil, Rubana N. Kalyani, Rui Tang, Lex H. T. Van der Ploeg, and David H. Weinberg**	**23**
Zinc–Histidine as Nucleation Centers for Growth of ZnS Nanocrystals	**Richard Kho, Liem Nguyen, Claudia L. Torres-Martínez, and Rajesh K. Mehra**	**29**
Association of Functional Microsatellites in the Human Type I Collagen α2 Chain (COL1A2) Gene with Systemic Sclerosis	**Ryu-Ichiro Hata, Jun Akai, Akinori Kimura, Osamu Ishikawa, Masataka Kuwana, and Hiroshi Shinkai**	**36**
Distinct Hormone Stimulation and Counteraction by Insulin of the Expression of the Two Components of Glucose 6-Phosphatase in HepG2 Cells	**Yazhou Li and Gérald van de Werve**	**41**
Molecular Cloning of the Mouse APS as a Member of the Lnk Family Adaptor Proteins	**Masanori Iseki, Satoshi Takaki, and Kiyoshi Takatsu**	**45**
Dynamic Measurement of Single Protein's Mechanical Properties	**Keita Mitsui, Ken Nakajima, Hideo Arakawa, Masahiko Hara, and Atsushi Ikai**	**55**
^{1}H NMR Conformational Study of Antiherpetic C5-Substituted $2'$-Deoxyuridines: Insight into the Nature of Structure–Activity Relationships	**Jarosław Poznański, Krzysztof Felczak, Tadeusz Kulikowski, and Mieczysław Remin**	**64**
4-Hydroxynonenal-Induced MEL Cell Differentiation Involves PKC Activity Translocation	**Monica Rinaldi, Giuseppina Barrera, Angelo Aquino, Paola Spinsanti, Stefania Pizzimenti, Maria Giulia Farace, Mario Umberto Dianzani, and Vito Michele Fazio**	**75**
Single Mutation Induces a Metal-Dependent Subunit Association in Dimeric Cu,Zn Superoxide Dismutase	**Melania D'Orazio, Andrea Battistoni, Maria Elena Stroppolo, and Alessandro Desideri**	**81**
Molecular Basis of Competition between HSF2 and Catalytic Subunit for Binding to the PR65/A Subunit of PP2A	**Yiling Hong, Eric J. Lubert, David W. Rodgers, and Kevin D. Sarge**	**84**

Regulated Expression of Endothelial Cell-Derived Lipase — **Ken-ichi Hirata, Tatsuro Ishida, Hidetsugu Matsushita, Phillip S. Tsao, and Thomas Quertermous** 90

Redefined Substrate Specificity of ST6GalNAc II: A Second Candidate Sialyl-Tn Synthase — **Mari Kono, Tetsuro Tsuda, Shunichiro Ogata, Shou Takashima, Hong Liu, Toshiro Hamamoto, Steven H. Itzkowitz, Shinichiro Nishimura, and Shuichi Tsuji** 94

Retinoic Acid Switches Differential Expression of FGF8 Isoforms in LNCaP Cells — **Vincent Brondani and François Hamy** 98

Effect of Troponin I Phosphorylation by Protein Kinase A on Length-Dependence of Tension Activation in Skinned Cardiac Muscle Fibers — **Hidetoshi Kajiwara, Sachio Morimoto, Norio Fukuda, Iwao Ohtsuki, and Satoshi Kurihara** 104

Anchorage-Independent Activation of Mitogen-Activated Protein Kinase through Phosphatidylinositol-3 Kinase by Insulin-like Growth Factor I — **Katsuo Suzuki and Kazuhide Takahashi** 111

Regulation of Collagenolytic Protease Secretion through c-Src in Osteoclasts — **Naoki Furuyama and Yukio Fujisawa** 116

Spermatocyte-Specific Gene Excision by Targeted Expression of Cre Recombinase — **Hiroshi Ando, Yoshiya Haruna, Jun-ichi Miyazaki, Masaru Okabe, and Yoshinobu Nakanishi** 125

Direct Evidence of Nitric Oxide Presence within Mitochondria — **Manuel O. López-Figueroa, Claudio Caamaño, M. Inés Morano, Lars C. Rønn, Huda Akil, and Stanley J. Watson** 129

Visual Imaging of Ion Distribution in Human Epidermis — **Mitsuhiro Denda, Junichi Hosoi, and Yutaka Asida** 134

Skeletal Muscle Regeneration Is Not Impaired in *Fgf6* −/− Mutant Mice — **Frederic Fiore, Alain Sébille, and Daniel Birnbaum** 138

Axin-Induced Apoptosis Depends on the Extent of Its JNK Activation and Its Ability to Down-Regulate β-Catenin Levels — **Soek Ying Neo, Yi Zhang, Lai Ping Yaw, Peng Li, and Sheng-Cai Lin** 144

Inhibition of Intracellular Cathepsin Activities and Suppression of Immune Responses Mediated by Helper T Lymphocyte Type-2 by Peroral or Intraperitoneal Administration of Vitamin B_6 — **N. Katunuma, A. Matsui, K. Endo, J. Hanba, A. Sato, M. Nakano, Y. Yuto, Y. Tada, T. Asao, K. Himeno, Y. Maekawa, and T. Inubushi** 151

Down Syndrome Critical Region Gene 2: Expression during Mouse Development and in Human Cell Lines Indicates a Function Related to Cell Proliferation — **Jose M. Vidal-Taboada, Albert Lu, Maria Pique, Gabriel Pons, Joan Gil, and Rafael Oliva** 156

A Region in the 3′ UTR of MnSOD RNA Enhances Translation of a Heterologous RNA — **Linda Knirsch and Linda Biadasz Clerch** 164

L-152,804: Orally Active and Selective Neuropeptide Y Y5 Receptor Antagonist	**Akio Kanatani, Akane Ishihara, Hisashi Iwaasa, Kayo Nakamura, Osamu Okamoto, Masayasu Hidaka, Junko Ito, Takahiro Fukuroda, Douglas J. MacNeil, Lex H. T. Van der Ploeg, Yasuyuki Ishii, Takayoshi Okabe, Takehiro Fukami, and Masaki Ihara**	**169**
Nuclear and Chloroplast Poly(A) Polymerases from Plants Share a Novel Biochemical Property	**Arthur G. Hunt, Lisa R. Meeks, Kevin P. Forbes, Jaydip Das Gupta, and Bradley D. Mogen**	**174**
Enhancement by Homocysteine of Plasminogen Activator Inhibitor-1 Gene Expression and Secretion from Vascular Endothelial and Smooth Muscle Cells	**Sanae Midorikawa, Hironobu Sanada, Sigeatsu Hashimoto, and Tsuyoshi Watanabe**	**182**
Cloning and Characterization of the Human and Mouse PDE7B, a Novel cAMP-Specific Cyclic Nucleotide Phosphodiesterase	**Clare Gardner, Nicola Robas, Darren Cawkill, and Mark Fidock**	**186**
Gadd45 Family Proteins Are Coactivators of Nuclear Hormone Receptors	**Yong-Weon Yi (Yong Won Yi), Daegun Kim, Neoncheol Jung, Seung-Suh Hong, Hyun-Soo Lee, and Insoo Bae**	**193**
Identification of a New Active Site for Autocatalytic Processing of Penicillin Acylase Precursor in *Escherichia coli* ATCC11105	**Hansol Lee, Ok Ku Park, and Hyen Sam Kang**	**199**
A Novel Isoform of a Kallikrein-like Protease, TLSP/Hippostasin, (PRSS20), Is Expressed in the Human Brain and Prostate	**Shinichi Mitsui, Tatsuo Yamada, Akira Okui, Katsuya Kominami, Hidetoshi Uemura, and Nozomi Yamaguchi**	**205**
Resveratrol Is Absorbed in the Small Intestine as Resveratrol Glucuronide	**Gunter Kuhnle, Jeremy P. E. Spencer, George Chowrimootoo, Hagen Schroeter, Edward S. Debnam, S. Kaila S. Srai, Catherine Rice-Evans, and Ulrich Hahn**	**212**
Noninsecticidal Parasporal Proteins of a *Bacillus thuringiensis* Serovar *shandongiensis* Isolate Exhibit a Preferential Cytotoxicity against Human Leukemic T Cells	**Dae-Weon Lee, Tetsuyuki Akao, Satoko Yamashita, Hideki Katayama, Minoru Maeda, Hiroyuki Saitoh, Eiichi Mizuki, and Michio Ohba**	**218**
Molecular Cloning and Characterization of CRLM-2, a Novel Type I Cytokine Receptor Preferentially Expressed in Hematopoietic Cells	**Takashi Hiroyama, Atsushi Iwama, Yohei Morita, Yukio Nakamura, Akira Shibuya, and Hiromitsu Nakauchi**	**224**
Improved Expression of Vascular Endothelial Growth Factor by Naked DNA in Mouse Skeletal Muscles: Implication for Gene Therapy of Ischemic Diseases	**YoungJoo Lee, Eun Jin Park, Seung Shin Yu, Duk-Kyung Kim, and Sunyoung Kim**	**230**
Decomposition of Cocoa Procyanidins in the Gastric Milieu	**Jeremy P. E. Spencer, Fozia Chaudry, Ananth Sekher Pannala, S. Kaila Srai, Edward Debnam, and Catherine Rice-Evans**	**236**
Enzymatic Properties, Tissue-Specific Expression, and Lysosomal Location of Two Highly Homologous Rat SULT1C2 Sulfotransferases	**Li Xiangrong, Claudia Jöhnk, Dieter Hartmann, Frank Schestag, Wolfgang Krömer, and Volkmar Gieselmann**	**242**

DNA Annealing and DNA–Protein Interactions by Capillary Electrophoresis **Ram P. Singhal and Ochan Otim** 251

Chimeric Synthetic Peptide as Antigen for Immunodiagnosis of HIV-1 Infection **Milenen Hernández, Lilliam Pozo, Ivonne Gómez, and Antonio Melchor** 259

A Palmitoyl-CoA-Specific Δ9 Fatty Acid Desaturase from *Caenorhabditis elegans* **Jennifer L. Watts and John Browse** 263

Identification of a 26S Proteasome-Associated UCH in Fission Yeast **Tianwei Li, Naweed I. Naqvi, Hongyuan Yang, and Tian Seng Teo** 270

Activation of the Chemotactic Peptide Receptor FPRL1 in Monocytes Phosphorylates the Chemokine Receptor CCR5 and Attenuates Cell Responses to Selected Chemokines **Weiping Shen, Paul Proost, Baoqun Li, Wanghua Gong, Yingying Le, Robert Sargeant, Philip M. Murphy, Jo Van Damme, and Ji Ming Wang** 276

Multiple Copies of β-Lactoglobulin Promoter Do Not Function as LCR **Roberta M. James, Claire Neil, John Webster, Shanti Roos, A. John Clark, and C. Bruce A. Whitelaw** 284

Phytanyl-Pyrophosphate-Linked Substrate for a Bacterial α-Mannosyltransferase **A. C. Lellouch, G. M. Watt, R. A. Geremia, and S. L. Flitsch** 290

Identification of Novel Membrane and Secreted Proteins Upregulated during Adipocyte Differentiation **Hiromichi Tsuruga, Hidetoshi Kumagai, Tetsuo Kojima, and Toshio Kitamura** 293

Control of Smooth Muscle Cell Proliferation and Phenotype by Integrin Signaling through Focal Adhesion Kinase **Alex O. Morla and Jon E. Mogford** 298

Monospecific Antibodies against the Three Mammalian Fast Limb Myosin Heavy Chains **Christine A. Lucas, Lucia H. D. Kang, and Joseph F. Y. Hoh** 303

ERRATA

Volume **268,** Number 2 (2000), in the article "Oxidative Stress Induces Increase in Intracellular Amyloid β-Protein Production and Selective Activation of βI and βII PKCs in NT2 Cells," by Dimitri Paola, Cinzia Domenicotti, Mariapaola Nitti, Antonella Vitali, Roberta Borghi, Damiano Cottalasso, Damiano Zaccheo, Patrizio Odetti, Paola Strocchi, Umberto M. Marinari, Massimo Tabaton, and Maria A. Pronzato, pages 642–646 (doi:10.1006/bbrc.2000.2164) 309

Volume **269,** Number 1 (2000), in the article "Molecular and Immunochemical Evidences Demonstrate That Endooligopeptidase A Is the Predominant Cytosolic Oligopeptidase of Rabbit Brain," by Mirian A. F. Hayashi, Fernanda C. V. Portaro, Denise V. Tambourgi, Mauro Sucupira, Tetsuo Yamane, Beatriz L. Fernandes, Emer S. Ferro, Nancy A. Rebouças, and Antonio C. M. de Camargo, pages 7–13 (doi:10.1006/bbrc.2000.2243) 309

Number 2, June 7, 2000

BREAKTHROUGHS AND VIEWS

The Importance of Adenosine Deaminase for Lymphocyte Development and Function **Melissa B. Aldrich, Michael R. Blackburn, and Rodney E. Kellems** 311

REGULAR ARTICLES

Direct Photoaffinity Labeling of Kir6.2 by [γ-^{32}P]ATP-[γ]4-Azidoanilide	**Kouichi Tanabe, Stephen J. Tucker, Frances M. Ashcroft, Peter Proks, Noriyuki Kioka, Teruo Amachi, and Kazumitsu Ueda**	**316**
A Novel Intracellular Membrane-Bound Calcium-Independent Phospholipase A_2	**Haruki Tanaka, Ryu Takeya, and Hideki Sumimoto**	**320**
Adenosine-Derived Non-Phosphate Antagonists for $P2Y_1$ Purinoceptors	**Katrin Sak, Asko Uri, Erki Enkvist, Gerda Raidaru, Juhan Subbi, Merike Kelve, and Jaak Järv**	**327**
Deencryption of Cellular Tissue Factor Is Independent of Its Cytoplasmic Domain	**A. S. Wolberg, R. H. Kon, D. M. Monroe, M. Ezban, H. R. Roberts, and M. Hoffman**	**332**
Molecular Evidence of Complex Tissue- and Sex-Specific mRNA Expression of the Rat α_{2u}-Globulin Multigene Family	**Koichi Saito, Jun-Ichi Nishikawa, Masayoshi Imagawa, Tsutomu Nishihara, and Masatoshi Matsuo**	**337**
Activation of Different Lipoxygenase Isozymes Induces Apoptosis in Human Erythroleukemia and Neuroblastoma Cells	**Mauro Maccarrone, Marco Ranalli, Lorenza Bellincampi, Maria Luisa Salucci, Stefania Sabatini, Gerry Melino, and Alessandro Finazzi-Agrò**	**345**
Cyclic Zinc-Dithiocarbamate-*S,S′*-Dioxide Blocks CXCR4-Mediated HIV-1 Infection	**Nobutoki Takamune, Shogo Misumi, and Shozo Shoji**	**351**
Transforming Growth Factor-β_1 Increases the Expression of Lectin-like Oxidized Low-Density Lipoprotein Receptor-1	**Manabu Minami, Noriaki Kume, Hiroharu Kataoka, Masafumi Morimoto, Kazutaka Hayashida, Tatsuya Sawamura, Tomoh Masaki, and Toru Kita**	**357**
Transplantation of Normal and DMD Myoblasts Expressing the Telomerase Gene in SCID Mice	**Sophie Seigneurin-Venin, Valérie Bernard, Pierre-Alain Moisset, Michel M. Ouellette, Vincent Mouly, Silvia Di Donna, Woodring E. Wright, and Jacques P. Tremblay**	**362**
A Novel Cell Adhesion Inhibitor, K-7174, Reduces the Endothelial VCAM-1 Induction by Inflammatory Cytokines, Acting through the Regulation of GATA	**Michihisa Umetani, Hiroshi Nakao, Takeshi Doi, Akio Iwasaki, Manami Ohtaka, Takao Nagoya, Chikage Mataki, Takao Hamakubo, and Tatsuhiko Kodama**	**370**
p300-CBP-Dependent and -Independent Transcriptional Interference between NF-κB RelA and p53	**Akiko Ikeda, Xiangao Sun, Yan Li, Yong-kang Zhang, Richard Eckner, Takahiro S. Doi, Toshitada Takahashi, Yuichi Obata, Katsuji Yoshioka, and Ken-ichi Yamamoto**	**375**
PPAR-γ Is Selectively Upregulated in Caco-2 Cells by Butyrate	**Astrid Wächtershäuser, Stefan M. Loitsch, and Jürgen Stein**	**380**
Arp2/3 Complex-Independent Actin Regulatory Function of WAVE	**Nobunari Sasaki, Hiroaki Miki, and Tadaomi Takenawa**	**386**

A Neuronal NO Synthase (*NOS1*) Gene Polymorphism Is Associated with Asthma	**H. Grasemann, C. N. Yandava, K. Storm van's Gravesande, A. Deykin, A. Pillari, J. Ma, L. A. Sonna, C. Lilly, M. J. Stampfer, E. Israel, E. K. Silverman, and J. M. Drazen**	391
CD95/CD95 Ligand-Mediated Counterattack Does Not Block T Cell Cytotoxicity	**Andreas Jekle, Reinhard Obst, Florian Lang, Hans-Georg Rammensee, and Erich Gulbins**	395
Identification of Six CAG Repeat Domains into the Human Chromosome Region 12q24.1	**Jorge Aguiar**	400
Functional Expression of the Pore Forming Subunit of the ATP-Sensitive Potassium Channel in *Saccharomyces cerevisiae*	**Fiona M. Graves and Andrew Tinker**	403
Highly Regulated Expression of Subtilisin-like Proprotein Convertase PACE4 (SPC4) during Dentinogenesis	**Tetsuya Akamatsu, Yoshiko Matsuda, Keiko Tsumura, Jun Tada, Most. Nahid Parvin, Wei Wei, Norio Kanamori, and Kazuo Hosoi**	410
Mitochondrial GPx1 Decreases Induced but Not Basal Oxidative Damage to mtDNA in T47D Cells	**J. Legault, C. Carrier, P. Petrov, P. Renard, J. Remacle, and M.-E. Mirault**	416
Angiotensin II Modulates Ion Transport in Rat Proximal Tubules through CYP Metabolites	**Alicia Sánchez-Mendoza, Pedro López-Sánchez, Beatriz Vázquez-Cruz, Amelia Rios, Sonia Martínez-Ayala, and Bruno Escalante**	423
Induction of the Mitochondrial Permeability Transition *in Vitro* by Short-Chain Carboxylic Acids	**C. M. Palmeira, M. I. Rana, C. B. Frederick, and K. B. Wallace**	431
Identification of Novel Sequence-Specific Nuclear Factors Interacting with Mouse Senescence Marker Protein-30 Gene Promoter	**Prakash C. Supakar, Toshiko Fujita, and Naoki Maruyama**	436
2,3,7,8-Tetrachlorodibenzo-*p*-dioxin (TCDD) Induces Binding of a 50 kDa Protein on the 3′ Untranslated Region of Urokinase-Type Plasminogen Activator mRNA	**Shigeki Shimba, Mitsuaki Hayashi, Hideko Sone, Junzo Yonemoto, and Masakatsu Tezuka**	441
Neurocan Is a Heparin Binding Proteoglycan	**Kang Feng, Irene Arnold-Ammer, and Uwe Rauch**	449
Mouse and Human GTPBP2, Newly Identified Members of the GP-1 Family of GTPase	**Hironori Kudo, Satoru Senju, Hiroaki Mitsuya, and Yasuharu Nishimura**	456
Interaction of Vesl-1L/Homer 1c with Syntaxin 13	**Reiko Minakami, Akihiko Kato, and Hiroyuki Sugiyama**	466
Properties and Intracellular Localization of Calpain Activator Protein	**Edon Melloni, Roberto Minafra, Franca Salamino, and Sandro Pontremoli**	472
From a Short Amino Acidic Sequence to the Complete Gene	**Baltasar Miñambres, Elías R. Olivera, Belén García, Germán Naharro, and José M. Luengo**	477
Influence of the Histidine Tail on the Structure and Activity of Recombinant Chlorocatechol 1,2-Dioxygenase	**A. P. U. Araújo, G. Oliva, F. Henrique-Silva, R. C. Garratt, O. Cáceres, and L. M. Beltramini**	480

Purification of a Novel Serine Proteinase Inhibitor from the Skeletal Muscle of White Croaker (*Argyrosomus argentatus*) — **Min-Jie Cao, Kiyoshi Osatomi, Risa Matsuda, Makoto Ohkubo, Kenji Hara, and Tadashi Ishihara** 485

Distinct Regulation of Vascular Endothelial Growth Factor in Intact Human Conduit Vessels Exposed to Laminar Fluid Shear Stress and Pressure — **Li-ming Gan, Marinko Miocic, Roya Doroudi, Lena Selin-Sjögren, and Sverker Jern** 490

Targeting a Recombinant Adenovirus Vector to HCC Cells Using a Bifunctional Fab-Antibody Conjugate — **Seung-Kew Yoon, Leonhard Mohr, Catherine R. O'Riordan, Amy Lachapelle, Donna Armentano, and Jack R. Wands** 497

ENH, Containing PDZ and LIM Domains, Heart/Skeletal Muscle-Specific Protein, Associates with Cytoskeletal Proteins through the PDZ Domain — **Noritaka Nakagawa, Masahiko Hoshijima, Miho Oyasu, Naoaki Saito, Katsuyuki Tanizawa, and Shun'ichi Kuroda** 505

Deregulated Expression of Homeobox-Containing Genes, HOXB6, B8, C8, C9, and Cdx-1, in Human Colon Cancer Cell Lines — **Ben-Zion Vider, Amazia Zimber, Eric Chastre, Christian Gespach, Marisa Halperin, Pnina Mashiah, Abraham Yaniv, and Arnona Gazit** 513

Sulfolipid Is a Potential Candidate for Annexin Binding to the Outer Surface of Chloroplast — **Daphné Seigneurin-Berny, Norbert Rolland, Albert-Jean Dorne, and Jacques Joyard** 519

Selective Transcriptional Regulations in the Human Liver Cell by Hepatitis B Viral X Protein — **Jaeseok Han, Hae Yong Yoo, Byung Hyune Choi, and Hyune Mo Rho** 525

Determination of Genes Involved in the Process of Implantation: Application of GeneChip to Scan 6500 Genes — **Ken-ichi Yoshioka, Fuko Matsuda, Kenji Takakura, Youichi Noda, Kazuhiko Imakawa, and Senkiti Sakai** 531

Islet Phospholipase A_2 Activation Is Potentiated in Insulin Resistant Mice — **Erik Simonsson, Sven Karlsson, and Bo Ahrén** 539

Angiotensin-II Subtype 2 Receptor Agonist (CGP-42112) Inhibits Catecholamine Biosynthesis in Cultured Porcine Adrenal Medullary Chromaffin Cells — **Kazuhiro Takekoshi, Kiyoaki Ishii, Kazumasa Isobe, Toru Nanmoku, Yasushi Kawakami, and Toshiaki Nakai** 544

A Mechanism for Oxygen Exchange between Ligated Oxometalloporphinates and Bulk Water — **Jean-Louis Primus, Kees Teunis, Dominique Mandon, Cees Veeger, and Ivonne M. C. M. Rietjens** 551

Diverse Effect of Tributyltin on Apoptosis in PC12 Cells — **Osamu Yamanoshita, Masaaki Kurasaki, Takeshi Saito, Kyoko Takahasi, Hiroko Sasaki, Toshiyuki Hosokawa, Masashi Okabe, Jyunko Mochida, and Toshio Iwakuma** 557

Full-Length cDNA Cloning and Genomic Organization of the Mouse Liver-Specific Organic Anion Transporter-1 (1st-1) — **Kenichiro Ogura, Supratim Choudhuri, and Curtis D. Klaassen** 563

Escherichia coli Genome Is Composed of Two Distinct Types of Nucleotide Sequences — **David Häring and Jaroslav Kypr** 571

An Evolutionarily Conserved G-Protein Coupled Receptor Family, SREB, Expressed in the Central Nervous System	**Mitsuyuki Matsumoto, Tetsu Saito, Jun Takasaki, Masazumi Kamohara, Toru Sugimoto, Masato Kobayashi, Mina Tadokoro, Shun-ichiro Matsumoto, Takahide Ohishi, and Kiyoshi Furuichi**	**576**
First Report of the Investigation into the Importance of pK_a in the Inhibition of Estrone Sulfatase by Sulfamate Containing Compounds	**Sabbir Ahmed, Karen James, and Chirag K. Patel**	**583**
Direct Observation of Processive Movement by Individual Myosin V Molecules	**Takeshi Sakamoto, Ichiro Amitani, Etsuo Yokota, and Toshio Ando**	**586**
Studies on Hepatic Gene Expression in Different Liver Regenerative Models	**Peter Nagy, Hanne Cathrine Bisgaard, Janos Schnur, and Snorri S. Thorgeirsson**	**591**
Unusual Substrate Specificity of a Chimeric Hypoxanthine–Guanine Phosphoribosyltransferase Containing Segments from the *Plasmodium falciparum* and Human Enzymes	**I. N. Sujay Subbayya, Suja Sukumaran, K. Shivashankar, and Hemalatha Balaram**	**596**
Sphingosylphosphorylcholine Induces Endothelial Cell Migration and Morphogenesis	**George Boguslawski, Denise Lyons, Kevin A. Harvey, A. Thomas Kovala, and Denis English**	**603**
Cloning, Characterization, and Mapping of the Gene Encoding the Human G Protein γ 2 Subunit	**Mohammad Hossein Modarressi, Kay Elizabeth Taylor, and Jonathan Wolfe**	**610**
Isolation and Characterization of the Human *UGT2B7* Gene	**Jean-Sébastien Carrier, David Turgeon, Kim Journault, Dean W. Hum, and Alain Bélanger**	**616**
Functional Expression, Purification, and Characterization of 3α-Hydroxysteroid Dehydrogenase/Carbonyl Reductase from *Comamonas testosteroni*	**Edmund Maser, Eric Möbus, and Guangming Xiong**	**622**

Number 3, June 16, 2000

BREAKTHROUGHS AND VIEWS

Kinetic Modeling of ATP Synthesis by ATP Synthase and Its Mechanistic Implications	**Sunil Nath and Siddhartha Jain**	**629**

REGULAR ARTICLES

A Mechanism for Action of Oscillating Electric Fields on Cells	**Dimitris J. Panagopoulos, Niki Messini, Andreas Karabarbounis, Alexandros L. Philippetis, and Lukas H. Margaritis**	**634**
Phosphorylation of RTP, an ER Stress-Responsive Cytoplasmic Protein	**Kishan Lal Agarwala, Koichi Kokame, Hisao Kato, and Toshiyuki Miyata**	**641**

Human Fetal Skin Fibroblast Migration Stimulated by the Autocrine Growth Factor bFGF Is Mediated by Phospholipase A_2 via Arachidonic Acid without the Involvement of Pertussis Toxin-Sensitive G-Protein	**Hiroshi Kondo and Yumiko Yonezawa**	648
Molecular Cloning of the Gene Encoding Flavoredoxin, a Flavoprotein from *Desulfovibrio gigas*	**Marta Agostinho, Solange Oliveira, Manuela Broco, Ming-Yih Liu, Jean LeGall, and Claudina Rodrigues-Pousada**	653
Identification of Age-Dependent Changes in Expression of Senescence-Accelerated Mouse (SAMP8) Hippocampal Proteins by Expression Array Analysis	**Vijaya B. Kumar, Mark W. Franko, Susan A. Farr, H. James Armbrecht, and John E. Morley**	657
Sexually Dimorphic Expression of Two Types of DM (*Doublesex/Mab-3*)-Domain Genes in a Teleost Fish, the Tilapia (*Oreochromis niloticus*)	**Guijun Guan, Tohru Kobayashi, and Yoshitaka Nagahama**	662
Transduction of Apaf-1 or Caspase-9 Induces Apoptosis in A-172 Cells That Are Resistant to p53-Mediated Apoptosis	**Nobusada Shinoura, Shinya Sakurai, Akio Asai, Takaaki Kirino, and Hirofumi Hamada**	667
Synergistic Induction of Apoptosis in Murine Hepatoma Hepa1-6 Cells by IFN-γ and TNF-α	**Tadashi Sasagawa, Myint Hlaing, and Toshihiro Akaike**	674
Regulation and Significance of Hepatocyte-Derived Matrix Metalloproteinases in Liver Remodeling	**Takahiro Haruyama, Itsuki Ajioka, Toshihiro Akaike, and Yoshifumi Watanabe**	681
Cell-Type Specificity of L-Leucyl L-Leucine Methyl Ester	**Yoshiro Kobayashi, Akiko Takasaki, Kahori Kurosaka, Yuji Sakurai, Michiko Iwamura, and Naoko Watanabe**	687
False Fertilization in Sea Urchin Eggs Induced by Diabolin, a 120K Kelp Protein	**Kohji Nomura, Hiroyuki Nakamura, and Norio Suzuki**	691
Molecular Alignment of Proteins in Bicellar Solutions: Quantitative Evaluation of Effects Induced in 2D COSY Spectra	**Eike Brunner, James Ogle, Michael Wenzler, and Hans Robert Kalbitzer**	694
The HIV-1 Cell Entry Inhibitor T-20 Potently Chemoattracts Neutrophils by Specifically Activating the *N*-Formylpeptide Receptor	**Jennifer K. Hartt, Thomas Liang, Alfredo Sahagun-Ruiz, Ji-Ming Wang, Ji-Liang Gao, and Philip M. Murphy**	699
Bone Morphogenetic Protein-2 Blocks MDA MB 231 Human Breast Cancer Cell Proliferation by Inhibiting Cyclin-Dependent Kinase-Mediated Retinoblastoma Protein Phosphorylation	**Nandini Ghosh-Choudhury, Kathleen Woodruff, Wenbo Qi, Anthony Celeste, Sherry L. Abboud, and Goutam Ghosh Choudhury**	705
p21-Activated Kinase PAK Phosphorylates Desmin at Sites Different from Those for Rho-Associated Kinase	**Kazuhiro Ohtakara, Hiroyasu Inada, Hidemasa Goto, Waro Taki, Edward Manser, Louis Lim, Ichiro Izawa, and Masaki Inagaki**	712
Tensin Can Induce JNK and p38 Activation	**Ben-Zion Katz, Muriel Zohar, Hidemi Teramoto, Kazue Matsumoto, J. Silvio Gutkind, Diane C. Lin, Shin Lin, and Kenneth M. Yamada**	717

Molecular Cloning of Neuronally Expressed Mouse βPix Isoforms	**Seyun Kim, Taeho Kim, Deokjae Lee, Sun-Hwa Park, Hyun Kim, and Dongeun Park**	721
Functional Roles of Histidine and Tyrosine Residues in the H$^+$-Peptide Transporter PepT1	**Xing-Zhen Chen, Angela Steel, and Matthias A. Hediger**	726
Plasma Membrane Receptors for the Cancer-Regulating Progesterone Metabolites, 5α-Pregnane-3,20-dione and 3α-Hydroxy-4-pregnen-20-one in MCF-7 Breast Cancer Cells	**Peter J. Weiler and John P. Wiebe**	731
Multiple Promoters Regulate Human Calcitonin Receptor Gene Expression	**C. Hebden, R. Smalt, T. Chambers, and M. D. Pondel**	738
Prostaglandin E$_2$ Upregulates Cyclooxygenase-2 Expression in Lipopolysaccharide-Stimulated RAW 264.7 Macrophages	**Burkhard Hinz, Kay Brune, and Andreas Pahl**	744
Transcriptional Regulation of Human Cardiac Homeobox Gene *CSX1*	**Ichiro Shiojima, Toru Oka, Yukio Hiroi, Ryozo Nagai, Yoshio Yazaki, and Issei Komuro**	749
Acetaminophen Inhibits iNOS Gene Expression in RAW 264.7 Macrophages: Differential Regulation of NF-κB by Acetaminophen and Salicylates	**Young Sue Ryu, Jae Heun Lee, Jeong Ho Seok, Jang Hee Hong, Yeon Soo Lee, Jong Ho Lim, Yong Man Kim, and Gang Min Hur**	758
NFATz: A Novel Rel Similarity Domain Containing Protein	**Shi Pan, Risako Tsuruta, Esteban S. Masuda, Ryu Imamura, Fernando Bazan, Ken-ichi Arai, Naoko Arai, and Shoichiro Miyatake**	765
Developmental Expression of *maf*-1 Messenger Ribonucleic Acids in Rat Kidney by *in Situ* Hybridization Histochemistry	**Junko Imaki, Hidetaka Onodera, Ken Tsuchiya, Toshihiro Imaki, Toshio Mochizuki, Takuya Mishima, Kazuo Yamashita, Kazuhiko Yoshida, and Masaharu Sakai**	777
Plant Rac Proteins Induce Superoxide Production in Mammalian Cells	**Hamdy H. Hassanain, Yogesh K. Sharma, Leni Moldovan, Valery Khramtsov, Lawrence J. Berliner, Jon P. Duvick, and Pascal J. Goldschmidt-Clermont**	783
Dendritic Translocation of the Rat Ferritin H Chain mRNA	**Tetsuya Ishimoto, Kazuhiro Fujimori, Michiki Kasai, and Takahisa Taguchi**	789
Novel Cdk Inhibitors Restore TGF-β Sensitivity in Cdk4 Overexpressing Epithelial Cells	**Rajeev Soni, Heinz Fretz, Lionel Muller, Joseph Schoepfer, and Bhabatosh Chaudhuri**	794
Computational and Experimental Analysis Identifies Many Novel Human Genes	**Nobuyuki Miyajima, Christopher B. Burge, and Toshiyuki Saito**	801
Activation of Human CAII Gene Promoter by v-Src: Existence of Ras-Dependent and -Independent Pathways	**Sayo Naka, Mami Minakata, Takayuki Tatamiya, Hiromichi Kimura, Masayoshi Kumegawa, Norihiro Ishida, and Tatsuo Takeya**	808

Polyglutamine-Mediated Aggregation and Cell Death	**Tiziana de Cristofaro, Adelina Affaitati, Antonio Feliciello, Enrico V. Avvedimento, and Stelio Varrone**	**816**
Constitutive Cellular Expression of PI 3-Kinase Is Distinct from Transient Expression	**Kurt R. Auger, Jing Wang, Radha P. Narsimhan, Tiffany Holcombe, and Thomas M. Roberts**	**822**
Ligand Binding Properties of Binary Complexes of Heparin and Immunoglobulin-like Modules of FGF Receptor 2	**Fumiyuki Uematsu, Mikio Kan, Fen Wang, Jun-Hyeog Jang, Yongde Luo, and Wallace L. McKeehan**	**830**
Structure and Developmental Expression of the Mouse CCK-B Receptor Gene	**Jean M. Lay, Casey Jenkins, Lennart Friis-Hansen, and Linda C. Samuelson**	**837**
Structural Basis of Functional Mimicry between Carbohydrate and Peptide Ligands of Con A	**Deepti Jain, Kanwal J. Kaur, Manisha Goel, and Dinakar M. Salunke**	**843**
Modulation of the Chaperone Activities of Hsc70/Hsp40 by Hsp105α and Hsp105β	**Nobuyuki Yamagishi, Hidenori Nishihori, Keiichi Ishihara, Kenzo Ohtsuka, and Takumi Hatayama**	**850**
Both Amino- and Carboxyl-Terminal Domains of TRAF3 Negatively Regulate NF-κB Activation Induced by OX40 Signaling	**Akifumi Takaori-Kondo, Toshiyuki Hori, Keiko Fukunaga, Rinpei Morita, Shin Kawamata, and Takashi Uchiyama**	**856**
Identification of a GPI-Anchored Type HDL-Binding Protein on Human Macrophages	**Akifumi Matsuyama, Shizuya Yamashita, Naohiko Sakai, Takao Maruyama, Eiko Okuda, Ken-ichi Hirano, Shinji Kihara, Hisatoyo Hiraoka, and Yuji Matsuzawa**	**864**
High-Density Lipoproteins Protect Endothelial Cells from Tumor Necrosis Factor-α-Induced Apoptosis	**Masahiro Sugano, Keiko Tsuchida, and Naoki Makino**	**872**
Dominant Expression of a Novel Splice Variant of Caspase-8 in Human Peripheral Blood Lymphocytes	**Takahiko Horiuchi, Daisuke Himeji, Hiroshi Tsukamoto, Shin-ichi Harashima, Chinami Hashimura, and Kenshi Hayashi**	**877**
The Repressive Function of AP2 Transcription Factor on the Hepatocyte Growth Factor Gene Promoter	**Jie-Gen Jiang, Marie C. DeFrances, Jennifer Machen, Carla Johnson, and Reza Zarnegar**	**882**
Morphological Alteration of X-ray Induced Partially Transformed Human Cells by Transfection with a Small c-myc DNA Sequence	**Yoshio Kano, Tsutomu Nohno, Rei Takahashi, Fukumi Hiragami, Kenji Kawamura, Klaus Strebhardt, Masayoshi Namba, Taketoshi Sugiyama, and John B. Little**	**887**
Temperature Dependence of Force, Velocity, and Processivity of Single Kinesin Molecules	**Kenji Kawaguchi and Shin'ichi Ishiwata**	**895**
Hepatocyte Growth Factor Enhances MMP Activity in Human Endothelial Cells	**He Wang and Joan A. Keiser**	**900**
α_1-Adrenoceptor Subtypes Differentially Couple to Growth Promotion and Inhibition in Chinese Hamster Ovary Cells	**Susanne Keffel, Alexander Alexandrov, Mark Goepel, and Martin C. Michel**	**906**

Structural and Functional Characterizations of the 5′-Flanking Region of the Mouse Glucagon Receptor Gene: Comparison with the Rat Gene	**Anne Geiger, Jean François Decaux, Rémy Burcelin, Alphonse Le Cam, Guillermo Salazar, Maureen J. Charron, Jean Girard, and Alain Kervran**	**912**
VIP Activates G_s and G_{i3} in Rat Alveolar Macrophages and G_s in HEK293 Cells Transfected with the Human $VPAC_1$ Receptor	**S. M. Shreeve, S. P. Sreedharan, M. P. Hacker, D. E. Gannon, and M. J. Morgan**	**922**
Cloning and Characterization of αP Integrin in Embryos of the Sea Urchin *Strongylocentrotus purpuratus*	**Janine M. Susan, Margaret L. Just, and William J. Lennarz**	**929**
Translocation of TRAF Proteins Regulates Apoptotic Threshold of Cells	**Robert H. Arch, Richard W. Gedrich, and Craig B. Thompson**	**936**
Porphyrin Biosynthesis Intermediates Are Not Regulating δ-Aminolevulinic Acid Transport in *Saccharomyces cerevisiae*	**Mariana Bermudez Moretti, Susana Correa Garcia, and Alcira Batlle**	**946**
Refinement of the Expression Pattern of a Mouse Homologue of the Porcine 135-kDa α-D-Mannosidase (MAN2B2)	**Sèmi Tascou, Karim Nayernia, Wolfgang Engel, and Peter Burfeind**	**951**
Characterization of Insulin Receptor Substrate 3 in Rat Liver Derived Cells	**Woo S. Choi and Chin K. Sung**	**953**
Sensitivity of Orexin-A Binding to Phospholipase C Inhibitors, Neuropeptide Y, and Secretin	**J. K. Kane, H. Tanaka, S. L. Parker, M. Yanagisawa, and M. D. Li**	**959**

ERRATUM

Volume **271,** Number 3 (2000), in the article "Poliovirus Induces an Early Impairment of Mitochondrial Function by Inhibiting Succinate Dehydrogenase Activity," by Anna Koundouris, George E. N. Kass, Christopher R. Johnson, Angela Boxall, Peter G. Sanders, and Michael J. Carter, pages 610–614 (doi:10.1006/bbrc.2000.2675) **966**

Author Index for Volume 272 **967**

Volume 273, Number 1, June 24, 2000

BREAKTHROUGHS AND VIEWS

Transcriptional Homeostatic Control of Membrane Lipid Composition **Douglas Thewke, Marianne Kramer, and Michael S. Sinensky** 1

REGULAR ARTICLES

Activation of NADPH Oxidase in Alzheimer's Disease Brains **Shun Shimohama, Hiroko Tanino, Naoko Kawakami, Naoki Okamura, Hiroomi Kodama, Teruhide Yamaguchi, Takao Hayakawa, Akihiko Nunomura, Shigeru Chiba, George Perry, Mark A. Smith, and Sadaki Fujimoto** 5
Alterations in Outward K^+ Currents on Removal of External Ca^{2+} in Human Atrial Myocytes **Federica Bertaso, Bruce M. Hendry, Paul Donohoe, and Andrew F. James** 10
Mitochondrial Inhibitors Evoke Catecholamine Release from Pheochromocytoma Cells **S. C. Taylor, S. M. Shaw, and C. Peers** 17
S-Nitrosothiol Formation in Blood of Lipopolysaccharide-Treated Rats **David Jourd'heuil, Laura Gray, and Matthew B. Grisham** 22
Identification, Gene Structure, and Expression of Human Frizzled-3 (*FZD3*) **Cinzia F. Sala, Elisa Formenti, Georg C. Terstappen, and Andrea Caricasole** 27
Phosphoprotein Phosphatases Regulate Steroidogenesis by Influencing StAR Gene Transcription **Chris J. Burns, Shân L. Gyles, Shanta J. Persaud, David Sugden, Barbara J. Whitehouse, and Peter M. Jones** 35
Analysis of Tamoxifen–DNA Adducts by High-Performance Liquid Chromatography Using Postcolumn Online Photochemical Activation **Minoti Sharma** 40
Bile Acids Reduce the Apoptosis-Inducing Effects of Sodium Butyrate on Human Colon Adenoma (AA/C1) Cells: Implications for Colon Carcinogenesis **Lorna McMillan, Stephen Butcher, Yvonne Wallis, John P. Neoptolemos, and Janet M. Lord** 45
Artifacts in Cell Culture: Rapid Generation of Hydrogen Peroxide on Addition of (−)-Epigallocatechin, (−)-Epigallocatechin Gallate, (+)-Catechin, and Quercetin to Commonly Used Cell Culture Media **Lee Hua Long, Marie Veronique Clement, and Barry Halliwell** 50
Downregulation of Proapoptotic Proteins Bax and Bcl-X_S in p53 Overexpressing Hepatocellular Carcinomas **Walter Beerheide, Yee-Joo Tan, Eileen Teng, Anthony E. Ting, Adisorn Jedpiyawongse, and Petcharin Srivatanakul** 54
Inhibition of Alanyl-Aminopeptidase Suppresses the Activation-Dependent Induction of Glycogen Synthase Kinase-3β (GSK-3β) in Human T Cells **Uwe Lendeckel, Beate Scholz, Marco Arndt, Karin Frank, Antje Spiess, Huixiong Chen, Bernard P. Roques, and Siegfried Ansorge** 62
Shear Stress Enhances Glutathione Peroxidase Expression in Endothelial Cells **Saori Takeshita, Nobutaka Inoue, Tomomi Ueyama, Seinosuke Kawashima, and Mitsuhiro Yokoyama** 66

Lipid Peroxidation in Small and Large Phospholipid Unilamellar Vesicles Induced by Water-Soluble Free Radical Sources	**Qiu-Tian Li, Mui Huang Yeo, and Boon Kheng Tan**	**72**
Mitogenic Phospholipase D Activity Is Restricted to Caveolin-Enriched Membrane Microdomains	**Lizhong Xu, Yingjie Shen, Troy Joseph, Annika Bryant, Jing-Qing Luo, Paul Frankel, Thuy Rotunda, and David A. Foster**	**77**
Characterization of Novel and Identified Genes in Guinea Pig Organ of Corti	**Takeshi Oshima, Takaya Nakajima, Hiroshi Wada, Katsuhisa Ikeda, and Tomonori Takasaka**	**84**
Characterization of Five Novel Human Genes in the 11q13–q22 Region	**Kevin P. O'Brien, Isabel Tapia-Páez, Mona Ståhle-Bäckdahl, Darek Kedra, and Jan P. Dumanski**	**90**
1,25 Dihydroxyvitamin D$_3$ Activates Sphingomyelin Turnover in ROS17/2.8 Osteosarcoma Cells without Sphingolipid-Induced Changes in Cytosolic Ca^{2+}	**Riting Liu, Yihuan Xu, Mary C. Farach-Carson, James J. Vogel, and Norman J. Karin**	**95**
Inhibition of Fas-Mediated Fulminant Hepatitis in CrmA Gene-Transfected Mice	**Xiao-Kang Li, Masayuki Fujino, Lei Guo, Torayuki Okuyama, Naoko Funeshima, Mitsuhiro Hashimoto, Keiko Okabe, Hiroyuki Yaginuma, Katsuhiko Mikoshiba, Shin Enosawa, Hiroshi Amemiya, and Seiichi Suzuki**	**101**
Identification of Calponin as a Novel Substrate of Rho-Kinase	**Takako Kaneko, Mutsuki Amano, Akio Maeda, Hideyuki Goto, Katsuhito Takahashi, Masaaki Ito, and Kozo Kaibuchi**	**110**
Comparative Analysis of CD137 and LPS Effects on Monocyte Activation, Survival, and Proliferation	**Joachim Langstein, Florian M. Becke, Liane Söllner, Gitte Krause, Gero Brockhoff, Marina Kreutz, Reinhard Andreesen, and Herbert Schwarz**	**117**
Expression of Full-Length and Truncated Recombinant Human Brain Type I Inositol 1,4,5-Trisphosphate Receptors in Mammalian and Insect Cells	**Ting-Kuang Niu and Richard H. Ashley**	**123**
Inhibition of Signal Transducer and Activator Transcription Factor 3 in Rats with Acute Hepatic Failure	**Yukio Kamohara, Nozomu Sugiyama, Toru Mizuguchi, Daniel Inderbitzin, Helene Lilja, Yvette Middleton, Toomas Neuman, Achilles A. Demetriou, and Jacek Rozga**	**129**
Differential Contribution of Superoxide Dismutase Activity by Prion Protein *in Vivo*	**Boon-Seng Wong, Tao Pan, Tong Liu, Ruliang Li, Pierluigi Gambetti, and Man-Sun Sy**	**136**
NF-κB Activation Is Related to the Resistance of Lung Cancer Cells to TNF-α-Induced Apoptosis	**Jae-Yeol Kim, Seunghee Lee, Bin Hwangbo, Choon-Taek Lee, Young Whan Kim, Sung Koo Han, Young-Soo Shim, and Chul-Gyu Yoo**	**140**

CEA Is the Major PHA-L-Reactive Glycoprotein in Colon Carcinoma Cell Lines and Tumors: Relationship between K-*ras* Activation and β1–6 Branching of N-Linked Carbohydrate on CEA	**Donald C. Wojciechowicz, Patrick Y. Park, Rajiv V. Datta, and Philip B. Paty**	**147**
TSH and cAMP Do Not Signal Mitogenesis through Ras Activation	**Alexandra Van Keymeulen, Pierre P. Roger, Jacques E. Dumont, and Sarah Dremier**	**154**
Glycosylation Affects Translocation of Integrin, Src, and Caveolin into or out of GEM	**Akira Kazui, Masaya Ono, Kazuko Handa, and Sen-itiroh Hakomori**	**159**
Cytokine-Inducing Macromolecular Glycolipids from *Enterococcus hirae:* Improved Method for Separation and Analysis of Its Effects on Cellular Activation	**Masahito Hashimoto, Yoshimasa Imamura, Toshiyuki Morichika, Kazumi Arimoto, Osamu Takeuchi, Kiyoshi Takeda, Shizuo Akira, Kazue Aoyama, Toshihide Tamura, Shozo Kotani, Yasuo Suda, and Shoichi Kusumoto**	**164**
Possible Role of Calpain in Normal Processing of β-Amyloid Precursor Protein in Human Platelets	**Ming Chen, Jacques Durr, and Hugo L. Fernandez**	**170**
Characterization of Cop I Coat Proteins in Plant Cells	**Inmaculada Contreras, Elena Ortiz-Zapater, Luis Miguel Castilho, and Fernando Aniento**	**176**
The 300-kDa Intermediate Filament-Associated Protein (IFAP300) Is a Hamster Plectin Ortholog	**Bryan H. Clubb, Ying-Hao Chou, Harald Herrmann, Tatyana M. Svitkina, Gary G. Borisy, and Robert D. Goldman**	**183**
PC2 and 7B2 Null Mice Demonstrate That PC2 Is Essential for Normal Pro-CCK Processing	**Daesety Vishnuvardhan, Kelly Connolly, Brian Cain, and Margery C. Beinfeld**	**188**
Deficiency in Mitochondrial Aldehyde Dehydrogenase Increases the Risk for Late-Onset Alzheimer's Disease in the Japanese Population	**Kouzin Kamino, Keiko Nagasaka, Masaki Imagawa, Hideki Yamamoto, Hiroshi Yoneda, Akira Ueki, Shin Kitamura, Kazuhiko Namekata, Tetsuro Miki, and Shigeo Ohta**	**192**
Functional and Structural Studies of α-Crystallin from Galactosemic Rat Lenses	**Fu-Yung Huang, Yuh Ho, Tien-Shun Shaw, and Sheng-An Chuang**	**197**
The Frequency of Point Mutations in Mitochondrial DNA Is Elevated in the Alzheimer's Brain	**Shin-Wen Chang, Dekui Zhang, Hyung Doo Chung, and H. Peter Zassenhaus**	**203**
Dual Effects of PKNα and Protein Kinase C on Phosphorylation of Tau Protein by Glycogen Synthase Kinase-3β	**Takayuki Isagawa, Hideyuki Mukai, Kumiko Oishi, Taizo Taniguchi, Hiroshi Hasegawa, Toshio Kawamata, Chikako Tanaka, and Yoshitaka Ono**	**209**
Expression of Autocrine Motility Factor/Phosphohexose Isomerase in Cos7 Cells	**Annick Lagana, Thomas Duchaine, Avraham Raz, Luc DesGroseillers, and Ivan R. Nabi**	**213**
Specific Impairment of Cardiogenesis in Mouse ES Cells Containing a Human Chromosome 21	**Toshiaki Inoue, Tokuyuki Shinohara, Shoko Takehara, Jun Inoue, Hiroki Kamino, Hiroyuki Kugoh, and Mitsuo Oshimura**	**219**

Expression of Guanylin Is Downregulated in Mouse and Human Intestinal Adenomas	**Kris A. Steinbrecher, Thérèse M. F. Tuohy, Kathleen Heppner Goss, M. Catherine Scott, David P. Witte, Joanna Groden, and Mitchell B. Cohen**	225
The Role of ARNT2 in Tumor Angiogenesis and the Neural Response to Hypoxia	**Emin Maltepe, Brian Keith, Andrew M. Arsham, James R. Brorson, and M. Celeste Simon**	231
Transcription Factor GATA-2 Gene Is Located Near 3q21 Breakpoints in Myeloid Leukemia	**Rotraud Wieser, Armin Volz, Ursula Vinatzer, Katheleen Gardiner, Ulrich Jäger, Margit Mitterbauer, Andreas Ziegler, and Christa Fonatsch**	239
Convulxin Binding to Platelet Receptor GPVI: Competition with Collagen Related Peptides	**F. Niedergang, A. Alcover, C. G. Knight, R. W. Farndale, M. J. Barnes, I. M. B. Francischetti, C. Bon, and M. Leduc**	246
Molecular Identification and Characterization of Novel Members of the Human Organic Anion Transporter (OATP) Family	**Ikumi Tamai, Jun-ichi Nezu, Hiroshi Uchino, Yoshimichi Sai, Asuka Oku, Miyuki Shimane, and Akira Tsuji**	251
Interaction of Albumin mRNA with Proteins from Rat Liver with CCl_4-Induced Injury	**Susumu Morigasaki, Fang Li, Akiko Kawai, Kazumaro Yamazaki, Dwaipayan Sikdar, Yasuhide Hibino, and Koichi Hiraga**	261
Kaposi's Sarcoma Cells of Different Etiologic Origins Respond to HIV-Tat through the Flk-1/KDR (VEGFR-2): Relevance in AIDS-KS Pathology	**Monica Morini, Roberto Benelli, Daniela Giunciuglio, Sebastiano Carlone, Giuseppe Arena, Douglas M. Noonan, and Adriana Albini**	267
Restructured Transactivation Domain in Hamster AH Receptor	**Merja Korkalainen, Jouko Tuomisto, and Raimo Pohjanvirta**	272
Phenotypic Expression of IGF Binding Protein Transcripts in Muscle, *in Vitro* and *in Vivo*	**S. Bayol, P. T. Loughna, and C. Brownson**	282
Glioma Inhibition by HGF/NK2, an Antagonist of Scatter Factor/Hepatocyte Growth Factor	**Christopher Guerin, Carey Luddy, Roger Abounader, Bachchu Lal, and John Laterra**	287
Characterization of the Tyrosine Kinase Tnk1 and Its Binding with Phospholipase C-γ1	**Donna M. Felschow, Curt I. Civin, and Gerard T. Hoehn**	294
Direct Inhibition of *in Vitro* PLD Activity by 4-(2-Aminoethyl)-Benzenesulfonyl Fluoride	**Brooke Andrews, Kristina Bond, Jason A. Lehman, Jeffrey M. Horn, Amy Dugan, and Julia Gomez-Cambronero**	302
Expression of Leptin Receptors and Induction of IL-1β Transcript in Glial Cells	**Toru Hosoi, Yasunobu Okuma, and Yasuyuki Nomura**	312
The 5′-End of hTERT mRNA Is a Good Target for Hammerhead Ribozyme to Suppress Telomerase Activity	**Yasuhiro Yokoyama, Yuichiro Takahashi, Ariyoshi Shinohara, Xiaoyun Wan, Seiji Takahashi, Kenji Niwa, and Teruhiko Tamaya**	316
IGF-1 Regulates Cardiac Fibroblast Apoptosis Induced by Osmotic Stress	**James W. Mockridge, Eleanor C. Benton, Larisa V. Andreeva, David S. Latchman, Michael S. Marber, and Richard J. Heads**	322

Protein Kinase A-Dependent Phosphorylation of Aquaporin-1 — **Zhiqiang Han and Rajkumar V. Patil** — 328

Induction of Cytochrome P450 (CYP)1A1, CYP1A2, and CYP3A4 but Not of CYP2C9, CYP2C19, Multidrug Resistance (MDR-1) and Multidrug Resistance Associated Protein (MRP-1) by Prototypical Inducers in Human Hepatocytes — **Dieter Runge, Christoph Köhler, Vsevolod E. Kostrubsky, Dana Jäger, Thomas Lehmann, Dorothee M. Runge, Ursula May, Donna Beer Stolz, Stephen C. Strom, Wolfgang E. Fleig, and George K. Michalopoulos** — 333

p63 and p73 Transactivate Differentiation Gene Promoters in Human Keratinocytes — **Vincenzo De Laurenzi, Antonello Rossi, Alessandro Terrinoni, Daniela Barcaroli, Massimo Levrero, Antonio Costanzo, Richard A. Knight, Piero Guerrieri, and Gerry Melino** — 342

Cardiac Calcineurin during Transition from Hypertrophy to Heart Failure in Rats — **Wataru Hayashida, Yasuki Kihara, Asuka Yasaka, and Shigetake Sasayama** — 347

Cloning and Characterization of the 5′-Flanking Region for the Mouse Phospholipase C-δ1 Gene — **Jong Kee Kim, Woon Kyu Lee, Ho-Woo Nam, Kweon-Haeng Lee, Hoon Han, Hyoung Kyun Rha, Tae-Youn Jun, Kwang-Soo Kim, and Chang Rak Choi** — 352

Manganese Superoxide Dismutase Levels Are Elevated in a Proportion of Amyotrophic Lateral Sclerosis Patient Cell Lines — **Gillian McEachern, Sacha Kassovska-Bratinova, Sandeep Raha, Mark A. Tarnopolsky, John Turnbull, Jacqueline Bourgeois, and Brian Robinson** — 359

Isolation of Two Novel Human RhoGEFs, *ARHGEF3* and *ARHGEF4,* in 3p13–21 and 2q22 — **Signe Thiesen, S. Kübart, H.-H. Ropers, and H. G. Nothwang** — 364

Expression and Transcriptional Regulation of the Human α1,3-Fucosyltransferase 4 (FUT4) Gene in Myeloid and Colon Adenocarcinoma Cell Lines — **Akiyoshi Taniguchi, Ryohei Suga, and Kojiro Matsumoto** — 370

Enhanced Secretion of ApoB by Transfected HepG2 Cells Overexpressing Fibrinogen — **Hui Xia and Colvin Redman** — 377

Myoneurin, a Novel Member of the BTB/POZ-Zinc Finger Family Highly Expressed in Human Muscle — **Patrick M. Alliel, Nadia Seddiqi, Danièle Goudou, Carmen Cifuentes-Diaz, Norma Romero, Elena Velasco, François Rieger, and Jean-Pierre Périn** — 385

Number 2, July 5, 2000

BREAKTHROUGHS AND VIEWS

Identification of Dipeptidyl Peptidase III in Human Neutrophils — **Jun-ichi Hashimoto, Yukio Yamamoto, Hisasi Kurosawa, Kinya Nishimura, and Tadahiko Hazato** — 393

REGULAR ARTICLES

The Transcript for a Novel Protein with a Zinc Finger Motif Is Expressed at Specific Stages of Mouse Spermatogenesis — **Atsuto Inoue, Atsushi Ishiji, Satoshi Kasagi, Masamichi Ishizuka, Shigehisa Hirose, Tadashi Baba, and Hiromi Hagiwara** 398

Dual Anticancer Activity of 8-Cl-cAMP: Inhibition of Cell Proliferation and Induction of Apoptotic Cell Death — **Se Nyun Kim, Sang Gyun Kim, Jin Hyun Park, Myung Ae Lee, Sang Dai Park, Yoon S. Cho-Chung, and Seung Hwan Hong** 404

Influence of bcl-2-Related Proteins on Matrix Metalloproteinase Expression in a Rat Glioma Cell Line — **Lisa Oliver, Karine Tremblais, Nathalie Guriec, Stéphane Martin, Khaled Meflah, Jean Menanteau, and Françoise-Marie Vallette** 411

Losartan Inhibits Cellular Uptake of Oxidized LDL by Monocyte-Macrophages from Hypercholesterolemic Patients — **Tony Hayek, Michael Aviram, Ronit Heinrich, Emad Sakhnini, and Shlomo Keidar** 417

Structure–Activity Relationships for Selected Sulfur-Rich Antithrombotic Compounds — **Justin A. MacDonald and Richard F. Langler** 421

Deregulation of the Cytoplasmic Tyrosine Kinase cSrc in the Absence of a Truncating Mutation at Codon 531 in Human Bladder Carcinoma — **C. Bénistant, H. Chapuis, N. Mottet, J. Noletti, E. Crapez, J. P. Bali, and S. Roche** 425

Molecular Cloning and Characterization of a New Insulin/IGF-like Peptide of the Nematode *Caenorhabditis elegans* — **Tsuyoshi Kawano, Youhei Ito, Masaji Ishiguro, Kyoko Takuwa, Terumi Nakajima, and Yasuo Kimura** 431

4-Hydroxy-2-nonenal, the End Product of Lipid Peroxidation, Is a Specific Inducer of Cyclooxygenase-2 Gene Expression — **Takeshi Kumagai, Yoshiyuki Kawamoto, Yoshimasa Nakamura, Ichiro Hatayama, Kimihiko Satoh, Toshihiko Osawa, and Koji Uchida** 437

Molecular Cloning of a Cyclin-like Protein Associated with Cyclin-Dependent Kinase 3 (cdk 3) *in Vivo* — **Masaaki Matsuoka, Yoshiharu Matsuura, Kentaro Semba, and Ikuo Nishimoto** 442

Stimulation of Cell Invasion and Migration by Alcohol in Breast Cancer Cells — **Qinghui Meng, Bin Gao, Itzhak D. Goldberg, Eliot M. Rosen, and Saijun Fan** 448

Quantitative Determination of the Expression of Xeroderma Pigmentosum F Gene in Human Nonmelanoma Skin Cancers — **Li-Ching Chang, Hamm-Ming Sheu, Yu-Sheng Huang, and Kou-Wha Kuo** 454

Human Histo-blood Group *ABO* Glycosyltransferase Genes: Different Enhancer Structures with Different Transcriptional Activities — **Lung-Chih Yu, Ching-Yi Chang, Yuh-Ching Twu, and Marie Lin** 459

Hemin Is Kinetically Trapped in Cytochrome b_5 from Rat Outer Mitochondrial Membrane — **Svetlana Silchenko, Michelle L. Sippel, Olga Kuchment, David R. Benson, A. Grant Mauk, Adriana Altuve, and Mario Rivera** 467

Site-Specific Integration of a Transgene Mediated by a Hybrid Adenovirus/Adeno-Associated Virus Vector Using the Cre/*loxP*-Expression-Switching System	**Takashi Ueno, Hajime Matsumura, Keiji Tanaka, Tomoko Iwasaki, Mitsuhiro Ueno, Kei Fujinaga, Kiyozo Asada, and Ikunoshin Kato**	**473**
Complex Formation between Hepatitis C Virus Core Protein and p21Waf1/Cip1/Sdi1	**Fan Wang, Isao Yoshida, Manabu Takamatsu, Satoshi Ishido, Tsunenori Fujita, Kiyomasa Oka, and Hak Hotta**	**479**
Prostaglandins Up-Regulate Vascular Endothelial Growth Factor Production through Distinct Pathways in Differentiated U937 Cells	**Hiromi Bamba, Shinichi Ota, Akira Kato, Chiaki Kawamoto, and Kenji Fujiwara**	**485**
Collateral Existence of *Folded* and *Extended* Conformations of the β-Ala Moiety in a Model Peptide	**Ashwani Kumar Thakur, Paloth Venugopalan, and Raghuvansh Kishore**	**492**
Cloning of the *Microcystis aeruginosa* M228 Lectin (MAL) Gene	**Mitsuru Jimbo, Masato Yamaguchi, Koji Muramoto, and Hisao Kamiya**	**499**
Estradiol-17β Sulfotransferase Activity in Canine Osteosarcoma D17 Cells	**J. I. Raeside, H. L. Christie, L. Forster, and R. L. Renaud**	**505**
Rapid Isolation and Characterization of the Yeast Proteasome Regulatory Complex	**Yasushi Saeki, Akio Toh-e, and Hideyoshi Yokosawa**	**509**
Prostaglandin I_2, a Possible Thermo-Sensory Mediator in *Paramecium*	**Tomohisa Murata, Hiroshi Morii, Yumiko Watanabe, Kiyoshi Matsumura, Yasuyoshi Watanabe, and Yasuo Nakaoka**	**516**
Involvement of the Ras/MAPK Signaling Pathway in the Modulation of Urokinase Production and Cellular Invasiveness by Transforming Growth Factor-β_1 in Transformed Keratinocytes	**Juan F. Santibáñez, Maite Iglesias, Pilar Frontelo, Jorge Martínez, and Miguel Quintanilla**	**521**
Epsilon as an Initiator of Translation of CAT mRNA in *Escherichia coli*	**Ashkan Golshani, Vihren Kolev, Mounir G. AbouHaidar, and Ivan G. Ivanov**	**528**
Identification of a Novel Human Sterol-Sensitive ATP-Binding Cassette Transporter (ABCA7)	**Wolfgang E. Kaminski, Evelyn Orsó, Wendy Diederich, Jochen Klucken, Wolfgang Drobnik, and Gerd Schmitz**	**532**
Adhesion to Fibronectin Enhances MKP-1 Activation in Human Endothelial Cells	**Francis Kim and Marshall A. Corson**	**539**
Involvement of p65 in the Regulation of NF-κB in Rat Hepatic Stellate Cells during Cirrhosis	**Vasilis Vasiliou, Ji Lee, Aglaia Pappa, and Dennis R. Petersen**	**546**
Fibroblast Growth Factors Are Translocated to the Nucleus of Human Endothelial Cells in a Microtubule- and Lysosome-Independent Pathway	**Guo-fu Hu, Hyun-ju Kim, Chi-jie Xu, and James F. Riordan**	**551**
Efficiency of Erythropoietin's Signal Peptide for HIV_{MN}-1 gp 120 Expression	**Antonieta M. Herrera, Alexis Musacchio, Julio R. Fernández, and Carlos A. Duarte**	**557**
Synergistic Activation of UCP-3 Expression in Cultured Fetal Rat Brown Adipocytes by PPARα and PPARγ Ligands	**Teresa Teruel, Stephen A. Smith, John Peterson, and John C. Clapham**	**560**

Quantification of Platelet Activation Status by Analyzing P-Selectin Expression	**Valery Leytin, Meera Mody, John W. Semple, Bernadette Garvey, and John Freedman**	**565**
Molecular Cloning and Genomic Organization of a Second Probable Allatostatin Receptor from *Drosophila melanogaster*	**Camilla Lenz, Michael Williamson, and Cornelis J. P. Grimmelikhuijzen**	**571**
Characterization of an ECF Sigma Factor Protein from *Pseudomonas aeruginosa*	**Megan J. Wilson and Iain L. Lamont**	**578**
Functional Analysis of Heme Regulatory Elements of the Transcriptional Activator Hap1	**Thomas Hon, Angela Hach, Hee Chul Lee, Tina Cheng, and Li Zhang**	**584**
PQBP-1/Npw38, a Nuclear Protein Binding to the Polyglutamine Tract, Interacts with U5-15kD/dim1p via the Carboxyl-Terminal Domain	**M. Waragai, E. Junn, M. Kajikawa, S. Takeuchi, I. Kanazawa, M. Shibata, M. M. Mouradian, and H. Okazawa**	**592**
Cloning of a Coproporphyrinogen Oxidase Promoter Regulatory Element Binding Protein	**Shinichiro Takahashi, Kazumichi Furuyama, Akira Kobayashi, Shigeru Taketani, Hideo Harigae, Masayuki Yamamoto, Kazuhiko Igarashi, Takeshi Sasaki, and Norio Hayashi**	**596**
Aging Enhances the Activation of the Permeability Transition Pore in Mitochondria	**Michael Mather and Hagai Rottenberg**	**603**
Disruption of Actin Cytoskeleton Induces Chondrogenesis of Mesenchymal Cells by Activating Protein Kinase C-α Signaling	**Young-Bin Lim, Shin-Sung Kang, Tae Kyu Park, Young-Sup Lee, Jang-Soo Chun, and Jong Kyung Sonn**	**609**
Molecular Basis for Differing Antineurogenic Effects of GATA-1a and GATA-1b in *Xenopus*	**Hung-Dar Chen, Ying Kao Huang, Kay Ault, Gee Wan Wong, Marie Chia-Mi Lin, Hao-Chia Chen, and Hsiang-fu Kung**	**614**
Inefficient Function of the Signal Sequence of PTHrP for Targeting into the Secretory Pathway	**Norio Amizuka, Mariko Fukushi-Irie, Tomoyo Sasaki, Kimimitsu Oda, and Hidehiro Ozawa**	**621**
Multilineage Differentiation of *Cbfa1*-Deficient Calvarial Cells *in Vitro*	**Hirohiko Kobayashi, Yu-hao Gao, Chisato Ueta, Akira Yamaguchi, and Toshihisa Komori**	**630**
Neovascularization with Blood-Brain Barrier Breakdown in Delayed Neuronal Death	**Yosky Kataoka, Yilong Cui, Hisao Yamada, Katsuhiro Utsunomiya, Hironari Niiya, Hisato Yanase, Yoichi Nakamura, Akira Mitani, Kiyoshi Kataoka, and Yasuyoshi Watanabe**	**637**
Molecular Cloning and Expression of the Mouse *N*-Acetylneuraminic Acid 9-Phosphate Synthase Which Does Not Have Deaminoneuraminic Acid (KDN) 9-Phosphate Synthase Activity	**Daisuke Nakata, Brett E. Close, Karen J. Colley, Tsukasa Matsuda, and Ken Kitajima**	**642**
In Vitro Creation of Amyloid Fibrils from Native and Arg124Cys Mutated βIGH3$_{(110-131)}$ Peptides, and Its Relevance for Lattice Corneal Amyloid Dystrophy Type I	**Clair-Florent Schmitt-Bernard, Alain Chavanieu, Jean Derancourt, Bernard Arnaud, Jacques G. Demaille, Bernard Calas, and Àngel Argiles**	**649**

Promoter Analysis and Chromosomal Mapping of Human EBAG9 Gene	**Kazuhiro Ikeda, Masako Sato, Osamu Tsutsumi, Fujiko Tsuchiya, Michiko Tsuneizumi, Mitsuru Emi, Issei Imoto, Johji Inazawa, Masami Muramatsu, and Satoshi Inoue**	**654**
Specificity and Efficiency of Cre-Mediated Recombination in Emx1–cre Knock-in Mice	**Huailian Guo, Shuangsong Hong, Xiao-Lu Jin, Ren-Shiang Chen, Prachee Pradeep Avasthi, Yen-Te Tu, Tammy Leanne Ivanco, and Yuqing Li**	**661**
Systemic Administration of HVJ Viral Coat–Liposome Complex Containing Human Insulin Vector Decreases Glucose Level in Diabetic Mouse: A Model of Gene Therapy	**Ryuichi Morishita, Gary H. Gibbons, Yasufumi Kaneda, Toshio Ogihara, and Victor J. Dzau**	**666**
Vitamin D Induced Up-Regulation of Keratinocyte Growth Factor (FGF-7/KGF) in MCF-7 Human Breast Cancer Cells	**Alex Lyakhovich, Nickolai Aksenov, Pasi Pennanen, Susanna Miettinen, Merja H. Ahonen, Heimo Syvälä, Timo Ylikomi, and Pentti Tuohimaa**	**675**
Enantiospecific Recognition of DNA Sequences by a Proflavine Tröger Base	**Christian Bailly, William Laine, Martine Demeunynck, and Jean Lhomme**	**681**
The Mouse ZFH-4 Protein Contains Four Homeodomains and Twenty-Two Zinc Fingers	**Nobuo Sakata, Kazunori Hemmi, Makoto Kawaguchi, Yutaka Miura, Shigeru Noguchi, Dongping Ma, Masakiyo Sasahara, Taiji Kato, Makoto Hori, and Taiki Tamaoki**	**686**
6,3′-Dibromoflavone and 6-Nitro-3′-bromoflavone: New Additions to the 6,3′-Disubstituted Flavone Family of High-Affinity Ligands of the Brain Benzodiazepine Binding Site with Agonistic Properties	**Haydee Viola, Mariel Marder, Cristina Wasowski, Osvaldo Giorgi, Alejandro C. Paladini, and Jorge H. Medina**	**694**
COX-2 Inhibition Prevents Insulin-Dependent Diabetes in Low-Dose Streptozotocin-Treated Mice	**Tahereh Tabatabaie, Angelica M. Waldon, Jane M. Jacob, Robert A. Floyd, and Yashige Kotake**	**699**
Expression and Binding Properties of a Soluble Chimeric Protein Containing the N-Terminal Domain of the Duffy Antigen	**Kazimiera Waśniowska, Marcin Czerwiński, Wojciech Jachymek, and Elwira Lisowska**	**705**
Identification of a Novel β-Catenin-Interacting Protein	**Aie Kawajiri, Naohiro Itoh, Masaki Fukata, Masato Nakagawa, Masaki Yamaga, Akihiro Iwamatsu, and Kozo Kaibuchi**	**712**
Stress-Activated Protein Kinase-Dependent Induction of c-*fos* by Cd^{2+} Is Mediated by MKK7	**Wei Ding and Douglas M. Templeton**	**718**
Reciprocal Expression of Infant- and Adult-Preferring Transcripts of CDCrel-1 Septin Gene in the Rat Neocortex	**Shigenobu Toda, Yasushi Kajii, Mitsumoto Sato, and Toru Nishikawa**	**723**
The Effects of Vitamin C Supplementation on Protein Oxidation in Healthy Volunteers	**Julie L. Carty, Ruth Bevan, Helen Waller, Nalini Mistry, Marcus Cooke, Joe Lunec, and Helen R. Griffiths**	**729**

Extracellular Regulated Kinase, but Not Protein Kinase C, Is an Antiapoptotic Signal of Insulin-like Growth Factor-1 on Cultured Cardiac Myocytes — **Rocío Foncea, Anita Gálvez, Viviana Pérez, María Paz Morales, Andrea Calixto, Jaime Meléndez, Fabián González-Jara, Guillermo Díaz-Araya, Mario Sapag-Hagar, Peter H. Sugden, Derek LeRoith, and Sergio Lavandero** **736**

Involvement of Nitric Oxide in Endothelium-Dependent Arterial Relaxation by Leptin — **Keizo Kimura, Kazushi Tsuda, Akira Baba, Tetsuya Kawabe, Shin-ichi Boh-oka, Masayo Ibata, Chizu Moriwaki, Takuzo Hano, and Ichiro Nishio** **745**

Optical Biosensor Study of Ternary Complex Formation in a Cytochrome P4502B4 System — **Yuri D. Ivanov, Irina P. Kanaeva, and Alexander I. Archakov** **750**

Cloning and Characterization of the NADH Pyrophosphatases from *Caenorhabditis elegans* and *Saccharomyces cerevisiae,* Members of a Nudix Hydrolase Subfamily — **WenLian Xu, Christopher A. Dunn, and Maurice J. Bessman** **753**

Cloning and Expression of Mouse Deafness Dystonia Peptide 1 cDNA — **Tokio Nakane, Yoichi Inada, Fumiaki Ito, Nobuo Itoh, Shigeki Tazawa, and Shigetoshi Chiba** **759**

Polymorphisms in FcϵRI β Chain Do Not Affect IgE-Mediated Mast Cell Activation — **Yasuko Furumoto, Shuichi Hiraoka, Keiko Kawamoto, Shigehiro Masaki, Toshio Kitamura, Ko Okumura, and Chisei Ra** **765**

Inhibition of Cyclooxygenase-2 Improves Cardiac Function in Myocardial Infarction — **Takayuki Saito, Ian W. Rodger, Fu Hu, Hani Shennib, and Adel Giaid** **772**

The Structure of the Human LIM Protein ACT Gene and Its Expression in Tumor Cell Lines — **Matthew J. Morgan and Simon A. Whawell** **776**

Epolactaene, a Novel Neuritogenic Compound in Human Neuroblastoma Cells, Selectively Inhibits the Activities of Mammalian DNA Polymerases and Human DNA Topoisomerase II — **Yoshiyuki Mizushina, Susumu Kobayashi, Kouji Kuramochi, Seigo Nagata, Fumio Sugawara, and Kengo Sakaguchi** **784**

The Deuterium Isotope Effect on the NMR Signal of the Low-Barrier Hydrogen Bond in a Transition-State Analog Complex of Chymotrypsin — **Constance S. Cassidy, Jing Lin, and Perry A. Frey** **789**

Phylogenetic Classification of Prokaryotic and Eukaryotic Sir2-like Proteins — **Roy A. Frye** **793**

Number 3, July 14, 2000

BREAKTHROUGHS AND VIEWS

Sterol 14-Demethylase P450 (CYP51) Provides a Breakthrough for the Discussion on the Evolution of Cytochrome P450 Gene Superfamily — **Yuzo Yoshida, Yuri Aoyama, Mitsuhide Noshiro, and Osamu Gotoh** **799**

H_2O_2-Induced Tyrosine Phosphorylation of Protein Kinase Cδ by a Mechanism Independent of Inhibition of Protein-Tyrosine Phosphatase in CHO and COS-7 Cells	**Toshiyoshi Yamamoto, Hidenori Matsuzaki, Hiroaki Konishi, Yoshitaka Ono, and Ushio Kikkawa**	**960**
A Kinetically Efficient Form of the *Chlamydomonas* Self-Splicing Ribosomal RNA Precursor	**Tai-Chih Kuo and David L. Herrin**	**967**
A sds22 Homolog That Is Associated with the Testis-Specific Serine/Threonine Protein Phosphatase $1\gamma 2$ in Rat Testis	**Yang-Sook Chun, Jong-Wan Park, Gi-Tae Kim, Hiroshi Shima, Minako Nagao, Myung-Suk Kim, and Myung-Hee Chung**	**972**
Metabolism of Vitamin D_3 by Human CYP27A1	**Natsumi Sawada, Toshiyuki Sakaki, Miho Ohta, and Kuniyo Inouye**	**977**
Genomic Organization and Characterization of Human *PEX2* Encoding a 35-kDa Peroxisomal Membrane Protein	**Martina Biermanns and Jutta Gärtner**	**985**
Molecular Cloning and Characterization of a Novel Human Gene Containing Ankyrin Repeat and Double BTB/POZ Domain	**Ken-Shwo Dai, Wei Wei, and Choong-Chin Liew**	**991**
The Role of RhoA in the Germinal Vesicle Breakdown of Mouse Oocytes	**Yong Pil Cheon, Sung Woo Kim, Soo-Jung Kim, Young-Il Yeom, Chaejoon Cheong, and Kwon-Soo Ha**	**997**
Oligomerization and Toxicity of β-Amyloid-42 Implicated in Alzheimer's Disease	**Omar M. A. El-Agnaf, Devinder S. Mahil, Bhroma P. Patel, and Brian M. Austen**	**1003**
Glucocorticoid Effects on NF-κB Binding in the Transcription of the ICAM-1 Gene	**Johan Liden, Ingalill Rafter, Mathias Truss, Jan-Åke Gustafsson, and Sam Okret**	**1008**
Chicken β-Globin 5′HS4 Insulators Function to Reduce Variability in Transgenic Founder Mice	**Wendy Potts, David Tucker, Hilary Wood, and Colin Martin**	**1015**
Epiregulin Is Up-Regulated in Pancreatic Cancer and Stimulates Pancreatic Cancer Cell Growth	**Zhaowen Zhu, Jörg Kleeff, Helmut Friess, Li Wang, Arthur Zimmermann, Yosef Yarden, Markus W. Büchler, and Murray Korc**	**1019**
Adenine-Induced Selective Apoptosis toward HIV Chronically Infected Cells *in Vitro*	**Keisuke Hirasawa, Osamu Yoshida, Takako Fujinami, Kazunori Sohma, and Atsushi Watanabe**	**1025**
Development and Comparison of Two 3T3-L1 Adipocyte Models of Insulin Resistance: Increased Glucose Flux vs Glucosamine Treatment	**Stuart A. Ross, Xiaoli Chen, Heidi R. Hope, Shaping Sun, Ellen G. McMahon, Kay Broschat, and Eric A. Gulve**	**1033**
A Cysteine Residue in the Helix-Loop-Helix Domain of Id2 Is Critical for Homodimerization and Function	**Jian Liu, Wei Shi, and David Warburton**	**1042**
Interaction between Cytochrome P450 and Other Drug-Metabolizing Enzymes: Evidence for an Association of CYP1A1 with Microsomal Epoxide Hydrolase and UDP-Glucuronosyltransferase	**Ken-ichiro Taura, Hideyuki Yamada, Yukiko Hagino, Yuji Ishii, Masa-aki Mori, and Kazuta Oguri**	**1048**
Immunochemical Identification of UGT Isoforms in Human Small Bowel and in Caco-2 Cell Monolayers	**Mary F. Paine and Michael B. Fisher**	**1053**

Purification of Dual-Tagged Intact Recombinant Proteins	**Jesusa L. Rosales and Ki-Young Lee**	1058
Identification of Functional Elements in the Bidirectional Promoter of the Mouse *Nthl1* and *Tsc2* Genes	**Shogo Ikeda, Aiki Mochizuki, Altaf H. Sarker, and Shuji Seki**	1063
Increased Effect of Interferon γ on PDGF-Induced *c-fos* Gene Transcription in Glomerular Mesangial Cells: Differential Effect of the Transcriptional Coactivator CBP on STAT1α Activation	**Goutam Ghosh Choudhury and Jill M. Ricono**	1069
Pancreatitis Induces HSP72 in the Lung: Role of Neutrophils and Xanthine Oxidase	**Emma Folch, Daniel Closa, Patricia Ñeco, Sònia Solé, Anna Planas, Emilio Gelpí, and Joan Roselló-Catafau**	1078
Familial Chylomicronemia Caused by a Novel Type of Mutation in the APOE-CI-CIV-CII Gene Cluster Encompassing Both the APOCII Gene and the First APOCIV Gene Mutation: APOCII-CIV$_{\text{Nijmegen}}$	**J. de Graaf, M. J. V. Hoffer, P. M. J. Stuyt, R. R. Frants, and A. F. H. Stalenhoef**	1084
Structural Study of the Exopolysaccharide Produced by a Clinical Isolate of *Burkholderia cepacia*	**Paola Cescutti, Marco Bosco, Fabrizio Picotti, Giuseppe Impallomeni, Jorge H. Leitão, João A. Richau, and Isabel Sá-Correia**	1088
Transient Expression of Human Telomerase Extends the Life Span of Normal Human Fibroblasts	**Susanne Steinert, Jerry W. Shay, and Woodring E. Wright**	1095
Dialyzable Leukocyte Extract Suppresses the Activity of Essential Transcription Factors for HIV-1 Gene Expression in Unstimulated MT-4 Cells	**Miriam Ojeda Ojeda, Celia Fernández-Ortega, and Manuel de J. Araña Rosaínz**	1099
Human Leukemic (HMC-1) Mast Cells Are Responsive to 1α,25-Dihydroxyvitamin D_3: Selective Promotion of ICAM-3 Expression and Constitutive Presence of Vitamin D_3 Receptor	**Magda Babina, Matthias Krautheim, Andreas Grützkau, and Beate M. Henz**	1104
Mungin, a Novel Cyclophilin-like Antifungal Protein from the Mung Bean	**X. Y. Ye and T. B. Ng**	1111
Expression of *N*-Myristoyltransferase Inhibitor Protein and Its Relationship to c-Src Levels in Human Colon Cancer Cell Lines	**Raju V. S. Rajala, Scott Dehm, Xuguang Bi, Keith Bonham, and Rajendra K. Sharma**	1116
Sequence Determination and Analysis of the Full-Length Genome of Colorado Tick Fever Virus, the Type Species of Genus *Coltivirus* (Family *Reoviridae*)	**Houssam Attoui, Frédérique Billoir, Philippe Biagini, Jean François Cantaloube, Reine de Chesse, Philippe de Micco, and Xavier de Lamballerie**	1121
Molecular Cloning and Genomic Organization of an Allatostatin Preprohormone from *Drosophila melanogaster*	**Camilla Lenz, Michael Williamson, and Cornelis J. P. Grimmelikhuijzen**	1126

A New Cytochrome P450 from *Drosophila melanogaster,* CYP4G15, Expressed in the Nervous System **M. Maïbèche-Coisne, L. Monti-Dedieu, S. Aragon, and C. Dauphin-Villemant** **1132**

Stabilization of Chromium(V) Species in Bovine Serum Albumin Adduct **Kumari Murthy Ananth, Rama Rajaram, and Thirumalachari Ramasami** **1138**

The Effects of Thiazolidinediones on Vascular Smooth Muscle Cell Activation by Angiotensin II **Yoshiyuki Hattori, Kazumi Akimoto, and Kikuo Kasai** **1144**

Exercise Induces Isoform-Specific Increase in 5′AMP-Activated Protein Kinase Activity in Human Skeletal Muscle **Nobuharu Fujii, Tatsuya Hayashi, Michael F. Hirshman, Jeremy T. Smith, Susan A. Habinowski, Lennart Kaijser, James Mu, Olle Ljungqvist, Morris J. Birnbaum, Lee A. Witters, Anders Thorell, and Laurie J. Goodyear** **1150**

B48 Is Preferentially Translated over B100 in Cells with Increased Endogenous Apo B mRNA **Heidi L. Collins, Charles E. Sparks, and Janet D. Sparks** **1156**

Toll-like Receptor 4-Mediated Signal Pathway Induced by *Porphyromonas gingivalis* Lipopolysaccharide in Human Gingival Fibroblasts **Pao-Li Wang, Yasutaka Azuma, Mitsuko Shinohara, and Kiyoshi Ohura** **1161**

5-Fluorouracil Induces Apoptosis through the Suppression of NF-κB Activity in Human Salivary Gland Cancer Cells **Keiko Aota, Masayuki Azuma, Tsuyoshi Yamashita, Tetsuya Tamatani, Katsumi Motegi, Naozumi Ishimaru, Yoshio Hayashi, and Mitsunobu Sato** **1168**

Cloning and Functional Expression of ATA1, a Subtype of Amino Acid Transporter A, from Human Placenta **Haiping Wang, Wei Huang, Mitsuru Sugawara, Lawrence D. Devoe, Frederick H. Leibach, Puttur D. Prasad, and Vadivel Ganapathy** **1175**

ERRATA

Volume **267,** Number 2 (2000), in the article “Regulation of Connexin 43 Gene Expression by Cyclical Mechanical Stretch in Neonatal Rat Cardiomyocytes,” by Tzong-Luen Wang, Yung-Zu Tseng, and Hang Chang, pages 551–557 (doi:10.1006/bbrc.1999.1988) **1180**

Volume **272,** Number 1 (2000), in the article “Distinctive Structural and Kinetic Properties of an Unusual Juvenile Hormone-Hydrolyzing Esterase,” by Keiko Kadono-Okuda, Bettye Ridley, Davy Jones, and Grace Jones, pages 12–17 (doi:10.1006/bbrc.2000.2711) **1180**

Volume **272,** Number 3 (2000), in the article “Multiple Promoters Regulate Human Calcitonin Receptor Gene Expression,” by C. Hebden, R. Smalt, T. Chambers, and M. D. Pondel, pages 738–743 (doi:10.1006/bbrc.2000.2842) **1180**

Author Index for Volume 273 **1181**

Volume 274, Number 1, July 21, 2000

BREAKTHROUGHS AND VIEWS

Recent Advances in Human Hepatocyte Culture Systems — **Dieter Runge, George K. Michalopoulos, Steven C. Strom, and Dorothee M. Runge** — 1

REGULAR ARTICLES

Suppression of IκBα Expression Is Necessary for c-Jun N-Terminal Kinase-Mediated Enhancement of Fas Cytotoxicity — **Nan-Shan Chang, Lori Schultz, and John Heath** — 4

Preferential Cleavage Sites for *Sau3A* Restriction Endonuclease in Human Ribosomal DNA — **Natalia S. Kupriyanova, Pavel M. Kirilenko, Kirill K. Netchvolodov, and Alexei P. Ryskov** — 11

Processing of cdk5 Activator p35 to Its Truncated Form (p25) by Calpain in Acutely Injured Neuronal Cells — **Rathna Nath, Megan Davis, Albert W. Probert, Nancy C. Kupina, Xiaodong Ren, Gerald P. Schielke, and Kevin K. W. Wang** — 16

HASH-1 and E2-2 Are Expressed in Human Neuroblastoma Cells and Form a Functional Complex — **Paula Persson, Annika Jögi, Anna Grynfeld, Sven Påhlman, and Håkan Axelson** — 22

Glutathione Transferase M2-2 Catalyzes Conjugation of Dopamine and Dopa *o*-Quinones — **Alexies Dagnino-Subiabre, Bruce K. Cassels, Sofia Baez, Ann-Sofie Johansson, Bengt Mannervik, and Juan Segura-Aguilar** — 32

Minimal Requirements for the Nuclear Localization of p27$^{\mathrm{Kip1}}$, a Cyclin-Dependent Kinase Inhibitor — **Ying Zeng, Katsuya Hirano, Mayumi Hirano, Junji Nishimura, and Hideo Kanaide** — 37

Identification and Biochemical Localization of a Na-K-Cl Cotransporter in the Human Placental Cell Line BeWo — **Haiyan Zhao and Harinder S. Hundal** — 43

Genomic Structure, Chromosomal Localization, and Expression Pattern of the Human LIM-Homeobox3 (*LHX 3*) Gene — **Silke Schmitt, Anna Biason-Lauber, David Betts, and Eugen J. Schoenle** — 49

Anion Protection of CuZnSOD during Peroxidative Activity with H_2O_2 — **Sandra L. Jewett, Helen K. Olmsted, Jaime A. Marach, Fabricio Rojas, and Keri Silva** — 57

Resveratrol Inhibits AGEs-Induced Proliferation and Collagen Synthesis Activity in Vascular Smooth Muscle Cells from Stroke-Prone Spontaneously Hypertensive Rats — **Kenichi Mizutani, Katsumi Ikeda, and Yukio Yamori** — 61

Mechanisms of Activation and Action of mDia1 in the Formation of Parallel Stress Fibers in MDCK Cells — **Kenji Takaishi, Akihisa Mino, Wataru Ikeda, Katsutoshi Nakano, and Yoshimi Takai** — 68

Real-Time PCR Quantification of Full-Length and Exon 11 Spliced *BRCA1* Transcripts in Human Breast Cancer Cell Lines — **David A. Favy, Stéphane Lafarge, Pascale Rio, Cécile Vissac, Yves-Jean Bignon, and Dominique Bernard-Gallon** — 73

Cloning of the Full-Length Coding Sequence of Rat Liver-Specific Organic Anion Transporter-1 (rlst-1) and a Splice Variant and Partial Characterization of the Rat lst-1 Gene	**Supratim Choudhuri, Kenichiro Ogura, and Curtis D. Klaassen**	79
Functional Interaction of the Immunosuppressant Mizoribine with the 14-3-3 Protein	**Shu Takahashi, Hideki Wakui, Jan-Åke Gustafsson, Johanna Zilliacus, and Hideaki Itoh**	87
Characterization of the β-Dystroglycan–Growth Factor Receptor 2 (Grb2) Interaction	**Katia Russo, Enrico Di Stasio, Gianfranco Macchia, Giuseppina Rosa, Andrea Brancaccio, and Tamara Corinna Petrucci**	93
Regiospecific Transglycolytic Synthesis and Structural Characterization of 6-*O*-α-Glucopyranosyl–Glucopyranose (Isomaltose)	**Amedeo Vetere, Amelia Gamini, Cristiana Campa, and Sergio Paoletti**	99
Hsl7p, the Yeast Homologue of Human JBP1, Is a Protein Methyltransferase	**Jin-Hyung Lee, Jeffry R. Cook, Brian P. Pollack, Terri Goss Kinzy, David Norris, and Sidney Pestka**	105
Regulation of IL-1β-Mediated MUC2 Gene in NCI-H292 Human Airway Epithelial Cells	**Yong Dae Kim, Eun Jin Kwon, Taeg Kyu Kwon, Suk-Hwan Baek, Si Youn Song, and Jang Su Suh**	112
Molecular Cloning, Expression Analysis, and Chromosome Mapping of WDR6, a Novel Human WD-Repeat Gene	**Duanxiang Li, Paula Burch, Oscar Gonzalez, Catherine D. Kashork, Lisa G. Shaffer, Linda L. Bachinski, and Robert Roberts**	117
Transgenic Mice Reveal Novel Sites of Calcitonin Receptor Gene Expression during Development	**C. Jagger, T. Chambers, and M. Pondel**	124
Temperature-Dependent Functional Expression of a Plant K^+ Channel in Mammalian Cells	**Ildikò Szabò, Alessandro Negro, Patrick Mark Downey, Mario Zoratti, Fiorella Lo Schiavo, and Giorgio Mario Giacometti**	130
A Redox-Inactive Thioredoxin Reduces Growth and Enhances Apoptosis in WEHI7.2 Cells	**Alex J. Freemerman and Garth Powis**	136
Contortrostatin Activates ERK2 and Tyrosine Phosphorylation Events via Distinct Pathways	**Matthew R. Ritter and Francis S. Markland, Jr.**	142
Genomic Organization and Amplification of the Human Epidermal Type II Keratin Genes K1 and K5	**Neil V. Whittock, Robin A. J. Eady, and John A. McGrath**	149
Solubilization of the Chemokine Receptor CXCR4	**Robert Staudinger and Juan C. Bandres**	153
A Novel Rice (*Oryza sativa* L.) Acidic *PR1* Gene Highly Responsive to Cut, Phytohormones, and Protein Phosphatase Inhibitors	**Ganesh Kumar Agrawal, Nam-Soo Jwa, and Randeep Rakwal**	157
Induction of Tryptophan 2,3-Dioxygenase in the Mouse Endometrium during Implantation	**Keiji Tatsumi, Toshihiro Higuchi, Hiroshi Fujiwara, Takahiro Nakayama, Haruto Egawa, Katsuhiko Itoh, Shingo Fujii, and Jun Fujita**	166
Identification and Expression of a Novel 3′-Exon of Mouse Runx1/Pebp2αB/Cbfa2/AML1 Gene	**Kunikazu Tsuji and Masaki Noda**	171

Nucleoredoxin, Glutaredoxin, and Thioredoxin Differentially Regulate NF-κB, AP-1, and CREB Activation in HEK293 Cells	**Kiichi Hirota, Minoru Matsui, Miyahiko Murata, Yuichiro Takashima, Fen Shi Cheng, Tatsuya Itoh, Kazuhiko Fukuda, and Yodoi Junji**	177
Nitric Oxide and Cytochrome *c* Oxidase: Mechanisms of Inhibition and NO Degradation	**Paolo Sarti, Alessandro Giuffré, Elena Forte, Daniela Mastronicola, Maria Cecilia Barone, and Maurizio Brunori**	183
Restriction Landmark Genomic Scanning of Mouse Liver Tumors for Gene Amplification: Overexpression of Cyclin A2	**Ramsi Haddad, Arlene D. Morrow, Christoph Plass, and William A. Held**	188
Salicylate Metabolites Inhibit Cyclooxygenase-2-Dependent Prostaglandin E_2 Synthesis in Murine Macrophages	**Burkhard Hinz, Volker Kraus, Andreas Pahl, and Kay Brune**	197
HBV Polymerase Interacts Independently with N-Terminal and C-Terminal Fragments of Hsp90β	**Ginam Cho, Se Won Suh, and Guhung Jung**	203
Immediate and Neurotoxic Effects of HIV Protein gp120 Act through CXCR4 Receptor	**Vinita Pandey and Stephen R. Bolsover**	212
Functional Expression and Biophysical Properties of Polymorphic Variants of the Human Gap Junction Protein Connexin37	**S. Sindhu Kumari, K. Varadaraj, Virginijus Valiunas, S. V. Ramanan, Emily A. Christensen, Eric C. Beyer, and Peter R. Brink**	216
Lack of Obvious 50 Kilobase Pair DNA Fragments in DNA Fragmentation Factor 45-Deficient Thymocytes upon Activation of Apoptosis	**Jianhua Zhang, Han Lee, Dan Wen Lou, Gregory P. Bovin, and Ming Xu**	225
CFTR-Mediated Anion Conductance Regulates Na^+-K^+-Pump Activity in Calu-3 Human Airway Cells	**Yasushi Ito, Yasunori Mizuno, Masahiro Aoyama, Hiroaki Kume, and Kenichi Yamaki**	230
The Effect of Monovalent Ions on Polyphosphate Binding to *Escherichia coli* Exopolyphosphatase	**Douglas G. Bolesch and J. D. Keasling**	236
Endothelial Cell Proliferation Induced by HARP: Implication of N or C Terminal Peptides	**E. Papadimitriou, M. Heroult, J. Courty, A. Polykratis, C. Stergiou, and P. Katsoris**	242
Osteoblast Maturation Suppressed Osteoclastogenesis in Coculture with Bone Marrow Cells	**Yoshiaki Deyama, Sadaaki Takeyama, Mino Koshikawa, Yoichi Shirai, Yoshitaka Yoshimura, Makoto Nishikata, Kuniaki Suzuki, and Akira Matsumoto**	249
A Common Pathway for Nitric Oxide Release from NO–Aspirin and Glyceryl Trinitrate	**Nina Grosser and Henning Schröder**	255
A Small Structural Element, Pc-J5/5a, Plays Dual Roles in a Group IC1 Intron RNA	**Yoshiya Ikawa, Hideaki Shiraishi, and Tan Inoue**	259

Number 2, August 2, 2000

Genomic Characterization and Embryonic Expression of the Mouse Bigh3 (Tgfbi) Gene	**Daniel F. Schorderet, Maurice Menasche, Sabine Morand, Sébastien Bonnel, Valérie Büchillier, Dominique Marchant, Katya Auderset, Christophe Bonny, Marc Abitbol, and Francis L. Munier**	267

Mitochondrial Expression of a Short Dystrophin-like Product with Molecular Weight of 71 kDa	**O. Chávez, M. C. Harricane, V. Alemán, L. Dorbani, C. Larroque, D. Mornet, A. Rendon, and D. Martínez-Rojas**	275
Osteoprotegerin Ligand Regulates Osteoclast Adherence to the Bone Surface in Mouse Calvaria	**E. A. O'Brien, J. H. H. Williams, and M. J. Marshall**	281
Diversity of *N*-Acetylglucosamine-6-*O*-sulfotransferases: Molecular Cloning of a Novel Enzyme with Different Distribution and Specificities	**Kenji Uchimura, Fathy Fasakhany, Kenji Kadomatsu, Tetsuya Matsukawa, Taishi Yamakawa, Nobuyuki Kurosawa, and Takashi Muramatsu**	291
Homozygosity for the R1268Q Mutation in *MRP6,* the Pseudoxanthoma Elasticum Gene, Is Not Disease-Causing	**Dominique P. Germain, Jérôme Perdu, Véronique Remones, and Xavier Jeunemaitre**	297
Genomic Structure and Expression of Human *KCNJ9 (Kir3.3/GIRK3)*	**Jeannette Vaughn, Johanna K. Wolford, Michal Prochazka, and Paskasari A. Permana**	302
Orexins Suppress Catecholamine Synthesis and Secretion in Cultured PC12 Cells	**Toru Nanmoku, Kazumasa Isobe, Takeshi Sakurai, Akihiro Yamanaka, Kazuhiro Takekoshi, Yasushi Kawakami, Kiyoaki Ishii, Katsutoshi Goto, and Toshiaki Nakai**	310
The Molecular Characterization and Tissue Distribution of the Human Cysteinyl Leukotriene $CysLT_2$ Receptor	**Jun Takasaki, Masazumi Kamohara, Mitsuyuki Matsumoto, Tetsu Saito, Toru Sugimoto, Takahide Ohishi, Hiroyuki Ishii, Toshio Ota, Tetsuo Nishikawa, Yuri Kawai, Yasuhiko Masuho, Takao Isogai, Yutaka Suzuki, Sumio Sugano, and Kiyoshi Furuichi**	316
Involvement of the Glucose-Regulated Protein 94 (Dd-GRP94) in Starvation Response of *Dictyostelium discoideum* Cells	**Tsuyoshi Morita, Kenji Saitoh, Takashi Takagi, and Yasuo Maeda**	323
Jumonji Is a Nuclear Protein That Participates in the Negative Regulation of Cell Growth	**Masashi Toyoda, Mizuyo Kojima, and Takashi Takeuchi**	332
Molecular Cloning and Characterization of Human *FGF-20* on Chromosome 8p21.3-p22	**Hiroyuki Kirikoshi, Norihiko Sagara, Tetsuroh Saitoh, Katsuaki Tanaka, Hisahiko Sekihara, Koichiro Shiokawa, and Masaru Katoh**	337
Electrophysiologic Characteristics of the Ca-Permeable Channels, ECaC and CaT, in the Kidney	**Makoto Suzuki, Kenichi Ishibashi, Gaku Ooki, Syuuichi Tsuruoka, and Masashi Imai**	344
cDNA Cloning and mRNA Analysis of PGC-1 in Epitrochlearis Muscle in Swimming-Exercised Rats	**Masahide Goto, Shin Terada, Miyuki Kato, Masao Katoh, Toshiko Yokozeki, Izumi Tabata, and Teruhiko Shimokawa**	350
Sucrose-Diet Feeding Induces Gene Expression of Heat Shock Protein in Rat Brain under Stress	**Haruaki Kageyama, Eiji Suzuki, Takayuki Kashiwa, Masao Kanazawa, Toshimasa Osaka, Shuichi Kimura, Yoshio Namba, and Shuji Inoue**	355

NMR Studies on Novel Antitumor Drug Candidates, Deoxoartemisinin and Carboxypropyldeoxoartemisinin	**Chang-Hun Lee, Heedouk Hong, Joon Shin, Mankil Jung, Injae Shin, Jongbok Yoon, and Weontae Lee**	359
Activation of the Tumor Metastasis Suppressor Gene, KAI1, by Etoposide Is Mediated by p53 and c-Jun Genes	**Tomoyuki Mashimo, Sucharita Bandyopadhyay, Goodarz Goodarzi, Misako Watabe, Sudha K. Pai, Steven C. Gross, and Kounosuke Watabe**	370
Cloning and Characterization of cDNA Encoding a Novel Human Leukotriene B_4 Receptor	**Ylva Tryselius, Niclas E. Nilsson, Knut Kotarsky, Björn Olde, and Christer Owman**	377
Genomic Organization of the Leukotriene B_4 Receptor Locus of Human Chromosome 14	**Niclas E. Nilsson, Ylva Tryselius, and Christer Owman**	383
Preparation of a Monoclonal Antibody to N^{ϵ}-(Hexanonyl)lysine: Application to the Evaluation of Protective Effects of Flavonoid Supplementation against Exercise-Induced Oxidative Stress in Rat Skeletal Muscle	**Yoji Kato, Yoshiaki Miyake, Kanefumi Yamamoto, Yoshiharu Shimomura, Hirotomo Ochi, Yoko Mori, and Toshihiko Osawa**	389
Na^+ Channel Regulation by Calmodulin Kinase II in Rat Cerebellar Granule Cells	**Edmond Carlier, Bénédicte Dargent, Michel De Waard, and François Couraud**	394
Microisolated Mouse Osteoclasts Express VIP-1 and PACAP Receptors	**Maria Ransjö, Anita Lie, Hitoshi Mukohyama, Pernilla Lundberg, and Ulf H. Lerner**	400
N-myc Down-Regulates Activin A	**Stephen Breit, Jochen Rössler, Theodore Fotsis, and Lothar Schweigerer**	405
Dipeptidyl Peptidase IV (DP IV/CD26) mRNA Expression in PWM-Stimulated T-Cells Is Suppressed by Specific DP IV Inhibition, an Effect Mediated by TGF-β_1	**Marco Arndt, Uwe Lendeckel, Antje Spiess, Jürgen Faust, Klaus Neubert, Dirk Reinhold, and Siegfried Ansorge**	410
Phosphodiesterases 4D and 7A Splice Variants in the Response of HUVEC Cells to TNF-α	**Xavier Miró, Josep M. Casacuberta, María D. Gutiérrez-López, Manuel O. de Landázuri, and Pere Puigdomènech**	415
Application of Hydrostatic Pressure Facilitates *ex Vivo* Adenovirus Gene Transfer into Rabbit Aortas	**Masatoshi Suzuki, Nobukazu Ishizaka, Wen-Maw Hwang, Kazuhisa Tsukamoto, Kayo Minami, Toru Aizawa, Ichiro Mori, Jun-ichi Taguchi, Ryozo Nagai, and Minoru Ohno**	422
PAL31, a Novel Nuclear Protein, Expressed in the Developing Brain	**Hideki Mutai, Yasushi Toyoshima, Weiyong Sun, Naka Hattori, Satoshi Tanaka, and Kunio Shiota**	427
RNA Interference for the Organizer-Specific Gene *Xlim-1* in *Xenopus* Embryos	**Hiroaki Nakano, Shonan Amemiya, Koichiro Shiokawa, and Masanori Taira**	434
Potent and Competitive Inhibition of Malic Enzymes by Lanthanide Ions	**Zhiru Yang, Renu Batra, Daniel L. Floyd, Hui-Chih Hung, Gu-Gang Chang, and Liang Tong**	440

V642I APP-Inducible Neuronal Cells: A Model System for Investigating Alzheimer's Disorders	**Takako Niikura, Norie Murayama, Yu-ichi Hashimoto, Yuko Ito, Yohichi Yamagishi, Masaaki Matsuoka, Yuji Takeuchi, Sadakazu Aiso, and Ikuo Nishimoto**	**445**
Accessibility of the High-Mannose Glycans of Glycoprotein *gp120* from Human Immunodeficiency Virus Type 1 Probed by *in Vitro* Interaction with Mannose-Binding Lectins	**Corinne Houlès Astoul, Willy J. Peumans, Els J. M. Van Damme, and Pierre Rougé**	**455**
α-Crystallin Facilitates the Reactivation of Hydrogen Peroxide-Inactivated Rhodanese	**Dino Del Fierro, Gustavo Zardeneta, and Jose A. Mendoza**	**461**
Age-Related Effects of TGF-β on Proteoglycan Synthesis in Equine Articular Cartilage	**Javed Iqbal, Jayesh Dudhia, Joseph L. E. Bird, and Michael T. Bayliss**	**467**
Rapid Inhibition by Sodium Azide of the Phosphoinositide-Mediated Calcium Response to Serotonin Stimulation in Human Platelets: Preservation in Alzheimer's Disease	**Henrietta L. M. Hedin, Sture Eriksson, and Christopher J. Fowler**	**472**
The Biphasic Effects of Nitric Oxide in Primary Rat Osteoblasts Are cGMP Dependent	**L. Mancini, N. Moradi-Bidhendi, L. Becherini, V. Martineti, and I. MacIntyre**	**477**
Nitric Oxide Regulates the Aggregation of Stimulated Human Neutrophils	**Tony Forslund, Harriet M. Nilsson, and Tommy Sundqvist**	**482**
A Rolling-Circle Plasmid from *Psychrobacter sp.* TA144: Evidence for a Novel Rep Subfamily	**M. Luisa Tutino, Angela Duilio, Maria Angela Moretti, Giovanni Sannia, and Gennaro Marino**	**488**
Membrane Permeability Modifications Are Involved in Antibiotic Resistance in *Klebsiella pneumoniae*	**Jacqueline Chevalier, Jean-Marie Pagès, Annie Eyraud, and Monique Malléa**	**496**
Immunomodulatory Potential of Thymulin–Zn^{2+} in the Alveolar Epithelium: Amelioration of Endotoxin-Induced Cytokine Release and Partial Amplification of a Cytoprotective IL-10-Sensitive Pathway	**John J. E. Haddad, Stephen C. Land, Nayef E. Saadé, and Bared Safieh-Garabedian**	**500**
Activation of ERK1/2 and cPLA$_2$ by the p55 TNF Receptor Occurs Independently of FAN	**Silke Lüschen, Dieter Adam, Sandra Ussat, Dirk Kreder, Wulf Schneider-Brachert, Martin Krönke, and Sabine Adam-Klages**	**506**
Dithiocarbamates Inhibit Hematopoiesis via a Copper-Dependent Mechanism	**David W. Pyatt, Yanzhu Yang, Anh Le, Wayne S. Stillman, and Richard D. Irons**	**513**
TGF-β1 Modulated the Expression of $\alpha5\beta1$ Integrin and Integrin-Mediated Signaling in Human Hepatocarcinoma Cells	**Ting Cai, Qun-Ying Lei, Li-Ying Wang, and Xi-Liang Zha**	**519**
Transcriptional Activation Function of Zinc Finger Protein TIS11 and Its Negative Regulation by Phorbol Ester	**Tomiyasu Murata, Kiyomi Hikita, and Norio Kaneda**	**526**

cis-9,10-Methylenehexadecanoic Acid Inhibits Contractility and Actomyosin ATPase Activity of Guinea Pig Myocardium	**Koichi Sakurada, Hirotaro Iwase, Masahiko Kobayashi, Hiroko Uemura, Haruaki Nakaya, Hiroshi Ikegaya, and Ken-ichi Yoshida**	533
Tools for Evaluating Ubiquitin (*UbC*) Gene Expression: Characterization of the Rat *UbC* Promoter and Use of an Unique 3′ mRNA Sequence	**Anne C. Marinovic, William E. Mitch, and S. Russ Price**	537
Endothelial Cells Downregulate Expression of the 70 kDa Heat Shock Protein during Hypoxia	**Rudolf Oehler, Bernhard Schmierer, Maria Zellner, Rainer Prohaska, and Erich Roth**	542
Interaction of Yeast Importin α with the NLS of Prothymosin α Is Insufficient to Trigger Nuclear Uptake of Cargos	**Vitaliy R. Shakulov, Ivan A. Vorobjev, Yuri P. Rubtsov, Nina V. Chichkova, and Andrey B. Vartapetian**	548
Cholesterol Modulates Vascular Reactivity to Endothelin-1 by Stimulating a Pro-inflammatory Pathway	**Daniel Paris, Terrence Town, James Humphrey, Kiyoko Yokota, and Michael Mullan**	553
N-Ethylmaleimide-Sensitive Factor Is Associated with the Nuclear Envelope	**Jun Mashima, Masami Nagahama, Kiyotaka Hatsuzawa, Katsuko Tani, Tsuneyoshi Horigome, Akitsugu Yamamoto, and Mitsuo Tagaya**	559
Protein Tyrosine Phosphorylation Induced by Ubiquitin-like Polypeptide in Murine T Helper Clone Type 2	**Morihiko Nakamura and Yoshinori Tanigawa**	565

Number 3, August 11, 2000

BREAKTHROUGHS AND VIEWS

Regulation of Leptin Release by Mammalian Adipose Tissue	**John N. Fain and Suleiman W. Bahouth**	571

REGULAR ARTICLES

Transcription Factor NF-κB Signals Antianoikic Function of Trefoil Factor 3 on Intestinal Epithelial Cells	**Yi-Hua Chen, Yu Lu, Isabelle G. De Plaen, Li-Ya Wang, and Xiao-Di Tan**	576
Elevated Expression and Activity of Protein-Tyrosine Phosphatase 1B in Skeletal Muscle of Insulin-Resistant Type II Diabetic Goto-Kakizaki Rats	**Shrikrishna S. Dadke, Hong C. Li, Anasua B. Kusari, Najma Begum, and Jyotirmoy Kusari**	583
Identification of a Potential Nurr1 Response Element That Activates the Tyrosine Hydroxylase Gene Promoter in Cultured Cells	**Takao Iwawaki, Kenji Kohno, and Kazuto Kobayashi**	590

Differential Redistribution of Protein Kinase C Isoforms by Cyclic AMP in HL60 Cells	**Begoña G. Miguel, M. Carmen Calcerrada, Felicísima Mata, Patricio Aller, Roberto Clemente, R. Edgardo Catalán, and Ana M. Martínez**	596
Epigallocatechin Gallate Inhibits Histamine Release from Rat Basophilic Leukemia (RBL-2H3) Cells: Role of Tyrosine Phosphorylation Pathway	**Kohei Yamashita, Yoshihiro Suzuki, Takashi Matsui, Tetsuro Yoshimaru, Mitsuo Yamaki, Miki Suzuki-Karasaki, Satoshi Hayakawa, and Kazufumi Shimizu**	603
Selective Inhibition by α-Tocopherol of Vascular Cell Adhesion Molecule-1 Expression in Human Vascular Endothelial Cells	**D. Zapolska-Downar, A. Zapolski-Downar, M. Markiewski, A. Ciechanowicz, M. Kaczmarczyk, and M. Naruszewicz**	609
Glucagon-like Peptide 1 Increases Glucose-Dependent Activity of the Homeoprotein IDX-1 Transactivating Domain in Pancreatic β-Cells	**Mehboob A. Hussain and Joel F. Habener**	616
Imipramine Inhibits Cl^- Secretion by Desensitization of β-Adrenergic Receptors in Calu-3 in Human Airway Cells	**Yasunori Mizuno, Yasushi Ito, Masahiro Aoyama, Hiroaki Kume, Shinsuke Nakayama, and Kenichi Yamaki**	620
Kinetics of Biodegradation of *p*-Nitrophenol by Different Bacteria	**Bharat Bhushan, Ashvini Chauhan, Sudip K. Samanta, and Rakesh K. Jain**	626
Substrate-Dependent Lipolysis Induced by Isoproterenol	**Chie Morimoto, Takahiro Tsujita, Michihiro Sumida, and Hiromichi Okuda**	631
Nitric Oxide Stimulates Tyrosine Phosphorylation of $p125^{FAK}$ and Paxillin in Rat Pancreatic Acini	**M. García-Benito, J. I. San Román, M. A. López, L. J. García-Marín, and J. J. Calvo**	635
The 3′ UTR of Human MnSOD mRNA Hybridizes to a Small Cytoplasmic RNA and Inhibits Gene Expression	**Joseph J. Stuart, Levente A. Egry, Grace H. Wong, and Roger L. Kaspar**	641
Induction of Oxidative Stress in Leukocytes by an *Enterobacter cloacae* Toxin Able to Form Oligomers and Binding to Proteins	**I. Albesa, A. I. Barnes, and M. G. Paraje**	649
The Cysteine- and Glycine-Rich LIM Domain Protein CRP2 Specifically Interacts with a Novel Human Protein (CRP2BP)	**Ralf Weiskirchen and Axel M. Gressner**	655
Apoptosis Induced by gp120 in the Neocortex of Rat Involves Enhanced Expression of Cyclooxygenase Type 2 and Is Prevented by NMDA Receptor Antagonists and by the 21-Aminosteroid U-74389G	**M. T. Corasaniti, M. C. Strongoli, S. Piccirilli, R. Nisticò, A. Costa, A. Bilotta, P. Turano, A. Finazzi-Agrò, and G. Bagetta**	664
The Analysis of Nucleotide Substitutions, Gaps, and Recombination Events between *RHD* and *RHCE* Genes through Complete Sequencing	**Hiroshi Okuda, Hiroshi Suganuma, Toyomi Kamesaki, Maki Kumada, Naoki Tsudo, Toshinori Omi, Sadahiko Iwamoto, and Eiji Kajii**	670
Cyclic Expression of Class I Alcohol Dehydrogenase in Male Rats Treated with Ethanol	**Thomas M. Badger, Jan-Olov Hoog, Stefan Svensson, Robert E. McGehee, Jr., Che Fang, Martin J. J. Ronis, and Magnus Ingelman-Sundberg**	684

Keratinocyte-Derived Chemotactic Cytokines: Expressional Modulation by Nitric Oxide *in Vitro* and during Cutaneous Wound Repair *in Vivo*	**Christian Wetzler, Heiko Kämpfer, Josef Pfeilschifter, and Stefan Frank**	**689**
Difference in Effective Dosage of Genistein on Bone and Uterus in Ovariectomized Mice	**Yoshiko Ishimi, Naoko Arai, Xinxiang Wang, Jian Wu, Keizo Umegaki, Chisato Miyaura, Akiharu Takeda, and Sachie Ikegami**	**697**
Cardiac Amyloid in Patients with Familial Amyloid Polyneuropathy Consists of Abundant Wild-Type Transthyretin	**Masahide Yazaki, Takahiko Tokuda, Akihiro Nakamura, Takeo Higashikata, Jun Koyama, Keiichi Higuchi, Yasu Harihara, Satoshi Baba, Fuyuki Kametani, and Shu-ichi Ikeda**	**702**
Interleukin-6 Negatively Regulates the Expression of Pregnane X Receptor and Constitutively Activated Receptor in Primary Human Hepatocytes	**Jean-Marc Pascussi, Sabine Gerbal-Chaloin, Lydiane Pichard-Garcia, Martine Daujat, Jean-Michel Fabre, Patrick Maurel, and Marie-José Vilarem**	**707**
Antibacterial and Hemolytic Activities of Single Tryptophan Analogs of Indolicidin	**C. Subbalakshmi, E. Bikshapathy, N. Sitaram, and R. Nagaraj**	**714**
Effect of Cholera Toxin on Rat Liver Lysosome Acidification	**Rebecca W. Van Dyke with the technical assistance of Loretha L. Ervin, Marianne R. Lewis, and Xiaqing Wang**	**717**
De Novo Methylation at Intronic CpG Islands of *Igf2r* Is Associated with Decreased Expression of Antisense RNA in Aged Mice	**In Chul Yang, Seung Kyoung Yang, Chang Won Park, and Jae Hoon Chung**	**722**
A Thermophilic Apoglucose Dehydrogenase as Nonconsuming Glucose Sensor	**Sabato D'Auria, Nicolas Di Cesare, Zygmunt Gryczynski, Ignacy Gryczynski, Mosé Rossi, and Joseph R. Lakowicz**	**727**
Inhibition of Serine Amidohydrolases by Complexes of Vanadate with Hydroxamic Acids	**Jason H. Bell, Kieran Curley, and R. F. Pratt**	**732**
Hypotonic Stress-Induced NO Production in Endothelium Depends on Endogenous ATP	**Chiwaka Kimura, Tetsuya Koyama, Masahiro Oike, and Yushi Ito**	**736**
Regulation by Adrenocorticotropic Hormone and Arachidonate of the Expression of Acyl-CoA Synthetase 4, an Arachidonate-Preferring Enzyme Expressed in Steroidogenic Tissues	**Yong-Yeon Cho, Man-Jong Kang, Shigeki Ogawa, Yoji Yamashita, Takahiro Fujino, and Tokuo T. Yamamoto**	**741**
Hepatic Metabolism of Ergot Alkaloids in Beef Cattle by Cytochrome P450	**A. S. Moubarak and C. F. Rosenkrans, Jr.**	**746**
A Possible Role of the Na^+/K^+-ATPase for O_2 Production from H_2O_2	**Francine Bruston, Evelyne Duval, Emile Petit, Lydie Grajcar, Marie-Hélène Baron, and Régis Calvayrac**	**750**
Bovine Lactoperoxidase and Its Recombinant: Comparison of Structure and Some Biochemical Properties	**Shikiko Watanabe, Shinya Murata, Haruto Kumura, Shingo Nakamura, Alex Bollen, Nicole Moguilevsky, and Kei-ichi Shimazaki**	**756**

Sequence of Genome Segments 1, 2, and 3 of the Grass Carp Reovirus (Genus *Aquareovirus,* Family *Reoviridae*) — **Qin Fang, Houssam Attoui, Jean François Philippe Biagini, Zuoyan Zhu, Philippe de Micco, and Xavier de Lamballerie** — **762**

Adenoviral Vector Cytotoxicity Depends in Part on the Transgene Encoded — **Chengyu Zheng, Corinne M. Goldsmith, Brian C. O'Connell, and Bruce J. Baum** — **767**

Hepatocyte Growth Factor Decreases Sensitivity to Chemotherapeutic Agents and Stimulates Cell Adhesion, Invasion, and Migration — **Qinghui Meng, James M. Mason, Debra Porti, Itzhak D. Goldberg, Eliot M. Rosen, and Saijun Fan** — **772**

New Thiol and Sulfodiimine Metalloproteinase Inhibitors and Their Effect on Human Microvascular Endothelial Cell Growth — **Qing-Xiang Amy Sang, Meng-Chun Jia, Martin A. Schwartz, Michael C. Jaye, Hynda K. Kleinman, Mohammad A. Ghaffari, and Yi-Lin Luo** — **780**

Pyruvate Cycling and Implications for Regulation of Gluconeogenesis in the Insect, *Manduca sexta* L. — **S. N. Thompson** — **787**

ABC1 Gene Expression and ApoA-I-Mediated Cholesterol Efflux Are Regulated by LXR — **Karen Schwartz, Richard M. Lawn, and David P. Wade** — **794**

Tetracycline-Inducible CaM Kinase II Silences Hypertrophy-Sensitive Gene Expression in Rat Neonate Cardiomyocytes — **Thomas G. Valencia, Leslie D. Roberts, Hong Zeng, and Stephen R. Grant** — **803**

Cloning and Expression of ZAK, a Mixed Lineage Kinase-like Protein Containing a Leucine-Zipper and a Sterile-Alpha Motif — **Te-Chung Liu, Chang-Jen Huang, Yu-Chuan Chu, Chih-Chang Wei, Chun-Chieh Chou, Ming-Yung Chou, Chen-Kung Chou, and Jaw-Ji Yang** — **811**

Study on Colloidal Au-Enhanced DNA Sensing by Quartz Crystal Microbalance — **Lin Lin, Hong-qiu Zhao, Jin-ru Li, Ji-an Tang, Ming-xing Duan, and Long Jiang** — **817**

The Use of the Novel Substrate–Heme Complex Approach in the Derivation of a Representation of the Active Site of the Enzyme Cholesterol Side Chain Cleavage — **Sabbir Ahmed** — **821**

Phosphorylation of CPI-17, an Inhibitor of Myosin Phosphatase, by Protein Kinase N — **Tetsuya Hamaguchi, Masaaki Ito, Jianhua Feng, Tetsuya Seko, Mutsumi Koyama, Hirofumi Machida, Koujiro Takase, Mutsuki Amano, Kozo Kaibuchi, David J. Hartshorne, and Takeshi Nakano** — **825**

Small Peptides Do Not Inhibit Human Non-Pancreatic Secretory Phospholipase-A$_2$ (Type IIA) — **Christopher I. Clark, Robert C. Reid, Ross P. McGeary, Karl Schafer, and David P. Fairlie** — **831**

Opposing Actions of cGMP and Calcium on the Conductance of the F$_0$ Subunit c Pore — **Julie E. M. McGeoch, Malcolm W. McGeoch, Rong Mao, and Guido Guidotti** — **835**

Mutations on the Hinge Region of Leukocyte Elastase Inhibitor Determine the Loss of Inhibitory Function — **Paolo Perani, Samia Zeggai, Alicia Torriglia, and Yves Courtois** — **841**

Insulin Activation of Mitogen-Activated Protein (MAP) Kinase and Akt Is Phosphatidylinositol 3-Kinase-Dependent in Rat Adipocytes — **Hongzhi Liu, Bassil Kublaoui, Paul F. Pilch, and Jongsoon Lee** — **845**

Expression Cloning of KCRF, a Potassium Channel Regulatory Factor — **Tal Keren-Raifman, Tatiana Ivanina, Yona Bismuth, and Nathan Dascal** — **852**

Search for UV-Responsive Genes in Human Cells by Differential mRNA Display: Involvement of Human Ras-Related GTP-Binding Protein, Rheb, in UV Susceptibility — **Kazuko Kita, Yu-Ping Wu, Shigeru Sugaya, Tetsuhiro Moriya, Jun Nomura, Shunji Takahashi, Hideo Yamamori, Nobuyuki Nakajima, and Nobuo Suzuki** — **859**

S100A1, a New Marker for Acute Myocardial Ischemia — **Roland Kiewitz, Christian Acklin, Elisabeth Minder, Peter R. Huber, Beat W. Schäfer, and Claus W. Heizmann** — **865**

Cloning of DPK, a Novel Dendritic Cell-Derived Protein Kinase Activating the ERK1/ERK2 and JNK/SAPK Pathways — **Weiping Zhang, Taoyong Chen, Tao Wan, Long He, Nan Li, Zhenglong Yuan, and Xuetao Cao** — **872**

ERRATA

Volume **273,** Number 1 (2000), in the article "Direct Inhibition of *in Vitro* PLD Activity by 4-(2-Aminoethyl)-Benzenesulfonyl Fluoride," by Brooke Andrews, Kristina Bond, Jason A. Lehman, Jeffrey M. Horn, Amy Dugan, and Julia Gomez-Cambronero, pages 302–311 (doi:10.1006/bbrc.2000.2938) — **880**

Volume **273,** Number 2 (2000), in the article "Molecular Cloning of a Cyclin-like Protein Associated with Cyclin-Dependent Kinase 3 (cdk 3) *in Vivo,*" by Masaaki Matsuoka, Yoshiharu Matsuura, Kentaro Semba, and Ikuo Nishimoto, pages 442–447 (doi:10.1006/bbrc.2000.2965) — **880**

Volume **273,** Number 2 (2000), in the article "Polymorphisms in FcϵRI β Chain Do Not Affect IgE-Mediated Mast Cell Activation," by Yasuko Furumoto, Shuichi Hiraoka, Keiko Kawamoto, Shigehiro Masaki, Toshio Kitamura, Ko Okumura, and Chisei Ra, pages 765–771 (doi:10.1006/bbrc.2000.2989) — **880**

Author Index for Volume 274 — **881**

Volume 275, Number 1, August 18, 2000

Differential Regulation of Phospholipase C-β Isozymes in Cardiomyocyte Hypertrophy	**Petra Schnabel, Florian Mies, Theo Nohr, Mathias Geisler, and Michael Böhm**	1
Effect of 17-β-Estradiol and Progesterone on Angiotensin II-Induced Changes in Inositol-1,4,5-Trisphosphate Content and Protein Kinase C Activity in Anterior Pituitary	**Agnieszka Lachowicz, Tomasz Ochędalski, Marek Pawlikowski, and Elżbieta Rębas**	7
Immunochemical Detection of Protein Dityrosine in Atherosclerotic Lesion of Apo-E-Deficient Mice Using a Novel Monoclonal Antibody	**Yoji Kato, Xiaohong Wu, Michitaka Naito, Hideki Nomura, Noritoshi Kitamoto, and Toshihiko Osawa**	11
Activation of the Akt/FKHRL1 Pathway Mediates the Antiapoptotic Effects of Erythropoietin in Primary Human Erythroid Progenitors	**Shahab Uddin, Samanthi Kottegoda, Danielle Stigger, Leonidas C. Platanias, and Amittha Wickrema**	16
C-Phycocyanin: A Potent Peroxyl Radical Scavenger *in Vivo* and *in Vitro*	**Vadiraja B. Bhat and K. M. Madyastha**	20
Phosphorylation of AZT-Resistant Human Immunodeficiency Virus Type 1 Reverse Transcriptase by Casein Kinase II *in Vitro:* Effects on Inhibitor Sensitivity	**Jean-Bernard Lazaro, Joëlle Boretto, Boulbaba Selmi, Jean-Paul Capony, and Bruno Canard**	26
A Polymorphism in the Growth Hormone (GH)-Releasing Hormone (GHRH) Receptor Gene Is Associated with Elevated Response to GHRH by Human Pituitary Somatotrophinomas *in Vitro*	**Eric F. Adams, Hedwig Symowski, Michael Buchfelder, and David R. Poyner**	33
Cloning, Genomic Organization, and Tissue Distribution of Human Ssf-1	**Nathalie Suarez-Huerta, Jean-Marie Boeynaems, and Didier Communi**	37
Membrane Association of Presynaptic Cytomatrix Protein Bassoon	**Lydia Sanmartí-Vila, Susanne tom Dieck, Karin Richter, Wilko Altrock, Lixia Zhang, Walter Volknandt, Herbert Zimmermann, Craig C. Garner, Eckart D. Gundelfinger, and Thomas Dresbach**	43
Gene Structure and Chromosomal Mapping of Human Epithelial Calcium Channel	**Dominik Müller, Joost G. J. Hoenderop, Gerard F. M. Merkx, Carel H. van Os, and René J. M. Bindels**	47
Effect of Advanced Glycation End Products on Lens Epithelial Cells *in Vitro*	**Sung-Baek Hong, Kwang-Won Lee, James T. Handa, and Choun-Ki Joo**	53
Cancer Cell-Derived Interleukin 1α Contributes to Autocrine and Paracrine Induction of Pro-metastatic Genes in Breast Cancer	**Shinichi Nozaki, George W. Sledge, Jr., and Harikrishna Nakshatri**	60
Combined Enzymatic Complex I and III Deficiency Associated with Mutations in the Nuclear Encoded *NDUFS4* Gene	**S. M. S. Budde, L. P. W. J. van den Heuvel, A. J. Janssen, R. J. P. Smeets, C. A. F. Buskens, L. DeMeirleir, R. Van Coster, M. Baethmann, T. Voit, J. M. F. Trijbels, and J. A. M. Smeitink**	63

Characterization of p40/GPR69A as a Peripheral Membrane Protein Related to the Lantibiotic Synthetase Component C	**Hemma Bauer, Herbert Mayer, Aron Marchler-Bauer, Ulrich Salzer, and Rainer Prohaska**	69
The Use of the Substrate–Heme Complex Approach in the Design, Synthesis, Biochemical Evaluation, and Rationalization of the Inhibitory Activity of a Range of Azole Compounds against Cholesterol Side Chain Cleavage Enzyme	**Sabbir Ahmed**	75
Extrapancreatic Trypsin-2 Cleaves Proteinase-Activated Receptor-2	**Anna-Karin Alm, Rebecca Gagnemo-Persson, Timo Sorsa, and Johan Sundelin**	77
Baculoviral Display of Functional scFv and Synthetic IgG-Binding Domains	**David G. Mottershead, Kaija Alfthan, Kirsi Ojala, Kristiina Takkinen, and Christian Oker-Blom**	84
px_2, the Newly Identified Gene in *Rhizobium leguminosarum,* Is Characterized to Enhance Its Adjacent *nodF* Expression	**Yang Yang, Hailiang Hu, and Guofan Hong**	91
Characterization of Interaction of C- and N-Terminal Domains in *LIM15/DMC1* and *RAD51* from a Basidiomycetes, *Coprinus cinereus*	**Takayuki Nara, Taichi Yamamoto, and Kengo Sakaguchi**	97
Glucose-6-Phosphatase in the Insulin Secreting Cell Line INS-1	**Rosella Fulceri, Tamás Kardon, Gábor Bánhegyi, William-F. Pralong, Alessandra Gamberucci, Paola Marcolongo, and Angelo Benedetti**	103
WISP-2 as a Novel Estrogen-Responsive Gene in Human Breast Cancer Cells	**Hidekuni Inadera, Shin-ichi Hashimoto, Hong-Yan Dong, Takuji Suzuki, Shigenori Nagai, Taro Yamashita, Nobuaki Toyoda, and Kouji Matsushima**	108
Retinoblastoma Protein Phosphorylation via PI 3-Kinase and mTOR Pathway Regulates Adipocyte Differentiation	**Isao Usui, Tetsuro Haruta, Minoru Iwata, Atsuko Takano, Tatsuhito Uno, Junko Kawahara, Eiichi Ueno, Toshiyasu Sasaoka, and Masashi Kobayashi**	115
Molecular Cloning, Functional Characterization, and Gene Expression of a Follicle-Stimulating Hormone Receptor in the Testis of Newt *Cynops pyrrhogaster*	**Yuki Nakayama, Takashi Yamamoto, Yuichi Oba, Yoshitaka Nagahama, and Shin-ichi Abé**	121
Chemotaxis and Biodegradation of 3-Methyl-4-Nitrophenol by *Ralstonia* sp. SJ98	**Bharat Bhushan, Sudip K. Samanta, Ashvini Chauhan, Asit K. Chakraborti, and Rakesh K. Jain**	129
Mapping and Determination of the cDNA Sequence of the *Erc* Gene Preferentially Expressed in Renal Cell Carcinoma in the *Tsc2* Gene Mutant (Eker) Rat Model	**Yokihiko Yamashita, Masayoshi Yokoyama, Etsuko Kobayashi, Setsuo Takai, and Okio Hino**	134
RBP95, a Novel Leucine Zipper Protein, Binds to the Retinoblastoma Protein	**Hong Wen and Shizhou Ao**	141

Neuronal Differentiation of PC12 Cells Involves Changes in Protein Kinase C-θ Distribution and Molecular Properties	**Bianca Sparatore, Mauro Patrone, Mario Passalacqua, Marco Pedrazzi, Sandro Pontremoli, and Edon Melloni**	**149**
Homology Modeling of Human Leptin/Leptin Receptor Complex	**Takaaki Hiroike, Junichi Higo, Hisato Jingami, and Hiroyuki Toh**	**154**
Expression of Angiopoietin-2 by Human Endometrial Endothelial Cells: Regulation by Hypoxia and Inflammation	**Graciela Krikun, Frederick Schatz, Tom Finlay, Susan Kadner, Augusto Mesia, Rene Gerrets, and Charles J. Lockwood**	**159**
Intrathecal Administration of Neutralizing Antibody against Fas Ligand Suppresses the Progression of Experimental Autoimmune Encephalomyelitis	**Yoshinobu Okuda, Saburo Sakoda, Harutoshi Fujimura, Shigekazu Nagata, Takehiko Yanagihara, and Claude C. A. Bernard**	**164**
Suppressive Mechanism of Salmosin, a Novel Disintegrin in B16 Melanoma Cell Metastasis	**In-Cheol Kang, Doo-Sik Kim, Yangsoo Jang, and Kwang-Hoe Chung**	**169**
Extramitochondrial Localization of Mortalin/mthsp70/PBP74/GRP75	**Qitao Ran, Renu Wadhwa, Rena Kawai, Sunil C. Kaul, Richard N. Sifers, Roger J. Bick, James R. Smith, and Olivia M. Pereira-Smith**	**174**
Alternative Exon Usage of Rat Septins	**Björn-Oliver Jackisch, Heinz Hausser, Liliana Schaefer, Joachim Kappler, Hans Werner Müller, and Hans Kresse**	**180**
Genomic Organization and Promoter Analysis of *mouse disabled 2* Gene	**Si Young Cho, So Young Cho, and Sung Soo Park**	**189**
Purification, Identification, and cDNA Cloning of Jun a 2, the Second Major Allergen of Mountain Cedar Pollen	**Minehiko Yokoyama, Michinori Miyahara, Kimiko Shimizu, Kohsuke Kino, and Hajime Tsunoo**	**195**
The Thyroid Transcription Factor 2 (TTF-2) Is a Promoter-Specific DNA-Binding Independent Transcriptional Repressor	**Lorena Perrone, Marina Pasca di Magliano, Mariastella Zannini, and Roberto Di Lauro**	**203**
Alternative Splicing of the *WNT-2B/WNT-13* Gene	**Masaru Katoh, Hiroyuki Kirikoshi, Tetsuroh Saitoh, Norihiko Sagara, and Jun Koike**	**209**
ILME: A Waterborne Pheromonal Peptide Released by the Eggs of *Sepia officinalis*	**Céline Zatylny, Jean Gagnon, Eve Boucaud-Camou, and Joël Henry**	**217**
cDNA Cloning by Amplification of Circularized First Strand cDNAs Reveals Non-IRE-Regulated Iron-Responsive mRNAs	**Zheng Ye and James R. Connor**	**223**
Dbf4 Motifs: Conserved Motifs in Activation Subunits for Cdc7 Kinases Essential for S-Phase	**Hisao Masai and Ken-ichi Arai**	**228**
Identification of PTE2, a Human Peroxisomal Long-Chain Acyl-CoA Thioesterase	**Jacob M. Jones and Stephen J. Gould**	**233**
Surface Expression of Lactoferrin by Resting Neutrophils	**Lucy V. Deriy, Julie Chor, and Larry L. Thomas**	**241**

ERRATA

Volume **271,** Number 3 (2000), in the article "Neprilysin II: A Putative Novel Metalloprotease and Its Isoforms in CNS and Testis," by Tanja Ouimet, Patricia Facchinetti, Christiane Rose, Marie-Chantal Bonhomme, Claude Gros, and Jean-Charles Schwartz, pages 565–570 (doi:10.1006/bbrc.2000.2664) **247**

Volume **274,** Number 1 (2000), in the article "Temperature-Dependent Functional Expression of a Plant K^+ Channel in Mammalian Cells," by Ildikò Szabò, Alessandro Negro, Patrick Mark Downey, Mario Zoratti, Fiorella Lo Schiavo, and Giorgio Mario Giacometti, pages 130–135 (doi:10.1006/bbrc.2000.3095) **247**

Volume **274,** Number 1 (2000), in the article "Nucleoredoxin, Glutaredoxin, and Thioredoxin Differentially Regulate NF-κB, AP-1, and CREB Activation in HEK293 Cells," by Kiichi Hirota, Minoru Matsui, Miyahiko Murata, Yuichiro Takashima, Fen Shi Cheng, Tatsuya Itoh, Kazuhiko Fukuda, and Junji Yodoi, pages 177–182 (doi:10.1006/bbrc.2000.3106) **247**

Number 2, August 28, 2000

BREAKTHROUGHS AND VIEWS

Prion Disease: A Loss of Antioxidant Function? **Boon-Seng Wong, Tao Pan, Tong Liu, Ruliang Li, Robert B. Petersen, Ian M. Jones, Pierluigi Gambetti, David R. Brown, and Man-Sun Sy** **249**

REGULAR ARTICLES

Identification of the NAD$^+$-Binding Fold of Glyceraldehyde-3-Phosphate Dehydrogenase as a Novel RNA-Binding Domain **Eszter Nagy, Tamás Henics, Mária Eckert, Attila Miseta, Robert N. Lightowlers, and Miklós Kellermayer** **253**

Trafficking of Human ADAM 12-L: Retention in the *trans*-Golgi Network **Susanne Hougaard, Frosty Loechel, Xiufeng Xu, Rie Tajima, Reidar Albrechtsen, and Ulla M. Wewer** **261**

Involvement of Nuclear Factor-κB (NF-κB) Signaling in the Expression of Inducible Nitric Oxide Synthase (iNOS) Gene in Rat C6 Glioma Cells **Tadashi Nishiya, Takashi Uehara, Masayuki Kaneko, and Yasuyuki Nomura** **268**

Magnet Used for Protein Crystallization: Novel Attempts to Improve the Crystal Quality **S.-X. Lin, M. Zhou, A. Azzi, G.-J. Xu, N. I. Wakayama, and M. Ataka** **274**

Biochemical Characterization of Cloned *Aspergillus fumigatus* Phytase (PhyA) **Abul H. J. Ullah, Kandan Sethumadhavan, X. G. Lei, and Edward J. Mullaney** **279**

Reducing Agents and Light Break an S–S Bond Activating Rhodopsin *in Vivo* in *Chlamydomonas* **Jureepan Saranak and Kenneth W. Foster** **286**

Regulation of Ferritin mRNA Translation in Primary Erythroblasts: Exogenous c-Kit plus EpoR Signaling Mimics v-ErbA Oncoprotein Activity **Wolfgang Mikulits, Matthias Schranzhofer, Eva Maria Deiner, Hartmut Beug, and Ernst W. Müllner** **292**

Human Leukocytes Contain a Large Pool of Free Forms of CD18	**Karel Drbal, Pavla Angelisová, Jan Cerný, Dagmar Pavlistová, Marek Cebecauer, Petr Novák, and Václav Horejsí**	**295**
Evidence for Apoptosis in the Selenite Rat Model of Cataract	**Y. Tamada, C. Fukiage, Y. Nakamura, M. Azuma, Y. H. Kim, and T. R. Shearer**	**300**
Oxidation of 7,8-Dihydroneopterin by Hypochlorous Acid Yields Neopterin	**Bernhard Widner, Christiane Mayr, Barbara Wirleitner, and Dietmar Fuchs**	**307**
Activation of Protein Kinase C Inhibits the Expression of Connective Tissue Growth Factor	**Wen-Hua Fan and Morris J. Karnovsky**	**312**
Vasopressin V1a Receptor Signaling in a Rat Choroid Plexus Cell Line	**T. Battle, L. Preisser, V. Marteau, G. Meduri, M. Lambert, R. Nitschke, P. D. Brown, and B. Corman**	**322**
Cell Cycle Dysregulation by Green Tea Polyphenol Epigallocatechin-3-Gallate	**Nihal Ahmad, Pingyan Cheng, and Hasan Mukhtar**	**328**
Nitrite Inhalation in Rats Elevates Tissue NOS III Expression and Alters Tyrosine Nitration and Phosphorylation	**William Kielbasa and Ho-Leung Fung**	**335**
Characterization of Two DNase γ-Specific Monoclonal Antibodies and the *in Situ* Detection of DNase γ in the Nuclei of Apoptotic Rat Thymocytes	**Daisuke Shiokawa, Mayumi Tanaka, Tatsuji Kimura, Kaoru Hashizume, Ryoko Takasawa, Harumi Ohyama, Kazuko Fujita, Takeshi Yamada, and Sei-ichi Tanuma**	**343**
The Pharmacology of a New Nitric Oxide Donor: B-NOD	**Richard J. Bing, Tadahiko Yamamoto, Hyunjin Kim, and Robert H. Grubbs**	**350**
Human Lens High-Molecular-Weight α-Crystallin Aggregates	**Jack J-N. Liang and Nila J. Akhtar**	**354**
Molecular Mechanisms for Antibody-Mediated Modulation of Peptide-Displaying Enzyme Sensors	**Neus Ferrer-Miralles, Jordi X. Feliu, and Antonio Villaverde**	**360**
Differential Expression of LR11 during Proliferation and Differentiation of Cultured Neuroblastoma Cells	**Satoshi Hirayama, Hideaki Bujo, Hiroyuki Yamazaki, Tatsuro Kanaki, Kazuo Takahashi, Junji Kobayashi, Wolfgang J. Schneider, and Yasushi Saito**	**365**
Molecular Characterization of Key Diptheria Toxin:Receptor Interactions	**Joanna S. Brooke and Jeong-Heon Cha**	**374**
Loss of Cell Viability by Histidine Substitution of Leucine 325 of the Glutamate Transporter EAAT1	**Inyeong Choi and Shing Yan Chiu**	**382**
Structure-Activity Studies on Mammalian Adenosine Kinase	**Mary C. Maj, Bhag Singh, and Radhey S. Gupta**	**386**
Molecular Cloning and Characterization of a Copper Chaperone for Copper/Zinc Superoxide Dismutase from the Rat	**Makoto Hiromura, Harumi Chino, Takashi Sonoda, and Hiromu Sakurai**	**394**
Evaluation of Dipeptide α-Keto-β-aldehydes as New Inhibitors of Cathepsin S	**Brian Walker, John F. Lynas, Mark A. Meighan, and Dieter Brömme**	**401**

Regression of TNF-α-Induced E-Selectin Expression by PPAR Activators: Involvement of Transcriptional Repressor LRF-1/ATF3	**Tigre Nawa, Makiko T. Nawa, Yong Cai, Chun Zhang, Isao Uchimura, Shosaku Narumi, Fujio Numano, and Shigetaka Kitajima**	**406**
Naturally Occurring Anti-band 3 Antibody Binds to Apoptotic Human T-Lymphoid Cell Line Jurkat Through Sialylated Poly-*N*-acetyllactosaminyl Saccharide Chains on the Cell Surface	**Ken Ando, Takashi Hagiwara, Masatoshi Beppu, and Kiyomi Kikugawa**	**412**
Upregulation of Myosin Heavy Chain MHCIα in Rat Muscles after Unweighting and Clenbuterol Treatment	**L. Stevens, B. Gohlsch, Y. Mounier, and D. Pette**	**418**
Regulation of Insulin-like Growth Factor Binding Protein-5 mRNA Abundance in Rat Intestinal Smooth Muscle	**Y. T. Hou, X. P. Xin, L. Li, and E. M. Zimmerman**	**422**
Role of Residues 230 and 236 of Actin in Myosin-ATPase Activation by Actin-Tropomyosin	**Kimiko Saeki, Takuo Yasunaga, Yoshiyuki Matsuura, and Takeyuki Wakabayashi**	**428**
Biochemical Characterization of Casein Kinase II as a Protein Kinase Responsible for Stimulation of HIV-1 Protease *in Vitro*	**Eiji Haneda, Teisuke Furuya, Shigeru Asai, Yuko Morikawa, and Kenzo Ohtsuki**	**434**
Differential Expression of the LAMB3 and LAMC2 Genes between Small Cell and Non-Small Cell Lung Carcinomas	**Ryokuhei Manda, Takashi Kohno, Toshiro Niki, Tessi Yamada, Seiichi Takenoshita, Hiroyuki Kuwano, and Jun Yokota**	**440**
CD36 Is a Ditopic Glycoprotein with the N-Terminal Domain Implicated in Intracellular Transport	**Paola Gruarin, Rick F. Thorne, Douglas J. Dorahy, Gordon F. Burns, Roberto Sitia, and Massimo Alessio**	**446**
Expression of Transcriptional Repressor Proteins mSin3A and 3B during Aging and Replicative Senescence	**Sergiy Kyrylenko, Pauliina Korhonen, Olga Kyrylenko, Maaria Roschier, and Antero Salminen**	**455**
The Effect of Valine Substitution for Glycine in the Dimer Interface of Citrate Synthase from *Thermoplasma acidophilum* on Stability and Activity	**Semra Kocabıyık and İpek Erduran**	**460**
Detection of *MRP1* mRNA in Human Tumors and Tumor Cell Lines by *in Situ* RT-PCR	**Lorella Pascolo, Cristina Fernetti, Doroti Pirulli, Samanta Bogoni, Maria Victoria Garcia-Mediavilla, Andrea Spanò, Daniela Puzzer, Claudio Tiribelli, Antonio Amoroso, and Sergio Crovella**	**466**
Gene Expression of Neurotrophins and Their Receptors in Lead Nitrate-Induced Rat Liver Hyperplasia	**Kiyomitsu Nemoto, Shingo Miyata, Fumiko Nemoto, Tsutomu Yasumoto, Uta Murai, Haruaki Kageyama, and Masakuni Degawa**	**472**

Central Effects of a Novel Acylated Peptide, Ghrelin, on Growth Hormone Release in Rats	**Yukari Date, Noboru Murakami, Masayasu Kojima, Takatoshi Kuroiwa, Shigeru Matsukura, Kenji Kangawa, and Masamitsu Nakazato**	477
Microenvironment of Cysteine 242 in Type-1 Ribosome-Inactivating Protein from Iris	**Qiang Hao, Els J. M. Van Damme, Annick Barre, Alain Sillen, Pierre Rougé, Yves Engelborghs, and Willy J. Peumans**	481
Active Allele Loss of the Androgen Receptor Gene Contributes to Loss of Androgen Receptor Expression in Female Breast Cancers	**Liang Shan, Qifeng Yang, Misa Nakamura, Yasushi Nakamura, Ichiro Mori, Takeo Sakurai, and Kennichi Kakudo**	488
cDNA Cloning of a Novel bHLH-PAS Transcription Factor Superfamily Gene, *BMAL2:* Its mRNA Expression, Subcellular Distribution, and Chromosomal Localization	**Masaaki Ikeda, Wangjie Yu, Momoki Hirai, Takashi Ebisawa, Sato Honma, Kazunori Yoshimura, Ken-Ichi Honma, and Masahiko Nomura**	493
Characterization of a Novel Member of the FGFR Family, *HrFGFR,* in *Halocynthia roretzi*	**Shuichi Kamei, Ichiro Yajima, Hiroaki Yamamoto, Ako Kobayashi, Kazuhiro W. Makabe, Hidetoshi Yamazaki, Shin-Ichi Hayashi, and Takahiro Kunisada**	503
Mouse Prenylated Rab Acceptor Is a Novel Golgi Membrane Protein	**Zhimin Liang and Guangpu Li**	509
Highly Reactive Cysteine Residues in Rodent Hemoglobins	**JJ Miranda**	517
Functional Analysis of Five Endothelin-B Receptor Mutations Found in Human Hirschsprung Disease Patients	**Yoichiro Abe, Takeshi Sakurai, Takahisa Yamada, Toshiaki Nakamura, Masashi Yanagisawa, and Katsutoshi Goto**	524
Isolation of Novel Mouse Genes Differentially Expressed in Brain Using cDNA Microarray	**Tsutomu Yoshikawa, Yumi Nagasugi, Takanori Azuma, Masaki Kato, Sumio Sugano, Katsuyuki Hashimoto, Yasuhiko Masuho, Masa-aki Muramatsu, and Naohiko Seki**	532
The Calcium-Sensing Receptor Stimulates JNK in MDCK Cells	**John M. Arthur, Martha S. Lawrence, Cameron R. Payne, Madhavi J. Rane, and Kenneth R. McLeish**	538
Purification and Characterization of Extracellular Superoxide Dismutase in Mouse Lung	**Cheryl L. Fattman, Jan J. Enghild, James D. Crapo, Lisa M. Schaefer, Zuzana Valnickova, and Tim D. Oury**	542
X-Ray Crystallographic Analysis of Pokeweed Antiviral Protein-II after Reductive Methylation of Lysine Residues	**I. V. Kurinov, C. Mao, J. D. Irvin, and F. M. Uckun**	549
Affinity Maturation of Natural Antibody Using a Chain Shuffling Technique and the Expression of Recombinant Antibodies in *Escherichia coli*	**Sae-Gwang Park, Jae-Sook Lee, Eun-Young Je, Ik-Jung Kim, Jun-Ho Chung, and In-Hak Choi**	553
Diversity of Voltage-Gated Sodium Channels in the Ascidian Larval Nervous System	**Hitoshi Nagahora, Toshiaki Okada, Naoya Yahagi, Jayhong Andrew Chong, Gail Mandel, and Yasushi Okamura**	558

Identification of a Juxtamembrane Segment of the Glutamate Receptor $\delta 2$ Subunit Required for the Plasma Membrane Localization	**Ikuo Matsuda and Masayoshi Mishina**	565
Crystal Structures of the Ribonuclease MC1 from Bitter Gourd Seeds, Complexed with $2'$-UMP or $3'$-UMP, Reveal Structural Basis for Uridine Specificity	**Akio Suzuki, Min Yao, Isao Tanaka, Tomoyuki Numata, Singo Kikukawa, Nobuyuki Yamasaki, and Makoto Kimura**	572
Novel Kinetics of Mammalian Glutathione Synthetase: Characterization of γ-Glutamyl Substrate Cooperative Binding	**J.-L. Luo, C.-S. Huang, K. Babaoglu, and M. E. Anderson**	577
Novel Proteinaceous Toxins from the Box Jellyfish (Sea Wasp) *Carybdea rastoni*	**Hiroshi Nagai, Kyoko Takuwa, Masahiro Nakao, Emiko Ito, Masami Miyake, Masatoshi Noda, and Terumi Nakajima**	582
Isolation and Characterization of a Novel Protein Toxin from the Hawaiian Box Jellyfish (Sea Wasp) *Carybdea alata*	**Hiroshi Nagai, Kyoko Takuwa, Masahiro Nakao, Bryan Sakamoto, Gerald L. Crow, and Terumi Nakajima**	589
A Novel 31-Amino-Acid-Length Endothelin, ET-1(1–31), Can Act as a Biologically Active Peptide for Vascular Smooth Muscle Cells	**Noriko Nagata, Yasuharu Niwa, and Yutaka Nakaya**	595
Arabidopsis Chloroplast Chaperonin 10 Is a Calmodulin-Binding Protein	**Tianbao Yang and B. W. Poovaiah**	601
A Distinct FMRP Polysomal Population at an Advanced Stage of Mammalian Erythropoiesis	**Marc-Alexandre Beaulieu**	608
Muscle Aldolase Decreases Muscle FBPase Sensitivity toward AMP Inhibition	**Dariusz Rakus and Andrzej Dzugaj**	611
Promoter Variants of the Human Mannose-Binding Lectin Gene Show Different Binding	**Simone Jüliger, Doris Luckner, Benjamin Mordmüller, Jürgen May, Andrea Weierich, Bertrand Lell, Adrian Luty, Peter G. Kremsner, and Jürgen F. J. Kun**	617
Genomic Structure and *in Vivo* Expression of the Human Organic Anion Transporter 1 (hOAT1) Gene	**Andrew Bahn, Dirk Prawitt, Diana Buttler, Glen Reid, Thorsten Enklaar, Natascha A. Wolff, Christian Ebbinghaus, Annette Hillemann, Hans-Jürgen Schulten, Bastian Gunawan, Lazlo Füzesi, Bernhard Zabel, and Gerhard Burckhardt**	623
Design of a Novel Small Peptide Targeted against a Tumor-Specific Receptor	**Michael J. Campa, Chien-Tsun Kuan, Maureen D. O'Connor-McCourt, Darell D. Bigner, and Edward F. Patz, Jr.**	631
Altered Ion Channel Activity in Murine Colonic Smooth Muscle Myocytes in an Experimental Colitis Model	**Hamid I. Akbarali, Charalabos Pothoulakis, and Ignazio Castagliuolo**	637
Genomic Structure and Alternative Splicing of Chicken Angiopoietin-2	**Jovita Mezquita, Pau Mezquita, Pau Montserrat, Belén Mezquita, Víctor Francone, Xavier Vilagrasa, and Cristóbal Mezquita**	643

Comparative Analysis of the Human and Mouse *Hey1* Promoter: *Hey* Genes Are New Notch Target Genes — **Manfred M. Maier and Manfred Gessler** **652**

A Novel Avian Hypothalamic Peptide Inhibiting Gonadotropin Release — **Kazuyoshi Tsutsui, Etsuko Saigoh, Kazuyoshi Ukena, Hitoshi Teranishi, Yuko Fujisawa, Motoshi Kikuchi, Susumu Ishii, and Peter J. Sharp** **661**

High-Affinity Ca^{2+} Binding Inhibits Autoactivation of Rat Trypsinogen — **Miklós Sahin-Tóth and Miklós Tóth** **668**

Spin Trapping of Vascular Nitric Oxide Using Colloid Fe(II)-Diethyldithiocarbamate — **Andrei L. Kleschyov, Hanke Mollnau, Mattias Oelze, Thomas Meinertz, Yale Huang, David G. Harrison, and Thomas Munzel** **672**

Oxidized Proteins in Alzheimer's Plasma — **Craig C. Conrad, Pam L. Marshall, John M. Talent, Christina A. Malakowsky, Joungil Choi, and Robert W. Gracy** **678**

Cloning and Characterization of Human Estrogen Receptor β Promoter — **Long-Cheng Li, Che-Chung Yeh, Dana Nojima, and Rajvir Dahiya** **682**

Eicosanoid 12(*S*)-HETE Activates Phosphatidylinositol 3-Kinase — **Charles K. Szekeres, Mohit Trikha, Daotai Nie, and Kenneth V. Honn** **690**

Involvement of Cyclooxygenase 2 in the Protective Effect of 17β-Estradiol on Hypercholesterolemic Rabbit Aorta — **Khadija Ghanam, Christian Lavagna, Jean-Luc Burgaud, James Javellaud, Leng Ea-Kim, and Nicole Oudart** **696**

Mutation of the Nucleophilic Elbow of the Lux-Specific Thioesterase from *Vibrio harveyi* — **Jun Li, Bijan Ahvazi, Rose Szittner, and Edward Meighen** **704**

Expression of Melanin-Concentrating Hormone Receptors in Insulin-Producing Cells: MCH Stimulates Insulin Release in RINm5F and CRI-G1 Cell Lines — **M. Tadayyon, H. J. Welters, A. C. Haynes, J. E. Cluderay, and G. Hervieu** **709**

BREAKTHROUGHS AND VIEWS

The Role of Regucalcin in Nuclear Regulation of Regenerating Liver — **Masayoshi Yamaguchi** 1

REGULAR ARTICLES

Synthesis of Stereoisomeric Analogues of Endomorphin-2, H-Tyr-Pro-Phe-Phe-NH_2, and Examination of Their Opioid Receptor Binding Activities and Solution Conformation — **Yoshio Okada, Atsuko Fukumizu, Motohiro Takahashi, Yoshiro Shimizu, Yuko Tsuda, Toshio Yokoi, Sharon D. Bryant, and Lawrence H. Lazarus** 7

A Novel Gene (Retinovin) Expressed Selectively in the Early Stage of Chick Retinal Development — **Masako Itami, Toshihiko Matsuo, and Hiroshi Ohtsuki** 12

AMP-Activated Protein Kinase Is Activated by the Stimulations of G_q-Coupled Receptors — **Kazuhiro Kishi, Tomoyuki Yuasa, Asako Minami, Mizuki Yamada, Akifumi Hagi, Hideki Hayashi, Bruce E. Kemp, Lee A. Witters, and Yousuke Ebina** 16

Complete Amino Acid Sequence of Japanese Chestnut Agglutinin — **Keiichi Nomura, Sachiko Nakamura, Mihoyo Fujitake, and Tetsu Nakanishi** 23

Edema Induction by the Disintegrin-like/Cysteine-Rich Domains from a *Bothrops atrox* Hemorrhagin — **Jorge H. Petretski, Milton M. Kanashiro, Flávia R. Rodrigues, Elias W. Alves, Olga L. T. Machado, and Thereza L. Kipnis** 29

ATP Synthesis and Heat Production during Ca^{2+} Efflux by Sarcoplasmic Reticulum Ca^{2+}-ATPase — **Leopoldo de Meis** 35

Suppression of CFTR-Mediated Cl^- Secretion by Enhanced Expression of Epithelial Na^+ Channels in Mouse Endometrial Epithelium — **L. N. Chan, X. F. Wang, L. L. Tsang, C. Q. Liu, and H. C. Chan** 40

Molecular Cloning of Testis-Abundant Finger Protein/Ring Finger Protein 23 (RNF23), a Novel RING-B Box-Coiled Coil-B30.2 Protein on the Class I Region of the Human MHC — **Akira Orimo, Toshiyuki Yamagishi, Nobuko Tominaga, Yasuhiro Yamauchi, Toshiki Hishinuma, Koichi Okada, Masami Suzuki, Miyuki Sato, Yasuhisa Nogi, Hiromichi Suzuki, Satoshi Inoue, Kazunori Yoshimura, Yoshihiko Shimizu, and Masami Muramatsu** 45

Multiple Transcripts of the Human Cu,Zn Superoxide Dismutase Gene — **M. Hirano, W.-Y. Hung, N. Cole, A. C. Azim, H.-X. Deng, and T. Siddique** 52

Inorganic Polyphosphate/ATP-NAD Kinase of *Micrococcus flavus* and *Mycobacterium tuberculosis* H37Rv — **Shigeyuki Kawai, Shigetarou Mori, Takako Mukai, Sachiko Suzuki, Takeshi Yamada, Wataru Hashimoto, and Kousaku Murata** 57

ppGpp-Dependent *leuO* Expression in Bacteria under Stress — **Ming Fang, Arundhati Majumder, Kan-Jen Tsai, and Hai-Young Wu** 64

Enzymes Leading to the Nucleotide Sugar Precursors for Exopolysaccharide Synthesis in *Burkholderia cepacia*	**João A. Richau, Jorge H. Leitão, and Isabel Sá-Correia**	71
Induction of NAD$^+$-Linked 15-Hydroxyprostaglandin Dehydrogenase Expression by Androgens in Human Prostate Cancer Cells	**Min Tong and Hsin-Hsiung Tai**	77
Effects of Carvedilol on Isolated Heart Mitochondria: Evidence for a Protonophoretic Mechanism	**Paulo J. Oliveira, M. Paula M. Marques, Luís A. E. Batista de Carvalho, and A. J. M. Moreno**	82
Pyrrolidine Dithiocarbamate Inhibits TNF-α-Dependent Activation of NF-κB by Increasing Intracellular Copper Level in Human Aortic Smooth Muscle Cells	**Atsushi Iseki, Fukushi Kambe, Kenji Okumura, Satoru Niwata, Ryohei Yamamoto, Tetsuo Hayakawa, and Hisao Seo**	88
Expression of the Na$^+$/Ca^{2+} Exchanger Ameliorates Ionomycin-Induced Cell Death	**Yihong Wang, Xiaozhuo Chen, and Robert A. Colvin**	93
Calcium-Modulating Cyclophilin Ligand Desensitizes Hormone-Evoked Calcium Release	**Stephen C. Tovey, Martin D. Bootman, Peter Lipp, Michael J. Berridge, and Richard J. Bram**	97
Three-Hybrid Strategy Reveals a Peptide Segment That Specifically Binds to the 3′-Untranslated Region of NF-IL6 mRNA	**Yuan-Zheng He and Ding-Gan Liu**	101
Alternative Splicing Forms of the Human CD1D Gene in Mononuclear Cells	**Satoshi Kojo, Yoshihiro Adachi, Akito Tsutsumi, and Takayuki Sumida**	107
Characterization of NAADP$^+$ Binding in Sea Urchin Eggs	**Richard A. Billington and Armando A. Genazzani**	112
Molecular Cloning and Genomic Organization of the Mouse AE2 Anion Exchanger Gene	**Jon Lecanda, Raquel Urtasun, and Juan F. Medina**	117
Genomic Organization of the Human Kallikrein Gene Family on Chromosome 19q13.3–q13.4	**George M. Yousef, Albert Chang, Andreas Scorilas, and Eleftherios P. Diamandis**	125
Hypoxia/Hypoglycemia-Induced Amino Acid Release Is Decreased *in Vitro* by Preconditioning	**Lisa Johns, Alan J. Sinclair, and John A. Davies**	134
Identification of Five New Isoforms of Murine Thrombopoietin mRNA	**Xiao-lin Wu, Michihiro Nakayama, and John W. Adamson**	137
Inhibiting Proteasomes in Human HepG2 and LNCaP Cells Increases Endogenous Androgen Receptor Levels	**Lowell Sheflin, Brendan Keegan, Wan Zhang, and Stephen W. Spaulding**	144
Genistein Induces Apoptosis of RPE-J Cells by Opening Mitochondrial PTP	**Hee Seong Yoon, Seong Cheol Moon, Nam Deuk Kim, Bong Soo Park, Min Ho Jeong, and Young Hyun Yoo**	151
Probing the Topology of the Glutamate Receptor GluR1 Subunit Using Epitope-Tag Insertions	**Rene Anand**	157
Regulation of Proteins Involved in Insulin Signaling Pathways in Differentiating Human Adipocytes	**Terry Pederson and Cristina M. Rondinone**	162

Wavelength-Programmed Solute Release from Photosensitive Liposomes	**Roger H. Bisby, Carole Mead, and Christopher G. Morgan**	169
Hepatic Copper Accumulation Induces DNA Strand Breaks in the Liver Cells of Long-Evans Cinnamon Strain Rats	**Masanobu Hayashi, Tomoko Kuge, Daiji Endoh, Kenji Nakayama, Jiro Arikawa, Akira Takazawa, and Toyo Okui**	174
The Subcellular Location of Nucleoside Analog Phosphorylation Is a Determinant of Synergistic Effects of Hydroxyurea	**Chaoyong Zhu, Magnus Johansson, and Anna Karlsson**	179
Myristoylation Alters Retinoic Acid-Induced Down-Regulation of MARCKS in Immortalized Hippocampal Cells	**Le Wang, David G. Watson, and Robert H. Lenox**	183
Glucocorticoid Resistance in Thymocytes from Mice Expressing a T Cell Receptor Transgene	**Ahmad Pazirandeh, Yintong Xue, Sam Okret, and Mikael Jondal**	189
Characterization of L-Asparaginase Fused with a Protective ScFv and the Protection Mechanism	**Li Guo, Jinhua Wang, Xiyun Yan, Runsheng Chen, Shijun Qian, and Guangzhen Meng**	197
Functional Properties of Sodium Channels Do Not Depend on the Cytoskeleton Integrity	**Oscar Moran, Paolo Tammaro, Mario Nizzari, and Franco Conti**	204
Evidence for the Cluster Model of Mitochondrial Steroid Hydroxylase System Derived from Dissociation Constants of the Complex between Adrenodoxin Reductase and Adrenodoxin	**Takayuki Hara, Chiho Koba, Mikako Takeshima, and Yasuhiro Sagara**	210
Cysteine Is the Initial Site of Modification of α-Crystallin by Kynurenine	**J. A. Aquilina and R. J. W. Truscott**	216
Site-Directed Mutagenesis of the Substrate-Binding Cleft of Human Estrogen Sulfotransferase	**Nadine Hempel, Amanda C. Barnett, Robyn M. Bolton-Grob, Nancy E. Liyou, and Michael E. McManus**	224
Equivalent Death of P-Glycoprotein Expressing and Nonexpressing Cells Induced by the Protein Kinase C Inhibitor Staurosporine	**Kellie M. Tainton, Astrid A. Ruefli, Mark J. Smyth, and Ricky W. Johnstone**	231
Increase in X-Ray-Induced Mutations by Exposure to Magnetic Field (60 Hz, 5 mT) in NF-κB-Inhibited Cells	**Gui-Rong Ding, Hiroko Yaguchi, Masami Yoshida, and Junji Miyakoshi**	238
Molecular Cloning and Chromosomal Mapping of a Novel Five-Span Transmembrane Protein Gene, *M83*	**Tsutomu Motohashi, Sousuke Miyoshi, Mitsujiro Osawa, Helen J. Eyre, Grant R. Sutherland, Yoichi Matsuda, Yukio Nakamura, Akira Shibuya, Atsushi Iwama, and Hiromitsu Nakauchi**	244
Peptide-Mediated Transcytosis of Phage Display Vectors in MDCK Cells	**Vasily V. Ivanenkov and Anil G. Menon**	251
Cloning, Functional Characterization, and Expression of Thyrotropin Receptors in the Thyroid of Amago Salmon (*Oncorhynchus rhodurus*)	**Yuichi Oba, Toshiaki Hirai, Yasutoshi Yoshiura, Tohru Kobayashi, and Yoshitaka Nagahama**	258

Amplification and Overexpression of TGIF2, a Novel Homeobox Gene of the TALE Superclass, in Ovarian Cancer Cell Lines	**Issei Imoto, Atiphan Pimkhaokham, Takafumi Watanabe, Fumiko Saito-Ohara, Eichi Soeda, and Johji Inazawa**	**264**
Human CDK10 Gene Isoforms	**Jean-Christophe Sergère, Jean-Yves Thuret, Gwenaëlle Le Roux, Edgardo D. Carosella, and François Leteurtre**	**271**
Norcantharidin-Induced Post-G$_2$/M Apoptosis Is Dependent on Wild-Type p53 Gene	**Chi-Yuan Hong, Shen C. Huang, Sze-Kwan Lin, Jihjong J. Lee, Ling-Ling Chueh, Chien-Hsin K. Lee, Jen-Hsou Lin, and Michael Hsiao**	**278**
Molecular Cloning of the Crustacean *DD4* cDNA Encoding a Ca^{2+}-Binding Protein	**Hirotoshi Endo, Petra Persson, and Toshiki Watanabe**	**286**
Enzymatic Modification of Heparan Sulfate on a Biochip Promotes Its Interaction with Antithrombin III	**Maria Hernaiz, Jian Liu, Robert D. Rosenberg, and Robert J. Linhardt**	**292**
A Novel Form of Gonadotropin-Releasing Hormone in the Medaka, *Oryzias latipes*	**Kataaki Okubo, Masafumi Amano, Yasutoshi Yoshiura, Hiroaki Suetake, and Katsumi Aida**	**298**
Biological Characterization of Uncleavable Plasma Membrane-Anchored Human Macrophage Colony-Stimulating Factor	**Ping Deng, Ying-Lin Wang, Violette L. Shahbazian, and Paul K. Pattengale**	**304**
An Anion Channel in Guinea Pig Gallbladder Epithelial Cells Is Highly Permeable to HCO$_3^-$	**Giuliano Meyer, Maria Lisa Garavaglia, Claudia Bazzini, and Guido Bottà**	**312**
Hypoxia Induces the Expression of a 43-kDa Protein (PROXY-1) in Normal and Malignant Cells	**Hannah Park, Michael A. Adams, Pascale Lachat, Fred Bosman, Stephen C. Pang, and Charles H. Graham**	**321**
Neuroendocrine-Specific Protein C, a Marker of Neuronal Differentiation, Is Reduced in Brain of Patients with Down Syndrome and Alzheimer's Disease	**Seong Hwan Kim, Byong Chul Yoo, Jos L. V. Broers, Nigel Cairns, and Gert Lubec**	**329**
Identification and Characterization of Rat AILIM/ICOS, a Novel T-Cell Costimulatory Molecule, Related to the CD28/CTLA4 Family	**Katsunari Tezuka, Takashi Tsuji, Daisuke Hirano, Takuya Tamatani, Kazuhiro Sakamaki, Yuko Kobayashi, and Masafumi Kamada**	**335**
Enhancement of the Activity of L-Aspartase from *Escherichia coli* W by Directed Evolution	**Li-juan Wang, Xiang-duo Kong, Hing-ying Zhang, Xiao-ping Wang, and Jin Zhang**	**346**
Receptor Isoform-Specific Interaction of Prostaglandin EP3 Receptor with Muskelin	**Hiroshi Hasegawa, Hironori Katoh, Hirotada Fujita, Kazutoshi Mori, and Manabu Negishi**	**350**
Drosophila von Hippel-Lindau Tumor Suppressor Complex Possesses E3 Ubiquitin Ligase Activity	**Teijiro Aso, Katsuhisa Yamazaki, Toshiro Aigaki, and Shigetaka Kitajima**	**355**
Upregulation of the Apoptosis-Associated Protein Grb3-3 in HIV-1-Infected Human CD4$^+$ Lymphocytes	**Xuguang Li, Marie-Christine Multon, Yvette Henin, Fabien Schweighoffer, Corinne Venot, Joyce LaVecchio, Juliana Josef, Patricia Stuckert, Abner Mhashilkar, Bruno Tocqué, and Wayne A. Marasco**	**362**

Anti-Angiogenic Potential of a Cancer Chemopreventive Flavonoid Antioxidant, Silymarin: Inhibition of Key Attributes of Vascular Endothelial Cells and Angiogenic Cytokine Secretion by Cancer Epithelial Cells — **Cheng Jiang, Rajesh Agarwal, and Junxuan Lü** — **371**

The Endogenous Oxindoles 5-Hydroxyoxindole and Isatin Are Antiproliferative and Proapoptotic — **Agnès Cane, Marie-Claude Tournaire, Denis Barritault, and Michèle Crumeyrolle-Arias** — **379**

Physical Interaction of Delta1, Jagged1, and Jagged2 with Notch1 and Notch3 Receptors — **Kiyoshi Shimizu, Shigeru Chiba, Toshiki Saito, Keiki Kumano, and Hisamaru Hirai** — **385**

Isolation and Characterization of Murine Orthologue of PTP-BK	**Takuya Tomemori, Naohiko Seki, Yo-ichi Suzuki, Takahiko Shimizu, Hiroshi Nagata, Akiyoshi Konno, and Takuji Shirasawa**	**974**
The Brain Link Protein-1 (*BRAL1*): cDNA Cloning, Genomic Structure, and Characterization as a Novel Link Protein Expressed in Adult Brain	**Satoshi Hirakawa, Toshitaka Oohashi, Wei-Dong Su, Hidekatsu Yoshioka, Takuro Murakami, Jirô Arata, and Yoshifumi Ninomiya**	**982**
Cloning, Expression, and Mapping of hWW45, a Novel Human WW Domain-Containing Gene	**Paloma Valverde**	**990**
A Pivotal Role of Zn-Binding Residues in the Function of the Copper Chaperone for SOD1	**Takeshi Endo, Tsuneko Fujii, Kenzo Sato, Naoyuki Taniguchi, and Junichi Fujii**	**999**
Stabilization of P450 2B4 by Its Association with P450 1A2 Revealed by High-Pressure Spectroscopy	**Dmitri R. Davydov, Natalia A. Petushkova, Alexander I. Archakov, and Gaston Hui Bon Hoa**	**1005**
The SepOvotropin: A New Ovarian Peptide Regulating Oocyte Transport in *Sepia officinalis*	**Céline Zatylny, Jean Gagnon, Eve Boucaud-Camou, and Joël Henry**	**1013**

Correlated Gene Expression between β-1,4-Galactosyltransferase V and *N*-Acetylglucosaminyltransferase V in Human Cancer Cell Lines **Takeshi Sato, Katsunori Shirane, Masahiro Kido, and Kiyoshi Furukawa** 1019

PMCA1 mRNA Expression in Rat Aortic Myocytes: A Real-Time RT–PCR Study **Tanya M. Mamic, Nicola A. Holman, Sarah J. Roberts-Thomson, and Gregory R. Monteith** 1024

Functional Analysis of Human Metaxin in Mitochondrial Protein Import in Cultured Cells and Its Relationship with the Tom Complex **Khaleque Md. Abdul, Kazutoyo Terada, Masato Yano, Michael T. Ryan, Illo Streimann, Nicholas J. Hoogenraad, and Masataka Mori** 1028

Translocational Status of ApoB in the Presence of an Inhibitor of Microsomal Triglyceride Transfer Protein **Joseph Macri, Paknoush Kazemian, Agnes Kulinski, Debbie Rudy, Andrea Aiton, Roger J. Thibert, and Khosrow Adeli** 1035

Identification of the Functional Site in the Mosquito Larvicidal Binary Toxin of *Bacillus sphaericus* 1593M by Site-Directed Mutagenesis **G. Elangovan, M. Shanmugavelu, F. Rajamohan, D. H. Dean, and Kunthala Jayaraman** 1048

Disease-Associated Mutations in *SOD1* are Impervious to Dominant Positive or Negative Effects **Jennifer R. Hall and Craig A. Strathdee** 1056

Gamma-Glutamyltranspeptidase-Dependent Glutathione Catabolism Results in Activation of NF-kB **Marie-José Accaoui, Milica Enoiu, Mojgan Mergny, Christine Masson, Sylvia Dominici, Maria Wellman, and Athanase Visvikis** 1062

Nuclear Localization and Apoptotic Regulation of an Amino-Terminal Domain Focal Adhesion Kinase Fragment in Endothelial Cells **Mel Lobo and Ian Zachary** 1068

Interaction of Chloroquine and Its Analogues with Heme: An Isothermal Titration Calorimetric Study **Kiran Bachhawat, Celestine J. Thomas, Namita Surolia, and Avadhesha Surolia** 1075

The α-Ketoisocaproate Catabolism in Human and Rat Livers **Ming Xu, Naoya Nakai, Kiyoshi Ishigure, Toshiaki Nonami, Masaru Nagasaki, Mariko Obayashi, Zhihao Li, Yuzo Sato, Noriaki Fujitsuka, Taro Murakami, and Yoshiharu Shimomura** 1080

Antigenicity of Chimeric Synthetic Peptides Based on HTLV-1 Antigens and the Impact of Epitope Orientation **Milenen Hernández, María Elena Selles, Lilliam Pozo Peña, Ivonne Gómez, and Antonio Melchor** 1085

Mouse *flt-1* Promoter Directs Endothelial-Specific Expression in the Embryoid Body Model of Embryogenesis **Gary Quinn, Takahiro Ochiya, Masaaki Terada, and Teruhiko Yoshida** 1089

Upregulation of LOX-1 Expression in Aorta of Hypercholesterolemic Rabbits: Modulation by Losartan **Hongjiang Chen, Dayuan Li, Tatsuya Sawamura, Kazuhiko Inoue, and Jawahar L. Mehta** 1100

Ku70 Can Translocate to the Nucleus Independent of Ku80 Translocation and DNA-PK Autophosphorylation — **Manabu Koike, Tadahiro Shiomi, and Aki Koike** — **1105**

Localization of *HB9* Homeobox Gene mRNA and Protein during the Early Stages of Chick Feather Development — **Yasuhiro Kosaka, Yoshihiro Akimoto, Akiko Obinata, and Hiroshi Hirano** — **1112**

Immunolocalization of AQP99 in Liver, Epididymis, Testis, Spleen, and Brain — **M.-L. Elkjær, Z. Vajda, L. N. Nejsum, T.-H. Kwon, U. B. Jensen, M. Amiry-Moghaddam, J. Frøkiær, and S. Nielsen** — **1118**

Myocilin Expression in the Astrocytes of the Optic Nerve Head — **Setsuko Noda, Yukihiko Mashima, Minoru Obazawa, Ryo Kubota, Yoshihisa Oguchi, Jun Kudoh, Shinsei Minoshima, and Nobuyoshi Shimizu** — **1129**

Expression and Localization of Heme Oxygenase in Human Placental Villi — **Naoyuki Yoshiki, Toshiro Kubota, and Takeshi Aso** — **1136**

D-Aspartate in a Prolactin-Secreting Clonal Strain of Rat Pituitary Tumor Cells (GH_3) — **Zhiqung Long, Jen-Ai Lee, Taizo Okamoto, Noriyuki Nimura, Kazuhiro Imai, and Hiroshi Homma** — **1143**

Solution Structure of BmP01 from the Venom of Scorpion *Buthus martensii* Karsch — **Gong Wu, Yiming Li, Dongsheng Wei, Fahu He, Shaokai Jiang, Guoyuan Hu, and Houming Wu** — **1148**

Homeobox Gene *Hex* Is Essential for Onset of Mouse Embryonic Liver Development and Differentiation of the Monocyte Lineage — **Vincent W. Keng, Hideshi Yagi, Masahito Ikawa, Takashi Nagano, Zaw Myint, Kazuya Yamada, Takashi Tanaka, Ayuko Sato, Ikunobu Muramatsu, Masaru Okabe, Makoto Sato, and Tamio Noguchi** — **1155**

Domains of Axin and Disheveled Required for Interaction and Function in Wnt Signaling — **M. A. Julius, B. Schelbert, W. Hsu, E. Fitzpatrick, E. Jho, F. Fagotto, F. Costantini, and J. Kitajewski** — **1162**

Cloning and Expression Profiling of Hpa2, a Novel Mammalian Heparanase Family Member — **Edward McKenzie, Kerry Tyson, Alasdair Stamps, Paul Smith, Paul Turner, Richard Barry, Margaret Hircock, Sonal Patel, Eleanor Barry, Colin Stubberfield, Jon Terrett, and Martin Page** — **1170**

A *Drosophila* Homolog of LIM-Kinase Phosphorylates Cofilin and Induces Actin Cytoskeletal Reorganization — **Kazumasa Ohashi, Toshihiko Hosoya, Kazuya Takahashi, Huey Hing, and Kensaku Mizuno** — **1178**

Direct Interaction of Actin with $p47^{phox}$ of Neutrophil NADPH Oxidase — **Minoru Tamura, Tetsutaro Kai, Shohko Tsunawaki, J. David Lambeth, and Kenji Kameda** — **1186**

Lateral Clustering of Cadherin-4 without Homophilic Interaction: Possible Involvement in the Concentration Process at Cell–Cell Adhesion Sites as Well as in the Cell Adhesion Activity — **Sachiko Murase, Shinji Hirano, Xiaopeng Wang, Michihiro Kitagawa, Michiya Natori, Shigeru Taketani, and Shintaro T. Suzuki** — **1191**

The H159A Mutant of Yeast Enolase 1 Has Significant Activity	**John M. Brewer, Michael J. Holland, and Lukasz Lebioda**	1199
Molecular Cloning and Functional Analysis of the Promoter Region of Rat Nonmuscle Myosin Heavy Chain-B Gene	**Judy W. P. Yam, Koon Wing Chan, Ning Li, and W. L. Wendy Hsiao**	1203
Ganglioside GD3 and Its Mimetics Induce Cytochrome *c* Release from Mitochondria	**Yutaka Inoki, Tsuyoshi Miura, Tetsuya Kajimoto, Mitsuo Kawase, Yuji Kawase, Yasuko Yoshida, Shuichi Tsuji, Tadatoshi Kinouchi, Hitoshi Endo, Yasuo Kagawa, and Toshiro Hamamoto**	1210
Copper Refolding of Prion Protein	**Boon-Seng Wong, Catherine Vénien-Bryan, R. Anthony Williamson, Dennis R. Burton, Pierluigi Gambetti, Man-Sun Sy, David R. Brown, and Ian M. Jones**	1217
Binding of Tropomyosin–Troponin to Actin Increases Filament Bending Stiffness	**Wolfgang H. Goldmann**	1225
The Amino Acid Region 115–119 of Ammodytoxins Plays an Important Role in Neurotoxicity	**Gabriela Ivanovski, Alenka Čopič, Igor Križaj, Franc Gubenšek, and Jože Pungerčar**	1229
Asymmetric Preference of Serine Proteases toward Phosphonate and Phosphinate Esters	**Brian Walker, Scott Wharry, Robert J. Hamilton, S. Lorraine Martin, Adrienne Healy, and Brian J. Walker**	1235
The Glycosyl Phosphatidylinositol Anchor of Human T-Cadherin Binds Lipoproteins	**Thomas Niermann, Frances Kern, Paul Erne, and Thérèse Resink**	1240
Identification of Nuclear Export Signal in UL37 Protein of Herpes Simplex Virus Type 2	**Daisuke Watanabe, Yoko Ushijima, Fumi Goshima, Hiroki Takakuwa, Yasushi Tomita, and Yukihiro Nishiyama**	1248
The Ubiquitin-Proteasome Proteolytic Pathway in Heart vs Skeletal Muscle: Effects of Acute Diabetes	**Zhenqi Liu, Wendell R. Miers, Liping Wei, and Eugene J. Barrett**	1255
Bacterial DNA Methylation and Gene Transfer Efficiency	**S. Allamane, P. Jourdes, D. Ratel, J. M. Vicat, I. Dupré, M. Lainé, F. Berger, A. L. Benabid, and D. Wion**	1261
Kinetin Inhibits Protein Oxidation and Glycoxidation *in Vitro*	**Philippe Verbeke, Gunhild E. Siboska, Brian F. C. Clark, and Suresh I. S. Rattan**	1265
Cloning, Characterization, and Tissue Distribution of Mouse Phosphodiesterase 7A1	**Peng Wang, Ping Wu, Robert W. Egan, and M. Motasim Billah**	1271
Solution Structure of a Designed Amphipathic Antimicrobial Synthetic Peptide, PGAa	**Eunmi Hong, Pan-Young Jeong, Jin-Won Jung, Yangmee Kim, Chaejoon Cheong, Young-Ki Paik, and Weontae Lee**	1278
Prokaryotic Expression, Purification, and Reconstitution of Biological Activities (Antiprotease, Antitumor, and Heparin-Binding) for Tissue Factor Pathway Inhibitor-2	**C. N. Rao, Prasad Reddy, Dennis J. Reeder, Yueying Liu, Sharon M. Stack, W. Kisiel, and David T. Woodley**	1286

Apoptosis and Restriction of G_1/S Cell Cycle by Fenretinide in Burkitt's Lymphoma Mutu I Cell Line Accessed with bcl-6 Down-Regulation	**Tze-chen Hsieh and Joseph M. Wu**	**1295**
Insulin-Dependent Phosphorylation of a 70-kDa Protein in Light Microsomes from Rat Adipocytes	**Carmen Martinez, Gino Vallega, and Paul F. Pilch**	**1302**
Adenosine: A Partial Agonist of the Growth Hormone Secretagogue Receptor	**Roy G. Smith, Patrick R. Griffin, Yuan Xu, Alexander G. A. Smith, Ken Liu, Jimmy Calacay, Scott D. Feighner, C.-S. Pong, Denis Leong, Anna Pomés, Kang Cheng, Lex H. T. Van der Ploeg, Andrew D. Howard, James Schaeffer, and Reid J. Leonard**	**1306**
Transition-State Formation in ATPase-Negative Mutants of Human MDR1 Protein	**Gergely Szakács, Csilla Özvegy, Éva Bakos, Balázs Sarkadi, and András Váradi**	**1314**
Activation of LEDGF Gene by Thermal- and Oxidative-Stresses	**Preeti Sharma, Dhirendra P. Singh, Nigar Fatma, Leo T. Chylack, Jr., and Toshimichi Shinohara**	**1320**
Author Index for Volume 276		**1325**

Volume 277, Number 1, October 14, 2000

BREAKTHROUGHS AND VIEWS

Phenobarbital-Elicited Activation of Nuclear Receptor CAR in Induction of Cytochrome P450 Genes — **Igor Zelko and Masahiko Negishi** — 1

REGULAR ARTICLES

Genomic Organization and Splicing Variants of a Peptidylglycine α-Hydroxylating Monooxygenase from Sea Anemones — **Michael Williamson, Frank Hauser, and Cornelis J. P. Grimmelikhuijzen** — 7

Influence of Reverse Micellar Environments on the Fluorescence Emission Properties of Tryptophan Octyl Ester — **Bidisa Sengupta and Pradeep K. Sengupta** — 13

Leptin Resistance of Adipocytes in Obesity: Role of Suppressors of Cytokine Signaling — **Zhuowei Wang, Yan-Ting Zhou, Tetsuya Kakuma, Young Lee, Satya P. Kalra, Pushpa S. Kalra, Wentong Pan, and Roger H. Unger** — 20

Molecular Cloning, Genomic Structure, Chromosomal Localization, and Alternative Splice Forms of the Platelet Collagen Receptor Glycoprotein VI — **Yasuharu Ezumi, Takashi Uchiyama, and Hiroshi Takayama** — 27

Monocyte Chemotactic Protein 1 Upregulates IL-1β Expression in Human Monocytes — **Mikhail A. Gavrilin, Michael F. Deucher, Faye Boeckman, and P. E. Kolattukudy** — 37

Activation of MMP-2 by *Clostridium difficile* Toxin B in Bovine Smooth Muscle Cells — **Teruhiko Koike, Masafumi Kuzuya, Toshinobu Asai, Shigeru Kanda, Xian Wu Cheng, Kunitomo Watanabe, Yoshiko Banno, Yoshinori Nozawa, and Akihisa Iguchi** — 43

Glycation of Aspartate Aminotransferase and Conformational Flexibility — **Norbert W. Seidler and Ines Seibel** — 47

Anti-PorA Antibodies Elicited by Immunization with Peptides Conjugated to P64k — **G. Sardiñas, S. González, H. E. Garay, C. Nazábal, O. Reyes, and R. Silva** — 51

Angiogenesis Modulators Expression in Culture Cell Lines Positives for HPV-16 Oncoproteins — **Mónica Bequet-Romero and Omar López-Ocejo** — 55

Enhanced p73 Expression during Differentiation and Complex p73 Isoforms in Myeloid Leukemia — **Mario P. Tschan, Tobias J. Grob, Uwe R. Peters, Vincenzo De Laurenzi, B. Huegli, K.-A. Kreuzer, C. A. Schmidt, Gerry Melino, Martin F. Fey, Andreas Tobler, and Jean-François Cajot** — 62

Suppression of the Expression of the CYP2B1/2 Gene by Retinoic Acids — **Hideyuki Yamada, Tohru Yamaguchi, and Kazuta Oguri** — 66

Lysophosphatidic Acid Enhances Collagen Gel Contraction by Hepatic Stellate Cells: Association with Rho-Kinase	**Mikio Yanase, Hitoshi Ikeda, Atsushi Matsui, Hisato Maekawa, Eisei Noiri, Tomoaki Tomiya, Masahiro Arai, Takeo Yano, Masao Shibata, Mitsuo Ikebe, Kenji Fujiwara, Marcos Rojkind, and Itsuro Ogata**	72
Partial Characterization of a Novel Cathepsin L-like Protease from *Fasciola hepatica*	**Susan J. Hawthorne, Maurice Pagano, David W. Halton, and Brian Walker**	79
Use of Domain Specific Ligands to Study Urea-Induced Unfolding of Bovine Serum Albumin	**Saad Tayyab, Neeraj Sharma, and Mohammad Mushahid Khan**	83
Complete Genomic Sequence of a Dengue Type 2 Virus from the French West Indies	**H. Tolou, P. Couissinier-Paris, V. Mercier, M-R. Pisano, X. de Lamballerie, P. de Micco, and J-P. Durand**	89
Analysis of Cell Mechanics in Single Vinculin-Deficient Cells Using a Magnetic Tweezer	**Francis J. Alenghat, Ben Fabry, Kenneth Y. Tsai, Wolfgang H. Goldmann, and Donald E. Ingber**	93
The Study of Crystallization of Estrogenic 17β-Hydroxysteroid Dehydrogenase with DHEA and DHT at Elevated Temperature	**Qing Han and Sheng-Xiang Lin**	100
Mechanism of Ultraviolet B-Induced Cell Cycle Arrest in G2/M Phase in Immortalized Skin Keratinocytes with Defective p53	**Mohammad Athar, Arianna L. Kim, Nihal Ahmad, Hasan Mukhtar, Jean Gautier, and David R. Bickers**	107
Oxygenation of (3*Z*)-Alkenals to 4-Hydroxy-(2*E*)-Alkenals in Plant Extracts: A Nonenzymatic Process	**Minke A. Noordermeer, Ivo Feussner, Adelheid Kolbe, Gerrit A. Veldink, and Johannes F. G. Vliegenthart**	112
Increase in Cap- and IRES-Dependent Protein Synthesis by Overproduction of Translation Initiation Factor eIF4G	**Satoko Hayashi, Kazuhiro Nishimura, Tomomi Fukuchi-Shimogori, Keiko Kashiwagi, and Kazuei Igarashi**	117
Altered Gene Expression upon BCR Cross-Linking in Burkitt's Lymphoma B Cell Line	**Yasuhiro Nakayama, Yoshiki Iwamoto, Stephen E. Maher, Yujiro Tanaka, and Alfred L. M. Bothwell**	124
Arachidonic Acid Causes Cytochrome *c* Release from Heart Mitochondria	**Marco Di Paola, Tiziana Cocco, and Michele Lorusso**	128
Exocytosis in the Dissociated Pancreatic Acinar Cells of the Guinea Pig Directly Visualized by VEC-DIC Microscopy	**Yukio Ishihara, Takashi Sakurai, Yoshiaki Habara, Julia V. Busik, Tomio Kanno, and Susumu Terakawa**	134
An Unknown Endogenous Inhibitor of Na/Ca Exchange Can Enhance the Cardiac Muscle Contractility	**Reuben Hiller, Chagit Shpak, Gabriel Shavit, Beny Shpak, and Daniel Khananshvili**	138
Tracing the Origin of the RACTK1 K^+ Channel	**B. Ortega, A. H. Beesley, D. Hornby, and S. J. White**	147
Cell Density-Dependent Regulation of Hepatic Development by a gp130-Independent Pathway	**Nobuhiko Kojima, Taisei Kinoshita, Akihide Kamiya, Koji Nakamura, Kinichi Nakashima, Tetsuya Taga, and Atsushi Miyajima**	152

Suppressive Effects of DNA Vaccines Encoding Heat Shock Protein on *Helicobacter pylori*-induced Gastritis in Mice	**Isami Todoroki, Takashi Joh, Katsushi Watanabe, Masayuki Miyashita, Kyoji Seno, Tomoyuki Nomura, Hirotaka Ohara, Yoshihumi Yokoyama, Kunio Tochikubo, and Makoto Itoh**	159
Localization of Aquaporin-7 in Rat and Mouse Kidney Using RT-PCR, Immunoblotting, and Immunocytochemistry	**L. N. Nejsum, M.-L. Elkjær, H. Hager, J. Frøkiær, T. H. Kwon, and S. Nielsen**	164
Analysis of the Role of Conserved Cysteine Residues in the Bcl-2 Oncoprotein	**Richard S. Maser, Keiko Antoku, William J. Scully, Jr., Richard L. Cho, and Daniel E. Johnson**	171
Arsenic Trioxide Inhibits Neuroblastoma Growth *in Vivo* and Promotes Apoptotic Cell Death *in Vitro*	**Ingrid Øra, Lennart Bondesson, Carolin Jönsson, June Ljungberg, Isabella Pörn-Ares, Stanislaw Garwicz, and Sven Påhlman**	179
Kringle 1 of Human Hepatocyte Growth Factor Inhibits Bovine Aortic Endothelial Cell Proliferation Stimulated by Basic Fibroblast Growth Factor and Causes Cell Apoptosis	**Li Xin, Ren Xu, Qian Zhang, Tsai-Ping Li, and Ren-Bao Gan**	186
Central Effects of Neuromedin U in the Regulation of Energy Homeostasis	**Masamitsu Nakazato, Reiko Hanada, Noboru Murakami, Yukari Date, Muhtashan S. Mondal, Masayasu Kojima, Hironobu Yoshimatsu, Kenji Kangawa, and Shigeru Matsukura**	191
Flt3 Ligand Induces Tyrosine Phosphorylation of Gab1 and Gab2 and Their Association with Shp-2, Grb2, and PI3 Kinase	**Shuli Zhang and Hal E. Broxmeyer**	195
Genomic Organization and Expression of the Mouse Equilibrative, Nitrobenzylthioinosine-Sensitive Nucleoside Transporter 1 (ENT1) Gene	**Doo-Sup Choi, Masahisa Handa, Hannah Young, Adrienne S. Gordon, Ivan Diamond, and Robert O. Messing**	200
Molecular Cloning and Functional Characterization of a Novel Nuclear Receptor Similar to an Embryonic Benzoate Receptor BXR	**Jun-ichi Nishikawa, Koichi Saito, Mikiko Sasaki, Yoshitaka Tomigahara, and Tsutomu Nishihara**	209
Requirement for the COOH-Terminal Pro-Sequence in the Translocation of Aqualysin I across the Cytoplasmic Membrane in *Escherichia coli*	**Dong-Wook Kim and Hiroshi Matsuzawa**	216
Calcium Increases Apolipoprotein B mRNA Editing	**Zhigang Chen, Thomas L. Eggerman, Darryn Potosky, Muriel Arborati, and Amy P. Patterson**	221
Heat Shock Protein 60 Is a High-Affinity High-Density Lipoprotein Binding Protein	**Alexander V. Bocharov, Tatyana G. Vishnyakova, Irina N. Baranova, Alan T. Remaley, Amy P. Patterson, and Thomas L. Eggerman**	228
Expression Profiling of Human Sulfotransferase and Sulfatase Gene Superfamilies in Epithelial Tissues and Cultured Cells	**Thomas P. Dooley, Ruth Haldeman-Cahill, Julie Joiner, and Teresa W. Wilborn**	236

Detection of Cellular Receptors Specific for the Hepatitis B Virus preS Surface Protein on Cell Lines of Extrahepatic Origin	**Jung-Hyun Park, Eun-A Choi, Eun-Wie Cho, Yun-Jung Lee, Jung-Min Park, Shin-Young Na, and Kil Lyong Kim**	246
Intracellular FGF-2 Promotes Differentiation in T-47D Breast Cancer Cells	**Reju M. Korah, Vilayvanh Sysounthone, Elizabeth Scheff, and Robert Wieder**	255
The Presenilin 1 C92S Mutation Increases Aβ 42 Production	**Patrick A. Lewis, Jordi Perez-Tur, Todd E. Golde, and John Hardy**	261
Neuropeptide Y Receptor Gene y6: Multiple Deaths or Resurrections?	**Paula Starbäck, Amanda Wraith, Henrik Eriksson, and Dan Larhammar**	264
Progesterone Receptor Activation Mediates LH-Induced Type-I Pituitary Adenylate Cyclase Activating Polypeptide Receptor (PAC_1) Gene Expression in Rat Granulosa Cells	**Chemyong Ko and Ok-Kyong Park-Sarge**	270

Number 2, October 22, 2000

Disruption of Aldose Reductase Gene (*Akr1b1*) Causes Defect in Urinary Concentrating Ability and Divalent Cation Homeostasis	**Kaoru Aida, Yukinobu Ikegishi, Jing Chen, Masato Tawata, Sadahiro Ito, Shuichiro Maeda, and Toshimasa Onaya**	281
Thyroid Oxidase (THOX2) Gene Expression in the Rat Thyroid Cell Line FRTL-5	**Corinne Dupuy, Martine Pomerance, Renée Ohayon, Marie-Sophie Noël-Hudson, Danielle Dème, Mokhtar Chaaraoui, Jacques Francon, and Alain Virion**	287
Enhancement of TNF-α-Induced Apoptosis by Immobilized Arginine-Glycine-Aspartate: Involvement of a Tyrosine Kinase-Dependent, MAP Kinase-Independent Mechanism	**Victoria Moreno-Manzano, Javier Lucio-Cazana, Tsuneo Konta, Kenji Nakayama, and Masanori Kitamura**	293
Regulation of the Expression of the Sea Urchin Mitochondrial D-Loop Binding Protein during Early Development	**Clara Musicco, Marina Roberti, Paola Loguercio Polosa, Francesco Milella, Amelia Sagliano, Maria Nicola Gadaleta, and Palmiro Cantatore**	299
Gene Responses in Bean Leaves Induced by Herbivory and by Herbivore-Induced Volatiles	**Gen-ichiro Arimura, Kosuke Tashiro, Satoru Kuhara, Takaaki Nishioka, Rika Ozawa, and Junji Takabayashi**	305
Reconstitution of Caspase-8 Sensitizes JB6 Cells to TRAIL	**In-Ki Kim, Chul-Woong Chung, Ha-Na Woo, Gil-Sun Hong, Shinji Nagata, and Yong-Keun Jung**	311
Augmentation of Signal Transducer and Activation of Transcription (STAT)6 and STAT3 Expression in Stimulated B and T Cells	**Yojiro Arinobu, Rie Sugimoto, Mina Akaiwa, Kazuhiko Arima, Takeshi Otsuka, Naotaka Hamasaki, and Kenji Izuhara**	317
Identification of Ubiquitin as an Immunophilin	**Diane L. Davis and Steven J. Soldin**	325
E-73, an Acetoxyl Analogue of Cycloheximide, Blocks the Tumor Necrosis Factor-Induced NF-κB Signaling Pathway	**Hikaru Sugimoto, Takao Kataoka, Masayuki Igarashi, Masa Hamada, Tomio Takeuchi, and Kazuo Nagai**	330

γ-Tocopherol Partially Protects Insulin-Secreting Cells against Functional Inhibition by Nitric Oxide	**Åke Sjöholm, Per-Olof Berggren, and Robert V. Cooney**	**334**
Neural BC1 RNA Associates with Pur α, a Single-Stranded DNA and RNA Binding Protein, Which Is Involved in the Transcription of the BC1 RNA Gene	**Shunsuke Kobayashi, Keisuke Agui, Sakurako Kamo, Yanmei Li, and Kaijiro Anzai**	**341**
Tissue Distribution of Constitutive Proteasomes, Immunoproteasomes, and PA28 in Rats	**Chiseko Noda, Nobuyuki Tanahashi, Naoki Shimbara, Klavs B. Hendil, and Keiji Tanaka**	**348**
FGF-20, a Novel Neurotrophic Factor, Preferentially Expressed in the Substantia Nigra Pars Compacta of Rat Brain	**Shigeki Ohmachi, Yohko Watanabe, Tadahisa Mikami, Naoki Kusu, Tomokazu Ibi, Akinori Akaike, and Nobuyuki Itoh**	**355**
The Role of Atypical and Conventional PKC in Dehydroepiandrosterone-Induced Glucose Uptake and Dexamethasone-Induced Insulin Resistance	**Kazuo Kajita, Tatsuo Ishizuka, Atsushi Miura, Masayoshi Ishizawa, Yoshinori Kanoh, and Keigo Yasuda**	**361**
Advanced Glycation End Products-Induced Gene Expression of Scavenger Receptors in Cultured Human Monocyte-Derived Macrophages	**Yasunori Iwashima, Masaaki Eto, Akira Hata, Kouhei Kaku, Seikoh Horiuchi, Fumitaka Ushikubi, and Hiroaki Sano**	**368**
Evaluation of the Energy of Red Blood Cell Agglutination by Monoclonal Antibodies	**L. Plá, R. J. Rasia, J. R. Valverde, S. Muller, and J. F. Stoltz**	**381**
Formic Acid Dissolves Aggregates of an N-Terminal Huntingtin Fragment Containing an Expanded Polyglutamine Tract: Applying to Quantification of Protein Components of the Aggregates	**Noriko Hazeki, Tadashi Tukamoto, Jun Goto, and Ichiro Kanazawa**	**386**
The Role of Cysteine Residues in Tellurite Resistance Mediated by the TehAB Determinant	**Melanie Dyllick-Brenzinger, Mingfu Liu, Tara L. Winstone, Diane E. Taylor, and Raymond J. Turner**	**394**
cDNA Representational Difference Analysis of Human Neutrophils Stimulated by GM-CSF	**Shida Yousefi, Paul R. Cooper, Beatrice Mueck, Suzanne L. Potter, and Gabor Jarai**	**401**
Impaired Angiogenic Balance and Suppression of Tumorigenicity in HeLa Cells Chronically Exposed to Interferon-α	**O. López-Ocejo, S. E. Perea, M. Bequet-Romero, M. J. Araña, and P. López Saura**	**410**
Glibenclamide Acts as an Inhibitor of Acyl-CoA:Cholesterol Acyltransferase Enzyme	**Nobutaka Ohgami, Akihiko Kuniyasu, Kohichiro Furukawa, Akira Miyazaki, Hideki Hakamata, Seikoh Horiuchi, and Hitoshi Nakayama**	**417**
Differential Expression of Lipoprotein Lipase Gene in Tissues of the Rat Model with Visceral Obesity and Postprandial Hyperlipidemia	**Minoru Hikita, Hideaki Bujo, Kenya Yamazaki, Kouichi Taira, Kazuo Takahashi, Junji Kobayashi, and Yasushi Saito**	**423**

Immunochemical Demonstration of a Novel β-Subunit Isoform of X,K-ATPase in Human Skeletal Muscle	**Nikolay B. Pestov, Tatyana V. Korneenko, Hao Zhao, Gail Adams, Mikhail I. Shakhparonov, and Nikolai N. Modyanov**	430
Protein Translocation within Chloroplast Is Similar in *Euglena* and Higher Plants	**Junko Inagaki, Yuichi Fujita, Toshiharu Hase, and Yasusi Yamamoto**	436
Thioredoxin, a Singlet Oxygen Quencher and Hydroxyl Radical Scavenger: Redox Independent Functions	**Kumuda C. Das and Chandan K. Das**	443
Kinetics of Expression of Connective Tissue Growth Factor Gene during Liver Regeneration after Partial Hepatectomy and D-Galactosamine-Induced Liver Injury in Rats	**Kozo Ujike, Toshiyuki Shinji, Shoji Hirasaki, Hidenori Shiraha, Masaki Nakamura, Takao Tsuji, and Norio Koide**	448
Phosphatidylinositol 3-Kinase Signaling to Akt Mediates Survival in Isolated Canine Islets of Langerhans	**Reid Aikin, Lawrence Rosenberg, and Dusica Maysinger**	455
Cellular Uptake and *in Situ* Binding of a Peptide Agonist for Calmodulin	**Michael K. Manion, Matteo Villain, Z. George Pan, Jay M. McDonald, and J. Edwin Blalock**	462
Protective Effect of Melatonin against Homocysteine-Induced Vasoconstriction of Human Umbilical Artery	**Yuji Okatani, Akihiko Wakatsuki, and Russel J. Reiter**	470
Differential Gene Expression in Apoptosis: Identification of Ribosomal Protein S29 as an Apoptotic Inducer	**Neeru Khanna, Vijay G. Reddy, Narendra Tuteja, and Neeta Singh**	476
Escape from Apoptosis after Prolonged Serum Deprivation Is Associated with the Regulation of the Mitochondrial Death Pathway by Bcl-x_L	**Xiao-Ju Zhang, Jun Yan, Leila Cuttle, Zoltan Endre, and Glenda Gobé**	487
Identification of a Novel Fibroblast Growth Factor, FGF-23, Preferentially Expressed in the Ventrolateral Thalamic Nucleus of the Brain	**Tetsuo Yamashita, Masazumi Yoshioka, and Nobuyuki Itoh**	494
Cytotoxic Activity of Recombinant bFGF-rViscumin Fusion Proteins	**Arno Schmidt, Babette Möckel, Jürgen Eck, Martin Langer, Marc Gauert, and Holger Zinke**	499
Epicatechin and Catechin are O-Methylated and Glucuronidated in the Small Intestine	**Gunter Kuhnle, Jeremy P. E. Spencer, Hagen Schroeter, Baskar Shenoy, Edward S. Debnam, S. Kaila S. Srai, Catherine Rice-Evans, and Ulrich Hahn**	507
The Serine/Threonine Kinase HIPK2 Interacts with TRADD, but Not with CD95 or TNF-R1 in 293T Cells	**Xin Li, Ying Wang, Klaus-Michael Debatin, and Hubert Hug**	513
The CUG-Binding Protein Binds Specifically to UG Dinucleotide Repeats in a Yeast Three-Hybrid System	**Nobuhiro Takahashi, Noboru Sasagawa, Koichi Suzuki, and Shoichi Ishiura**	518

Number 3, November 2, 2000

Identification of a Novel Taxol-Sensitive Kinase Activity Associated with the Cytoskeleton	**Yanru Wang, Roger Duncan, David K. Ann, and Sarah F. Hamm-Alvarez**	525
Cytochrome P4503A-Dependent Metabolism of Tocopherols and Inhibition by Sesamin	**Robert S. Parker, Timothy J. Sontag, and Joy E. Swanson**	531
Potential Problems of Ascorbate and Iron Supplementation: Pro-Oxidant Effect *in Vivo*?	**Anna R. Proteggente, Almas Rehman, Barry Halliwell, and Catherine A. Rice-Evans**	535
Dietary Fatty Acids Up-Regulate the Expression of UCP2 in 3T3-L1 Preadipocytes	**Joanne M. Reilly and Mary P. Thompson**	541
2-Chloro-adenosine Induces a Glutamate-Dependent Calcium Response in C2C12 Myotubes	**Claudio Frank, Anna Maria Giammarioli, Loredana Falzano, Stefano Rufini, Stefania Ceruti, Alessandra Camurri, Walter Malorni, Maria Pia Abbracchio, and Carla Fiorentini**	546
Plasmin and Kallikrein Reduce HDL-Induced Cholesterol Efflux from Foam Cells	**L. Lindstedt and P. T. Kovanen**	552
Cyclic AMP Inhibits Agonist-Induced Heparin-Binding EGF Gene Expression Independently of Effects on p42/p44 MAPK Activation	**Peter D. Ellis, Kathryn M. Hadfield, John C. Pascall, and Kenneth D. Brown**	558
Novel Lymphocyte Growth-Inhibiting Tripeptide: *N*-Acetyl-Glu-Ser-GlyNH$_2$	**Ying Liu, Kjell Elgjo, Marianne Wright, and Karl L. Reichelt**	562
Estrogenic Alkylphenols Induce Cell Death by Inhibiting Testis Endoplasmic Reticulum Ca^{2+} Pumps	**P. J. Hughes, H. McLellan, D. A. Lowes, S. Zafar Khan, J. G. Bilmen, S. C. Tovey, R. E. Godfrey, R. H. Michell, C. J. Kirk, and F. Michelangeli**	568
High-Level Expression of Antimicrobial Peptide Mediated by a Fusion Partner Reinforcing Formation of Inclusion Bodies	**J. H. Lee, J. H. Kim, S. W. Hwang, W. J. Lee, H. K. Yoon, H. S. Lee, and S. S. Hong**	575
Molecular Characterization of a Cellulase-Negative Mutant of *Hypocrea jecorina*	**Susanne Zeilinger, Maria Haller, Robert Mach, and Christian P. Kubicek**	581
Combined Transformation and Genetic Technique Verification of Protein–Protein Interactions in the Yeast Two-Hybrid System	**Shweta Tyagi and Sunil K. Lal**	589
Down-Regulation of Murine *Cyp1a-1* in Mouse Hepatoma Hepa-1c1c7 Cells by Bisphenol A	**Hye Gwang Jeong, Ji Young Kim, and Chul Yung Choi**	594
Selective Inhibition of Cyclooxygenase-2 by C-Phycocyanin, a Biliprotein from *Spirulina platensis*	**C. Madhava Reddy, Vadiraja B. Bhat, G. Kiranmai, M. Narsa Reddy, P. Reddanna, and K. M. Madyastha**	599
Nitric Oxide Mediates 17β-Estradiol-Stimulated Human and Rodent Osteoblast Proliferation and Differentiation	**Meg C. O'Shaughnessy, Julia M. Polak, Faiza Afzal, Mika V. J. Hukkanen, Paul Huang, Iain MacIntyre, and Lee D. K. Buttery**	604

Association of L-Type Calcium Channels with a Vacuolar H^+-ATPase G2 Subunit	**Tianyan Gao and M. Marlene Hosey**	**611**
Endotoxin and NO Induce MIP-1γ Gene Transcription in ANA-1 Murine Macrophages	**Hong T. Guo, Charles Q. Cai, and Paul C. Kuo**	**617**
Human Homologues of Yeast Vacuolar Protein Sorting 29 and 35	**Alasdair J. Edgar and Julia M. Polak**	**622**
Overexpression of Insulin-like Growth Factor-II in Mouse Embryonic Stem Cells Promotes Myogenic Differentiation	**Katja Prelle, Anna M. Wobus, Ottheinz Krebs, Werner F. Blum, and Eckhard Wolf**	**631**
Unusual Laminin α2 Processing in Myoblasts from a Patient with a Novel Variant of Congenital Muscular Dystrophy	**Giovanna Lattanzi, Francesco Muntoni, Patrizia Sabatelli, Stefano Squarzoni, Nadir Mario Maraldi, Vittoria Cenni, Marcello Villanova, Marta Columbaro, Luciano Merlini, and Sandra Marmiroli**	**639**
FGF10 Acts as a Major Ligand for FGF Receptor 2 IIIb in Mouse Multi-Organ Development	**Hideyo Ohuchi, Yukiko Hori, Masahiro Yamasaki, Hidemitsu Harada, Keisuke Sekine, Shigeaki Kato, and Nobuyuki Itoh**	**643**
Progestin Effects on Long-Term Growth, Death, and Bcl-xL in Breast Cancer Cells	**Michael R. Moore, Julie L. Conover, and Kevin M. Franks**	**650**
Caspase-14: Analysis of Gene Structure and mRNA Expression during Keratinocyte Differentiation	**Leopold Eckhart, Jozef Ban, Heinz Fischer, and Erwin Tschachler**	**655**
Expression Profiling in Pancreas during the Acute Phase of Pancreatitis Using cDNA Microarrays	**Nelson Javier Dusetti, Richard Tomasini, Amina Azizi, Marc Barthet, Maria Ines Vaccaro, Fritz Fiedler, Jean Charles Dagorn, and Juan Lucio Iovanna**	**660**
Mechanisms for the Formation of Protein-Bound Homocysteine in Human Plasma	**Tadayasu Togawa, Shantanu Sengupta, Hong Chen, Killian Robinson, Ilche Nonevski, Alana K. Majors, and Donald W. Jacobsen**	**668**
Ceramide Induction of COX-2 and PGE_2 in Pulmonary A549 Cells Does Not Involve Activation of NF-κB	**Robert Newton, Lorraine Hart, K. Fan Chung, and Peter J. Barnes**	**675**
Suppression Subtractive Hybridization Identifies Genes Expressed in Oviduct during Mouse Preimplantation Period	**Kai-Fai Lee, Ka-Leung Kwok, and William S. B. Yeung**	**680**
Tolerance and Sensitization to Endotoxin in Kupffer Cells Caused by Acute Ethanol Involve Interleukin-1 Receptor-Associated Kinase	**Shunhei Yamashina, Michael D. Wheeler, Ivan Rusyn, Kenichi Ikejima, Nobuhiro Sato, and Ronald G. Thurman**	**686**
Posttranscriptional Regulation of α-Catenin Expression Is Required for Wnt Signaling in L Cells	**Nobuyuki Takahashi, Satoru Ishihara, Shinji Takada, Shoichiro Tsukita, and Akira Nagafuchi**	**691**

PPARα-Dependent Alteration of GRP94 Expression in Mouse Hepatocytes	**Neil Macdonald, Katie Barrow, Robert Tonge, Matthew Davison, Ruth A. Roberts, and Stephan Chevalier**	**699**
Photodynamic Modulation of Adrenergic Receptors in the Isolated Rat Hepatocytes	**Zong Jie Cui, Yoshiaki Habara, and Yoh-ichi Satoh**	**705**
C60 Carboxyfullerene Exerts a Protective Activity against Oxidative Stress-Induced Apoptosis in Human Peripheral Blood Mononuclear Cells	**Daniela Monti, Laura Moretti, Stefano Salvioli, Elisabetta Straface, Walter Malorni, Roberto Pellicciari, Gennaro Schettini, Michela Bisaglia, Carlo Pincelli, Cristiana Fumelli, Massimiliano Bonafè, and Claudio Franceschi**	**711**
Activation of RhoA by Association of $G\alpha_{13}$ with Dbl	**Shenghao Jin and John H. Exton**	**718**
The Promoter Region of the Human PMCA1 Gene Mediates Transcriptional Downregulation by 1,25-Dihydroxyvitamin D_3	**Paul Glendenning, Thomas Ratajczak, Richard L. Prince, Nandor Garamszegi, and Emanuel E. Strehler**	**722**
Reversibility of the Ca^{2+} Channel α_1–β Subunit Interaction	**Delphine Bichet, Catherine Lecomte, Jean-Marc Sabatier, Ricardo Felix, and Michel De Waard**	**729**
Matrix Gla Protein Is Regulated by a Mechanism Functionally Related to the Calcium-Sensing Receptor	**Afshin Farzaneh-Far, Diane Proudfoot, Peter L. Weissberg, and Catherine M. Shanahan**	**736**
Small GTPase Rac1: Structure, Localization, and Expression of the Human Gene	**Paulo Matos, Jennifer Skaug, Bárbara Marques, Sebastian Beck, Fátima Veríssimo, Christian Gespach, Maria Guida Boavida, Stephen W. Scherer, and Peter Jordan**	**741**
Involvement of Hrs Binding Protein in IgE Receptor-Triggered Exocytosis in RBL-2H3 Mast Cells	**Sachiko Murai and Naomi Kitamura**	**752**
Enhanced Drug Resistance in Cells Coexpressing ErbB2 with EGF Receptor or ErbB3	**Xinmei Chen, Tai K. Yeung, and Zhixiang Wang**	**757**
Simultaneous Measurement of 8-Oxo-2′-deoxyguanosine and 8-Oxo-2′-deoxyadenosine by HPLC-MS/MS	**Ian D. Podmore, Don Cooper, Mark D. Evans, Michelle Wood, and Joseph Lunec**	**764**
Mitochondrial DNA Variations in Patients with Maternally Inherited Diabetes and Deafness Syndrome	**D. Perucca-Lostanlen, H. Narbonne, J. B. Hernandez, P. Staccini, A. Saunieres, V. Paquis-Flucklinger, B. Vialettes, and C. Desnuelle**	**771**
CYP4B1 Is a Possible Risk Factor for Bladder Cancer in Humans	**Susumu Imaoka, Yukio Yoneda, Toshikado Sugimoto, Toyoko Hiroi, Keisuke Yamamoto, Tatsuya Nakatani, and Yoshihiko Funae**	**776**

ERRATA

Volume **272,** Number 3 (2000), in the article "Sexually Dimorphic Expression of Two Types of DM (*Doublesex/Mab-3*)-Domain Genes in a Teleost Fish, the Tilapia (*Oreochromis niloticus*)," by Guijun Guan, Tohru Kobayashi, and Yoshitaka Nagahama, pages 662–666 (doi:10.1006/bbrc.2000.2840) **781**

Volume **273,** Number 3 (2000), in the article "Crosslinking between α and β Subunits Defines the Orientation and Spatial Relationship of Some of the Transmembrane Helices of the Proton-Translocating Pyridine Nucleotide Transhydrogenase of *Escherichia coli,*" by Philip D. Bragg and Cynthia Hou, pages 955–959 (doi:10.1006/bbrc.2000.3037) **782**

Author Index for Volume 277 **783**

Volume 278, Number 1, November 11, 2000

BREAKTHROUGHS AND VIEWS

Superoxide as a Messenger of Endothelial Function — **Volker Ullrich and Markus Bachschmid** — 1

REGULAR ARTICLES

Protein Inhibitor of Activated STAT3 Regulates Androgen Receptor Signaling in Prostate Carcinoma Cells — **Akira Junicho, Tadashi Matsuda, Tetsuya Yamamoto, Hiroyuki Kishi, Kemal Korkmaz, Fahri Saatcioglu, Hideki Fuse, and Atsushi Muraguchi** — 9

α-Melanocyte Stimulating Hormone Acts as a Selective Inducer of Secretory Functions in Human Mast Cells — **Andreas Grützkau, Beate M. Henz, Loreen Kirchhof, Thomas Luger, and Metin Artuc** — 14

Overexpression of DAN Causes a Growth Suppression in p53-Deficient SAOS-2 Cells — **Eiji Hanaoka, Toshinori Ozaki, Yohko Nakamura, Hideshige Moriya, Akira Nakagawara, and Shigeru Sakiyama** — 20

Methoxyestradiols Mediate the Antimitogenic Effects of Estradiol on Vascular Smooth Muscle Cells via Estrogen Receptor-Independent Mechanisms — **Raghvendra K. Dubey, Delbert G. Gillespie, Lefteris C. Zacharia, Marinella Rosselli, Kenneth R. Korzekwa, Juergen Fingerle, and Edwin K. Jackson** — 27

Blockage of Human T Lymphocyte Kv1.3 Channels by Pi1, a Novel Class of Scorpion Toxin — **Mózes Péter, Jr., Péter Hajdu, Zoltán Varga, Sándor Damjanovich, Lourival D. Possani, György Panyi, and Rezsö Gáspár, Jr.** — 34

Suppressor of Cytokine Signaling (SOCS)-3 Protein Interacts with the Insulin-like Growth Factor-I Receptor — **Bhakta R. Dey, Richard W. Furlanetto, and Peter Nissley** — 38

Expression of cAMP-Regulated Guanine Nucleotide Exchange Factors in Pancreatic β-Cells — **Colin A. Leech, George G. Holz, Oleg Chepurny, and Joel F. Habener** — 44

Expression of an Intracisternal A-Particle-like Element in Rat Ovary — **Katherine Michelle Graham, Chemyong Ko, KyungSoo Park, Kevin Sarge, and Ok-Kyong Park-Sarge** — 48

Class II Transactivator Suppresses Transcription of Thyroid-Specific Genes — **Atsumi Mori-Aoki, Michelle Pietrarelli, Minoru Nakazato, Patrizio Caturegli, Leonard D. Kohn, and Koichi Suzuki** — 58

Identification of Novel First Exons in *Ad4BP/SF-1* (*NR5A1*) Gene and Their Tissue- and Species-Specific Usage — **Rina Kimura, Hironori Yoshii, Masatoshi Nomura, Naoe Kotomura, Tokuo Mukai, Satoru Ishihara, Koichi Ohba, Toshihiko Yanase, Osamu Gotoh, Hajime Nawata, and Ken-ichirou Morohashi** — 63

Elongation Factor-1α Is a Novel Substrate of Rho-Associated Kinase — **Tetsuyuki Izawa, Yuko Fukata, Toshihide Kimura, Akihiro Iwamatsu, Kazuhiro Dohi, and Kozo Kaibuchi** — 72

Enhancement of FcγR- and CR3-Mediated Neutrophil Phagocytosis by Cerebrosides	**Masatoshi Sakai, Shigeharu Nagasawa, and Kazuhiko Takahashi**	**79**
Induction of Acrosomal Exocytosis in Chicken Spermatozoa by Inner Perivitelline-Derived N-linked Glycans	**A. Janet Horrocks, Sarah Stewart, Lynn Jackson, and Graham J. Wishart**	**84**
P- and E-Selectins Recognize Sialyl 6-Sulfo Lewis X, the Recently Identified L-Selectin Ligand	**Katsuyuki Ohmori, Kayoko Kanda, Chikako Mitsuoka, Akiko Kanamori, Kazumi Kurata-Miura, Katsutoshi Sasaki, Tatsunari Nishi, Takuya Tamatani, and Reiji Kannagi**	**90**
Endogenous AP-1 Levels Necessary for Oncogenic Activity Are Higher Than Those Sufficient to Support Normal Growth	**Motoyasu Ui, Taketoshi Mizutani, Mizuho Takada, Tohru Arai, Taiji Ito, Masao Murakami, Chika Koike, Tatsuo Watanabe, Kentaro Yoshimatsu, and Hideo Iba**	**97**
Molecular Cloning of a Regulatory Protein for Membrane-Bound Guanylate Cyclase GC-A	**Zi-Jiang Chen, Zhen-Hua Miao, Michael Vetter, Nickolai Dulin, Shiguo Liu, Danian Che, Benjamin Hughes, Ferid Murad, Janice Douglas, and Chung-Ho Chang**	**106**
Purification, Characterization, and cDNA Sequence of Halysetin, a Disintegrin-like/Cysteine-Rich Protein from the Venom of *Agkistrodon halys* Pallas	**Jie-Wu Liu, Xiao-Yan Du, Ping Liu, Xin Chen, Jian-Min Xu, Xiang-Fu Wu, and Yuan-Cong Zhou**	**112**
Characterization of a Mouse *ctgf* 3′-UTR Segment That Mediates Repressive Regulation of Gene Expression	**Seiji Kondo, Satoshi Kubota, Takanori Eguchi, Takako Hattori, Tohru Nakanishi, Toshio Sugahara, and Masaharu Takigawa**	**119**
Cloning and Initial Analysis of the Human Multidrug Resistance-Related MVP/LRP Gene Promoter	**Christian Lange, Wolfgang Walther, Holger Schwabe, and Ulrike Stein**	**125**
Genomic Organization, Chromosomal Localization, and the Complete 22 kb DNA Sequence of the Human GCMa/GCM1, a Placenta-Specific Transcription Factor Gene	**Kazuyo Yamada, Hisamitsu Ogawa, Gen Tamiya, Masashi Ikeno, Miwa Morita, Shuichi Asakawa, Nobuyoshi Shimizu, and Tuneko Okazaki**	**134**
Increased Activity and Intranuclear Expression of Phospholipase D2 in Human Renal Cancer	**Yutong Zhao, Hidetoshi Ehara, Yukihiro Akao, Masayo Shamoto, Yoshihito Nakagawa, Yoshiko Banno, Takashi Deguchi, Nobuko Ohishi, Kunio Yagi, and Yoshinori Nozawa**	**140**
Loss of the Normal Epicardial to Endocardial Gradient of cftr mRNA Expression in the Hypertrophied Rabbit Left Ventricle	**Kevin R. Wong, Ann E. O. Trezise, Bertrand Crozatier, and Jamie I. Vandenberg**	**144**
Identification of a Novel Gene with RING-H2 Finger Motif Induced after Chronic Antidepressant Treatment in Rat Brain	**Mitsuhiko Yamada, Misa Yamada, Satoru Yamazaki, Kou Takahashi, Gentaro Nishioka, Kentaro Kudo, Hiroki Ozawa, Shingo Yamada, Yuji Kiuchi, Kunitoshi Kamijima, Teruhiko Higuchi, and Kazutaka Momose**	**150**

A Nuclease Hypersensitive Element in the Human c-*myc* Promoter Adopts Several Distinct *i*-Tetraplex Structures	**Tomas Simonsson, Marketa Pribylova, and Michaela Vorlickova**	**158**
Characterization of the CIN85 Adaptor Protein and Identification of Components Involved in CIN85 Complexes	**Shinji Watanabe, Hitoshi Take, Kazuyo Takeda, Zu-Xi Yu, Nobuhisa Iwata, and Sachiko Kajigaya**	**167**
Computational and Functional Analysis of the Putative SH2 Domain in Janus Kinases	**Dione Kampa and Joan Burnside**	**175**
Proteoliposomes Colocalized with Endogenous Mitochondria in Mouse Fertilized Egg	**Yutaka Inoki, Yoji Hakamata, Toshiro Hamamoto, Tadatoshi Kinouchi, Shoji Yamazaki, Yasuo Kagawa, and Hitoshi Endo**	**183**
Isolation and Characterization of the Gene Encoding Glyceraldehyde-3-Phosphate Dehydrogenase	**Mi-Jeong Jeong, Soo-Chul Park, Hawk-Bin Kwon, and Myung-Ok Byun**	**192**
cDNA Cloning and Characterization of Vascular Apoptosis-Inducing Protein 1	**Shinako Masuda, Toshiro Ohta, Kazuhiko Kaji, Jay W. Fox, Hiroshi Hayashi, and Satohiko Araki**	**197**
Frequent Altered Expression of Fragile Histidine Triad Protein in Human Colorectal Adenomas	**Hiroshi Morikawa, Yoshihito Nakagawa, Keisuke Hashimoto, Masami Niki, Yutaro Egashira, Ichiro Hirata, Kenichi Katsu, and Yukihiro Akao**	**205**
Pituitary Adenylate Cyclase-Activating Polypeptide Prevents Cytokine-Induced Cytotoxicity via Inhibition of Inducible Nitric Oxide Synthase Expression in βTC Cells	**Kayo Sekiya, Hiroshi Nagasaki, Nobuaki Ozaki, Atsushi Suzuki, Yoshitaka Miura, and Yutaka Oiso**	**211**
Formation of Iron(II)–Nitrosoalkane Complexes: A New Activity of Microperoxidase 8	**Remy Ricoux, Jean-Luc Boucher, Daniel Mansuy, and Jean-Pierre Mahy**	**217**
Prostaglandin E_2 Receptors, EP2 and EP4, Differentially Modulate TNF-α and IL-6 Production Induced by Lipopolysaccharide in Mouse Peritoneal Neutrophils	**Hana Yamane, Yukihiko Sugimoto, Satoshi Tanaka, and Atsushi Ichikawa**	**224**
Accelerated Growth of Hepatocytes in Association with Up-Regulation of Cyclin E in Transgenic Mice Expressing the Dominant Negative Form of Retinoic Acid Receptor	**Atsushi Tsutusmi, Goshi Shiota, Hidetoshi Yamazaki, Takahiro Kunisada, Tadashi Terada, and Hironaka Kawasaki**	**229**
Attenuation of Expression of γ-Glutamylcysteine Synthetase by Ribozyme Transfection Enhance Insulin Secretion by Pancreatic β Cell Line, MIN6	**Hideaki Kondo, Satoko Mori, Hirofumi Takino, Hiroshi Kijima, Hironori Yamasaki, Masako Ozaki, Iida Tetsuya, Yoshishige Urata, Takahiro Abe, Yasunori Sera, Kenji Yamakawa, Eiji Kawasaki, Yoshihiko Yamaguchi, Takahito Kondo, and Katsumi Eguchi**	**236**

Identification of a Novel Putative Ran-Binding Protein and Its Close Homologue	**Peter Koch, Inga Bohlmann, Martin Schäfer, Thomas E. Hansen-Hagge, Hitoshi Kiyoi, Monika Wilda, Horst Hameister, Claus R. Bartram, and Johannes W.G. Janssen**	**241**
Less Extrahepatic Induction of Fatty Acid β-Oxidation Enzymes by PPARα	**William S. Cook, Anjana V. Yeldandi, M. Sambasiva Rao, Takashi Hashimoto, and Janardan K. Reddy**	**250**
Activity of Allelic Variants of Pi Class Human Glutathione *S*-Transferase Toward Chlorambucil	**Utpal Pandya, Sanjay K. Srivastava, Sharad S. Singhal, Ajai Pal, Sanjay Awasthi, Piotr Zimniak, Yogesh C. Awasthi, and Shivendra V. Singh**	**258**
Induction of Hypoxia-Inducible-Factor 1 by Nitric Oxide Is Mediated via the PI 3K Pathway	**Katrin Britta Sandau, Hortensia Giménez Faus, and Bernhard Brüne**	**263**

Number 2, November 19, 2000

BREAKTHROUGHS AND VIEWS

How Salt Regulates Genes: Function of a Rel-like Transcription Factor TonEBP	**Seung Kyoon Woo, Ohnn Nahm, and H. Moo Kwon**	**269**

REGULAR ARTICLES

KV1.1 K^+ Channels Identification in Human Breast Carcinoma Cells: Involvement in Cell Proliferation	**H. Ouadid-Ahidouch, F. Chaussade, M. Roudbaraki, C. Slomianny, E. Dewailly, P. Delcourt, and N. Prevarskaya**	**272**
Structure of the 5′-Flanking Region of the Rat Prostaglandin $F_{2\alpha}$ Receptor Gene and Its Transcriptional Control Functions in Hepatocytes	**Frank Neuschäfer-Rube, Ulrike Möller, and Gerhard P. Püschel**	**278**
Gain-of-Function Mutations Associated with Hereditary Pancreatitis Enhance Autoactivation of Human Cationic Trypsinogen	**Miklós Sahin-Tóth and Miklós Tóth**	**286**
Rice (*Oryza sativa* L.) *OsPR1b* Gene Is Phytohormonally Regulated in Close Interaction with Light Signals	**Ganesh Kumar Agrawal, Randeep Rakwal, and Nam-Soo Jwa**	**290**
Thrombopoietin and Interleukin-2 Induce Association of CRK with STAT5	**Atsushi Oda, Hiroshi Wakao, Mitsuhiro Fujihara, Katsutoshi Ozaki, Norio Komatsu, Shinya Tanaka, Hisami Ikeda, Atsushi Miyajima, and Kenji Ikebuchi**	**299**
Activation of Akt Is Induced by Heat Shock and Involved in Suppression of Heat-Shock-Induced Apoptosis of NIH3T3 Cells	**Ok-Sun Bang, Byung-Guen Ha, Eui Kyun Park, and Shin-Sung Kang**	**306**

Insulin-like Growth Factor II Induces Interleukin-6 Expression via NFκB Activation in Psoriasis	**Yoo-Wook Kwon, Eun-Ryung Jang, You-Mie Lee, You-Sun Kim, Kyung-Sool Kwon, Ho-Sun Jang, Chang-Keun Oh, and Kyu-Won Kim**	**312**
Identification and Characterization of Differentially Expressed Genes in the Early Response Phase during Liver Regeneration	**Wangxiang Xu, Siying Wang, Ge Wang, Handong Wei, Fuchu He, and Xiaoming Yang**	**318**
Human Calcium Transport Protein CaT1	**Ji-Bin Peng, Xing-Zhen Chen, Urs V. Berger, Stanislawa Weremowicz, Cynthia C. Morton, Peter M. Vassilev, Edward M. Brown, and Matthias A. Hediger**	**326**
Roles of His-79 and Tyr-180 of D-Xylose/Dihydrodiol Dehydrogenase in Catalytic Function	**Yukuhiko Asada, Shinya Aoki, Syuhei Ishikura, Noriyuki Usami, and Akira Hara**	**333**
Adenovirus-Mediated Hepatocyte Growth Factor Gene Transfer Prevents Lethal Liver Failure in Rats	**Takahiro Nomi, Goshi Shiota, Masato Isono, Kenzo Sato, and Hironaka Kawasaki**	**338**
Positive Regulation of Transcription of Homeoprotein-Encoding *YHP1* by the Two-Component Regulator Sln1 in *Saccharomyces cerevisiae*	**Tatsuki Kunoh, Yoshinobu Kaneko, and Satoshi Harashima**	**344**
Genomic Organization, Physical Mapping, and Expression Analysis of the Human Protein Arginine Methyltransferase 1 Gene	**Andreas Scorilas, Margot H. Black, Maroulio Talieri, and Eleftherios P. Diamandis**	**349**
Apoptosis in the Dorsal Lateral Geniculate Nucleus after Monocular Deprivation Involves Glutamate Signaling, NO Production, and PARP Activation	**Carlo Nucci, Silvia Piccirilli, Paola Rodinò, Robert Nisticò, Marina Grandinetti, Luciano Cerulli, Marcel Leist, Pierluigi Nicotera, and Giacinto Bagetta**	**360**
Diabetes and Tumor Formation in Transgenic Mice Expressing Reg I	**Takashi Yamaoka, Kenji Yoshino, Taketo Yamada, Chiyoko Idehara, Mohammad O. Hoque, Maki Moritani, Katsuhiko Yoshimoto, Jun-ich Hata, and Mitsuo Itakura**	**368**
Isolation of *Xenopus frizzled-10A* and *frizzled-10B* Genomic Clones and Their Expression in Adult Tissues and Embryos	**Junya Moriwaki, Eri Kajita, Hiroyuki Kirikoshi, Jun Koike, Norihiko Sagara, Yukuto Yasuhiko, Tetsuroh Saitoh, Momoki Hirai, Masaru Katoh, and Koichiro Shiokawa**	**377**
Poly(ADP-ribose) Polymerase Localizes to the Centrosomes and Chromosomes	**Masayuki Kanai, Masahiro Uchida, Shuji Hanai, Naoya Uematsu, Kazuhiko Uchida, and Masanao Miwa**	**385**
Overexpression of Vacuolar ATPase 16-kDa Subunit in 10T1/2 Fibroblasts Enhances Invasion with Concomitant Induction of Matrix Metalloproteinase-2	**Shunichiro Kubota and Yousuke Seyama**	**390**
Excision Repair of Uracil-Containing DNA in a Mitochondrial Extract of *Xenopus* Oocytes	**Takafumi Ohta and Masaru Ryoji**	**395**

Ribozyme to Human TGF-β1 mRNA Inhibits the Proliferation of Human Vascular Smooth Muscle Cells	**Jin-Zi Su, Noboru Fukuda, Wen-Yang Hu, and Katsuo Kanmatsuse**	401
Comparison of D-Aspartic Acid Contents in α A-Crystallin from Normal and Age-Matched Cataractous Human Lenses	**Noriko Fujii, Larry J. Takemoto, Sawako Matsumoto, Kosuke Hiroki, Dan Boyle, and Mitsuhiko Akaboshi**	408
Uptake and Intracellular Fate of Polyethylenimine *in Vivo*	**Michèle Lecocq, Simone Wattiaux-De Coninck, Nathanael Laurent, Robert Wattiaux, and Michel Jadot**	414
Generation of Tension by Skinned Fibers and Intact Skeletal Muscles from Desmin-Deficient Mice	**Sascha Wieneke, Robert Stehle, Zhenlin Li, and Harald Jockusch**	419
Single Amino Acid of $G_{\alpha16}$ (Ala^{228}) Is Responsible for the Ability of Chemoattractant C5a Receptor to Induce $G_{\alpha16}$-Mediated Inositol Phosphate Release	**Ji Hee Ha, N. Dhanasekaran, Hyun Chul Koh, and Chang Ho Lee**	426
Proximal Promoter-Independent Activation of the Far-Upstream FGF-Inducible Response Element of Syndecan-1 Gene	**Panu Jaakkola, Tapani Vihinen, and Markku Jalkanen**	432
Soluble Urokinase Receptor Promotes Cell Adhesion and Requires Tyrosine-92 for Activation of $p56/59^{hck}$	**Susan Trigwell, Lisa Wood, and Peter Jones**	440
Arteriovenous Carboxyhemoglobin Gradient Is a Technical Artifact That Is Eliminated by Special Calibration (SAT 100)	**Thomas P. Weber, Maike A. Große Hartlage, Jörg Meyer, Hugo Van Aken, Uhlig S., and Norbert Rolf**	447
Expression and Binding Analysis of GST-VacA Fusions Reveals That the C-Terminal ~100-Residue Segment of Exotoxin Is Crucial for Binding in HeLa Cells	**Hung-Jung Wang and Wen-Ching Wang**	449
Molecular Organization of Protein–DNA Complexes for Cell-Targeted DNA Delivery	**Anna Arís and Antonio Villaverde**	455
Induction of Ref-1 Ensures AP-1 Activation in Intracellular Oxidative Environment of IL-2-Stimulated BA/F3β Cells	**Mingda Yan, Weijin Xu, Linrong Lu, Lanying Sun, Xinyuan Liu, and Zhongcheng Zheng**	462
Transmission of Human TT Virus of Genotype 1a to Chimpanzees with Fecal Supernatant or Serum from Patients with Acute TTV Infection	**Akio Tawara, Yoshihiro Akahane, Masaharu Takahashi, Tsutomu Nishizawa, Takashi Ishikawa, and Hiroaki Okamoto**	470
Prediction of Protein Subcellular Locations by Incorporating Quasi-Sequence-Order Effect	**Kuo-Chen Chou**	477
Inhibition of ERK and p38 MAP Kinases Inhibits Binding of Nrf2 and Induction of GCS Genes	**Laurie M. Zipper and R. Timothy Mulcahy**	484
Highly Potent Nociceptin Analog Containing the Arg-Lys Triple Repeat	**Kazushi Okada, Tetsujo Sujaku, Yoshiro Chuman, Rie Nakashima, Takeru Nose, Tommaso Costa, Yoshinari Yamada, Masayuki Yokoyama, Atsushi Nagahisa, and Yasuyuki Shimohigashi**	493

Number 3, November 30, 2000

Anisomycin Affects Both Pro- and Antiapoptotic Mechanisms in PC12 Cells	**Beáta Törőcsik and József Szeberényi**	550
25-Hydroxycholesterol Activates a Cytochrome *c* Release-Mediated Caspase Cascade	**Lin Yang and Michael S. Sinensky**	557
Extracellular N-Domain Alone Can Mediate Specific Heterophilic Adhesion between Members of the Carcinoembryonic Antigen Family, CEACAM6 and CEACAM8	**Shinzo Oikawa, Masako Sugiyama, Motomu Kuroki, Masahide Kuroki, and Hiroshi Nakazato**	564
Potential of Ribozymes against Deoxycytidine Kinase to Confer Drug Resistance to Cytosine Nucleoside Analogs	**Christian M. Beauséjour, Guy Tremblay, and Richard L. Momparler**	569
Anandamide and 2-Arachidonoylglycerol Inhibit Fatty Acid Amide Hydrolase by Activating the Lipoxygenase Pathway of the Arachidonate Cascade	**Mauro Maccarrone, Simona Salvati, Monica Bari, and Alessandro Finazzi-Agrò**	576
Functional Expression of NAD(P)H Oxidase p47 in Lung Microvascular Endothelial Cells	**Hedwig S. Murphy, Chuliang Yu, and Jawaid Quddus**	584

GPI 6150 Prevents H_2O_2 Cytotoxicity by Inhibiting Poly(ADP-ribose) Polymerase	**Jie Zhang, Susan Lautar, Shirley Huang, Cynthia Ramsey, Anissa Cheung, and Jia-He Li**	**590**
Efficient Enhancement of Priming Effect by Intermittent Treatment with Interferon	**Fusao Ikeda, Hiroyuki Shimomura, Hiroshi Nakagawa, Yoshiaki Iwasaki, Masanobu Miyake, Hideyuki Tsuji, Shin-ichi Fukioka, Mamoru Itoh, Akira Takahashi, and Takao Tsuji**	**599**
Rnd1, a Novel Rho Family GTPase, Induces the Formation of Neuritic Processes in PC12 Cells	**Junko Aoki, Hironori Katoh, Kazutoshi Mori, and Manabu Negishi**	**604**
NMR Study on the Interaction between MHC Class I Protein and Its Antigen Peptide	**Masatoshi Nakagawa, Kaori Chiba-Kamoshida, Keiko Udaka, and Hiroshi Nakanishi**	**609**
Isolation and Activity of Proteolytic Fragment of Laminin-5 $\alpha 3$ Chain	**Yoshiaki Tsubota, Hiroto Mizushima, Tomomi Hirosaki, Shouichi Higashi, Hidetaro Yasumitsu, and Kaoru Miyazaki**	**614**
Molecular Characterization of the *Ser*L Paralogs of *Tetrahymena thermophila*	**F. Paul Doerder and Carri A. Gerber**	**621**
p41 as a Possible Marker for Cell Death Is Generated by Caspase Cleavage of p42/SETβ in Irradiated MOLT-4 Cells	**Akinori Morita, Norio Suzuki, Yoshihisa Matsumoto, Kazuya Hirano, Atsushi Enomoto, Jin Zhu, and Kazuo Sakai**	**627**
Neuronal Cell Apoptosis by a Receptor-Binding Domain Peptide of ApoE4, Not through Low-Density Lipoprotein Receptor-Related Protein	**Akari Hagiwara, Yuichi Hashimoto, Takako Niikura, Yuko Ito, Kenzo Terashita, Yoshiko Kita, Ikuo Nishimoto, and Kazuo Umezawa**	**633**
Obesity and Disturbed Lipoprotein Profile in Estrogen Receptor-α-Deficient Male Mice	**Claes Ohlsson, Nina Hellberg, Paolo Parini, Olle Vidal, Mohammed Bohlooly, Mats Rudling, Marie K. Lindberg, Margaret Warner, Bo Angelin, and Jan-Åke Gustafsson**	**640**
Modeling a Prion Protein Dimer: Predictions for Fibril Formation	**Jim Warwicker**	**646**
A Novel Activating Mutation of the K-*ras* Gene in Human Primary Colon Adenocarcinoma	**Kazunori Tsukuda, Motohiko Tanino, Hiroyuki Soga, Nobuyoshi Shimizu, and Kenji Shimizu**	**653**
Nuclear Translocation of TSC-22 (TGF-β-Stimulated Clone-22) Concomitant with Apoptosis: TSC-22 as a Putative Transcriptional Regulator	**Satoshi Hino, Hitoshi Kawamata, Daisuke Uchida, Fumie Omotehara, Yoshihiro Miwa, Nasima-Mila Begum, Hideo Yoshida, Takahiro Fujimori, and Mitsunobu Sato**	**659**
Disruption of *klotho* Gene Causes an Abnormal Energy Homeostasis in Mice	**Kiyoshi Mori, Kensei Yahata, Masashi Mukoyama, Takayoshi Suganami, Hisashi Makino, Tetsuya Nagae, Hiroaki Masuzaki, Yoshihiro Ogawa, Akira Sugawara, Yo-ichi Nabeshima, and Kazuwa Nakao**	**665**

HD-PTP: A Novel Protein Tyrosine Phosphatase Gene on Human Chromosome 3p21.3	**Shin-ichi Toyooka, Mamoru Ouchida, Yoshimi Jitsumori, Kazunori Tsukuda, Akiko Sakai, Akio Nakamura, Nobuyoshi Shimizu, and Kenji Shimizu**	**671**
Biochemical Characterization of Extracellular cAMP-Dependent Protein Kinase as a Tumor Marker	**Yee Sook Cho, Youl Nam Lee, and Yoon S. Cho-Chung**	**679**
Role of NAD^+ in the Deacetylase Activity of the SIR2-like Proteins	**Joseph Landry, James T. Slama, and Rolf Sternglanz**	**685**
Distinct Regulation of Brain Mitochondrial Carrier Protein-1 and Uncoupling Protein-2 Genes in the Rat Brain during Cold Exposure and Aging	**Takafumi Mizuno, Tomoko Miura-Suzuki, Hitoshi Yamashita, and Nozomu Mori**	**691**
Additivity of the Proliferative Effects of HGF/SF and EGF on Hepatocytes	**Hirokane Fukujin, Toshiro Fujita, and Tetsuya Mine**	**698**
Activation of Human Peroxisome Proliferator-Activated Receptor (PPAR) Subtypes by Pioglitazone	**Junichi Sakamoto, Hiroyuki Kimura, Shinji Moriyama, Hiroyuki Odaka, Yu Momose, Yasuo Sugiyama, and Hidekazu Sawada**	**704**
Insulin Stimulates Production of Nitric Oxide via ERK in Osteoblast Cells	**Sung-Jin Kim, Jong-Yoon Chun, and Mi-Sun Kim**	**712**
Transcriptional Factor AP-2γ Increases Human Cystatin A Gene Transcription of Keratinocytes	**Hidetoshi Takahashi, Noritaka Oyama, Yasuhiro Itoh, Akemi Ishida-Yamamoto, Fumio Kaneko, and Hajime Iizuka**	**719**
Cisplatin and UV Radiation Induce Activation of the Stress-Activated Protein Kinase p38γ in Human Melanoma Cells	**Marie-Jeanne Pillaire, Angel R. Nebreda, and Jean-Marie Darbon**	**724**
Posttranscriptional Regulation of ATA2 Transport during Liver Regeneration	**Thomas L. Freeman and Mark E. Mailliard**	**729**
Hydroxytyrosol, a Natural Molecule Occurring in Olive Oil, Induces Cytochrome *c*-Dependent Apoptosis	**Fulvio Della Ragione, Valeria Cucciolla, Adriana Borriello, Valentina Della Pietra, Gabriele Pontoni, Luigi Racioppi, Caterina Manna, Patrizia Galletti, and Vincenzo Zappia**	**733**
Shear Stress-Dependent Expression of Apoptosis-Regulating Genes in Endothelial Cells	**Babett Bartling, Heike Tostlebe, Dorothea Darmer, Juergen Holtz, Rolf-Edgar Silber, and Henning Morawietz**	**740**
Genomic Organization and Transcriptional Regulation of Human Apo2/TRAIL Gene	**Bendi Gong and Alex Almasan**	**747**
NGF Withdrawal Induces Apoptosis in CESS B Cell Line through p38 MAPK Activation and Bcl-2 Phosphorylation	**Paolo Rosini, Giovanna De Chiara, Maria Lucibello, Enrico Garaci, Federico Cozzolino, and Maria Torcia**	**753**
An Overlapping Set of DNA Elements in the Rat Aldolase B Gene Origin/Promoter Regulates Transcription and Autonomous Replication	**Satoru Miyagi, Yunpeng Zhao, Yasushi Saitoh, and Ken-ichi Tsutsumi**	**760**

Characterization of C14orf4, a Novel Intronless Human Gene Containing a Polyglutamine Repeat, Mapped to the ARVD1 Critical Region — **Alessandra Rampazzo, Francesca Pivotto, Gianluca Occhi, Natascia Tiso, Stefania Bortoluzzi, Lee Rowen, Lee Hood, Andrea Nava, and Gian Antonio Danieli** — **766**

Molecular Characterization of a Siglec8 Variant Containing Cytoplasmic Tyrosine-Based Motifs, and Mapping of the Siglec8 Gene — **George Foussias, George M. Yousef, and Eleftherios P. Diamandis** — **775**

Genomic Organization of the Human Cholesterol-Responsive ABC Transporter ABCA7: Tandem Linkage with the Minor Histocompatibility Antigen HA-1 Gene — **Wolfgang E. Kaminski, Armin Piehler, and Gerd Schmitz** — **782**

Cyclooxygenase-2 Expression in Lipopolysaccharide-Stimulated Human Monocytes Is Modulated by Cyclic AMP, Prostaglandin E_2, and Nonsteroidal Anti-inflammatory Drugs — **Burkhard Hinz, Kay Brune, and Andreas Pahl** — **790**

Olive Oils Rich in Natural Catecholic Phenols Decrease Isoprostane Excretion in Humans — **Francesco Visioli, Donatella Caruso, Claudio Galli, Serena Viappiani, Giovanni Galli, and Angelo Sala** — **797**

Uncoupling Protein-1 mRNA Expression in Lipomas from Patients Bearing Pathogenic Mitochondrial DNA Mutations — **Maya R. Vilà, Josep Gámez, Abelardo Solano, Ana Playán, Simó Schwartz, Filippo M. Santorelli, Carles Cervera, Carlo Casali, Julio Montoya, and Francesc Villarroya** — **800**

Estimation of Gelatinase Content in Rat Brain: Effect of Focal Ischemia — **Anna M. Planas, Sònia Solé, Carles Justicia, and Eduard Rodríguez Farré** — **803**

A Patient with Type 2 Diabetes Mellitus Associated with Mutations in Calcium Sensing Receptor Gene and Mitochondrial DNA — **Eizo Ohkubo, Kaoru Aida, Jing Chen, Jun-Ichi Hayashi, Kotoyo Isobe, Masato Tawata, and Toshimasa Onaya** — **808**

Wnt-16a, a Novel Wnt-16 Isoform, Which Shows Differential Expression in Adult Human Tissues — **Mark W. Fear, David P. Kelsell, Nigel K. Spurr, and Michael R. Barnes** — **814**

Human Glioma Cell BT325 Expresses a Proteinase That Converts Human Plasminogen to Kringle 1–5-Containing Fragments — **Fuyang Li, Jinghua Yang, Xinping Liu, Peng He, Shaoping Ji, Jicun Wang, Jiong Han, Nanchun Chen, and Libo Yao** — **821**

Analysis of Expression of a Cytosolic Enzyme on the Surface of *Streptococcus pyogenes* — **Sybil S. D'Costa, Terence G. Romer, and Michael D. P. Boyle** — **826**

Cation-Dependent Conformational Switches in d-TGGCGGC Containing Two Triplet Repeats of Fragile X Syndrome: NMR Observations — **P. K. Patel, Neel S. Bhavesh, and R. V. Hosur** — **833**

Author Index for Volume 278 — **839**

Volume 279, Number 1, December 9, 2000

Synergistic Effect of TNF-α and IL-4 on the Expression of Thymus- and Activation-Regulated Chemokine in Human Corneal Fibroblasts — **Naoki Kumagai, Ken Fukuda, and Teruo Nishida** — 1

Interaction of Daxx, a Fas Binding Protein, with Sentrin and Ubc9 — **Seung-Wook Ryu, Suhn-Kee Chae, and Eunhee Kim** — 6

Properties and Secondary Structure Analysis of *Ban*I Endonuclease: Identification of Putative Active Site — **Sonia Advani and Kunal B. Roy** — 11

Δ^6-Desaturase of *Mucor rouxii* with High Similarity to Plant Δ^6-Desaturase and Its Heterologous Expression in *Saccharomyces cerevisiae* — **Kobkul Laoteng, Rapeeporn Mannontarat, Morakot Tanticharoen, and Supapon Cheevadhanarak** — 17

The Effect of Ethanol-Induced Cytochrome p4502E1 on the Inhibition of Proteasome Activity by Alcohol — **Fawzia Bardag-Gorce, Qi X. Yuan, Jun Li, Barbara A. French, Che Fang, Magnus Ingelman-Sundberg, and Samuel W. French** — 23

iNOS Expression Inhibits Hypoxia-Inducible Factor-1 Activity — **Jiu-Haw Yin, Ding-I Yang, Grace Ku, and Chung Y. Hsu** — 30

Involvement of Prolactin-Releasing Peptide in the Preovulatory Luteinizing Hormone and Prolactin Surges in the Rat — **Takatoshi Hizume, Hajime Watanobe, Masashi Yoneda, Toshihiro Suda, and Helgi B. Schiöth** — 35

Differentiation-Dependent Cytoplasmic Distribution and *in Vivo* RNA Association of Proteins Recognized by the 3′-UTR Stability Element of α-Globin mRNA in Erythroleukemic Cells — **Tamás Henics** — 40

17β-Estradiol Inhibits Tumor Necrosis Factor-α-Induced Nuclear Factor-κB Activation by Increasing Nuclear Factor-κB p105 Level in MCF-7 Breast Cancer Cells — **Su-Ming Hsu, Yen-Chou Chen, and Ming-Chung Jiang** — 47

Expression and Up-Regulation of Alternatively Spliced Transcripts of Melastatin, a Melanoma Metastasis-Related Gene, in Human Melanoma Cells — **Dong Fang and Vijayasaradhi Setaluri** — 53

Novel Acyl-CoA Synthetase in Adrenoleukodystrophy Target Tissues — **Ayako Moriya-Sato, Azumi Hida, Masayo Inagawa-Ogashiwa, Michiko R. Wada, Kaoru Sugiyama, Junko Shimizu, Tomoko Yabuki, Yousuke Seyama, and Naohiro Hashimoto** — 62

Identification of 6-Furfuryladenine (Kinetin) in Human Urine — **Jan Barciszewski, Michal Mielcarek, Maciej Stobiecki, Gunhild Siboska, and Brian F. C. Clark** — 69

A Robust Cysteine-Deficient Chitinase-like Antifungal Protein from Inner Shoots of the Edible Chive *Allium tuberosum*	**Y. W. Lam, H. X. Wang, and T. B. Ng**	**74**
Regulation of the Rat Liver Carnitine Palmitoyltransferase I Gene Transcription by Thyroid Hormone	**Maria J. Barrero, Pedro F. Marrero, and Diego Haro**	**81**
Vitamin D Receptor Expression Is Linked to Cell Cycle Control in Normal Human Keratinocytes	**Siegfried Segaert, Hugo Degreef, and Roger Bouillon**	**89**
Distinct Regions of the Chicken p46 Polypeptide Are Required for Its *in Vitro* Interaction with Histones H2B and H4 and Histone Acetyltransferase-1	**Ahyar Ahmad, Yasunari Takami, and Tatsuo Nakayama**	**95**
Overexpression of Protein Kinase C-η Attenuates Caspase Activation and Tumor Necrosis Factor-α-Induced Cell Death	**Giridhar R. Akkaraju and Alakananda Basu**	**103**
Regulation of HGF/SF Gene Expression in MRC-5 Cells by *N*-Acetylcysteine	**Phillip M. Harrison and Farzin Farzaneh**	**108**
Myoepithelial-Specific CD44 Shedding Is Mediated by a Putative Chymotrypsin-like Sheddase	**Maggie C. Lee, Mary L. Alpaugh, Mai Nguyen, Maria Deato, Lena Dishakjian, and Sanford H. Barsky**	**116**
Carrier-Mediated Uptake of Rhodamine 123: Implications on Its Use for MDR Research	**Cheong-Weon Cho, Yang Liu, Xiangdong Yan, Thomas Henthorn, and Ka-Yun Ng**	**124**
Molecular Characterization and Nuclear Localization of Rat *timeless*-like Gene Product	**Shuji Sakamoto, Koyomi Miyazaki, Hiromi Fukui, Katsutaka Oishi, Naoto Hayasaka, Masato Okada, Maki Kamakura, Taketoshi Taniguchi, Katsuya Nagai, and Norio Ishida**	**131**
Characterization of a Zebrafish (*Danio rerio*) Sphingosine 1-Phosphate Receptor Expressed in the Embryonic Brain	**Dong-Soon Im, Anne R. Ungar, and Kevin R. Lynch**	**139**
Determination of Functional Regions of p125, a Novel Mammalian Sec23p-Interacting Protein	**Toshihide Mizoguchi, Ken-ichi Nakajima, Kiyotaka Hatsuzawa, Masami Nagahama, Hans-Peter Hauri, Mitsuo Tagaya, and Katsuko Tani**	**144**
Regulation of Shortening Velocity by Calponin in Intact Contracting Smooth Muscles	**Katsuhito Takahashi, Ryo Yoshimoto, Kenichi Fuchibe, Ayako Fujishige, Minori Mitsui-Saito, Masatoshi Hori, Hiroshi Ozaki, Hisako Yamamura, Nobuhisa Awata, Shun-ichiro Taniguchi, Motoya Katsuki, Teizo Tsuchiya, and Hideaki Karaki**	**150**
Inhibitory Effects of an Antisense Oligonucleotide in an Experimentally Infected Mouse Model of Influenza A Virus	**Tadashi Mizuta, Masatoshi Fujiwara, Takayuki Abe, Naoko Miyano-Kurosaki, Tomoyuki Yokota, Shiro Shigeta, and Hiroshi Takaku**	**158**

Down-Regulated Expression of TWEAK mRNA in Acute and Chronic Inflammatory Pathologies	**Yves Chicheportiche, Liliane Fossati-Jimack, Solange Moll, Nabila Ibnou-Zekri, and Shozo Izui**	**162**
PEA3 and AP-1 Are Required for Constitutive IL-8 Gene Expression in Hepatoma Cells	**Akihiro Iguchi, Isao Kitajima, Munekazu Yamakuchi, Shinichi Ueno, Takashi Aikou, Toshikazu Kubo, Kouji Matsushima, Naofumi Mukaida, and Ikuro Maruyama**	**166**
bFGF Induces Differentiation and Death of Olfactory Neuroblastoma Cells	**Ken-icihi Nibu, Guoqi Li, Kimitaka Kaga, and Jay L. Rothstein**	**172**
Phosphorylation of Anchoring Protein by Calmodulin Protein Kinase Associated to the Sarcoplasmic Reticulum of Rabbit Fast-Twitch Muscle	**Ernesto Damiani, Roberta Sacchetto, and Alfredo Margreth**	**181**
Enzymatic Formation of Unnatural Aromatic Polyketides by Chalcone Synthase	**Hiroyuki Morita, Yusuke Takahashi, Hiroshi Noguchi, and Ikuro Abe**	**190**
Genomic Organization of the Human FXYD2 Gene Encoding the γ Subunit of the Na,K-ATPase	**Kathleen J. Sweadner, Randall K. Wetzel, and Elena Arystarkhova**	**196**
TSH Induces Insulin Receptors That Mediate Insulin Costimulation of Growth in Normal Human Thyroid Cells	**Alexandra Van Keymeulen, Jacques E. Dumont, and Pierre P. Roger**	**202**
Use of Small Fluorescent Molecules to Monitor Channel Activity	**Sharon E. Jones, Rajesh R. Naik, and Morley O. Stone**	**208**
Chromatin Structure of Telomere Domain in Human Sperm	**Irina A. Zalenskaya, E. Morton Bradbury, and Andrei O. Zalensky**	**213**
Callipeltin A, a Cyclic Depsipeptide Inhibitor of the Cardiac Sodium–Calcium Exchanger and Positive Inotropic Agent	**L. Trevisi, S. Bova, G. Cargnelli, D. Danieli-Betto, M. Floreani, E. Germinario, M. V. D'Auria, and S. Luciani**	**219**
Cloning and Recombinant Expression of Human Group IIF-Secreted Phospholipase A_2	**Emmanuel Valentin, Alan G. Singer, Farideh Ghomashchi, Michel Lazdunski, Michael H. Gelb, and Gérard Lambeau**	**223**
Deficiency of the Initiation Events of Sporulation in *Bacillus subtilis clpP* Mutant Can Be Suppressed by a Lack of the Spo0E Protein Phosphatase	**Hideaki Nanamiya, Kouki Takahashi, Masaya Fujita, and Fujio Kawamura**	**229**
Glucosamine Inhibits Inducible Nitric Oxide Synthesis	**Cynthia J. Meininger, Katherine A. Kelly, Hui Li, Tony E. Haynes, and Guoyao Wu**	**234**
Mutagenesis Studies on the Iron Binding Ligands of Clavaminic Acid Synthase	**Linh X. Doan, Abby Hassan, Sarah J. Lipscomb, Anupma Dhanda, Zhihong Zhang, and Christopher J. Schofield**	**240**
Transcriptional Activity of the Distal CD40 Ligand Promoter	**Francis M. Lobo, Shuhua Xu, Celine Lee, and Ramsay L. Fuleihan**	**245**
Characterization of the Promoter of the Murine *mac25* Gene	**Noriyuki Kanemitsu, Mitsuo V. Kato, Tsuneharu Miki, Sei Komatsu, Yasushi Okazaki, Yoshihide Hayashizaki, and Toshiyuki Sakai**	**251**

TNF-α-Dependent Activation of NF-κB in Human Osteoblastic HOS-TE85 Cells Is Repressed in Vector-Averaged Gravity Using Clinostat Rotation	**Kenji Kobayashi, Fukushi Kambe, Kazutoshi Kurokouchi, Tadahiro Sakai, Naoki Ishiguro, Hisashi Iwata, Kazuo Koga, Raphael Gruener, and Hisao Seo**	**258**
Oligonucleotide-Capped Gold Nanoparticles for Improved Atomic Force Microscopic Imaging and Enhanced Selectivity in Polynucleotide Detection	**Shubo Han, Jianqiao Lin, Feimeng Zhou, and Robert Luis Vellanoweth**	**265**
Effects of *para*-Nonylphenol on 92 kDa Gelatinase Secretion by Human Peripheral Lymphocytes and U937 Cells *in Vitro*	**Shunichiro Kubota, Sachiko Ohara, Taeko Miyauchi, Tomomi Edo, Eiji Takayama, Kousuke Tomita, and Yousuke Seyama**	**270**
Intracellular Signaling Factors—Enhanced Hepatic Nuclear Protein Binding to TTGGC Sequence in the Rat Regucalcin Gene Promoter: Involvement of Protein Phosphorylation	**Hiroyuki Misawa and Masayoshi Yamaguchi**	**275**
Transcription Modulation by a Rat Nuclear Scaffold Protein, P130, and a Rat Highly Repetitive DNA Component or Various Types of Animal and Plant Matrix or Scaffold Attachment Regions	**Yasuhide Hibino, Hiromitsu Ohzeki, Nobuhiko Sugano, and Koichi Hiraga**	**282**
Discriminating Activation of CYP2B9 Expression in Male C57BL/6 Mouse Liver by β-Estradiol	**Kanokwan Jarukamjorn, Tsutomu Sakuma, and Nobuo Nemoto**	**288**
Erythropoietin Inhibits Calcium-Induced Neurotransmitter Release from Clonal Neuronal Cells	**Masakatsu Kawakami, Satoshi Iwasaki, Kazuki Sato, and Masami Takahashi**	**293**
The Immediate Early Gene 1 Product of Human Cytomegalovirus Is Sufficient for Up-Regulation of Interleukin-8 Gene Expression	**Tsugiya Murayama, Naofumi Mukaida, Hidetaka Sadanari, Nobuo Yamaguchi, Khalid S. A. Khabar, Junji Tanaka, Kouji Matsushima, Seiichiro Mori, and Yoshito Eizuru**	**298**

ERRATA

Volume **276,** Number 2 (2000), in the article "Knockdown of Caveolin-1 by Antisense Oligonucleotides Impairs Angiogenesis *in Vitro* and *in Vivo,*" by Cristiana Griffoni, Enzo Spisni, Spartaco Santi, Massimo Riccio, Tiziana Guarnieri, and Vittorio Tomasi, pages 756–761 (doi:10.1006/bbrc.2000.3484)	**305**
Volume **276,** Number 3 (2000), in the article "D-Aspartate in a Prolactin-Secreting Clonal Strain of Rat Pituitary Tumor Cells (GH_3)," by Zhiqung Long, Jen-Ai Lee, Taizo Okamoto, Noriyuki Nimura, Kazuhiro Imai, and Hiroshi Homma, pages 1143–1147 (doi:10.1006/bbrc.2000.3573)	**305**
Volume **277,** Number 1 (2000), in the article "Expression Profiling of Human Sulfotransferase and Sulfatase Gene Superfamilies in Epithelial Tissues and Cultured Cells," by Thomas P. Dooley, Ruth Haldeman-Cahill, Julie Joiner, and Teresa W. Wilborn, pages 236–245 (doi:10.1006/bbrc.2000.3643)	**306**
Volume **278,** Number 1 (2000), in the article "A Nuclease Hypersensitive Element in the Human c-*myc* Promoter Adopts Several Distinct *i*-Tetraplex Structures," by Tomas Simonsson, Marketa Pribylova, and Michaela Vorlickova, pages 158–166 (doi:10.1006/bbrc.2000.3783)	**306**

Number 2, December 20, 2000

BREAKTHROUGHS AND VIEWS

Glucocorticoid-Induced Apoptosis in Lymphocytes **Sonia L. Planey and Gerald Litwack** 307

REGULAR ARTICLES

Novel Oxidatively Stable Subtilisin-like Serine Proteases from Alkaliphilic *Bacillus* spp.: Enzymatic Properties, Sequences, and Evolutionary Relationships **Katsuhisa Saeki, Mitsuyoshi Okuda, Yuji Hatada, Tohru Kobayashi, Susumu Ito, Hideto Takami, and Koki Horikoshi** 313

The Heart Is a Source of Circulating Cardiotrophin-1 in Humans **Shigeru Asai, Yoshihiko Saito, Koichiro Kuwahara, Yuji Mizuno, Michihiro Yoshimura, Chie Higashikubo, Tetsuo Tsuji, Ichiro Kishimoto, Masaki Harada, Ichiro Hamanaka, Nobuki Takahashi, Hirofumi Yasue, and Kazuwa Nakao** 320

Knockout of the Mouse Glutamate Cysteine Ligase Catalytic Subunit (*Gclc*) Gene: Embryonic Lethal When Homozygous, and Proposed Model for Moderate Glutathione Deficiency When Heterozygous **Timothy P. Dalton, Matthew Z. Dieter, Yi Yang, Howard G. Shertzer, and Daniel W. Nebert** 324

PPARα Agonists Reduce 11β-Hydroxysteroid Dehydrogenase Type 1 in the Liver **Anne Hermanowski-Vosatka, David Gerhold, Steven S. Mundt, Vilert A. Loving, Meiqing Lu, Yuli Chen, Alex Elbrecht, Margaret Wu, Thomas Doebber, Linda Kelly, Denise Milot, Qiu Guo, Pei-Ran Wang, Marc Ippolito, Yu-Sheng Chao, Samuel D. Wright, and Rolf Thieringer** 330

Nonuniform Distribution of Ca^{2+} Uptake Sites within Human Neutrophils **Elizabeth J. Pettit and Maurice B. Hallett** 337

The P(174)L Mutation in the Human *hSCO1* Gene Affects the Assembly of Cytochrome *c* Oxidase **Claudia Paret, Anja Lode, Udo Krause-Buchholz, and Gerhard Rödel** 341

Evidence for the Presence of Two Homer 1 Transcripts in Skeletal and Cardiac Muscles **Dorianna Sandonà, Elisa Tibaldo, and Pompeo Volpe** 348

KB-R7943 Inhibits Store-Operated Ca^{2+} Entry in Cultured Neurons and Astrocytes **Naohisa Arakawa, Masaki Sakaue, Ikuko Yokoyama, Hitoshi Hashimoto, Yutaka Koyama, Akemichi Baba, and Toshio Matsuda** 354

Roles of Agonist-Binding Sites in Nicotinic Acetylcholine Receptor Function **Susan M. J. Dunn and Michael A. Raftery** 358

Activation of p42/44 and p38 Mitogen-Activated Protein Kinases by Extracellular Calcium-Sensing Receptor Agonists Induces Mitogenic Responses in the Mouse Osteoblastic MC3T3-E1 Cell Line **Toru Yamaguchi, Naibedya Chattopadhyay, Olga Kifor, Jennifer L. Sanders, and Edward M. Brown** 363

Multidrug Resistance P-Glycoprotein Is Not Involved in Cholesterol Esterification	**Marc Issandou and Thierry Grand-Perret**	**369**
Defective Remodeling of Cardiolipin and Phosphatidylglycerol in Barth Syndrome	**Peter Vreken, Fredoen Valianpour, Leo G. Nijtmans, Les A. Grivell, Barbara Plecko, Ronald J. A. Wanders, and Peter G. Barth**	**378**
Mutant p53 Forms a Complex with Sp1 on HIV-LTR DNA	**Agustin Chicas, Patricia Molina, and Jill Bargonetti**	**383**
Modulation of the Effects of Osteoprotegerin (OPG) Ligand in a Human Leukemic Cell Line by OPG and Calcitonin	**L. Mancini, N. Moradi-Bidhendi, M. L. Brandi, M. Perretti, and I. MacIntyre**	**391**
COL9A2 Allelotypes in Intervertebral Disc Disease	**Christian Wrocklage, Hansdetlef Wassmann, and Werner Paulus**	**398**
EWS Fli-1 Antisense Nanocapsules Inhibits Ewing Sarcoma-Related Tumor in Mice	**Gregory Lambert, Jean Rémi Bertrand, Elias Fattal, Frédéric Subra, Huguette Pinto-Alphandary, Claude Malvy, Christian Auclair, and Patrick Couvreur**	**401**
Ginkbilobin, a Novel Antifungal Protein from *Ginkgo biloba* Seeds with Sequence Similarity to Embryo-Abundant Protein	**Hexiang Wang and Tzi Bun Ng**	**407**
Inhibition of Human Platelet Aggregation by Nitric Oxide Donor Drugs: Relative Contribution of cGMP-Independent Mechanisms	**Naoki Sogo, Kesson S. Magid, Catherine A. Shaw, David J. Webb, and Ian L. Megson**	**412**
Cloning and Characterization of Thermostable Endoglucanase (Cel8Y) from the Hyperthermophilic *Aquifex aeolicus* VF5	**Jong Ok Kim, Sang Ryeol Park, Woo Jin Lim, Sung Kee Ryu, Min Keun Kim, Chang Long An, Soo Jeong Cho, Yong Woo Park, Jeong Hwan Kim, and Han Dae Yun**	**420**
Characterization of Spontaneous Mutation in the *oxyR* Strain of *Escherichia coli*	**Eiji Yamamura, Tatsuo Nunoshiba, Masakado Kawata, and Kazuo Yamamoto**	**427**
Evidence for Multiple Active States of *Plasmodium falciparum* Hypoxanthine–Guanine–Xanthine Phosphoribosyltranserase	**I. N. Sujay Subbayya and Hemalatha Balaram**	**433**
A Novel Endogenous PP2C-like Phosphatase Dephosphorylates Casein Kinase II-Phosphorylated *Physarum* Fragmin	**Etienne Waelkens, Veerle de Corte, Wilfried Merlevede, Joël Vandekerckhove, and Jan Gettemans**	**438**
Dissociation of Kar2p/BiP from an ER Sensory Molecule, Ire1p, Triggers the Unfolded Protein Response in Yeast	**Katsutomo Okamura, Yukio Kimata, Hironori Higashio, Akio Tsuru, and Kenji Kohno**	**445**
Cloning of 17β-Hydroxysteroid Dehydrogenase-I cDNAs from Japanese Eel Ovary	**Yukinori Kazeto, Shigeho Ijiri, Hajime Matsubara, Shinji Adachi, and Kohei Yamauchi**	**451**
Bioluminescent *Mycobacterium aurum* Expressing Firefly Luciferase for Rapid and High Throughput Screening of Antimycobacterial Drugs *in Vitro* and in Infected Macrophages	**D. K. Deb, K. K. Srivastava, Ranjana Srivastava, and B. S. Srivastava**	**457**

Amino Acid Residues Conferring Herbicide Tolerance in Tobacco Acetolactate Synthase	**Chom-Kyu Chong and Jung-Do Choi**	**462**
Functional Complementation by Wheat eIF2α in the Yeast GCN2-Mediated Pathway	**Li-Yun Chang, Woo Young Yang, and Don Roth**	**468**
Recognition of 2′-Deoxy-L-ribonucleoside 5′-Triphosphates by Human Telomerase	**Toyofumi Yamaguchi, Rieko Yamada, Aki Tomikawa, Koichi Shudo, Motoki Saito, Fuyuki Ishikawa, and Mineo Saneyoshi**	**475**
A Novel RING Finger-B Box-Coiled-Coil Protein, GERP	**Steven R. Vincent, Dorota A. Kwasnicka, and Pascale Fretier**	**482**
Identification and Characterization of a Novel Gene KE04 Differentially Expressed by Activated Human Dendritic Cells	**Nan Li, Xin Huang, Zhongliang Zhao, Guoyou Chen, Weiping Zhang, and Xuetao Cao**	**487**
Reciprocal Modulation of Transcriptional Activities between HIV-1 Tat and MHC Class II Transactivator CIITA	**Hiroshi Okamoto, Kaori Asamitsu, Hiroyuki Nishimura, Naoyuki Kamatani, and Takashi Okamoto**	**494**
Hepatocyte Growth Factor Induces Differentiation of Adult Rat Bone Marrow Cells into a Hepatocyte Lineage *in Vitro*	**Seh-Hoon Oh, Masahiro Miyazaki, Hirosuke Kouchi, Yusuke Inoue, Masakiyo Sakaguchi, Toshiya Tsuji, Nobuyuki Shima, Kanji Higashio, and Masayoshi Namba**	**500**
Deficiencies of Hippocampal Zn and ZnT3 Accelerate Brain Aging of Rat	**Takeshi Saito, Kyoko Takahashi, Noriko Nakagawa, Toshiyuki Hosokawa, Masaaki Kurasaki, Osamu Yamanoshita, Yuwako Yamamoto, Hiroko Sasaki, Kazuo Nagashima, and Hiroyoshi Fujita**	**505**
Proline Alleviates Salt-Stress-Induced Enhancement in Ribulose-1,5-Bisphosphate Oxygenase Activity	**P. Sivakumar, P. Sharmila, and P. Pardha Saradhi**	**512**
Mutagenesis of Organophosphorus Hydrolase to Enhance Hydrolysis of the Nerve Agent VX	**Sriram Gopal, Vipin Rastogi, William Ashman, and Walter Mulbry**	**516**
First-Generation Monoclonal Antibodies Identifying the Human Leukotriene B_4 Receptor-1	**Annika Pettersson, Åke Boketoft, Alan Sabirsh, Niclas E. Nilsson, Knut Kotarsky, Björn Olde, and Christer Owman**	**520**
Two Novel Genes, Human *neugrin* and Mouse *m-neugrin,* Are Upregulated with Neuronal Differentiation in Neuroblastoma Cells	**Shinsuke Ishigaki, Jun-ichi Niwa, Tsuyoshi Yoshihara, Norimasa Mitsuma, Manabu Doyu, and Gen Sobue**	**526**
Altered Subunit Communication in Subfamilies of Trimeric dUTPases	**András Fiser and Beáta G. Vértessy**	**534**
Structure of the VPATPD Gene Encoding Subunit D of the Human Vacuolar Proton ATPase	**Anil K. Agarwal and Perrin C. White**	**543**
A Family of Compact Plasmid Vectors for DNA Immunization in Humans	**Antonieta M. Herrera, Ernesto G. Rodríguez, Tays Hernández, Belkis Sández, and Carlos A. Duarte**	**548**

N-Acetylcysteine Counteracts Erythrocyte Alterations Occurring in Chronic Obstructive Pulmonary Disease — **Elisabetta Straface, Paola Matarrese, Lucrezia Gambardella, Silvia Forte, Stefano Carlone, Enrico Libianchi, Giovanni Schmidt, and Walter Malorni** — **552**

The RNA Aptamer-Binding Site of Hepatitis C Virus NS3 Protease — **Joonsung Hwang, Hamid Fauzi, Kotaro Fukuda, Satoru Sekiya, Nobuko Kakiuchi, Kunitada Shimotohno, Kazunari Taira, Isao Kusakabe, and Satoshi Nishikawa** — **557**

Nonredundant Roles of the Elongation Factor MEN in Postimplantation Development — **Kinuko Mitani, Tetsuya Yamagata, Chika Iida, Hideaki Oda, Kazuhiro Maki, Motoshi Ichikawa, Takashi Asai, Hiroaki Honda, Mineo Kurokawa, and Hisamaru Hirai** — **563**

Tissue and Cell Distribution of a Mammalian Proteasomal ATPase, MSS1, and Its Complex Formation with the Basal Transcription Factors — **Shinsuke Yanagi, Naoki Shimbara, and Taka-aki Tamura** — **568**

Expression and Evolution of the *Drosophila Attacin/Diptericin* Gene Family — **Marika Hedengren, Karin Borge, and Dan Hultmark** — **574**

Induction of Heme Oxygenase-1 Can Act Protectively against Cardiac Ischemia/Reperfusion *in Vivo* — **Misako Hangaishi, Nobukazu Ishizaka, Toru Aizawa, Yukiko Kurihara, Jun-ichi Taguchi, Ryozo Nagai, Satoshi Kimura, and Minoru Ohno** — **582**

Human Neuroblastoma Cell Differentiation Requires Protein Kinase C-θ — **Bianca Sparatore, Mauro Patrone, Mario Passalacqua, Marco Pedrazzi, Sandro Pontremoli, and Edon Melloni** — **589**

Multiple Deletions of mtDNA Remove the Light Strand Origin of Replication — **Corina Bank, Tewfik Soulimane, J. Michael Schröder, Gerhard Buse, and Stefanie Zanssen** — **595**

Transcriptional Inactivation of p53 by Deletions and Single Amino Acid Changes in Mouse mot-1 Protein — **Sunil C. Kaul, Syuichi Takano, Roger R. Reddel, Youji Mitsui, and Renu Wadhwa** — **602**

High Levels of Zinc Ions Induce Loss of Mitochondrial Potential and Degradation of Antiapoptotic Bcl-2 Protein in *in Vitro* Cultivated Human Prostate Epithelial Cells — **G. Untergasser, H. Rumpold, E. Plas, M. Witkowski, G. Pfister, and P. Berger** — **607**

Molecular Cloning and Characterization of a New Human Histamine Receptor, *HH4R* — **Takao Nakamura, Hiraku Itadani, Yusuke Hidaka, Masataka Ohta, and Kenichi Tanaka** — **615**

Morphine Upregulates *mu* Opioid Receptors of Human and Monkey Lymphocytes — **Shunji Suzuki, Tomoko Miyagi, Teddy K. Chuang, Linda F. Chuang, Roy H. Doi, and Ronald Y. Chuang** — **621**

Bioflavonoid Quercetin Inhibits Mitosis and Apoptosis of Glomerular Cells *in Vitro* and *in Vivo* — **Yoshihisa Ishikawa and Masanori Kitamura** — **629**

Activation of Prostacyclin Synthesis by Mechanical Stimulation in the Ciliated Protozoan *Tetrahymena thermophila*	**Masaaki Iwamoto, Tomohisa Murata, Hiroshi Morii, Yasuyoshi Watanabe, and Yasuo Nakaoka**	**635**
Relation between Phosphatidylserine Exposure and Store-Operated Ca^{2+} Entry in Stimulated Cells	**Sophie Martin, Isabelle Laude-Lemaire, Danièle Kerbiriou-Nabias, Jean-Marie Freyssinet, and M. Carmen Martínez**	**639**
YC-1, a Benzyl Indazole Derivative, Stimulates Vascular cGMP and Inhibits Neointima Formation	**David A. Tulis, William Durante, Kelly J. Peyton, Gary B. Chapman, Alida J. Evans, and Andrew I. Schafer**	**646**
Recombinant Cry3Aa Has Insecticidal Activity against the Andean Potato Weevil, *Premnotrypes vorax*	**Sylvia Gomez, Ana Constanza Mateus, Javier Hernandez, and Barbara H. Zimmermann**	**653**
Myeloperoxidase-Catalyzed Oxidation of Melatonin by Activated Neutrophils	**Sueli de Oliveira Silva, Valdecir F. Ximenes, Luiz Henrique Catalani, and Ana Campa**	**657**
Sensitivity of Trypanosomatid Protozoa to DFMO and Metabolic Turnover of Ornithine Decarboxylase	**Carolina Carrillo, Silvina Cejas, Micaela Cortés, Carolina Ceriani, Alejandra Huber, Nélida S. González, and Israel D. Algranati**	**663**
Potent Heterologous Antifungal Proteins from Cheeseweed (*Malva parviflora*)	**Xing Wang and Greg J. Bunkers**	**669**
A Novel Conformer of Oxidized *Paracoccus pantotrophus* Cytochrome cd_1 Observed by Freeze-Quench NIR-MCD Spectroscopy	**James W. A. Allen, Myles R. Cheesman, Christopher W. Higham, Stuart J. Ferguson, and Nicholas J. Watmough**	**674**
The BRCT Regions of Tumor Suppressor BRCA1 and of XRCC1 Show DNA End Binding Activity with a Multimerizing Feature	**Kazuhiko Yamane, Eisaku Katayama, and Takashi Tsuruo**	**678**
APC Protein Is Required for Initiation of Neuronal Differentiation in Rat Pheochromocytoma PC12 Cells	**Yoh Dobashi, Kazuhiro Katayama, Masataka Kawai, Tetsu Akiyama, and Toru Kameya**	**685**
A Reevaluation of the Peroxynitrite Scavenging Activity of Some Dietary Phenolics	**Uraiwan Ketsawatsakul, Matthew Whiteman, and Barry Halliwell**	**692**
TT Virus mRNAs Detected in the Bone Marrow Cells from an Infected Individual	**Hiroaki Okamoto, Tsutomu Nishizawa, Akio Tawara, Masaharu Takahashi, Junichi Kishimoto, Toshiaki Sai, and Yoshiki Sugai**	**700**
Cofactor Recycling with Immobilized Heterologous Cytochrome P450 105D1 (CYP105D1)	**Mark Taylor, David C. Lamb, Rick J. P. Cannell, Michael J. Dawson, and Steven L. Kelly**	**708**
Proteasome-Dependent Degradation of Cytosolic Chaperonin CCT	**Shin-ichi Yokota, Tohru Kayano, Tsunetaka Ohta, Masashi Kurimoto, Hideki Yanagi, Takashi Yura, and Hiroshi Kubota**	**712**

Visualization of TT Virus Particles Recovered from the Sera and Feces of Infected Humans — **Yukio Itoh, Masaharu Takahashi, Masako Fukuda, Takao Shibayama, Takashi Ishikawa, Fumio Tsuda, Takeshi Tanaka, Tsutomu Nishizawa, and Hiroaki Okamoto** — **718**

Cloning and Characterization of a Novel Nuclear Bcl-2 Family Protein, zfMcl-1a, in Zebrafish Embryo — **Ming-Chyuan Chen, Hong-Yi Gong, Ching-Yi Cheng, Jia-Pey Wang, Jiann-Ruey Hong, and Jen-Leih Wu** — **725**

p29, a Novel GCIP-Interacting Protein, Localizes in the Nucleus — **Mau-Sun Chang, Chih-Long Chang, Chang-Jen Huang, and Yuh-Cheng Yang** — **732**

ERRATA

Volume **274,** Number 2 (2000), in the article “Electrophysiologic Characteristics of the Ca-Permeable Channels, ECaC and CaT, in the Kidney,” by Makoto Suzuki, Kenichi Ishibashi, Gaku Ooki, Syuuichi Tsuruoka, and Masashi Imai, pages 344–349 (doi:10.1006/bbrc.2000.3135) — **738**

Volume **276,** Number 1 (2000), in the article, “Human CDK10 Gene Isoforms,” by Jean-Christophe Sergère, Jean-Yves Thuret, Gwenaëlle Le Roux, Edgardo D. Carosella, and François Leteurtre, pages 271–277 (doi:10.1006/bbrc.2000.3395) — **738**

Volume **276,** Number 3 (2000), in the article “Homeobox Gene *Hex* Is Essential for Onset of Mouse Embryonic Liver Development and Differentiation of the Monocyte Lineage,” by Vincent W. Keng, Hideshi Yagi, Masahito Ikawa, Takashi Nagano, Zaw Myint, Kazuya Yamada, Takashi Tanaka, Ayuko Sato, Ikunobu Muramatsu, Masaru Okabe, Makoto Sato, and Tamio Noguchi, pages 1155–1161 (doi:10.1006/bbrc.2000.3548) — **739**

Number 3, December 29, 2000

BREAKTHROUGHS AND VIEWS

Gene Cloning at the Computer Screen: Possibilities and Problems — **Peter Jordan, Paulo Matos, and Fátima Veríssimo** — **741**

REGULAR ARTICLES

Glycosylation Effect on Membrane Domain (GEM) Involved in Cell Adhesion and Motility: A Preliminary Note on Functional $\alpha3$, $\alpha5$-CD82 Glycosylation Complex in ldlD 14 Cells — **Masaya Ono, Kazuko Handa, Donald A. Withers, and Sen-itiroh Hakomori** — **744**

Selegiline and Desmethylselegiline Stimulate NGF, BDNF, and GDNF Synthesis in Cultured Mouse Astrocytes — **Ikuko Mizuta, Mitsuhiro Ohta, Kiyoe Ohta, Masataka Nishimura, Eiji Mizuta, Kyozo Hayashi, and Sadako Kuno** — **751**

Calpastatin Domain L Is Involved in the Regulation of L-Type Ca^{2+} Channels in Guinea Pig Cardiac Myocytes — **Li-Ying Hao, Asako Kameyama, Sachiko Kuroki, Jiro Takano, Emiko Takano, Masatoshi Maki, and Masaki Kameyama** — **756**

A Calmodulin Binding Protein from *Arabidopsis* Is Induced by Ethylene and Contains a DNA-Binding Motif	**A. S. N. Reddy, Vaka S. Reddy, and Maxim Golovkin**	**762**
Hydrophobic Clustering in Acid-Denatured IL-2 and Fluorescence of a Trp $NH\cdots\pi$ H-bond	**Vikas Nanda, Shu-Mei Liang, and Ludwig Brand**	**770**
Chimeras of Δ^6-Fatty Acid and Δ^8-Sphingolipid Desaturases	**Balázs Libisch, Louise V. Michaelson, Mervyn J. Lewis, Peter R. Shewry, and Johnathan A. Napier**	**779**
Slow Recovery of Body Fat Lost during Adenovirus-Induced Hyperleptinemia	**Moritake Higa, Tetsuya Kakuma, Wentong Pan, Zhuo-Wei Wang, Evelyn Babcock, Kay McCorkle, Young Lee, and Roger Unger**	**786**
MODY Associated with Two Novel Hepatocyte Nuclear Factor-1α Loss-of-Function Mutations (P112L and Q466X)	**Lise Bjørkhaug, Honggang Ye, Yukio Horikawa, Oddmund Søvik, Anders Molven, and Pål Rasmus Njølstad**	**792**
Nek2 Expression and Localization in Porcine Oocyte during Maturation	**Toru Fujioka, Yuji Takebayashi, Masaharu Ito, and Takafumi Uchida**	**799**
Targeting of Active Human Cytochrome P4501A1 (CYP1A1) to the Periplasmic Space of *Escherichia coli*	**Mustak A. Kaderbhai, Cynthia C. Ugochukwu, David C. Lamb, and Steven L. Kelly**	**803**
Expression of Specific Markers and Particle Transport in a New Human Intestinal M-Cell Model	**Elisabet Gullberg, Maurice Leonard, Johan Karlsson, Ann M. Hopkins, David Brayden, Alan W. Baird, and Per Artursson**	**808**
An Estrogen Receptor β Isoform That Lacks Exon 5 Has Dominant Negative Activity on both ERα and ERβ	**Satoshi Inoue, Sumito Ogawa, Kuniko Horie, Shinjiro Hoshino, Wakako Goto, Takayuki Hosoi, Osamu Tsutsumi, Masami Muramatsu, and Yasuyoshi Ouchi**	**814**
KIAP, a Novel Member of the Inhibitor of Apoptosis Protein Family	**Jiing-Huey Lin, Gary Deng, Qihong Huang, and John Morser**	**820**
A New Subfamily of High Molecular Mass CDC2-Related Kinases with PITAI/VRE Motifs	**Francois Marqués, Jean-Luc Moreau, Gerard Peaucellier, Jean-Claude Lozano, Philippe Schatt, Andre Picard, Isabelle Callebaut, Eric Perret, and Anne-Marie Geneviève**	**832**
A Novel *FUS/CHOP* Chimera in Myxoid Liposarcoma	**Ioannis Panagopoulos, Fredrik Mertens, Margareth Isaksson, and Nils Mandahl**	**838**
Kringle 1–4 of Hepatocyte Growth Factor Inhibits Proliferation and Migration of Human Microvascular Endothelial Cells	**Keiji Kuba, Kunio Matsumoto, Kenji Ohnishi, Takayuki Shiratsuchi, Masao Tanaka, and Toshikazu Nakamura**	**846**
Serine 27, a Human Retinoid X Receptor α Residue, Phosphorylated by Protein Kinase A Is Essential for CyclicAMP-Mediated Downregulation of RXRα Function	**S. Harish, M. S. Ashok, Tasneem Khanam, and P. N. Rangarajan**	**853**
The Luminal Ca^{2+} Transient Controls Ca^{2+} Release/Re-uptake of Sarcoplasmic Reticulum	**Noriaki Ikemoto and Takeshi Yamamoto**	**858**

Regulation of CYP4F2 Leukotriene B_4 ω-Hydroxylase by Retinoic Acids in HepG2 Cells	**Xiolan Zhang and James P. Hardwick**	**864**
Suppression of Apoptosis by UVB Irradiation: Survival Signaling via PI3-Kinase/Akt Pathway	**Yuko Ibuki and Rensuke Goto**	**872**
Neuronal Expression of the ERM-like Protein MIR in Rat Brain and Its Localization to Human Chromosome 6	**Per-Anders Olsson, Beat C. Bornhauser, Laura Korhonen, and Dan Lindholm**	**879**
A Novel Epigenetic Control Operating on *Vme1*$^+$ Locus Leads to Variegated Monoallelic Expression	**Sangkyun Jeong, Young Jae Lee, Jae Seon Jang, Chang Won Park, Jae Hoon Chung, Je-Kyung Seong, Kyung-Kwang Lee, and Dae-Yeul Yu**	**884**
Down-Regulation of Reduced Folate Carrier Gene (*RFC1*) Expression after Exposure to Methotrexate in ZR-75-1 Breast Cancer Cells	**Deqin Ma, Hui Huang, and Jeffrey A. Moscow**	**891**
Hormonal Control of mRNA Expression of Immunoglobulin Binding Factor in Uterine Cervix	**Shuji Yoshikawa, Masaharu Kamada, Masahiko Maegawa, Satoshi Yamamoto, Minoru Irahara, Shuji Yamano, Toshihiro Aono, Hiroshi Kido, and Samuel S. Koide**	**898**
Identification of Mouse YB1/p50 as a Component of the FMRP-Associated mRNP Particle	**Stephanie Ceman, Retecher Nelson, and Stephen T. Warren**	**904**
Ghrelin and Des-acyl Ghrelin: Two Major Forms of Rat Ghrelin Peptide in Gastrointestinal Tissue	**Hiroshi Hosoda, Masayasu Kojima, Hisayuki Matsuo, and Kenji Kangawa**	**909**
Systemic Administration of Epidermal Growth Factor Increases UCP3 mRNA Levels in Skeletal Muscle and Adipose Tissue in Rats	**Steen B. Pedersen, Kurt Kristensen, Jens M. Bruun, Allan Flyvbjerg, Lars Vinter-Jensen, and Bjørn Richelsen**	**914**
Expression of a Smaller Lecithin:Retinol Acyl Transferase Transcript and Reduced Retinol Esterification in MCF-7 Cells	**Fausto Andreola, Valeria Giandomenico, Richard Spero, and Luigi M. De Luca**	**920**
TTIP Is a Novel Protein That Interacts with the Truncated T1 TrkB Neurotrophin Receptor	**David Kryl and Philip A. Barker**	**925**
Extracellular Matrix Components Cooperate to Activate Phosphatidyl Inositol-4-phosphate 5-Kinase	**Marjorie E. Dunlop and Evelyne E. Muggli**	**931**
ATRAP, Novel AT1 Receptor Associated Protein, Enhances Internalization of AT1 Receptor and Inhibits Vascular Smooth Muscle Cell Growth	**Tai-Xing Cui, Hironori Nakagami, Masaru Iwai, Yuko Takeda, Tetsuya Shiuchi, Koichi Tamura, Laurent Daviet, and Masatsugu Horiuchi**	**938**
Cloning and Characterization of the *pknA* Gene from *Streptomyces coelicolor* A3(2), Coding for the Mn^{2+}-Dependent Protein Ser/Thr Kinase	**Kateřina Petříčková, Pavel Tichý, and Miroslav Petříček**	**942**
Reduction of Phenoxyl Radicals Mediated by Monodehydroascorbate Reductase	**Yasuko Sakihama, Jun'ichi Mano, Satoshi Sano, Kozi Asada, and Hideo Yamasaki**	**949**
Autophosphorylation of the Insulin-like Growth Factor I Receptor Cytoplasmic Domain	**Wlodzimierz Lopaczynski, Cheryl Terry, and Peter Nissley**	**955**

A Protease Inhibitor of the Kunitz Family from Skin Secretions of the Tomato Frog, *Dyscophus guineti* (Microhylidae) — **J. Michael Conlon and Joseph B. Kim** — **961**

Angiotensin II Increases Calponin Expression in Cultured Rat Vascular Smooth Muscle Cells — **Cira R. T. di Gioia, Willy M. M. van de Greef, Giovanni Sperti, Giovanna Castoldi, Nicoletta Todaro, Carolina Ierardi, Federico Pieruzzi, and Andrea Stella** — **965**

Inhibition of Transthyretin-met30 Expression Using Inosine$^{15.1}$-Hammerhead Ribozymes in Cell Culture — **M. J. Pröpsting, S. Kubicka, J. Genschel, M. P. Manns, H. Lochs, and H. H.-J. Schmidt** — **970**

Rapid Activation of Protein Kinase B/Akt Has a Key Role in Antiapoptotic Signaling during Liver Regeneration — **Feng Hong, Van-Anh Nguyen, Xuening Shen, George Kunos, and Bin Gao** — **974**

Cleavage of Human Orosomucoid by a Chromium(V) Species: Relevance in Biotoxicity of Chromium — **H. Yamini Shrivastava and Balachandran Unni Nair** — **980**

Release of PAI-1 by Human Preadipocytes and Adipocytes Independent of Insulin and IGF-1 — **David L. Crandall, Thomas M. Groeling, Dennis E. Busler, and Thomas M. Antrilli** — **984**

Genomic Organization and Molecular Characterization of the Human Ninein Gene — **Yi-Ren Hong, Chang-Han Chen, Meng-Hui Chuo, Shiau-Yun Liou, and Shen-Long Howng** — **989**

Trends of Amino Acid Usage in the Proteins from the Unicellular Parasite *Giardia lamblia* — **Beatriz Garat and Héctor Musto** — **996**

Temperature-Sensitive Mutants of p53 Homologs — **Radhika Pochampally, Changgong Li, Wenge Lu, Lihong Chen, Ronald Luftig, Jiayuh Lin, and Jiandong Chen** — **1001**

Preparation and Initial Characterization of the Compound I, II, and III States of Iron Methylchlorin-Reconstituted Horseradish Peroxidase and Myoglobin: Models for Key Intermediates in Iron Chlorin Enzymes — **Eric D. Coulter, Jennifer Cheek, Amy P. Ledbetter, Chi K. Chang, and John H. Dawson** — **1011**

CORRIGENDUM

Volume **251,** Number 2 (1998), in the article “A Differentially Expressed Prion Gene mRNA Is Found in Prion-Infected Mouse Brains and in N2A Cells but Not in Uninfected Mice,” by Björn Schröder, Martin Groschup, Gerhard Hunsmann, and Walter Bodemer, pages 423–428 (doi:10.1006/bbrc.1998.9481) — **1016**

Author Index for Volume 279 — **1017**

Biochemical and Biophysical Research Communications
2000 Cumulative Subject Index, pp. 42–190
doi:10.1006/bbrc.2000.4411, available online at http://www.idealibrary.com on IDEAL®

Cumulative Subject Index
Volumes 267–279[1]

A

- A23187
  - deencryption of cellular tissue factor, role of TF cytoplasmic domain (BHK cells), **272,** 332
- ABC transporters, *see* ATP-binding cassette transporters
- Abscisic acid
  - and light signals, regulation of *OsPR1b* gene (rice), **278,** 290
- Absorption
  - resveratrol in jejunum (rat), **272,** 212
- Acetaldehyde
  - depression of cardiomyocyte contraction induced by, enhancement by diabetes (rat), **269,** 697
- Acetaminophen
  - inhibition of iNOS gene expression in RAW 264.7 cells: NF-κB regulation by acetaminophen and salicylates, **272,** 758
- Acetolactate synthase
  - cysteinyl residues, structural and functional roles (tobacco), **271,** 801
  - herbicide tolerance, amino acid residues conferring, identification (tobacco), **279,** 462
- Acetylation
  - actin N-terminus, strengthening of weak interaction between actin and myosin by, **268,** 14
- Acetylcholine receptor
  - muscarinic, M_1, mamba toxin MT7 blocking, recombinant expression, **271,** 435
  - nicotinic
    - aggregation in skeletal muscle cells via PNA-binding carbohydrates, stimulation by α-galactosidase, **270,** 899
    - α subunits, synthetic peptides comprising residues 188–207 of, binding of nicotine, **268,** 480
    - function, roles of agonist-binding sites, **279,** 358
- *N*-Acetylcysteine
  - activation of ERK signaling pathway in articular chondrocytes (bovine, human), **275,** 789
  - effect on erythrocyte alterations in chronic obstructive pulmonary disease (human), **279,** 552
  - regulation of hepatocyte growth factor/scatter factor gene expression in MRC-5 cells, **279,** 108
- *N*-Acetylgalactosamine-α2,6-sialyltransferase
  - ST6GalNAc I and II, acceptor substrate specificities: redefined substrate specificity of ST6GalNAc II (mouse), **272,** 94
- *N*-Acetylglucosamine-6-*O*-sulfotransferase
  - GlcNAc6ST-4, molecular cloning and expression (human, mouse), **274,** 291
- *N*-Acetylglucosaminyltransferase V
  - and β-1,4-galactosyltransferase V, genes encoding, correlated expression in cancer cells (human), **276,** 1019
- *N*-Acetylneuraminic acid 9-phosphate synthase
  - molecular cloning and expression (mouse), **273,** 642
- *N*-Acetyl-*S*-(3-oxo-3-carboxy-*n*-propyl)cysteine
  - priming effect on superoxide generation in neutrophils (human), **269,** 297
- *N*-Acetyltryptophan
  - fluorescence, effects of pressure, **269,** 681
- *N*-Acetyltryptophanamide
  - fluorescence, effects of pressure, **269,** 681
- Achlorhydria
  - antral gastrin and somatostatin synthesis and secretion in response to, i carboxypeptidase E-deficient mice, **267,** 638
- Acid activation
  - prorenin, rate of, role of prosegment, **267,** 577
- Acid ceramidase
  - activity, active release by endothelial cells (mouse), **275,** 746
- α_1-Acid glycoprotein/orosomucoid gene
  - rearrangement (human), **276,** 779
- Acidification
  - hepatic lysosomes, effect of cholera toxin (rat), **274,** 717
- Acid maltase
  - in enzyme replacement correction of glycogen storage disease type I (human), **276,** 917
- *Acinetobacter*
  - heterologous cytochrome P450 engineering, **276,** 797
- ACK1
  - tyrosine phosphorylation dependent on, activation of guanine nucleotid exchange factor Dbl after, **268,** 141
- *cis*-Aconitase
  - modulation in lens epithelial cells by heme oxygenase-1 induction, **270,** 32
- Acrosome reaction
  - induction in spermatozoa by inner perivitelline-derived N-linked glycan (chicken), **278,** 84
- Acrylamide
  - quenching of *apo*- and *holo*-α-lactalbumin in guanidine hydrochloride, **269,** 70
- Acrylic acid
  - induction of mitochondrial permeability transition *in vitro* (rat), **272,** 431
- ACT
  - gene structure and expression in tumor cell lines (human), **273,** 776
- Actin
  - association with Enigma homologue protein via PDZ domain (rat), **272,** 50
  - binding
    - by hsp25, retention by hsp25 N-terminal 33-amino-acid deletion varian **270,** 183
    - by tropomyosin–troponin, effect on filament bending stiffness (rabbit) **276,** 1225
  - interaction with $p47^{phox}$ of neutrophil NADPH oxidase (human, rabbit), **276** 1186
  - mutants lethal to yeast, purification and polymerization, **271,** 464
  - myosin ATPase activity activated by, Ca^{2+}-dependent inhibition by S100C **267,** 77
  - N-terminal acetylation, strengthening of weak interaction between actin an myosin, **268,** 14
  - regulation by WAVE, Arp2/3 complex-independent mechanism, **272,** 386
  - residues 230 and 236, role in myosin-ATPase activation by actin tropomyosin, **275,** 428
- Actin cytoskeleton
  - disruption, induction of chondrogenesis of mesenchymal cells by activatio of PKC-α signaling (chick embryo), **273,** 609
  - reorganization, induction by *Drosophila* homolog of LIM-kinase, **276,** 117

- Actin filaments
  - calponin binding, inhibition by calponin phosphorylation by Rho-kinase, **273,** 110
  - cortical, disruption, role in Rnd1 induction of neurite process formation in PC12 cells, **278,** 604
  - myosin V processive movement along, direct observation (chicken), **272,** 586
  - rotation in skeletal muscle, mechanical model, **270,** 677
- α-Actinin
  - association with Enigma homologue protein via PDZ domain (rat), **272,** 505
  - isoform 4, binding to BERP, **267,** 906
- Activator protein-1, *see* AP-1
- Active zone
  - presynaptic nerve terminals, cytomatrix protein Bassoon of, membrane association (rat), **275,** 43
- Activin A
  - downregulation by *N-myc* oncogene, **274,** 405
  - identification as essential cofactor for osteoclast induction, **268,** 2
- Activin receptor
  - truncated type II, increased number of glomeruli in transgenic mice expressing, **268,** 445
- Activin receptor-like kinases
  - ALK-2, ALK-3, and ALK-6, Smad8 phosphorylation downstream of, induction of Smad8–Smad4 association and transcriptional activity (mouse), **271,** 682
- Actomyosin
  - myocardial, ATPase activity, inhibition by *cis*-9,10-methylenehexadecanoic acid (guinea pig), **274,** 533
- Acute myeloid leukemia
  - 3q21 breakpoints, localization of GATA-2 gene near, **273,** 239
- Acute T-cell leukemia cells
  - antibiotic activity of CRAMP analogues without hemolytic effect, **275,** 904
- Acyl-CoA:cholesterol acyltransferase
  - inhibition by glibenclamide, **277,** 417
- Acyl-CoAs
  - changes during tetraethylammonium-induced long-term potentiation in hippocampal slices (rat), **267,** 208
- Acyl-CoA synthetase
  - ACS4, expression in steroidogenic tissues, regulation by ACTH and arachidonate (mouse), **274,** 741
  - lipidosin, identification in adrenoleukodystrophy target tissues (mouse), **279,** 62
- Acyl-CoA thioesterase
  - long-chain peroxisomal PTE2, identification (human), **275,** 233
- Acyltransferases
  - palmitoyl-CoA-dependent and -independent, analysis with water-soluble glucosaminylphosphatidylinositol analogue, **267,** 296
- Ac-YVAD-cmk
  - effects on experimental autoimmune encephalomyelitis (mouse), **267,** 826
- *Ad4BP/SF-1* gene
  - identification of novel first exons and tissue- and species-specific usage (human, mouse, rat), **278,** 63
- ADAM 12-L
  - retention in *trans*-Golgi network (human), **275,** 261
- ADAM 12-S
  - cleavage of IGFBP-3 and IGFBP-5 and inhibition by TIMP-3, **278,** 511
- γ-Adaptin
  - and GGA proteins, interacting with γ-synergin, adaptor γ ear homology domain conservation in, **271,** 719
- Adaptor γ ear homology domain
  - conservation in γ-adaptin and GGA proteins interacting with γ-synergin, **271,** 719
- Adaptor proteins
  - CIN85
    - characterization, and identification of components in CIN85 complexes, **278,** 167
    - interacting with c-Cbl, cloning and characterization (human), **268,** 321
  - Lnk family, molecular cloning of mouse APS as member of, **272,** 45
  - Shf, role in PDGF-α-receptor regulation of apoptosis, **278,** 537
  - STAP-1, molecular cloning (mouse), **268,** 697
- Adenine
  - induction of selective apoptosis toward HIV chronically infected cells *in vitro,* **273,** 1025
- Adeno-associated virus
  - recombinant, self-amplification system for production, **276,** 559
- Adenosine
  - non-phosphate antagonists of $P2Y_1$ purinoceptors derived from, synthesis and effects on inositol phosphate synthesis, **272,** 327
  - as partial agonist of growth hormone secretagogue receptor (pig), **276,** 1306
- Adenosine deaminase
  - function in gastrointestinal tract (mouse), **269,** 749
  - role in lymphocyte development and function, review, **272,** 311
- Adenosine kinase
  - structure–activity studies (Chinese hamster), **275,** 386
- *S*-Adenosylhomocysteine
  - intracellular, interrelations with plasma homocysteine (rat), **271,** 47
- Adenovirus
  - caspase 8 transfer mediated by, combined with IκB, induction of apoptosis in gliomas (human), **271,** 544
  - gene transfer by, into rabbit aorta, faciliation by hydrostatic pressure, **274,** 422
  - hepatocyte growth factor gene transfer mediated by, prevention of lethal liver failure (rat), **278,** 338
  - hyperleptinemia induced by, slow recovery of body fat lost during, analysis in rats, **279,** 786
  - osteoinduction by vector carrying BMP-2 under transient immunosuppression (rat), **267,** 382
  - recombinant vector, targeting to HCC cells with bifunctional Fab–antibody conjugate, **272,** 497
  - vector cytotoxicity, dependence on transgene encoded, **274,** 767
- Adenovirus/adeno-associated virus vector
  - mediation of site-specific integration of transgene using Cre/*loxP*-expression-switching system, **273,** 473
- Adenylyl cyclase
  - adipocyte membrane, activity modification by NAD (rat), **270,** 203
- Adhesion structures
  - cell–cell, MAGI-1 association: β-catenin interaction, **270,** 903
- Adipocytes
  - Akt and MAP kinase activation by insulin, dependence on phosphatidylinositol 3-kinase (rat), **274,** 845
  - amino acid transporter, differential expression
    - regulation, major DNA motif for, SP1-like *cis*-element identification as, **271,** 91
    - transactivation by SP1 and SP3 during 3T3-L1 preadipocyte differentiation, **271,** 100
  - brown, fetal, UCP-3 expression *in vitro,* synergistic activation by PPARα and PPARγ ligands (rat), **273,** 560
  - *Cbfa1*-deficient calvarial cell differentiation into, *in vitro* study (mouse), **273,** 630
  - differentiating, insulin signaling pathways, proteins involved in, regulation (human), **276,** 162
  - differentiation
    - inhibition by c-Myc, independence from c-Myc role in cell cycle control (3T3-L1 cells), **269,** 438

- Adipocytes (*continued*)
    - membrane and secreted proteins upregulated during, identification (3T3-L1 cells), **272,** 293
    - regulation by retinoblastoma protein phosphorylation via PI 3-kinase and mTOR pathway (3T3-L1 cells), **275,** 115
  - GLUT1 targeting in, effects of glucose deprivation (3T3-L1 cells), **273,** 859
  - insulin metabolic effects, effects of PKB/Akt inhibition (rat), **268,** 315
  - insulin resistance models, comparison: increased glucose flux vs. glucosamine treatment (3T3-L1 cells), **273,** 1033
  - leptin mRNA expression and secretion *in vitro,* stimulation by eicosapentaenoic acids (3T3-L1 cells), **270,** 343
  - leptin release, regulation, **274,** 571
  - leptin resistance, in obesity, role of suppressors of cytokine signaling (rat), **277,** 20
  - light microsomes, 70-kDa protein, insulin-dependent phosphorylation (rat), **276,** 1302
  - membrane adenylyl cyclase activity, modification by NAD (rat), **270,** 203
  - plasminogen activator inhibitor-1 release independent of insulin and IGF-1 (human), **279,** 984
  - SNARE protein levels, quantitation (3T3-L1 cells), **270,** 841
  - STAT6 activation, effect of IL-4 (3T3-L1 cells), **267,** 516
- Adipogenesis
  - thiazolidinedione-induced, inhibitory effect of Pro^{12} → Ala mutation of PPARγ 2, **268,** 178
- Adipose tissue
  - brown and white, effect of disruption of *klotho* gene (mouse), **278,** 665
  - leptin release, regulation, **274,** 571
  - leptin secretion *in vitro,* dual effect of insulin (human), **276,** 477
  - uncoupling protein 3 mRNA levels, increase after systemic EGF administration (rat), **279,** 914
- ADP
  - modulation of dynamic behavior of glycolytic pathway of *Escherichia coli,* **271,** 244
- ADP-ribosylation
  - elongation factor 2, catalyzed by diphtheria toxin or endogenous transferase, cytoplasmic inhibitor of, detection in liver cells (rat), **269,** 553
  - Gα_{olf} and Gα_s subunits in pancreatic beta cells, decrease by high glucose, **271,** 86
  - Gsα, endogenous reaction induced by NAD, evidence against, **270,** 203
- ADP-ribosylation factors
  - class I, interaction with PDZ domain of PICK1 (human), **267,** 149
- ADP-ribosyl cyclase
  - activity in salivary glands (rat), **270,** 469
  - CD38 family clone from rabbit, molecular cloning, expression, and functional characterization, **273,** 884
- Adrenal medulla
  - chromaffin cells, catecholamine biosynthesis in, inhibition by CGP-42112 (pig), **272,** 544
- Adrenergic receptors
  - photodynamic modulation in isolated rat hepatocytes, **277,** 705
- α_1-Adrenergic receptors
  - linkage with Jak/STAT signaling pathway in vascular smooth muscle cells, **268,** 25
  - subtypes, differential coupling to growth promotion and inhibition in CHO cells, **272,** 906
- β-Adrenergic receptors
  - desensitization, role in imipramine inhibition of Cl$^-$ secretion by Calu-3 airway cells, **274,** 620
- β_2-Adrenergic receptors
  - chimera with histamine H2 receptor: mapping of structural requirements for H2 receptor-mediated dual signaling (human), **276,** 539
- Adrenocortical cells
  - steroidogenesis regulation by phosphoprotein phosphatases, role of influence on StAR gene transcription (mouse Y1 cells), **273,** 35
- Adrenocorticotropic hormone
  - regulation of acyl-CoA synthetase 4 expression in steroidogenic tissues (mouse), **274,** 741
- Adrenodoxin–adrenodoxin reductase complex
  - dissociation constants: evidence for cluster model of mitochondrial steroid hydroxylase system, **276,** 210
- Adrenoleukodystrophy
  - target tissues, identification of lipidosin with acyl-CoA synthetase activity (mouse), **279,** 62
- Adrenoleukodystrophy protein
  - and related peroxisomal ABC transporters, interaction with PEX19p (human), **271,** 144
- Adrenomedullin/CGRP receptor
  - RAMPs for, cloning and upregulation in obstructive nephropathy (rat), **270,** 89
- Adrenomedullin receptor
  - gene expression in lung, decrease during sepsis (mouse), **271,** 197
- Adriamycin
  - photoactive analogue of, *in situ* photoaffinity labeling of proteasome, **273,** 928
  - sensitivity to, effect of hepatocyte growth factor (CHO cells), **274,** 772
- Advanced glycation end products
  - effect on lens epithelial cells *in vitro* (bovine, human), **275,** 53
  - scavenger receptor gene expression induced by, in cultured monocyte-derived macrophages (human), **277,** 368
  - vascular smooth muscle cell proliferation induced by, inhibition by resveratrol in stroke-prone spontaneously hypertensive rat, **274,** 61
- AE2 gene
  - molecular cloning and genomic organization (mouse), **276,** 117
  - tissue-specific N-terminal isoforms from overlapping alternate promoters (human), **267,** 228
- Aequorin
  - apoprotein, in monitoring of endoplasmic reticulum protein degradation initiated by loss of ER Ca^{2+}, **268,** 711
- Aerosol-OT
  - reverse micelles, tryptophan octyl ester in, fluorescence emission properties, **277,** 13
- Affinity chromatography
  - cytochrome P450 interactions with drug-metabolizing enzymes, **273,** 1048
  - soluble protein target binding to TentaGel beads, linker properties for optimal display of peptide ligands in, definition by combinatorial chemistry, **269,** 591
  - tranilast-binding protein identification in bovine skin and aorta as 36-kDa microfibril-associated glycoprotein, **270,** 1002
- Agglutination
  - red blood cells by monoclonal antibodies, energy evaluation (human), **277,** 381
- Agglutinin
  - fucose-binding, from legumes, mode of recognition of L-fucose, **268,** 262; *erratum,* **270,** 329
  - Japanese chestnut, complete amino acid sequence, **276,** 23
  - peanut, carbohydrates binding to, role in α-galactosidase stimulation of acetylcholine receptor aggregation in skeletal muscle cells, **270,** 899
- Aggrecan
  - mRNA, regulated by BMP-2, expression by microvascular pericytes, **269,** 172
- Aggregation
  - α-crystallin: correlation of aggregate size and chaperone-like activity with increasing temperature (bovine), **268,** 426

Aging
  brain, acceleration by hippocampal deficiencies of zinc and zinc transporter 3 (rat), **279,** 505
  brain mitochondrial carrier protein-1 and uncoupling protein-2 gene regulation during, analysis (rat), **278,** 691
  α-crystallin modification by kynurenine, cysteine identification as initial site of, **276,** 216
  decreased antisense RNA expression in, association with *de novo* methylation of intronic CpG islands of *Igf2r* (mouse), **274,** 722
  enhancement of mitochondrial permeability transition pore activation (mouse), **273,** 603
  mammalian Sin3A and Sin3B expression during, analysis (rat), **275,** 455
  related decline of osteoprotegerin expression by bone marrow cells cultured in 3D collagen sponges (human), **268,** 669
  related effects of TGF-β on proteoglycan synthesis in articular cartilage (horse), **274,** 467
  senescence-accelerated mouse, related changes in hippocampal protein expression, identification by expression array analysis, **272,** 657
Agouti-related protein
  effect on melanin-concentrating hormone and orexin gene expression after icv injection (mouse, rat), **268,** 88
Agouti signal protein
  immunohistochemical localization in murine skin, **270,** 176
Agrobacterium tumefaciens
  epsilon sequence enhancing activity, **269,** 508
[*Ah*] battery genes
  constitutive expression in liver, effect of targeted knockout of *CYP1a1* gene (mouse), **267,** 184
AIDS
  disease progression, promotion by Nef and Vpr proteins, **267,** 677
  Kaposi's sarcoma pathology, relevance of response of KS cells of different origins to HIV-Tat through Flk-1/KDR, **273,** 267
AILIM/ICOS
  identification and characterization as T cell costimulatory molecule related to CD28/CTLA4 family (rat), **276,** 335
Air exposure
  promotion of fibroblast growth with increased expression of MAP kinase cascade, **270,** 961
Air–liquid interface
  promotion of gastric surface mucous cell differentiation in culture (mouse), **271,** 741
Airway cells
  chloride secretion, inhibition by imipramine via desensitization of β-adrenergic receptors (Calu-3 cells), **274,** 620
  epithelial, MUC2 gene and protein expression, regulatory effects of IL-1β (human), **274,** 112
  Na^+-K^+-pump activity, regulation by CFTR-mediated anion conductance (Calu-3 cells), **274,** 230
Airways
  antigen-induced eosinophil recruitment into, effect of JAK2 blockade by tyrphostin AG-490 (mouse), **270,** 209
Ajoene
  antithrombotic activity, minimum functionality required for, **273,** 421
A-kinase anchoring proteins
  phosphorylation by calmodulin protein kinase of rabbit fast-twitch muscle sarcoplasmic reticulum, **279,** 181
Akt
  activation
    induction by heat shock and role in suppression of heat shock-induced apoptosis of NIH3T3 cells, **278,** 306
    by insulin, dependence on phosphatidylinositol 3-kinase in adipocytes (rat), **274,** 845
    during simulated ischemia/reperfusion in cardiac myocytes (rat), **270,** 947
  heat shock-induced caspase-3-independent breakdown (COS-7 cells), **276,** 702
  inhibition, effects on metabolic effects of insulin in rat adipocytes, **268,** 315
  phosphatidylinositol 3-kinase signaling to, mediation of survival in isolated islets of Langerhans (dog), **277,** 455
  phosphorylation
    coordination by PDGF: prevention of v-Ha-Ras-dependent apoptosis (human), **267,** 33
    role in suppression of apoptosis by UVB irradiation (NIH3T3 cells), **279,** 872
  phosphorylation and activity in PC12 cells, effects of anisomycin, **278,** 550
  rapid activation, role in antiapoptotic signaling during liver regeneration (mouse), **279,** 974
  regulation of NF-κB signaling events in suppression of TNF-induced apoptosis (MCF-7 cells), **271,** 342
  role in IGF-I regulation of cardiac fibroblast apoptosis induced by osmotic stress (rat), **273,** 322
  signal transduction, role in TNF-α stimulation of MCP-1 expression (HUVEC), **276,** 791
Akt/FKHRL1 pathway
  activation, mediation of antiapoptotic effects of erythropoietin in primary human erythroid progenitors, **275,** 16
Alanine
  β-Ala moiety in model peptide, collateral existence of *folded* and *extended* conformations in, **273,** 492
Alanyl aminopeptidase, *see* Aminopeptidase N
Albumin
  mRNA, interaction with proteins from rat liver with CCl_4-induced injury, **273,** 261
  nonenzymatically glycated, effect on expression of monocyte chemoattractant protein-1 in vascular smooth muscle cells (rat), **269,** 666
  uptake by cultured endothelial cells, effect of shear stress (pig), **270,** 616
ALCAM
  and E-cadherin, coordinate recruitment to cell–cell contacts by α-catenin, **267,** 870
Alcohol
  stimulation of breast cancer cell invasion and migration, **273,** 448
Alcohol dehydrogenase
  class I, cyclic expression in ethanol-treated male rat, **274,** 684
  class V, complex transcription unit generating C-terminal multiplicity in, characterization (human), **278,** 544
Aldehyde dehydrogenase
  mitochondrial, deficiency, increased risk for late-onset Alzheimer's disease in Japanese with, **273,** 192
Aldehyde oxidoreductase
  biochemical/spectroscopic characterization and X-ray analysis (*Desulfovibrio desulfuricans*), **268,** 745
Aldolase
  AldB gene origin/promoter, overlapping set of elements in, regulation of transcription and autonomous replication (rat), **278,** 760
  muscle, effect on muscle fructose-1,6-bisphosphatase sensitivity to AMP inhibition (rabbit), **275,** 611
Aldose reductase
  gene encoding, disruption of, induction of defect in urinary concentrating ability and divalent cation homeostasis (mouse), **277,** 281
Alkaline phosphatase
  peptide-displaying sensor, antibody-mediated modulation, molecular mechanisms, **275,** 360
Alkaline proteinase
  active site, role of Trp in proximity to His and Cys (*Conidiobolus* sp.), **270,** 910

Alkaloids
  enzymes synthesizing, gene family with similarity to, animal and plant members, **271,** 191
(3*Z*)-Alkenals
  nonenzymatic oxygenation to 4-hydroxy-(2*E*)-alkenals in plant extracts, **277,** 112
Alkylation
  apoptotic cell death induced by, role of RhoB, **268,** 784
Alkyl dibenzothiophenes
  thermophilic enzymes desulfurizing, genes from *Paenibacillus* sp. A11-2 encoding, operon structure and functional analysis, **270,** 81
Alkylphenols
  estrogenic, induction of cell death by inhibition of testis endoplasmic reticulum Ca^{2+} pumps (rat), **277,** 568
Allatostatin
  preprohormone, molecular cloning and genomic organization (*Drosophila melanogaster*), **273,** 1126
Allatostatin receptor
  DAR-2, molecular cloning and genomic organization (*Drosophila melanogaster*), **273,** 571
Allergens
  Asp f 2, deletion mutants, antibody binding (*Aspergillus fumigatus*), **270,** 1128
  Jun a 2, purification, identification, and cDNA cloning (mountain cedar pollen), **275,** 195
  Pen n 13, characterization (*Penicillium notatum*), **269,** 14
Allosterism
  altered subunit communication in subfamilies of trimeric dUTPases, **279,** 534
α_1-protease inhibitor
  functions after S-nitrosylation: inhibition of cysteine protease and antibacterial activity (human), **267,** 918
Alternative splicing
  angiopoietin-2 (chicken), **275,** 643
  caspase-8 long isoform generated by, dominant expression in peripheral blood lymphocytes (human), **272,** 877
  CD1D gene variants in mononuclear cells (human), **276,** 107
  CDK10 mRNAs (human), **276,** 271; *erratum,* **279,** 738
  Cu,Zn superoxide dismutase gene (human), **276,** 52
  DNA polymerase β mRNA, **268,** 1
  dynamin-like protein variants produced by, binding as substrates to glycogen synthase kinase 3β (rat brain), **268,** 893
  estrogen receptor-related receptor γ (mouse), **267,** 532
  fibroblast growth factor receptor 4: soluble-form splice variant expressed in human gastrointestinal epithelial cells, **267,** 658
  gar-1 (*Caenorhabditis elegans*), **268,** 354
  kallikrein-like protease isoform TLSP/hippostasin produced by, expression in human brain and prostate, **272,** 205
  melastatin mRNAs in human melanoma cells, **279,** 53
  platelet collagen receptor glycoprotein VI (human), **277,** 27
  and polyadenylation, competition: 3′-end generation in class V alcohol dehydrogenase gene (human), **278,** 544
  Vme1$^+$ gene, **279,** 884
  WNT-2B/WNT-13 gene (human), **275,** 209
Aluminum
  effect on phospholipase C-δ1 levels in brain (rat), **271,** 620
Alveolar epithelium
  differential expression of apoptosis factors, redox sensitivity and role of NF-κB-selective targeting (rat), **271,** 257
  immunomodulation by thymulin–Zn^{2+} (human), **274,** 500
Alzheimer's disease
  affected brain, role of amyloid β protein starting pyroglutamate at position 3 (human), **276,** 422
  β-amyloid-42 implicated in, oligomerization and toxicity, **273,** 1003
  analysis with V642I amyloid precursor protein-inducible neuronal cells **274,** 445
  elevated frequency of point mutations in mitochondrial DNA in brain, **273** 203
  inhibition of amyloid β fibril formation *in vitro* by HDL, **270,** 62
  late-onset, risk in Japanese, increase with mitochondrial aldehyde dehydrogenase deficiency, **273,** 192
  NADPH oxidase activation in brain, **273,** 5
  oxidized protein levels in patient plasma, **275,** 678
  reduction of neuroendocrine-specific protein C in brain of patients with, **276** 329
  sodium azide inhibition of phosphoinositide-mediated calcium response t serotonin stimulation in platelets (human), **274,** 472
Amadori adducts
  effect on monocyte chemoattractant protein-1 expression in vascular smoot muscle cells (rat), **269,** 666
Amidation
  precursor peptide for production of recombinant salmon calcitonin, **267,** 36
Amine oxidase (copper-containing)
  in serum, modulation by H_2O_2 (bovine), **267,** 174
Amino acid composition
  quasi-sequence-order effect incorporation for prediction of protein subcellular locations, **278,** 477
Amino acids
  in ammodytoxins, region 115–119, role in neurotoxicity (*Vipera ammodyte ammodytes*), **276,** 1229
  neurotransmitter, hypoxia/hypoglycemia-induced release from rat brain cortical slices, effects of preconditioning, **276,** 134
  usage in proteins from *Giardia lamblia,* **279,** 996
Amino acid transporter
  adipocyte, differential expression
    regulation, major DNA motif for, SP1-like *cis*-element identification as **271,** 91
    transactivation by SP1 and SP3 during 3T3-L1 preadipocyte differentiation, **271,** 100
Amino acid transporter A
  ATA1 subtype, cloning from placenta and functional expression (human) **273,** 1175
(α-Aminoalkyl) diphenylphosphonates
  as inactivators of chymotrypsin, cathepsin G, and neutrophil elastase (human), **276,** 1235
γ-Aminobutyric acid
  hypoxia/hypoglycemia-induced release from rat brain cortical slices, effect of preconditioning, **276,** 134
4-(2-Aminoethyl)-benzenesulfonyl fluoride
  direct inhibition of *in vitro* phospholipase D activity, **273,** 302; *erratum* **274,** 880
p-Aminohippuric acid
  transport at renal apical membrane, mediation by human inorganic phosphate transporter NPT1, **270,** 254
δ-Aminolevulinic acid
  transport in *Saccharomyces cerevisiae,* effects of porphyrin biosynthesi intermediates, **272,** 946
Aminopeptidase N
  association with raft membrane microdomains in monocytes, **269,** 143
  gene transcription in crypt–villus axis of small intestine, negative regulatio by AT motif binding factor 1-A, **267,** 91
  inhibition, suppression of activation-dependent induction of glycogen synthase kinase-3β in human T cells, **273,** 62
Ammodytoxin A
  amino acid region 115–119, role in neurotoxicity (*Vipera ammodytes ammodytes*), **276,** 1229

- AMP
  - fructose-1,6-bisphosphatase sensitivity to inhibition by, decrease by muscle aldolase (rabbit), **275,** 611
- AMP-activated protein kinase
  - activation by stimulation of G_q-coupled receptors (CHO cells), **276,** 16
  - activity in skeletal muscle, isoform-specific increase induced by exercise (human), **273,** 1150
- Amylase
  - secretion from pancreatic acini, effects of myosin light chain kinase inhibitor wortmannin (rat), **269,** 792
- Amylin receptor phenotype
  - generation from calcitonin receptor gene product, requirement of multiple RAMP domains, **267,** 368
- Amyl nitrite
  - xanthine oxidase-catalyzed reduction to nitric oxide, **270,** 880
- Amyloid
  - cardiac, formation in patients with familial amyloid polyneuropathy, role of wild-type transthyretin, **274,** 702
- Amyloid fibrils
  - creation from native and Arg124Cys mutated βIGH3$_{(110-131)}$ peptides and relevance for lattice corneal amyloid dystrophy type 1, **273,** 649
- β-Amyloid peptide
  - assembly into fibrils, inhibition by HDL, **270,** 62
  - formation, inhibitors based on β-secretase cleavage site, **268,** 133
  - interaction with plasma proteins and erythrocytes, implications for quantitation in plasma (human), **268,** 750
  - secretion by wild-type and Swedish mutated βAPP-expressing HEK293 cells, effects of Rab 11 overexpression or constitutively active Rab11, **275,** 910
- Amyloid precursor protein
  - sAPPα, secretion by wild-type and Swedish mutated βAPP-expressing HEK293 cells, effects of Rab 11 overexpression or constitutively active Rab11, **275,** 910
  - V642I mutant, neuronal cells with inducible expression of, for studies of Alzheimer's disease, **274,** 445
- β-Amyloid precursor protein
  - normal processing in human platelets, role of calpain, **273,** 170
  - β-secretase cleavage site, inhibitors of β-amyloid formation based on, **268,** 133
  - Swedish-mutated, neuronal metabolism, effects of estradiol, **271,** 82
  - wild-type and Swedish mutated HEK293 cells expressing, secretion of sAPPα and Aβ, effects of Rab 11 overexpression or constitutively active Rab11, **275,** 910
- β-Amyloid protein
  - Aβ42
    - aggregated, esterase-like and proteolytic activities, **267,** 733
    - oligomerization and toxicity, **273,** 1003
    - production, increase by presenilin 1 C92S mutation, **277,** 261
  - intracellular, oxidative stress-induced increase in NT2 cells, **268,** 642; *erratum,* **272,** 309
  - starting pyroglutamate at position 3, in Alzheimer's disease brain (human), **276,** 422
- Amyotrophic lateral sclerosis
  - cell lines from patients, elevated MnSOD levels in, **273,** 359
  - Cu,Zn superoxide dismutase gene from patients, splice variant transcripts, **276,** 52
  - *SOD1* mutations associated with, role of dominant positive and negative effects, **276,** 1056
  - transgenic murine model, survival, effect of janus kinase-3 inhibitor WHI-P131, **267,** 22
- Anabolic response
  - bone marrow stromal cells to low-intensity pulsed ultrasound (mouse ST2 cells), **268,** 216
- Anandamide
  - inhibition of fatty acid amide hydrolase by activation of lipoxygenase pathway of arachidonate cascade, **278,** 576
  - levels in anterior pituitary gland, sex steroid influence (rat), **270,** 260
- Anaphase-promoting complex
  - mammalian, negative regulation in mitotic checkpoint by Cdc20/Fizzy phosphorylation, **271,** 299
- Anchorage
  - MCF-7 cells deficient in, response to IGF-I, and transduction of IGF-I signal, **272,** 111
- Anchoring protein
  - phosphorylation by calmodulin protein kinase of rabbit fast-twitch muscle sarcoplasmic reticulum, **279,** 181
- Androgen receptor
  - active allele loss in gene for, role in loss of receptor expression in female breast cancer, **275,** 488
  - endogenous levels in human HepG2 and LNCaP cells, effect of proteasome inhibition, **276,** 144
  - signaling in prostate carcinoma cells, regulation by protein inhibitor of activated STAT3, **278,** 9
- Androgens
  - induction of lipogenesis, associated increased Spot 14 expression in T47-D breast cancer cells, **269,** 209
  - induction of NAD$^+$-linked 15-hydroxyprostaglandin dehydrogenase expression in human prostate cancer cells, **276,** 77
- Angiogenesis
  - anti-angiogenic potential of silymarin, **276,** 371
  - effect of caveolin-1 knockdown by antisense oligonucleotides *in vitro* and *in vivo,* **276,** 756; *erratum,* **279,** 305
  - *ex vivo* rat aortic ring assay, microvessel formation in, inhibition by endostatin, **268,** 183
  - hypoxia-induced, in hepatocarcinogenesis, mediation by hepatitis B virus X protein, **268,** 456
  - impairment by chronic IFN-α exposure (HeLa cells), **277,** 410
  - inhibition by suppression of Rho signal transduction pathway (human), **269,** 633
  - modulators of, expression in cell lines positive for HPV-16 oncoproteins, **277,** 55
  - regulation by thromboxane A_2, **267,** 245
  - role of endothelin ET-1 (1–31) (pig), **275,** 595
  - tumor, role of ARNT2, **273,** 231
- Angiogenin
  - internalization and processing by aortic smooth muscle cells *in vitro* (human), **267,** 719
- Angiopoietin-2
  - expression by human endometrial endothelial cells, regulation by hypoxia and inflammation, **275,** 159
  - genomic structure and alternative splicing (chicken), **275,** 643
  - upregulation in human umbilical vein endothelial cells by TNF-α, **269,** 361
- Angiostatin
  - Kringle 1–5-containing fragments, proteinase converting human plasminogen to, expression by glioma BT325 cells, **278,** 821
- Angiotensin
  - cardiomyocyte apoptosis induced by, effect of IGF-1, **270,** 1029
- Angiotensin II
  - activation of vascular smooth muscle cells, effects of thiazolidinediones (rat), **273,** 1144
  - AT1 receptor internalization induced by, enhancement in vascular smooth muscle cells by ATRAP (rat), **279,** 938
  - delayed STAT3 activation induced by, role of autocrine/paracrine secretion of IL-6 family cytokines (mouse, rat), **269,** 798
  - effect on calponin expression in cultured vascular smooth muscle cells (rat), **279,** 965

Angiotensin II (*continued*)
  induced changes in IP_3 content and PKC activity in anterior pituitary, effects of E_2 and progesterone (rat), **275,** 7
  modulation of ion transport in proximal tubules through CYP metabolites (rat), **272,** 423
Angiotensin-converting enzyme inhibitor
  effects on calcineurin pathway and hypertrophic process in heart (rat), **273,** 347
Angiotensin-II subtype 2 receptor
  agonist CGP-42112, inhibition of catecholamine biosynthesis in cultured adrenal medullary chromaffin cells (pig), **272,** 544
9-Anilinoacridines
  topoisomerase II-inhibiting, induction of DNA cleavage (*Plasmodium falciparum*), **269,** 406
Anilinonaphthalene sulfonate
  inactivation of vesicular stomatitis virus, **275,** 955
Animal cap
  anterior neural markers in, induction by *SIP1* gene (*Xenopus laevis*), **271,** 151
Anion channels
  in gallbladder epithelial cells, high permeability to HCO_3^- (guinea pig), **276,** 312
  voltage-dependent, role in GSH transport into mitochondria (yeast), **276,** 940
Anion exchanger gene
  AE2, molecular cloning and genomic organization (mouse), **276,** 117
Anisomycin
  effects on pro- and antiapoptotic mechanisms in PC12 cells, **278,** 550
Ankyrin repeat
  and double BTB/POZ domain, human gene with, molecular cloning and characterization, **273,** 991
Annealing
  DNA, capillary electrophoresis method, **272,** 251
Annexin
  binding to chloroplast outer surface via sulfolipid (spinach), **272,** 519
Anoikis
  antianoikic function of trefoil factor 3 on intestinal epithelial IEC-18 cells, signaling by NF-κB, **274,** 576
Anterior pituitary
  cannabinoid CB_1 receptor mRNA and endocannabinoid levels, influence of sex steroids (rat), **270,** 260
  inositol 1,4,5-trisphosphate content and PKC activity, AngII-induced changes, effects of E_2 and progesterone (rat), **275,** 7
Anthranilic acid
  formation by degradation of *o*-nitrobenzoate by *Arthrobacter protophormiae,* **267,** 236
Antiangiogenesis
  myoepithelial-specific CD44 shedding related to, mediation by putative chymotrypsin-related sheddase, **279,** 116
  silymarin potential for, **276,** 371
Antibiotic resistance
  Klebsiella pneumoniae, membrane permeability modifications involved in, **274,** 496
Antibiotics
  effects on induction of cytochromes P450 1A1, 1A2, 3A4, 2C9, and 2C19 and MDR-1 and MRP-1 in human hepatocytes, **273,** 333
Antibodies, *see also* Monoclonal antibodies
  agouti signal protein, localization of ASP in murine skin using, **270,** 176
  anti-band 3, binding to apoptotic Jurkat cells via sialylated poly-*N*-acetyllactosaminyl saccharide chains, **275,** 412
  anti-dsDNA IgG autoantibodies, binding properties, determination by light chain (human), **271,** 240
  anti-KLM-1 autoantibodies, and *CYP2D6* polymorphisms, in patients wit chronic hepatitis C, **270,** 922
  anti-orexin, inhibition of food intake after central injection in fasted rats **267,** 527
  anti-PorA, elicitation by immunization with peptides conjugated to P64k **277,** 51
  Bcl-2, induction of hemoglobin release by red blood cells loaded with *i vitro* translated Bcl-2 and cleaved fragment, **270,** 816
  binding by deletion mutants of *Aspergillus fumigatus* allergen Asp f 2, **270** 1128
  in characterization and quantitation of phospholamban and its phosphory lation state, **267,** 40
  Fab–antibody conjugate, targeting of recombinant adenovirus vector to HCC cells with, **272,** 497
  intact, baculoviral display using synthetic IgG-binding domains, **275,** 84
  mediation of modulation of peptide-displaying enzyme sensors, molecula mechanisms, **275,** 360
  natural
    affinity maturation using chain shuffling method, **275,** 553
    light chain of, dominant role in protein antigen binding, **268,** 390
  neutralizing, against Fas ligand, effect on EAE progression after intratheca administration (mouse), **275,** 164
  recombinant, expression in *Escherichia coli,* **275,** 553
  tumor vasculature-targeted, TES-23, recognition of human activated CD44 **269,** 671
Anticancer drugs
  8-chloro-cAMP: inhibition of cell proliferation and induction of apoptosi (SH-SY5Y cells), **273,** 404
Antidepressant-related gene 34
  RING-H2 finger motif-containing, induced after chronic sertraline treat ment, identification (rat brain), **278,** 150
Antidepressants
  chronic treatement with, gene with RING-H2 finger motif induced after identification in rat brain, **278,** 150
Antifungal activity
  mungin isolated from mung bean seeds, **273,** 1111
  quinqueginsin isolated from American ginseng roots, **269,** 203
Antifungal proteins
  chitinase-like
    cysteine-deficient, purification from inner shoots of chive *Allium tubero sum,* **279,** 74
    dolichin isolation from *Dolichos lablab,* **269,** 155
  heterologous CW-1 and CW-2, purification from cheeseweed and charac terization, **279,** 669
Antigenicity
  chimeric synthetic peptides based on HTLV-1 antigens, **276,** 1085
  lower, engineering of mini-trichosanthin with, **270,** 279
Antigen-presenting cells
  CD95 ligand expression, effect on T cell cytotoxicity (mouse), **272,** 395
  Leishmania major-infected mouse, role of PSAPs in lysosome, **276,** 693
Antigen receptor
  induced apoptosis in CH31 B cells, rescue (mouse), **276,** 417
Antigens
  binding of, dominant role of light chain of natural antibody, **268,** 390
  induced eosinophil recruitment into mouse airways, effect of JAK2 blockad by tyrphostin AG-490, **270,** 209
  lipid component of lipoprotein from *Borrelia burgdorferi,* presentation vi human dendritic cells, **267,** 897
  ovarian cancer-associated, O-acetylated Sialyl-Tn in, analysis, **271,** 281
  peptide binding to MCH class I protein, NMR study, **278,** 609
  tyrosine hydroxylase identification as autoantigen in autoimmune polyen docrine syndrome type I (human), **267,** 456

Antiherpetics
  C5-substituted 2′-deoxyuridines, ^{1}H NMR conformational study, **272,** 64
Anti-HIV activity
  antiviral agent targeted to HIV-1 gp41 core, role of salt bridge from agent to N-terminal coiled coil of gp41, **270,** 153
  quinqueginsin isolated from American ginseng roots, **269,** 203
Anti-inflammatory activity
  peptide mimicking sialyl-Lewis^a, **268,** 106
Anti-inflammatory response
  in vivo, resulting from inhibition of MAP kinase kinase (mouse ear), **268,** 647
Antilipolytic effect
  insulin, in rat adipocytes, effect of PKB inhibition, **268,** 315
Antimicrobial peptides
  broad-spectrum, kassinatuerin-1, isolation from skin of Hyperoliid frog *Kassina senegalensis,* **268,** 433
  high-level expression in *E. coli* by fusion partner reinforcing formation of inclusion bodies, **277,** 575
  Korean native goat lactoferrin, domain essential for activity of, identification, **268,** 333
  Vibrio fischeri resistance to, *sap* genes required for, identification and analysis, **269,** 743
Antimycobacterial drugs
  screening with bioluminescent *Mycobacterium aurum* expressing firefly luciferase, **279,** 457
Antioxidant/electrophile response element
  binding of nuclear proteins, activation in vascular smooth muscle cells by benzo[*a*]pyrene (mouse), **267,** 12
Antioxidants
  catechin monomer and procyanidin activity *in vitro* (cocoa), **276,** 945
  content in LDL, effect on kinetics of copper-induced LDL oxidation, **268,** 818
Antiprotease activity
  TFPI-2 (HT-1080 cells), **276,** 1286
Antisense *c-jun*
  inhibition of apoptosis induced by H_2O_2 under serum deprivation (F-MEL cells), **271,** 747
Antisense DNA
  deafness dystonia peptide 1 cDNA, effects on neuronal differentiation of embryonal carcinoma P19 cells, **273,** 759
  sense codon-dependent introduction of unnatural amino acids into multiple sites of protein, **270,** 1136
Antisense oligonucleotides
  inhibitory effects in experimentally infected mouse model of influenza A virus, **279,** 158
  knockdown of caveolin-1, effect on angiogenesis *in vitro* and *in vivo,* **276,** 756; *erratum,* **279,** 305
  selective inhibition of cyclooxygenase-2, effect on induction of adjuvant-induced arthritis (rat), **269,** 415
Antisense RNA
  artificial *lacZ* regulation by, comparison in fission yeast and human cells, **268,** 8
  decreased expression in aged mice, association with *de novo* methylation of intronic CpG islands of *Igf2r,* **274,** 722
Antisense techniques
  Ewing sarcoma-related tumor inhibition by EWS Fli-1 antisense nanocapsules (mouse), **279,** 401
  tumor therapy by targeting of Polo-like kinase 1 mRNA (human), **269,** 352
Antithrombin III
  identification as major heparin-binding protein in porcine aqueous humor, **272,** 1
  interaction with heparan sulfate on biochip, effect of enzymatic modification of HS, **276,** 292
Antitumor activity
  macrophages, selective activation by muramyl dipeptide delivery with polynucleotide-based carrier recognized by scavenger receptors, **268,** 772
  TFPI-2 (HT-1080 cells), **276,** 1286
Antiviral agent
  targeted to gp41 core, salt bridge to N-terminal coiled coil of gp41, role in anti-HIV-1 activity, **270,** 153
Antiviral effects
  interferon enhancement of priming effect by intermittent treatment, **278,** 599
Antrum pylori
  gastrin and somatostatin synthesis and secretion, effect of achlorhydria, analysis in carboxypeptidase E-deficient mice, **267,** 638
Anxiolytic properties
  6,3′-dibromoflavone and 6-nitro-3′-bromoflavone (rat), **273,** 694
Aorta
  in apolipoprotein E-deficient mice, oxidized macrophages in atherosclerotic lesion from, detection of lipid peroxides and oxysterols, **269,** 775
  ex vivo adenovirus gene transfer into, facilitation by hydrostatic pressure (rabbit), **274,** 422
  hypercholesterolemic
    LOX-1 expression (rabbit), **276,** 1100
    protective effect of 17β-estradiol, role of cyclooxygenase 2 (rabbit), **275,** 696
  tranilast-binding protein identification as 36-kDa microfibril-associated glycoprotein (bovine), **270,** 1002
Aortic endothelial cells
  glutathione peroxidase expression, enhancement by shear stress (bovine), **273,** 66
  hypotonic stress-induced NO production, dependence on endogenous ATP (bovine), **274,** 736
  lectin-like oxidized LDL receptor-1 expression, increase by TGF-β_1 (bovine), **272,** 357
  LPS-induced expression of ICAM-1, suppression by cerivastatin via Rho GTPase (bovine), **269,** 97
  mitochondrial membrane potential and albumin uptake *in vitro,* effect of shear stress (pig), **270,** 616
  proliferation stimulated by bFGF and apoptosis, effects of human HGF kringle 1 domain (bovine), **277,** 186
Aortic rings
  ex vivo angiogenesis assay, microvessel formation in, inhibition by endostatin (rat), **268,** 183
AP-1
  activation
    by angiotensin II in vascular smooth muscle cells, effects of thiazolidinediones, **273,** 1144
    in bronchial epithelial cells, suppression by erythromycin (human), **267,** 124
    in HEK293 cells, regulation by nucleoredoxin, glutaredoxin, and thioredoxin, **274,** 177; *erratum,* **275,** 247
    in intracellular oxidative environment of IL-2-stimulated BA/F3β cells, effect of Ref-1 induction, **278,** 462
  endogenous, inhibition of, effects on oncogenic potential and normal growth in human tumor cell lines, **278,** 97
  neurotensin-mediated binding in pancreatic cancer cell line MIA PaCa-2, **269,** 704
  NFAT/AP-1 site in human IL-4 promoter, characterization, **270,** 1016
  and NF-κB, concurrent activation by CMV IE1, role in IE1 upregulation of IL-8 gene expression, **279,** 298
  and PEA3, role in constitutive IL-8 gene expression in hepatoma cells, **279,** 166

- AP-2
  - isoform γ, effect on cystatin A gene transcription in keratinocytes (human), **278,** 719
  - repression of hepatocyte growth factor gene promoter, **272,** 882
- Apaf-1
  - transduction, induction of apoptosis of A-172 cells resistant to p53-mediated apoptosis, **272,** 667
- APC protein
  - requirement for initiation of neuronal differentiation in PC12 cells, **279,** 685
- APCs, *see* Antigen-presenting cells
- Apical membrane
  - renal, *p*-aminohippuric acid transport mediated by human inorganic phosphate transporter NPT1, **270,** 254
- Apigenin
  - suppression of vitamin D receptor expression and vitamin D responsiveness in human keratinocytes, **268,** 237
- Apo2 ligand, *see* TRAIL
- Apoaequorin
  - in monitoring of endoplasmic reticulum protein degradation initiated by loss of ER Ca^{2+}, **268,** 711
- Apocytochrome *c*
  - binding to GroEL, electrostatic interactions in, fluorescence correlation spectroscopic study, **267,** 300
- Apoglucose dehydrogenase
  - thermophilic, as nonconsuming glucose sensor, **274,** 727
- Apo-α-lactalbumin
  - disulfide-reduced, binding to GroEL, electrostatic interactions in, fluorescence correlation spectroscopic study, **267,** 300
- Apolipoprotein A-I
  - cholesterol efflux mediated by, regulation by LXR (RAW 264.7 cells), **274,** 794
  - effect on release of TNF-α, IL-1β, and IL-8 by human neutrophils, **268,** 405
  - ligand domain interacting with high-affinity binding sites on HepG2 cells, **267,** 541
- Apolipoprotein B
  - enhanced secretion by transfected HepG2 cells overexpressing fibrinogen, **273,** 377
  - mRNA editing, increase by calcium, **277,** 221
  - translocation status in presence of MTP inhibitor (HepG2 cells), **276,** 1035
- Apolipoprotein B48
  - preferential translation over B100 in cells with increased endogenous Apo B mRNA, **273,** 1156
- Apolipoprotein B100
  - in LDL, iron-mediated oxidation of Pro and Arg side-chain residues, 5-hydroxy-2-aminovaleric acid as specific marker, **270,** 852
- Apolipoprotein CII
  - mutation causing familial chylomicronemia, identification in APOE-CI-CIV-CII gene cluster (human), **273,** 1084
- Apolipoprotein CIV
  - mutation causing familial chylomicronemia, identification in APOE-CI-CIV-CII gene cluster (human), **273,** 1084
- Apolipoprotein D
  - expression in murine model of singlet oxygen-induced cerebral stroke, **268,** 835
- Apolipoprotein E
  - accelerating effect on amyloid β fibril formation, inhibition by HDL, **270,** 62
  - *APOE-ϵ4,* ALDH2 deficiency with, synergistic increased risk of late-onset Alzheimer's disease in Japanese, **273,** 192
  - expression in murine model of singlet oxygen-induced cerebral stroke, **268,** 835
  - mice deficient in Apo E
    - atherosclerotic lesion, protein dityrosine in, immunochemical detection, **275,** 11
    - oxidized macrophages from, detection of lipid peroxides and oxysterols, **269,** 775
- Apolipoprotein E4
  - receptor-binding domain peptide, induction of neuronal cell apoptosis, role of LDL receptor-related protein, **278,** 633
- Apomine
  - antiproliferative and preapoptotic activities, **270,** 240
- Apomorphine
  - upregulation of synthesis of NGF and GDNF in cultured mouse astrocytes, **272,** 18
- Apoptosis, *see also* Cell death
  - A-172 cells resistant to p53-mediated apoptosis, induction by transduction of Apaf-1 or caspase-9, **272,** 667
  - during acute gastritis induced by *Helicobacter pylori* lipopolysaccharide, role of endothelin-converting enzyme-1 upregulation (mouse), **267,** 801
  - alkylation-induced, role of RhoB, **268,** 784
  - antiapoptotic effects of erythropoietin in primary human erythroid progenitors, mediation by activation of Akt/FKHRL1 pathway, **275,** 16
  - antiapoptotic signaling during liver regeneration, role of rapid activation of protein kinase B/Akt (mouse), **279,** 974
  - antigen receptor-induced, in CH31 B cell rescue (mouse), **276,** 417
  - aortic endothelial cells, induction by human HGF kringle 1 domain (bovine), **277,** 186
  - in articular cartilage, effects of ceramide (rabbit), **267,** 438
  - associated protein Grb3-3, upregulation in HIV-1-infected human $CD4^+$ lymphocytes, **276,** 362
  - attenuation by human telomerase reverse transcriptase expressed in rabbit lens epithelial cells, **278,** 503
  - axin-induced, role of JNK activation and β-catenin downregulation (CHO cells), **272,** 144
  - Bax-σ role, **270,** 868
  - B cell line CESS, induction by NGF withdrawal via p38 MAPK activation and Bcl-2 phosphorylation, **278,** 753
  - Bcl-2 protein effects (hamster), **275,** 899
  - BHK21 cells, effect of N-linked glycosylation inhibition (hamster), **276,** 965
  - Burkitt's lymphoma Mutu I cells by fenretinide accompanied by reduced bcl-2 expression, **276,** 1295
  - cardiomyocytes
    - osmotic stress-induced, regulation by insulin-like growth factor-1, **270,** 1029
    - prevention by 17β-estradiol (rat), **268,** 192
    - prevention by IGF-1 *in vitro,* role of ERK and PKC (rat), **273,** 736
  - caspase-dependent, in THP-1 cells exposed to oxidized LDL, **273,** 948
  - CD95/Fas-induced, Jurkat T cells rescued by caspase inhibition from, functional characterization, **270,** 1009
  - cell-free system, caspase-9 in, effect of baculovirus P35 protein (human), **276,** 855
  - in central nervous system, mediation by Tat *in vivo* (rat), **267,** 252
  - c-Myc and s-Myc-mediated, differential role of c-Jun N-terminal kinase and p38 MAP kinase pathway, **267,** 221
  - cytochrome *c*-dependent, induction by hydroxytyrosol (HL-60 cells), **278,** 733
  - in dorsal lateral geniculate nucleus after monocular deprivation, role of glutamate signaling, NO production, and PARP activation (rat), **278,** 360
  - enhancement by redox-inactive thioredoxin in WEHI7.2 cells, **274,** 136
  - epigallocatechin-3-gallate-mediated, in human chondrosarcoma cells, role of caspase-3, **270,** 793
  - erythroleukemia and neuroblastoma cells, induction by activation of lipoxygenase isozymes (human), **272,** 345
  - escape from, after prolonged serum deprivation, association with $Bcl-x_L$ regulation of mitochondrial death pathway (MDCK cells), **277,** 487

fluorescein fluorescence hyperpolarization as early kinetic measure (mouse thymocytes), **268,** 155
genes regulating, shear stress-dependent expression in human umbilical vein endothelial cells, **278,** 740
genistein-induced, in RPE-J cells, role of opening of mitochondrial permeability transition pore, **276,** 151
in gliomas, induction by IκB combined with adenovirus-mediated caspase 8 transfer (human), **271,** 544
glomerular cells, inhibition by quercetin *in vitro* and *in vivo* (rat), **279,** 629
glucocorticoid-induced
  in lymphocytes, review, **279,** 307
  resistance in thymocytes from mice expressing T cell receptor transgene, **276,** 189
gp120-induced, in neocortex, role of cyclooxygenase-2 and prevention by NMDA receptor antagonists and U-74389G (rat), **274,** 664
heat shock-induced, suppression by heat shock-induced Akt activation in NIH3T3 cells, **278,** 306
hematopoietic cells, induced by cytokine deprivation, Ras-dependent signals preventing, **267,** 449
HIV chronically infected cells, selective induction by adenine *in vitro,* **273,** 1025
hydrogen peroxide-induced, under serum deprivation, inhibition by antisense c-*jun* in F-MEL cells, **271,** 747
implications of evidence for carboxyl methylation of nuclear lamins in pancreatic β cells, **268,** 249
induced, luteinized granulosa cells, role of mitochondria and caspases (human), **269,** 542
induction
  by apomine in HL-60 cells, **270,** 240
  by 8-Cl-cAMP (SH-SY5Y cells), **273,** 404
  by conjugated eicosapentaenoic and docosahexaenoic acids in tumor cells *in vitro,* role of lipid peroxidation (human), **270,** 649
  by degraded DNA lipotransfection (Rat-1 cells), **270,** 406
  by DNA in electroporated U937 cells, **270,** 94
  by estrogenic alkylphenols by inhibition of testis endoplasmic reticulum Ca^{2+} pump (rat), **277,** 568
  by glibenclamide in RINm5F cells via sustained enhancement of Ca^{2+} influx, **271,** 422
  by peroxisome proliferator activated receptor-γ agonists: inhibition of lung cancer cell growth (human), **270,** 400
  by pyrrolidine dithiocarbamate via cytochrome *c*-dependent mechanism (HL-60 cells), **268,** 942
  by all-*trans*-retinoic acid and C2-ceramide treatment in rat stromal–vascular cultures, **270,** 76
inhibitors of, effects on experimental autoimmune encephalomyelitis (mouse), **267,** 826
initiator caspase cleavage by TRAIL death receptor DR4, inhibition by p21$^{WAF1/CIP1}$, **269,** 179
insect cell, induced by baculovirus, inhibition by silkworm hemolymph, **271,** 186
interleukin-2 withdrawal-induced, in BAF-B03 β cells, inhibition by MAJN, **270,** 267
in isolated islets of Langerhans, effect of phosphatidylinositol 3-kinase signaling to Akt (dog), **277,** 455
Jurkat cells undergoing, binding of anti-band 3 antibody via sialylated poly-*N*-acetyllactosaminyl saccharide chains, **275,** 412
leukemia cell, induction by recombinant modulin P48 derived from *Mycoplasma fermentans* (human, mouse), **269,** 284
in liver, reduction in CrmA gene-transfected mice: inhibition of Fas-mediated fulminant hepatitis, **273,** 101
mechanosensitive, in endothelial cells, mediation by integrin-associated protein and thrombospondin-1 (human), **271,** 584
modulation by KIAP (human), **279,** 820
neuroblastoma cells *in vitro*
  effects of intracellular labile zinc levels (human BE(2)-C cells), **268,** 148
  promotion by arsenic trioxide (human), **277,** 179
neuronal cells by receptor-binding domain peptide of ApoE4 (F11, SH-SY5Y cells), **278,** 633
osmotic stress-induced, regulation by insulin-like growth factor 1
  cardiac fibroblasts (rat), **273,** 322
  cardiac myocytes (rat), **270,** 1029
osteoclasts, stimulation by high extracellular calcium levels (rabbit), **268,** 899
oxidative stress-induced, in human PBMCs, protective activity of C60 carboxyfullerene, **277,** 711
p53-induced, thioredoxin peroxidase inhibiting, mouse peroxiredoxin V identification as, **268,** 921
pancreatic beta cells in transgenic mice expressing Reg I, **278,** 368
PC12 cells
  effect of tributyltin, **272,** 557
  mechanisms favoring and opposing, effects of anisomycin, **278,** 550
peripheral blood leukocytes from highly pathogenic SHIV-inoculated monkey, direct detection, **268,** 868
post-G$_2$/M, norcantharidin-induced, role of p53: effects in glioblastoma cell lines, **276,** 278
proapoptotic proteins Bax and Bcl-X$_s$, downregulation in p53-overexpressing hepatocellular carcinomas, **273,** 54
promotion by endogenous oxindoles 5-hydroxyoxindole and isatin, **276,** 379
regulation of N-terminal FAK (HUVEC), **276,** 1068
regulation by PDGF-α-receptor, role of Shf (NIH3T3 cells), **278,** 537
resistance of cervical multidrug-resistant cells to, correlation with reduced caspase-3 activation and enhanced antiapoptotic protein expression (human), **270,** 415
rheumatoid synovial cells, induction by ceramide, mechanism, **269,** 70
ribosomal protein S29 as inducer of, identification in rat thymocytes, **277,** 476
salivary gland cancer cells, induction by 5-fluorouracil via suppression of NF-κB (human), **273,** 1168
in selenite rat model of cataract, **275,** 300
sodium butyrate-induced, in human colon adenoma and cancer cells, effects of bile acids, **273,** 45
staurosporine-induced, in P-glycoprotein-expressing and -nonexpressing cells, **276,** 231
suppression
  by Bcl-2, role of conserved cysteine residues, **277,** 171
  by UVB irradiation: survival signaling via PI3-kinase/Akt pathway (NIH3T3 cells), **279,** 872
susceptibility in colon carcinoma SW480 cells, effects of Fhit protein expression, **278,** 205
synergistic induction by IFN-γ and TNF-α in hepatoma Hepa1-6 cells, **272,** 674
T cells, induction by CD95 ligand expression (mouse), **272,** 395
thymocytes deficient in DNA fragmentation factor 45, activation, associated lack of 50-kb DNA fragments (mouse), **274,** 225
thymocytes undergoing, DNase γ in nuclei of, *in situ* detection (rat), **275,** 343
TSC-22 translocation to nucleus in, transcriptional regulatory activity after, **278,** 659
tumor necrosis factor α-induced
  cell sensitivity to, determination by TRAF2 translocation (HEK293 cells), **272,** 936
  endothelial cells, protective effect of high-density lipoprotein (human), **272,** 872
  enhancement by immobilized arginine-glycine-aspartate (rat), **277,** 293
  lung cancer cell resistance to, role of NF-κB activation, **273,** 140

Apoptosis (*continued*)
    suppression of, NF-κB signaling events in, regulation by PI3-K/AKT (MCF-7 cells), **271,** 342
  v-Ha-Ras-dependent, prevention by PDGF coordination of ERK and Akt phosphorylation (human), **267,** 33
  zinc deficiency-associated increase in embryo (rat), **271,** 250
Apoptosis factors
  differential expression in alveolar epithelium, redox sensitivity and role of NF-κB-selective targeting (rat), **271,** 257
Apoptosis-inducing nucleosides
  from CD57$^+$HLA-DR$^{\text{bright}}$ natural suppressor cell line, activation of caspase-3 in Molt4 cells, **268,** 514
Apoptosis inhibitory domain
  characterization at C-terminus of FE65-like protein (mouse), **276,** 843
APS
  molecular cloning as member of Lnk family adaptor proteins (mouse), **272,** 45
Aqualysin I
  translocation across cytoplasmic membrane in *Escherichia coli,* role of COOH-terminal pro-sequence, **277,** 216
Aquaporin-1
  protein kinase A-dependent phosphorylation, **273,** 328
Aquaporin-4
  immunoreactivity in brain, increase in response to systemic hyponatremia (rat), **270,** 495
Aquaporin-7
  localization in kidney by RT-PCR, immunoblotting, and immunocytochemistry (mouse, rat), **277,** 164
Aquaporin-9
  immunolocalization in liver, epididymis, testis, spleen, and brain (rat), **276,** 1118
Aquareovirus
  grass carp reovirus, genome segments 1, 2, and 3, sequence, **274,** 762; *erratum,* **276,** 391
Aqueous humor
  antithrombin III identification as major heparin-binding protein (pig), **272,** 1
  thrombospondin-1 detection (bovine, human, rat), **267,** 257
Aquifex aeolicus VF5
  thermostable endoglucanase, cloning and characterization, **279,** 420
1-β-D-Arabinofuranosylcytosine
  phosphorylation, subcellular location of, and synergistic effects of hydroxyurea, **276,** 179
Arachidonate
  lipoxygenase pathway converting, activation, in fatty acid amide hydrolase inhibition by 2-arachidonoylglycerol and anandamide, **278,** 576
  regulation of acyl-CoA synthetase 4 expression in steroidogenic tissues (mouse), **274,** 741
Arachidonate 12-lipoxygenase
  platelet-type, inhibition by hinokitol, **275,** 885
Arachidonic acid
  CYP metabolites, role in modulation of ion transport in proximal tubules by angiotensin II (rat), **272,** 423
  induction of cytochrome *c* release from cardiac mitochondria (rat), **277,** 128
  release by P388D$_1$ macrophages, role of cytosolic group IV phospholipase A$_2$ phosphorylation, **267,** 145
  role in phospholipase A$_2$ mediation of bFGF-stimulated fetal skin fibroblast migration without pertussis toxin-sensitive G protein involvement (human), **272,** 648
2-Arachidonoylglycerol
  generation in brain after picrotoxinin administration (rat), **271,** 654
  inhibition of fatty acid amide hydrolase by activation of lipoxygenase pathway of arachidonate cascade, **278,** 576
  levels in anterior pituitary gland, sex steroid influence (rat), **270,** 260
Arginase
  role in regulation of NO production, **275,** 715
Arginine
  iron-mediated side-chain oxidation in LDL apoB-100, 5-hydroxy-2-aminovaleric acid as specific marker, **270,** 852
  pharmacological levels, effects on whole blood viscosity independent of nitric-oxide synthase activity *in vitro* (human), **269,** 687
Arginine-glycine-aspartate
  immobilized, enhancement of TNFα-induced apoptosis (rat), **277,** 293
Argininosuccinate lyase
  gene regulation in rat liver in endotoxin shock, **268,** 221
  role in regulation of NO production, **275,** 715
Argininosuccinate synthetase
  gene regulation in rat liver in endotoxin shock, **268,** 221
  role in regulation of NO production, **275,** 715
ARHGEF3
  isolation in 3p13–21 (human), **273,** 364
ARHGEF4
  isolation in 2q22 (human), **273,** 364
Arimidex
  for aromatase inhibition, synthesis and evaluation, **267,** 356
ARNT2
  role in tumor angiogenesis and neural response to hypoxia, **273,** 231
Aromatase
  in human osteoblast-like cells, effect of IL-1β, **268,** 60
  inhibition in ovarian granulosa cells by troglitazone (human), **271,** 710
  inhibitors of, synthesis and biochemical evaluation using enhanced representation of enzyme active site, **267,** 356
Aromatic polyketides
  unnatural, enzymatic formation by chalcone synthase, **279,** 190
Arp2/3 complex
  role in actin regulatory function of WAVE, **272,** 386
Arsenic trioxide
  inhibition of neuroblastoma cell growth *in vivo* and promotion of apoptosis *in vitro* (human), **277,** 179
Arsenite
  Leishmania donovani resistant to, putative P-glycoprotein expression, downregulation by verapamil, **271,** 615
Artemisinin
  interference with heme metabolism of *Plasmodium,* **268,** 665
Arterial wall
  selenoproteins, purification (rat), **270,** 688
Arteries
  endothelium-dependent relaxation by human leptin, role of NO (rat), **273,** 745
  umbilical, effect of endothelin-1 (1-31) (human), **270,** 622
Arterioles
  pial, NO-dependent dilation in female rat, effects of chronic estrogen depletion and repletion, **269,** 165
Arthritis
  adjuvant-induced, induction, restriction by selective inhibition of cyclooxygenase-2 with antisense oligodeoxynucleotide (rat), **269,** 415
  glucosamine treatment: inhibition of inducible nitric oxide synthesis in RAW 264.7 macrophages and rat, **279,** 234
  rheumatoid
    circulating levels of superoxide dismutase, improvement by NSAID therapy, **270,** 714
    synovial cells from patients with, growth regulation by ceramide, **269,** 70
Arthrobacter protophormiae
  o-nitrobenzoate degradation via anthranilic acid, **267,** 236
  p-nitrophenol biodegradation, kinetics, **274,** 626
  plasmid-encoded degradation of *p*-nitrophenol and 4-nitrocatechol, **270,** 733

- ARVD1 critical region
  - intronless C14orf4 gene with polyglutamine repeat in, detection and characterization (human), **278,** 766
- Aryl hydrocarbon receptor
  - pathway independent of, in CYP1A1 induction by serum, **267,** 572
  - restructured transactivation domain (hamster), **273,** 272
- Aryl hydrocarbon receptor nuclear translocator
  - ARNT2, role in tumor angiogenesis and neural response to hypoxia, **273,** 231
- Ascites tumor cells
  - phosphofructokinase C isozyme from, cloning, expression, and properties (mouse), **271,** 635
- Ascorbate
  - and iron, supplementation, effects on DNA damage (human), **277,** 535
- L-Ascorbate
  - copper-catalyzed oxidation, inhibitory effects of prion protein octapeptide region, **267,** 398
- Ascorbate free radical
  - extracellular reduction by erythrocytes (human), **267,** 118
- Asialoglycoprotein receptor
  - binding to amino-terminal domain of thyroglobulin (rat), **268,** 42
- L-Asparaginase
  - fused with protective ScFv, and protective mechanism, characterization, **276,** 197
- L-Aspartase
  - *Escherichia coli* W, activity enhancement by directed evolution, **276,** 346
- D-Aspartate
  - identification in prolactin-secreting clonal strain of GH$_3$ cells (rat), **276,** 1143; *erratum,* **279,** 305
- Aspartate aminotransferase
  - glycation, associated conformational changes, **277,** 47
- D-Aspartic acid
  - contents in α A-crystallin from normal and age-matched cataractous lenses (human), **278,** 408
- Aspartic protease
  - HIV-1, computational design of cyclic urea inhibitors for improved binding of, **268,** 384
- *Aspergillus fumigatus*
  - allergen Asp f 2, deletion mutants, antibody binding, **270,** 1128
  - antibiotic activity of CRAMP analogues without hemolytic effect, **275,** 904
  - phytase
    - biochemical characterization, **275,** 279
    - enzyme activity, **275,** 759
    - gene expression in *Pichia pastoris* and characterization of recombinant enzyme, **268,** 373
- Asp f 2
  - deletion mutants, antibody binding (*Aspergillus fumigatus*), **270,** 1128
- Aspirin
  - NO-aspirin, NO release from, pathway for, **274,** 255
- Asthma
  - neuronal *NOS1* gene polymorphism associated with, analysis (human), **272,** 391
  - NOS1, NOS2, and NOS3 gene variants associated with, analysis (human), **267,** 761
- Astrocytes
  - brain, trafficking of endosomes containing LDL, digital fluorescence imaging (rat), **269,** 25
  - cortical, septide-sensitive tachykinin binding sites (mouse), **270,** 668
  - estradiol effects on neuronal Swedish-mutated β-amyloid precursor protein metabolism, **271,** 82
  - optic nerve head, myocilin expression (pig), **276,** 1129
  - store-operated Ca^{2+} entry *in vitro,* inhibition by KB-R7943 (rat), **279,** 354
  - synthesis of NGF, BDNF, and GDNF *in vitro,* stimulation by selegiline and desmethylselegiline (mouse), **279,** 751
  - synthesis of NGF and GDNF *in vitro,* upregulation by apomorphine (mouse), **272,** 18
- Astrocytoma cells
  - interleukin-8 gene expression, upregulation by human cytomegalovirus IE1 (U373MG cells), **279,** 298
  - septide-sensitive tachykinin binding sites (U373 MG cells), **270,** 668
- AT1 receptor
  - internalization by vascular smooth muscle cells, enhancement by ATRAP (rat), **279,** 938
- ATA2
  - transport activity during liver regeneration, posttranscriptional regulation (rat), **278,** 729
- Atherosclerosis
  - homocysteine effects on PAI-1 and tPA expression and secretion in vascular endothelial and smooth muscle cells, **272,** 182
  - kallikrein and plasmin effects on HDL-induced cholesterol efflux from foam cells, **277,** 552
  - paraoxonase activity reduction by pro-atherosclerotic diet (rabbit), **269,** 232; *erratum,* **270,** 676
- Atherosclerotic lesion
  - aortic, from apolipoprotein E-deficient mice, oxidized macrophages in, detection of lipid peroxides and oxysterols, **269,** 775
  - ApoE-deficient mice, immunochemical detection of protein dityrosine using novel monoclonal antibody, **275,** 11
- AT motif binding factor 1-A
  - negative regulation of aminopeptidase N gene transcription in crypt–villus axis of small intestine, **267,** 91
- Atomic force microscopy
  - polynucleotide imaging and selective detection, oligonucleotide-capped gold nanoparticles for, **279,** 265
  - single protein mechanical properties, measurement, **272,** 55
- ATP
  - Ca^{2+} release evoked by, effect of calcium-modulating cyclophilin ligand, **276,** 97
  - content of βTC3 insulinoma cells, effects of pH (mouse), **273,** 937
  - endogenous, role in hypotonic stress-induced NO production in endothelium (bovine), **274,** 736
  - hydrolysis by CFTR domain, pharmacology and effects of G551D mutation, **271,** 518
  - mediated release of IL-1 from endothelial cells, modulation by CD39, **270,** 272
  - MRP1 N- and C-terminal domains binding, expression and characterization, **273,** 913
  - synthesis
    - by ATP synthase, kinetic modeling and mechanistic implications, **272,** 629
    - during Ca^{2+} efflux by sarcoplasmic reticulum Ca^{2+}-ATPase, **276,** 35
    - in lipoamide dehydrogenase deficiency (human), **269,** 382
    - in rod outer segments of bovine retina by reversal of disk Ca^{2+} pump, **268,** 625
- ATPase
  - actin-activated activity of myosin, Ca^{2+}-dependent inhibition by S100C, **267,** 77
  - actomyosin activity as, in myocardium, inhibition by *cis*-9,10-methylenehexadecanoic acid (guinea pig), **274,** 533
  - copper-transporting ATP7B, intracellular distribution, effect of copper (Huh7 cells), **275,** 871
  - mammalian MSS1, tissue and cell distribution and formation of complex with basal transcription factors, **279,** 568
  - negative mutants of MDR1 protein, transition state formation (human), **276,** 1314

ATPase 6
  mitochondrial DNA encoding, sense and antisense transcripts, differential expression in fetal and adult brain (pig), **271,** 170
ATPase domains
  induction of mammalian gene expression with, growth suppression of *E. coli* by, **268,** 553
[γ-^{32}P]ATP-[γ]4-azidoanilide
  direct photoaffinity labeling of Kir6.2, **272,** 316
ATP-binding cassette half-transporter
  ABCG2 gene, product of, expression in plasma membrane, **271,** 42
ATP-binding cassette transporters
  ABC1 gene
    5′ end analysis: additional peptide sequence, promoter region, and polymorphisms (human), **271,** 451
    expression, regulation by LXR (RAW 264.7 cells), **274,** 794
  ABCA7
    genomic organization: tandem linkage with HA-1 gene (human), **278,** 782
    with sterol sensitivity, identification in macrophages (human), **273,** 532
  peroxisomal, related to adrenoleukodystrophy protein, interaction with PEX19p (human), **271,** 144
ATP-dependent NAD kinase
  inorganic polyphosphate-dependent (*Micrococcus flavus, Mycobacterium tuberculosis* H37Rv), **276,** 57
ATP synthase
  ATP synthesis with, kinetic modeling and mechanistic implications, **272,** 629
  F_0 subunit c pore, conductance, opposing effects of calcium and cGMP (bovine), **274,** 835
ATRAP
  enhancement of AT1 receptor internalization and inhibition of vascular smooth muscle cell growth (rat), **279,** 938
Atrazine
  derivative, in generation of high-affinity scFvs from single rabbit immunized with multiple haptens, **268,** 398
Atria
  positive inotropic effect of callipeltin A (guinea pig), **279,** 219
Atrial natriuretic peptide
  activation of membrane-bound guanylate cyclase GC-A by, role of guanylate cyclase regulatory protein, **278,** 106
  active processed form, ectopic expression in skeletal myoblasts (mouse), **270,** 637
  upregulation in ventricle of Csx/Nkx2-5 transgenic mice, **270,** 1074
Attacin
  AttC and *AttD* genes, expression and evolution (*Drosophila melanogaster*), **279,** 574
Augmented covariant-discriminant algorithm
  in prediction of protein subcellular locations, **278,** 477
Autoantibodies
  anti-dsDNA IgG, binding properties, determination by light chain (human), **271,** 240
  anti-KLM-1, and *CYP2D6* polymorphisms, in patients with chronic hepatitis C, **270,** 922
Autoantigens
  tyrosine hydroxylase identification as, in autoimmune polyendocrine syndrome type I (human), **267,** 456
Autocatalytic processing
  penicillin acylase precursor, active site for, identification in *E. coli* ATCC11105, **272,** 199
Autocrine motility factor
  expression in Cos7 cells, **273,** 213
Autoimmune hemolytic anemia
  regulation of TWEAK mRNA in, analysis (mouse), **279,** 162
Autoimmune polyendocrine syndrome type I
  tyrosine hydroxylase as autoantigen in, identification (human), **267,** 456
Autoxidation
  oxyhemoglobin, heme degradation during, **273,** 839
AUUUA sequences
  effect on stability of human insulin-like growth factor binding protein-1, **267,** 509
Axin
  apoptosis induced by, role of JNK activation and β-catenin downregulation, **272,** 144
  domain requirement for interaction and function in Wnt signaling (yeast), **276,** 1162
Axons
  regeneration, enhancement by human GDNF (rat), **273,** 902
Azide
  protection of Cu,Zn-superoxide dismutase during peroxidative activity with H_2O_2, **274,** 57
Azide paradox
  role in methylene blue-photosensitized oxidation of cysteine sulfinic acid and other sulfinates, **270,** 782
N-(*p*-Azidobenzoyl)-Adriamycin
  in situ photoaffinity labeling of proteasome, **273,** 928
Azole compounds
  against cholesterol side chain cleavage enzyme, synthesis and biochemical evaluation, substrate–heme complex approach, **275,** 75
Azo reduction
  methyl red by neuronal nitric-oxide synthase, role of FMN, **275,** 752
AZT
  HIV-1 reverse transcriptase resistant to, phosphorylation by casein kinase II *in vitro:* effects on inhibitor sensitivity, **275,** 26

B

Bacillus sphaericus
  mosquito larvicidal binary toxin, functional site identification, **276,** 1048
Bacillus spp.,
  alkaliphilic, oxidatively stable subtilisin-like serine proteases, enzymatic properties, sequences, and evolution, **279,** 313
Bacillus subtilis
  antibiotic activity of CRAMP analogues without hemolytic effect, **275,** 904
  early events of sporulation, effect of *clpP* mutation, **279,** 229
  phytase, metal dependence, **268,** 365
Bacillus thuringiensis
  Cry3Aa cloning, recombinant expression, and insecticidal activity, **279,** 653
Bacillus thuringiensis serovar *shandongiensis*
  noninsecticidal parasporal proteins, preferential cytotoxicity to leukemic T cells, **272,** 218
Bacillus thuringiensis sp. *kurstaki* HD73
  Cry1Ac protoxin, binding to surface proteins in mouse small intestine, **271,** 54
Bacitracin
  protease contaminant in, enzyme destruction by, **273,** 829
Bacteria
  antibiotic activity of CRAMP analogues without hemolytic effect, **275,** 904
  DNA methylation and gene transfer efficiency, **276,** 1261
  genome-wide detection of unknown subtle mutations by combination of MutS and RDA, **268,** 535
Bacteriophage
  scFv display library, in generation of high-affinity scFvs from single rabbit immunized with multiple haptens, **268,** 398
Bacteriophage T4
  ribonucleotide reductase self-splicing intron, restoration of mRNA splicing by second-site intragenic suppressor in, **268,** 359

  thymidylate synthase group 1 intron RNA, self-splicing, inhibition by spectinomycin, **269,** 574
Baculoviral display
  functional scFv and synthetic IgG-binding domains, **275,** 84
Baculovirus
  insect cell apoptosis induced by, inhibition by silkworm hemolymph, **271,** 186
  P35 protein, effect on caspase-9, in cell-free system of apoptosis (human), **276,** 855
Baculovirus expression system
  human brain type I full-length and truncated recombinant inositol 1,4,5-trisphosphate receptor, **273,** 123
  human glial cell-derived neurotrophic factor preparation, **273,** 902
  human lactoperoxidase and myeloperoxidase, **271,** 831
BAG-1
  p33 and p50 isoforms, enhanced expression in cervical multidrug-resistant cells, correlation with resistance to apoptosis (human), **270,** 415
Baicalin
  HIV-1 infection inhibition at viral entry level, **276,** 534
Bak
  shear stress-dependent expression in human umbilical vein endothelial cells, **278,** 740
Balloon angioplasty
  neointima formation induced by, inhibition by YC-1 (rat), **279,** 646
  subsequent expression of IL-1β, IL-1 receptor, and IL-1 receptor antagonist mRNA in carotid artery (rat), **271,** 138
Band 3 protein
  antibodies to, binding to apoptotic Jurkat cells via sialylated poly-*N*-acetyllactosaminyl saccharide chains, **275,** 412
*Ban*I restriction endonuclease
  binding in major groove of DNA, **269,** 35
  properties and secondary structure analysis: identification of putative active site, **279,** 11
Barbiturates
  effects on induction of cytochromes P450 1A1, 1A2, 3A4, 2C9, and 2C19 and MDR-1 and MRP-1 in human hepatocytes, **273,** 333
Barth syndrome
  defective remodeling of cardiolipin and phosphatidylglycerol (human), **279,** 378
Base periodicity
  in genes and genomes, Fourier signals characterizing, vectors of Shannon information from, **268,** 289
Basibranchial region
  expression of cloned thyrotropin receptors (amago salmon), **276,** 258
Basic fibroblast growth factor, *see* Fibroblast growth factor 2
Basophilic leukemia cells
  granule membranes, syntaxin-3 and VAMP-7 expression (rat), **271,** 36
  histamine release, inhibition by epigallocatechin gallate, role of tyrosine phosphorylation pathway (RBL-2H3 cells), **274,** 603; *erratum,* **276,** 391
Bassoon
  membrane association: presynaptic cytomatrix protein, **275,** 43
Bax
  Bax-σ isoprotein, characterization and role in apoptosis, **270,** 868
  in breast cancer cells, progestin effects, **277,** 650
  proapoptotic, downregulation in p53-overexpressing hepatocellular carcinomas, **273,** 54
  shear stress-dependent expression in human umbilical vein endothelial cells, **278,** 740
BC1
  neural RNA, association with Pur α (rat), **277,** 341
B cell linker protein
  identification as binding partner of CIN85 adaptor protein, **278,** 167
B cell receptor
  crosslinking in Burkitt's lymphoma B cell line, associated changes in gene expression, **277,** 124
B cells
  apoptosis, induction by NGF withdrawal via p38 MAPK activation and Bcl-2 phosphorylation (CESS cells), **278,** 753
  CH31, rescue from antigen receptor-induced apoptosis (mouse), **276,** 417
  DT40 cell line, transcription regulation in, individual roles of histone H1 variants (chicken), **268,** 501
  hepatitis B virus preS surface protein-specific receptors, detection in EBV-transformed Wa cells, **277,** 246
  Raji cell line, coculture with Caco-2 cells as human intestinal M-cell model, **279,** 808
  STAT3 and STAT6 expression, augmentation in stimulated cells (human), **277,** 317
Bcl-2
  altered levels in cell lines from ALS patients, **273,** 359
  antiapoptotic action, role of conserved cysteine residues, **277,** 171
  antibodies, induction of hemoglobin release by red blood cells loaded with *in vitro* translated Bcl-2 and cleaved fragment, **270,** 816
  cDNA cloning and functional analysis (hamster), **275,** 899
  degradation, induction in prostate epithelial cells *in vitro* by high levels of zinc ions (human), **279,** 607
  diminution, association with Bcl-xL upregulation and stimulated long-term growth in progestin-treated breast cancer cells, **277,** 650
  induction in PC12 cells, effects of anisomycin, **278,** 550
  phosphorylation, role in induction of apoptosis in CESS B cell line by NGF withdrawal, **278,** 753
  related proteins, effect on matrix metalloproteinase expression in glioma cell line (rat), **273,** 411
  shear stress-dependent expression in human umbilical vein endothelial cells, **278,** 740
Bcl-6
  expression in Mutu I cells, effect of fenretinide, **276,** 1295
B-C loop
  cytochrome P450 2C9, analysis: Arg97 and Arg108 importance in CYP2C9 catalytic function, **270,** 983
Bcl-x_L
  enhanced expression in cervical multidrug-resistant cells, correlation with resistance to apoptosis (human), **270,** 415
  regulation of mitochondrial death pathway, association with escape from apoptosis after prolonged serum deprivation (MDCK cells), **277,** 487
  shear stress-dependent expression in human umbilical vein endothelial cells, **278,** 740
  upregulation by progestin in breast cancer cells accompanied by stimulation of long-term growth, **277,** 650
Bcl-X_s
  proapoptotic, downregulation in p53-overexpressing hepatocellular carcinomas, **273,** 54
Benzoate X receptor β
  molecular cloning and functional characterization (*Xenopus laevis*), **277,** 209
Benzodiazepines
  brain binding sites for, 6-nitro-3′-bromoflavone and 6,3′-dibromoflavone as high-affinity ligands of, identification (rat), **273,** 694
  identification in *Artemisia dracunculus* and *Solanum tuberosum:* endogenous formation in plant tissue, **269,** 290
Benzohydroxamic acid
  complex with vanadate, inhibition of serine amidohydrolases, **274,** 732
Benzo[*a*]pyrene
  activation of nuclear protein binding to antioxidant/electrophile response element in vascular smooth muscle cells (mouse), **267,** 12

- *N*-Benzyloxycarbonyl-Ile-Glu-(*O*-*t*-butyl)-Ala-leucinal
  - effect on sepsis-induced muscle proteolysis *in vivo* (rat), **270,** 215
- BERP
  - binding to α-actinin-4, **267,** 906
- βIGH3 protein
  - native and Arg124Cys mutated βIGH3$_{(110-131)}$ peptides, amyloid fibril creation from, relevance for lattice corneal amyloid dystrophy type 1, **273,** 649
- Betaine aldehyde dehydrogenase
  - renal, kinetics (pig), **269,** 596
- Beta oxidation
  - fatty acids, enzymes involved in, induction by PPARα in heart, kidney, and liver (mouse), **278,** 250
- β-turn
  - short, elastin with, protein A minidomain with, effect of sodium sulfate, **276,** 899
- Bicarbonate
  - anion channel in guinea pig gallbladder epithelial cells highly permeable to, **276,** 312
  - effects on scavenging of peroxynitrite by dietary phenolics, **279,** 692
  - protection of Cu,Zn-superoxide dismutase during peroxidative activity with H_2O_2, **274,** 57
- Bigh3 gene
  - genomic characterization and embryonic expression (mouse), **274,** 267
- Bile
  - phospholipid secretion in, role of nonvesicular transport (rat), **268,** 790
  - from selenium-deficient rat, hepatic endogenous H_2O_2 in, detection, **271,** 699
- Bile acids
  - reduction of apoptosis-inducing effects of sodium butyrate on human colon adenoma cells, **273,** 45
- Bile duct
  - epithelia, expression of homologous rat SULT1C2 sulfotransferases, **272,** 242
- Biliprotein
  - C-phycocyanin from *Spirulina platensis,* selective inhibition of cyclooxygenase-2, **277,** 599
- Binary toxin
  - mosquito larvicidal, functional site identification *(Bacillus sphaericus),* **276,** 1048
- Binding constants
  - DNA–protein, probing by capillary electrophoresis, **272,** 251
- Biochip
  - enzymatic modification of heparan sulfate on, effect on interaction with antithrombin III, **276,** 292
- Biodegradation
  - 3-methyl-4-nitrophenol by *Ralstonia* sp. SJ98, **275,** 129
  - plasmid-encoded, *p*-nitrophenol and 4-nitrocatechol by *Arthrobacter protophormiae,* **270,** 733
- Bioglass 45S5
  - ionic products, effect on human osteoblasts and IGF-II mRNA and protein synthesis, **276,** 461
- Biological media
  - real-time monitoring of oligonucleotides by hybridization assay, **268,** 92
- Bioluminescence
  - firefly luciferase: generation of two low-molecular-weight light-emitting species, **270,** 247
- Bioluminescence assay
  - antimycobacterial drugs: screening with *Mycobacterium aurum* expressing firefly luciferase, **279,** 457
- Biotin
  - and pantothenate, uptake via rat sodium-dependent multivitamin transporter, electrogenic nature, **270,** 836
- N-Biotinylation
  - restoration of hepatitis C virus NS3 protease cofactor NS4A activity i I25A/I29A mutant, **267,** 278
- Bis-(8-anilinonaphthalene-1-sulfonate)
  - inactivation of vesicular stomatitis virus, **275,** 955
- Bis(pentamethylcyclopentadienyl) vanadium dichloride
  - spermicidal activity, boar sperm as model system for study of, **270,** 826
- Bisphenol A
  - downregulation of murine *Cyp1a-1* in mouse hepatoma Hepa-1c1c7 cells **277,** 594
  - estrogen receptor-mediated effects on preimplantation mouse embryos, **270** 918
  - inhibition of testis endoplasmic reticulum Ca^{2+} pumps (rat), **277,** 568
  - sulfation by human cytosolic sulfotransferases, **267,** 80
- Bladder
  - benign and cancerous tissues, IGF-II promoter usage in, analysis (human) **268,** 886
- Bladder cancer
  - cSrc tyrosine kinase deregulation in absence of truncating mutation at codon 531 (human), **273,** 425
  - cytochrome P450 4B1 as possible risk factor in humans, **277,** 776
- Bladder tumors
  - *PSCA* expression (human), **275,** 783
- Blastocysts
  - expression of insulin-dependent glucose transporter isoform 4 (bovine), **271** 753
- Blood
  - cyclooxygenase-2 selective inhibition by C-phycocyanin from *Spirulina platensis* (human), **277,** 599
  - ethanol levels, relationship to serotonin metabolism (Syrian golden hamster), **271,** 823
  - whole, viscosity, effects of arginine at pharmacological levels independen of nitric-oxide synthase activity *in vitro* (human), **269,** 687
- Blood–brain barrier
  - breakdown, neovascularization with, in delayed neuronal death (gerbil) **273,** 637
  - control of carnitine levels in brain, study with RBE4 cells, **267,** 433
- Blood group ABO
  - histo-blood group glycosyltransferase genes for, enhancer structures and transcriptional activities (human), **273,** 459
- B lymphoma cells
  - B cell receptor crosslinking in, associated changes in gene expression, **277** 124
  - Fas-mediated phospholipase D activation, role of Ras (A20 cells), **271,** 32
  - interleukin-4-induced germline ϵ transcription, role of Shc (DND39 cells) **268,** 54
- *BMAL1*
  - mRNA, rhythmic expression, alteration in *Clock* mutant mice, **268,** 164
- *BMAL2*
  - cDNA cloning, mRNA expression, subcellular distribution, and chromosomal localization (human), **275,** 493
- BmP01
  - solution structure (scorpion), **276,** 1148
- BMS 197636
  - ApoB translocation status in presence (HepG2 cells), **276,** 1035
- B-NOD
  - pharmacology, **275,** 350
- Body fat
  - lost by rats during adenovirus-induced hyperleptinemia, slow recovery o **279,** 786
- Bone
  - genistein treatment, effective dosage: comparison with uterus in ovariectomized mouse, **274,** 697

  metabolism
    in adult GHR$-/-$ mice, **267,** 603
    role of $p57^{Kip2}$ gene (rat), **269,** 422
  mineral density, association with estrogen receptor β gene polymorphism (human), **269,** 537
  osteopontin, *N*-glycan structures (human), **268,** 814
  surface in calvaria, osteoclast adherence to, regulation by osteoprotegerin ligand (mouse), **274,** 281
  transcription factor (mouse), **276,** 813
Bone cells
  proteinases, stimulation by human growth hormone via IGF-I (rabbit), **268,** 875
Bone marrow
  mPer1 and *mPer2* expression (mouse), **276,** 724
  preosteoclast-like cells derived from, release of prostaglandins and nitric oxide, stimulation by fluid shear stress (rat), **270,** 643
Bone marrow cells
  differentiation into hepatocyte lineage *in vitro,* induction by HGF (rat), **279,** 500
  granulopoiesis *in vitro,* effects of swainsonine and *N*-butyldeoxynojirimycin: suppression of neutrophil maturation (human), **269,** 219
  hepatitis B virus preS surface protein-specific receptors, detection (KG-1 cells), **277,** 246
  interactions with cancer cells, induction of osteoclast differentiation factor and formation of osteoclast-like cells (mouse), **267,** 632
  osteoblasts cocultured with, maturation, suppression of osteoclastogenesis (mouse), **274,** 249
  osteoclastogenesis, stimulation by breast cancer cell line MDA-231, **270,** 1097
  osteoprotegerin expression by cells cultured in 3D collagen sponges, age-related decline (human), **268,** 669
  precursor cells, osteoclast induction, activin A as essential cofactor (mouse), **268,** 2
  replicative forms of TT virus DNA in, analysis (human), **270,** 657
  stromal cells
    anabolic response to low-intensity pulsed ultrasound (mouse ST2 cells), **268,** 216
    cell line established from ts-SV40 T antigen gene transgenic mice, multipotency (TBR31-2 cells), **268,** 450
    hematopoietic supportive cell lines, isolation of PDZ-containing myosin (mouse), **270,** 67
  stromal/osteoblastic cells, IL-6 gene expression, differential stimulation by PGE_2 and calcemic hormones (mouse), **270,** 1080
  TT virus mRNA in, detection in TT virus-infected individual, **279,** 700
Bone morphogenetic protein-2
  aggrecan message regulated by, expression by microvascular pericytes, **269,** 172
  block of breast cancer MDA MB 231 cell proliferation by inhibition of cyclin-dependent kinase-mediated retinoblastoma protein phosphorylation, **272,** 705
  and BMP-4, DAN, and BMPRs, expression in bone and soft tissue tumor cell lines: Dan-induced growth suppression in p53-deficient SAOS-2 cells, **278,** 20
  human recombinant, osteoinduction by, effect of elcatonin, **269,** 317
  induction of osteoblastic differentiation of mesenchymal progenitor cell line C3H10T1/2, role of ERK, **268,** 757
  induction in osteosarcoma cells by compactin and simvastatin (human), **271,** 688
  osteodinduction by, via adenoviral vector under transient immunosuppression (rat), **267,** 382
Bone morphogenetic protein-4
  and BMP-2, DAN, and BMPRs, expression in bone and soft tissue tumor cell lines: Dan-induced growth suppression in p53-deficient SAOS-2 cells, **278,** 20
Bone morphogenetic protein receptors
  ALK-2, ALK-3, and ALK-6, Smad8 phosphorylation downstream of, induction of Smad8–Smad4 association and transcriptional activity (mouse), **271,** 682
  and BMP-2, BMP-4, and DAN, expression in bone and soft tissue tumor cell lines: Dan-induced growth suppression in p53-deficient SAOS-2 cells, **278,** 20
Bone resorption
  activin A role in osteoclast induction, **268,** 2
  collagenolytic protease synthesis and secretion by osteoclasts, role of $pp60^{c\text{-}src}$ activity, **272,** 116
  dentine slices by osteoclasts *in vitro,* stimulation by CD36-binding peptide from thrombospondin-1, **270,** 1124
  sealing zone required for, formation in osteoclasts, prevention by specific antagonists of NMDA receptors, **268,** 201
  stimulation in human osteoclasts by breast cancer cell line MDA-231, **270,** 1097
Bone tumor-derived cells
  expression levels of *DAN, BMP-2, BMP-4,* and *BMPR*s (human), **278,** 20
Borato-1,2-diaminocyclohexane platinum(II)
  anti-tumor activity, **270,** 383
Borrelia burgdorferi
  lipoprotein lipid component, structure, antigenicity, and presentation via human dendritic cells, **267,** 897
Bovine serum albumin
  Cr(V) stabilization in adduct of, **273,** 1138
  urea-induced unfolding, analysis with domain-specific ligands, **277,** 83
Bradykinin
  stimulated Ca^{2+} signaling, in endothelial cells, effect of midkine (pig), **276,** 830
Brain
  aging, acceleration by hippocampal deficiencies of zinc and zinc transporter 3 (rat), **279,** 505
  Alzheimer's disease
    elevation in frequency of point mutations in mitochondrial DNA, **273,** 203
    NADPH oxidase activation, **273,** 5
    reduction of neuroendocrine-specific protein C, **276,** 329
    role of amyloid β protein starting pyroglutamate at position 3, **276,** 422
  amino acid transporter A subtype ATA1 expression (human), **273,** 1175
  apoptosis in dorsal lateral geniculate nucleus after monocular deprivation, role of glutamate signaling, NO production, and PARP activation (rat), **278,** 360
  aquaporin-4 immunoreactivity, increase in response to systemic hyponatremia (rat), **270,** 495
  aquaporin-9 localization (rat), **276,** 1118
  2-arachidonoylglycerol generation after picrotoxinin administration (rat), **271,** 654
  BC1 RNA association with Pur α (rat), **277,** 341
  benzodiazepine binding sites, 6-nitro-3′-bromoflavone and 6,3′-dibromoflavone as high-affinity ligands of, identification (rat), **273,** 694
  brain mitochondrial carrier protein-1 and uncoupling protein-2 gene regulation during cold exposure and aging (rat), **278,** 691
  carnitine levels, control by blood–brain barrier, study with RBE4 cells, **267,** 433
  constitutive proteasome, immunoproteasome, and PA28 distribution (rat), **277,** 348
  cortical slices, hypoxia/hypoglycemia-induced amino acid release, effects of preconditioning (rat), **276,** 134
  Cre-mediated gene mutation restricted to cerebellum and hippocampus (mouse), **269,** 149
  developing, PAL31 expression (rat), **274,** 427

Brain (*continued*)
  Down syndrome and Alzheimer's disease patients, reduction of neuroendocrine-specific protein C, **276,** 329
  dynamin-like protein, alternatively spliced variants, binding as substrates to glycogen synthase kinase 3β (rat), **268,** 893
  embryonic, sphingosine 1-phosphate receptor expressed in, characterization (zebrafish), **279,** 139
  endooligopeptidase A, identification as predominantly expressed oligopeptidase (rabbit), **269,** 7; *erratum,* **272,** 309
  ENT1 gene expression (mouse), **277,** 200
  fetal
    BMAL2 mRNA expression (human), **275,** 493
    differential expression of *WNT-2B* isoforms (human), **275,** 209
  fetal and adult, differential expression of sense and antisense transcripts of mtDNA coding for ATPase 6 (pig), **271,** 170
  fibroblast growth factor 23 expression in ventrolateral thalamic nucleus (mouse), **277,** 494
  gelatinase content, estimation and effect of focal ischemia (rat), **278,** 803
  gene gun-mediated DNA delivery *in vivo* (rat), **270,** 163
  glioma cell invasion in slice culture, quantitative analysis by confocal laser scanning microscopy, **269,** 513
  G-protein-coupled receptor expression (human), **276,** 952
  heat shock protein gene expression under stress, induction by sucrose diet feeding (rat), **274,** 355
  HSP70 induction after ethanol administration, regulation by glutathione redox state (rat), **269,** 397
  identification of gene with RING-H2 finger motif induced after chronic antidepressant treatment (rat), **278,** 150
  junctophilin subtype gene expression (human), **273,** 920
  kallikrein-like protease isoform TLSP/hippostasin expressed in human, **272,** 205
  membranes, binding of ^{3}H-PbTx-3 and ^{3}H-saxitoxin (puffer fish), **267,** 403
  mitochondrial complex I, inactivation by oxidative modification, **275,** 890
  mitochondrial permeability transition pore activation, enhancement by aging (mouse), **273,** 603
  murine genes differentially expressed in, isolation with cDNA microarray, **275,** 532
  neuronal expression of myosin regulatory light chain interacting protein expression (rat), **279,** 879
  NO-dependent pial arteriolar dilation in female rat, effects of chronic estrogen depletion and repletion, **269,** 165
  phospholipase C-δ1 levels, increase by treatment with aluminum (rat), **271,** 620
  prion disease, relationship to prion protein loss of antioxidant function, **275,** 249
  prion-infected, and N2A cells, differentially expressed prion protein gene mRNA found in, **251,** 423; *corrigendum,* **279,** 1016
  prion protein mRNA analysis by *in situ* hybridization (sheep), **273,** 890
  selenoproteins, purification (rat), **270,** 688
  singlet oxygen-induced stroke, murine model, expression of apolipoprotein D and apolipoprotein E in, **268,** 835
  substantia nigra pars compacta, preferential expression of FGF-20, **277,** 355
  superoxide dismutase activity *in vivo,* differential contribution by prion protein (mouse), **273,** 136
  Wnt16 isoform expression (human), **278,** 814
Brain-derived neurotrophic factor
  gene expression in lead nitrate-induced hepatic hyperplasia (rat), **275,** 472
  synthesis in cultured astrocytes, stimulation by desmethylselegiline and selegiline (mouse), **279,** 751
Brain link protein-1
  cDNA cloning, genomic structure, and characterization (human brain), **276,** 982
Brain mitochondrial carrier protein-1
  gene regulation in brain during cold exposure and aging (rat), **278,** 691
Brain stem
  pre-proglucagon mRNA expression, effect of leptin (rat), **269,** 331
BRCA1
  BRCT region, DNA end binding activity with multimerizing feature, **279,** 678
  expression inhibition by TGF-β1 via pRb pathway, **276,** 686
  full-length and exon 11 spliced transcripts in breast cancer cells, real-time PCR assay, **274,** 73
BRCA2
  nuclear localization signals in, **270,** 171
Breast
  benign and cancerous tissues, IGF-II promoter usage in, analysis (human), **268,** 886
Breast cancer
  autocrine and paracrine induction of pro-metastatic genes in, role of cancer cell-derived interleukin 1α, **275,** 60
  loss of androgen receptor expression in female, role of active allele loss of androgen receptor gene, **275,** 488
  protein arginine methyltransferase 1 gene expression, **278,** 349
Breast cancer cells
  anchorage-independent activation of MAP kinase through PI3-K by insulin-like growth factor I (MCF-7 cells), **272,** 111
  BRCA1 gene, full-length and exon 11 spliced transcripts of, real-time PCR assay, **274,** 73
  caspase activation and TNF-α-induced cell death, attenuation by protein kinase C-η overexpression (MCF-7 cells), **279,** 103
  coculture with bone marrow cells, induction of osteoclast differentiation factor and formation of osteoclast-like cells (mouse Balb/c-MC cells), **267,** 632
  differentiation, promotion by intracellular FGF-2 (T-47D cells), **277,** 255
  effects of borato-1,2-diaminocyclohexane platinum(II) (MCF-7 cells), **270,** 383
  epithelial, anti-angiogenic potential of silymarin (MCF-7, MDA-MB-468 cells), **276,** 371
  estrogen-dependent growth, role of SRC-1 (MCF-7 cells), **267,** 311
  FGF-1 and FGF-2 mitogenic activities, differential regulation related to kinetics of binding to heparan sulfate (MDA-MB-231 cells), **267,** 770
  G2/M progression, regulation by orphan receptor COUP-TFII by modulation of p21$^{WAF1/CIP1}$, cyclin D1, and cdk2, **270,** 1144
  hypoxia-induced expression of 43-kDa protein PROXY-1 (MDA-MB-231 cells), **276,** 321
  invasion and migration, stimulation by alcohol (MCF-7 cells), **273,** 448
  keratinocyte growth factor upregulation by vitamin D (MCF-7 cells), **273,** 675
  KV1.1 K$^+$ channel identification and role in cell proliferation (MCF-7 cells), **278,** 272
  long-term growth, death, and Bcl-xL in, progestin effects (T47D cells), **277,** 650
  metastatic, migration of, enhancement by phosphatidic acid (MDA-MB-231 cells), **268,** 471
  mitochondrial DNA, basal and induced oxidative damage, effects of mitochondrial glutathione peroxidase-1 (T47D cells), **272,** 416
  p53 in, tyrosine residues, nitration by nitric oxide (MCF-7 cells), **267,** 609
  plasma membrane receptors for 5α-pregnane-3,20-dione and 3α-hydroxy-4-pregnen-20-one, detection and characterization in MCF-7 cells, **272,** 731
  proliferation, block by BMP-2 via inhibition of cyclin-dependent kinase-mediated retinoblastoma protein phosphorylation (MDA MB 231 cells), **272,** 705
  protein arginine methyltransferase 1 gene expression (BT-474 cells), **278,** 349

  quiescence-induced expression of quiescin Q6, decorin, and ribosomal protein S29, regulation, **269,** 604
  reduced folate carrier gene expression, downregulation after methotrexate exposure (ZR-75-1 cells), **279,** 891
  relationship between ErbB receptor expression and drug resistance, **277,** 757
  smaller lecithin:retinol acyl transferase transcript expression and reduced retinol esterification (MCF-7 cells), **279,** 920
  Spot 14 expression increase by progestins and androgens (T47-D cells), **269,** 209
  stimulation of osteoclastogenesis and bone resorption in human osteoclasts (MDA-231 cells), **270,** 1097
  TNF-induced apoptosis, NF-κB signaling events in suppression of, regulation by PI3-K/AKT (MCF-7 cells), **271,** 342
  TNF-α-induced NF-κB activation, inhibition by 17β-estradiol by increasing NF-κB p105 level (MCF-7 cells), **279,** 47
  vascular endothelial growth factor mRNA expression in GI-707A cells derived from, **270,** 709
  WISP-2 as estrogen-responsive gene, **275,** 108
Breast cancer/mitoxantrone resistance protein
  ABCG2 gene-encoded, expression in plasma membrane, **271,** 42
8-Bromo-cAMP
  effects on LPS-induced cytokine gene expression in peritoneal macrophages (mouse), **269,** 570
  stimulus-specific inhibition of IL-5, **273,** 811; *erratum,* **275,** 713
Bronchial asthma
  imbalanced IL-1β and IL-1Ra production (human), **276,** 607
Bronchial epithelial cells
  activator protein-1 and NF-κB activation, suppression by erythromycin (human), **267,** 124
  hyperosmotic stress-induced IL-8 production, role of reactive oxygen intermediates (human), **276,** 571
BTB/POZ domain
  double, and ankyrin repeat, human gene with, molecular cloning and characterization, **273,** 991
BTB/POZ-zinc finger protein
  myoneurin, highly expressed in human muscle, cloning, **273,** 385
Burkholderia cepacia
  clinical isolate, exopolysaccharide produced by, structural study, **273,** 1088
  exopolysaccharide synthesis, enzymes leading to nucleotide sugar producers for, **276,** 71
  p-nitrophenol biodegradation, kinetics, **274,** 626
Burkitt's B lymphoma cells
  B cell receptor crosslinking in, associated changes in gene expression, **277,** 124
  interleukin-4-induced germline ϵ transcription, role of Shc (DND39 cells), **268,** 54
Burkitt's lymphoma Mutu I cells
  G$_1$/S cell cycle, effect of fenretinide, **276,** 1295
Butyl-anilinonaphthalene sulfonate
  inactivation of vesicular stomatitis virus, **275,** 955
Butylated hydroxytoluene
  inhibition of testis endoplasmic reticulum Ca^{2+} pumps (rat), **277,** 568
N-Butyldeoxynojirimycin
  suppressive effects on human bone marrow neutrophil maturation, **269,** 219
Butyl nitrite
  xanthine oxidase-catalyzed reduction to nitric oxide, **270,** 880
Butyrate
  cell differentiation induced by, associated 5-lipoxygenase expression in Caco-2 cells, **268,** 778
  selective upregulation of peroxisome PPAR-γ expression in Caco-2 cells, **272,** 380

C

C1orf9 gene
  encoding putative transmembrane protein, characterization (human), **267,** 855
C2-ceramide
  effect on cytoplasmic Ca^{2+} levels in human parathyroid cells, **268,** 636
  induction of apoptosis in rat stromal–vascular cultures, **270,** 76
C5a
  eosinophils stimulated by, phosphatidylinositol 4,5-bisphosphate-3-kinase activation and PI 3,4,5-trisphosphate formation (human), **269,** 816
C5a receptor
  induction of G$_{\alpha16}$-mediated inositol phosphate release, role of G$_{\alpha16}$ Ala^{228} residue, **278,** 426
C5 protein
  effects on *E. coli* RNase P catalysis with precursor tRNA^{Phe} bearing single mismatch in acceptor stem, **268,** 136
  terminal deletions, effects on promotion of RNase P catalysis, **268,** 118
C11orf1
  in 11q13–q22 region, characterization (human), **273,** 90
C11orf2
  in 11q13–q22 region, characterization (human), **273,** 90
C11orf3
  in 11q13–q22 region, characterization (human), **273,** 90
C11orf4
  in 11q13–q22 region, characterization (human), **273,** 90
C11orf5
  in 11q13–q22 region, characterization (human), **273,** 90
C14orf4 gene
  with polyglutamine repeat and no introns, detection in ARVD1 critical region and characterization (human), **278,** 766
C60 carboxyfullerene
  protective activity against oxidative stress-induced apoptosis in human PBMCs, **277,** 711
Ca^{2+}-ATPase
  disk, reversal, ATP synthesis in rod outer segments of bovine retina by, **268,** 625
  plasma membrane, isoform 1
    gene promoter region, mediation of transcriptional downregulation by 1,25-dihydroxyitamin D$_3$, **277,** 722
    mRNA expression in aortic myocytes, RT–PCR study (rat), **276,** 1024
  sarcoplasmic reticulum
    Ca^{2+} efflux by, ATP synthesis and heat production during (rabbit), **276,** 35
    oligomerization, effect of halothane (rabbit), **271,** 770
  testis endoplasmic reticulum, inhibition, cell death induction by estrogenic alkylphenols by, **277,** 568
Ca^{2+}/calmodulin-dependent protein kinase II
  activity in rat islets of Langerhans, reduction by depolarizing stimuli, **270,** 1119
  skeletal muscle, enrichment in nuclei and phosphorylation of serum response factor at multiple sites (chicken), **270,** 488
  tetracycline-inducible, silencing of hypertrophy-sensitive gene expression in neonate cardiomyocytes (rat), **274,** 803
Cachexia
  cancer-induced, relationship to DNA fragmentation in skeletal muscle during tumor growth (mouse, rat), **270,** 533
  sepsis-induced muscle proteolysis, effect of proteasome inhibitor *in vivo* (rat), **270,** 215
Cadherin
  DSC1 and *DSC3* genes encoding, genomic organization and amplification (human), **276,** 454

E-Cadherin
- and ALCAM, coordinate recruitment to cell–cell contacts by α-catenin, **267,** 870
- at cell periphery, role in keratinocyte differentiation *in vitro* (human), **269,** 369

T-Cadherin
- glycosyl phosphatidylinositol anchor, lipoprotein binding (human), **276,** 1240

Cadherin-4
- lateral clustering without homophilic interaction, **276,** 1191
- mutational analysis: structural and functional role of EC1 residues, **271,** 358

Cadmium
- stress-activated protein kinase-dependent induction of c-*fos* by, mediation by MKK7 (rat), **273,** 718

Caffeic acid
- dietary, scavenging of peroxynitrite, effect of bicarbonate, **279,** 692

Caged reagents
- potential utility of wavelength-programmed solute release from photosensitive liposomes, **276,** 169

CAG repeat domains
- identification in chromosomal region 12q24.1 (human), **271,** 515; **272,** 400

Calcein dye
- wavelength-programmed release from photosensitive liposomes, **276,** 169

Calcineurin
- cardiac, analysis during transition from hypertrophy to heart failure (rat), **273,** 347

Calcitonin
- modulation of effects of osteoprotegerin ligand in leukemic cell line FLG29.1, **279,** 391
- recombinant salmon, production by amidation of precursor peptide using enzymatic transacylation and photolysis, **267,** 362

Calcitonin gene-related peptide/adrenomedullin receptor
- RAMPs for, cloning and upregulation in obstructive nephropathy (rat), **270,** 89

Calcitonin receptor gene
- expression
  - regulation by multiple promoters (human), **272,** 738; *erratum,* **273,** 1180
  - sites during development, analysis in transgenic mouse, **274,** 124
- product of, generation of amylin receptor phenotype from, requirement of multiple RAMP domains, **267,** 368

Calcitonin receptor-like receptor
- associated RAMPs functioning as adrenomedullin receptor, cloning and expression in obstructive nephropathy model (rat), **270,** 89
- mRNA, expression in human VSMCs, dexamethasone-induced increase, **270,** 1063

Calcium
- activation of p42/44 and p38 MAP kinase: induction of mitogenic responses in osteoblastic MC3T3-E1 cells, **279,** 363
- activity in pancreatic β-cells, oscillations paralleling mitochondrial membrane potential (mouse), **267,** 179
- calmodulin-bound, regulation of microtubule bundling by motor and tail domains of kinesin-like calmodulin-binding protein (*Arabidopsis*), **267,** 201
- and cGMP, opposing effects on conductance of F_0 subunit c pore (bovine), **274,** 835
- chloride channel activated by, modulation by 14-3-3ε (*Xenopus laevis*), **270,** 581
- cytoplasmic, in human parathyroid cells, C2-ceramide-induced increase, **268,** 636
- cytosolic, sphingolipid-induced changes, relationship to 1,25-dihydroxyvitamin D_3 activation of sphingomyelin turnover in osteosarcoma cells, **273,** 95
- effect on apolipoprotein B mRNA editing, **277,** 221
- effect on osteoprotegerin ligand–osteoclast differentiation factor (MC3T3-E1 cells), **276,** 524
- efflux by sarcoplasmic reticulum Ca^{2+}-ATPase, ATP synthesis and heat production during, **276,** 35
- elevation in hippocampal neurons by exposure to HIV gp120, role of CXCR4 receptor (rat), **274,** 212
- external Ca^{2+}, sensitivity of voltage-gated K^+ currents in human atrial myocytes to, **273,** 10
- glutamate-dependent response in C2C12 myotubes, induction by 2-chloroadenosine, **277,** 546
- high affinity binding to trypsinogen: inhibition of autoactivation (rat), **275,** 668
- high extracellular levels, stimulation of osteoclast apoptosis (rabbit), **268,** 899
- hormone-evoked release, desensitization by Ca^{2+}-modulating cyclophilin ligand, **276,** 97
- influx into RINm5F cells, sustained enhancement by glibenclamide, induction of apoptosis, **271,** 422
- intracellular
  - adrenergic-mediated increases, photodynamic modulation in isolated rat hepatocytes, **277,** 705
  - and insulin, cAMP, and dexamethasone, effects on G6Pase components p36 and p46 in HepG2 cells, **272,** 41
  - and insulin secretion, in MIN6 pancreatic beta cells, effect of glutathione depletion, **278,** 236
  - in vascular smooth muscle cells, effects of endothelin ET-1 (1–31) (pig), **275,** 595
- ions, distribution in human epidermis, visual imaging, **272,** 134
- loss by endoplasmic reticulum, initiation of ER protein degradation, monitoring with apoaequorin, **268,** 711
- luminal transient, control of Ca^{2+} release/re-uptake of sarcoplasmic reticulum (rabbit), **279,** 858
- Na/Ca exchange, endogenous inhibitor of, enhancement of cardiac muscle contractility (bovine), **277,** 138
- neurotransmitter release from clonal neuronal cells induced by, effect of erythropoietin, **279,** 293
- oscillations in mouse eggs, cytosolic soluble protein factor triggering, detection in chicken and *Xenopus* sperm, **268,** 947
- phosphoinositide-mediated response to serotonin stimulation in platelets, inhibition by sodium azide (human), **274,** 472
- platelet-activating factor biosynthesis induced by, role of cytosolic phospholipase A_2 and PAF receptor (mouse), **271,** 812
- regulation of contraction in developing cardiac muscle, pH sensitivity, role of troponin I isoform switching (rabbit), **267,** 912
- role in *Bacillus subtilis* phytase activity, **268,** 365
- role in S100C inhibition of actin-activated myosin ATPase activity, **267,** 77
- signaling pathway, Edg-6 as putative sphingosine 1-phosphate receptor coupling to, **268,** 583
- store-operated Ca^{2+} entry
  - in cultured neurons and astrocytes, inhibition by KB-R7943 (rat), **279,** 354
  - in stimulated Scott cells, relationship to phosphatidylserine exposure, **279,** 639
- store-operated influx induced by lithium (human platelets), **267,** 546
- thapsigargin- and agonist-mobilized stores, refilling, role of H^+-ATPase (mouse), **271,** 311
- uptake sites in neutrophils, nonuniform distribution (human), **279,** 337

Calcium-binding proteins
- *DD4* cDNA encoding, molecular cloning (*Penaeus japonicus*), **276,** 286
- regucalcin, gene transcriptional regulation, role of hepatic nuclear factor I binding motif, **269,** 270

- Calcium channels
  - α_1–β subunit interaction, reversibility, **277,** 729
  - epithelial, gene structure and chromosomal mapping (human), **275,** 47
  - L-type
    - neuroendocrine, activation in retinal pigment epithelial cells and brain neurons by pp$60^{c\text{-}src}$, **270,** 806
    - regulation in cardiac myocytes, role of calpastatin domain L (guinea pig), **279,** 756
  - mouse CaT1 and rat ECaC, electrophysiologic characteristics in kidney, **274,** 344; *erratum,* **279,** 738
  - N- and P/Q-type, binding by chimeric analogs of ω-conotoxin MVIIA and MVIIC, **269,** 254
  - store-operated, lithium-induced opening in human platelets, **267,** 546
  - voltage-dependent, β_{2a} subunit cloning from heart and cooperative effect of α_2/δ and β_{2a} on membrane expression of α_{1C} (human), **267,** 156
  - voltage-gated
    - Ca^{2+} influx, and effects of mitochondrial inhibitors on catecholamine secretion in PC12 cells, **273,** 17
    - L-type, association with vacuolar H^+-ATPase G2 subunit, **277,** 611
    - two-pore channel 1 related to, molecular cloning, **270,** 370
- Calcium currents
  - voltage-dependent, in dorsal root ganglion cells, inhibitory effect of NO (rat), **271,** 509
- Calcium-like peptide
  - cellular uptake and *in situ* binding (Jurkat cells), **277,** 462
- Calcium-modulating cyclophilin ligand
  - desensitization of hormone-evoked calcium release, **276,** 97
- Calcium-permeable channel
  - stretch-activated, *Saccharomyces cerevisiae MID1* gene encoding, potential homologue *yam8*$^+$ from *Schizosaccharomyces pombe,* **269,** 265
- Calcium pump, *see* Ca^{2+}-ATPase
- Calcium-sensing receptor
  - expression and role in parathyroid hormone-related peptide secretion in Leydig cell model of humoral hypercalcemia of malignancy, **269,** 427
  - extracellular, agonists of, activation of p42/44 and p38 MAP kinase: induction of mitogenic responses in osteoblastic MC3T3-E1 cells, **279,** 363
  - gene mutations, type 2 diabetes mellitus patient with, **278,** 808
  - matrix Gla protein regulation by mechanism functionally related to, **277,** 736
  - stimulation of c-Jun N-terminal kinase in MDCK cells, **275,** 538
- Calcium signaling
  - bradykinin-stimulated, in endothelial cells, effect of midkine (pig), **276,** 830
  - FcαR-triggered, characterization (human), **276,** 749
  - regucalcin gene expression mediated through, regulatory mechanism, **276,** 1
- Calcium transport protein
  - CaT1, tissue distribution, gene localization, and functional properties (human), **278,** 326
- Callipeltin A
  - effect on Na^+/Ca^{2+} exchanger in cardiac sarcolemmal vesicles and positive inotropic effect in guinea pig atria, **279,** 219
- Calmodulin
  - binding by chloroplast chaperonin 10 (*Arabidopsis thaliana*), **275,** 601
  - with bound Ca^{2+}, regulation of microtubule bundling by motor and tail domains of kinesin-like calmodulin-binding protein (*Arabidopsis*), **267,** 201
  - peptide agonist for, cellular uptake and *in situ* binding (Jurkat cells), **277,** 462
- Calmodulin binding protein
  - EICBP, induction by ethylene and presence of DNA-binding motif (*Arabidopsis*), **279,** 762
- Calmodulin kinase II
  - regulation of Na^+ channel in cerebellar granule cells (rat), **274,** 394
- Calmodulin protein kinase
  - associated with rabbit fast-twitch muscle sarcoplasmic reticulum, phosphorylation of anchoring protein, **279,** 181
- Calpain
  - processing of cdk5 activator p35 to truncated form in acutely injured neuronal cells (rat), **274,** 16; *erratum,* **276,** 390
  - role in normal processing of β-amyloid precursor protein in human platelets, **273,** 170
- μ-Calpain
  - effect on m-calpain, **267,** 495
- m-Calpain
  - effect of μ-calpain, **267,** 495
  - proteolysis of histidine decarboxylase *in vitro* (rat), **271,** 777
  - role in apoptosis in lens epithelial cells from selenite rat model of cataract, **275,** 300
- Calpain activator protein
  - properties and intracellular localization, **272,** 472
- Calpastatin
  - domain L, role in regulation of L-type Ca^{2+} channels in cardiac myocytes (guinea pig), **279,** 756
- Calponin
  - expression in cultured vascular smooth muscle cells, increase by angiotensin II (rat), **279,** 965
  - identification as substrate of Rho-kinase, **273,** 110
  - regulation of shortening velocity in intact contracting smooth muscles (mouse), **279,** 150
- Calvarial cells
  - Cbfa1-deficent, multilineage differentiation *in vitro* (mouse), **273,** 630
- cAMP-regulated guanine nucleotide exchange factors
  - expression in pancreatic β-cells (rat), **278,** 44
- Camptothecin
  - sensitivity to, effect of hepatocyte growth factor (CHO cells), **274,** 772
- Cancer cachexia
  - relationship to DNA fragmentation in skeletal muscle during tumor growth (mouse, rat), **270,** 533
- Cancer cells
  - correlated β-1,4-galactosyltransferase V and *N*-acetylglucosaminyltransferase V gene expression (human), **276,** 1019
- *Candida albicans*
  - antibiotic activity of CRAMP analogues without hemolytic effect, **275,** 904
- Cannabinoid CB_1 receptor
  - mRNA levels in anterior pituitary gland, sex steroid influence (rat), **270,** 260
- Cap
  - protein synthesis dependent on, increase by overproduction of eIF4G in mouse mammary carcinoma cells, **277,** 117
- Capillary electrophoresis
  - DNA annealing and DNA–protein interactions by, **272,** 251
- Capillary permeability
  - growth factor-like protein increasing, purification from *Vipera lebetina* venom, **268,** 69
- CAR
  - expression in primary hepatocytes, negative regulation by IL-6 (human), **274,** 707
  - phenobarbital-elicited activation, in induction of cytochrome P450 genes, **277,** 1
- Carbamoyl-phosphate synthase I
  - gene regulation in rat liver in endotoxin shock, **268,** 221
- Carbohydrate recognition domains
  - C-type, expression and properties (*Trimeresurus stejnegeri*), **271,** 677
- Carbohydrates
  - N-linked, on CEA in colon carcinoma cells, β1–6 branching, relationship to K-*ras* activation, **273,** 147

Carbohydrates (*continued*)
  and peptides, ligands of concanavalin A, functional mimicry between, structural basis, **272,** 843
Carbonic anhydrase B
  single protein, dynamic measurement of mechanical properties, **272,** 55
Carbonic anhydrase II
  gene expression, regulation by hormonal nuclear receptors in HD11 monocytic cells, **271,** 481
  gene promoter of, activation by v-Src: Ras-dependent and -independent pathways (human), **272,** 808
Carbon monoxide
  increase in exhaled air of critically ill patients, **267,** 423
Carbon tetrachloride
  induced injury, proteins from rat liver with, interaction with albumin mRNA, **273,** 261
Carbonyl cyanide *p*-trifluoromethoxyphenyl hydrazone
  effect on stimulation of catecholamine secretion from pheochromocytoma cells, **273,** 17
Carboxychromans
  metabolism of tocopherols to, role of CYP3A, **277,** 531
Carboxyfullerene
  C60, protective activity against oxidative stress-induced apoptosis in human PBMCs, **277,** 711
Carboxyhemoglobin
  arteriovenous gradient measurement, technical artifact in, elimination by special calibration, **278,** 447
Carboxylic acids
  short-chain, induction of mitochondrial permeability transition *in vitro* (rat), **272,** 431
Carboxyl methylation
  nuclear lamin B in pancreatic beta cells (hamster, rat), **268,** 249
Carboxypeptidase E deficiency
  fat/fat mice with, impaired feedback of gastric functions, **267,** 638
Carboxypeptidase Y
  transacylation with, in production of recombinant salmon calcitonin, **267,** 362
Carboxypropyldeoxoartemisinin
  NMR studies, **274,** 359
Carbydea alata toxins
  isolation and characterization, **275,** 589
Carbydea rastoni toxins
  isolation, sequence, localization, and identity of toxin causing cutaneous inflammation, **275,** 582
Carcinoembryonic antigen
  CEACAM6 and CEACAM8, heterophilic adhesion of, mediation by extracellular N-domain, **278,** 564
  identification as major PHA-L-reactive glycoprotein in colon carcinoma cell lines and tumors, **273,** 147
  scFv specific for, baculoviral display, **275,** 84
Carcinogenesis
  colon, implications of reduction by bile acids of apoptosis-inducing effects of butyrate in human colon adenoma cells, **273,** 45
  hepatic, in SV40 T/t antigen transgenic mice, association with *mac25* gene methylation and downregulation, **267,** 109
Cardiac fibroblasts
  apoptosis induced by osmotic stress, regulation by insulin-like growth factor 1 (rat), **273,** 322
Cardiac hypertrophy
  loss of normal epicardial to endocardial gradient of CFTR mRNA expression in hypertrophied rabbit left ventricle, **278,** 144
Cardiogenesis
  specific impairment in mouse embryonic stem cells containing human chromosome 21, **273,** 219
Cardiolipin
  defective remodeling in Barth syndrome (human), **279,** 378
Cardiomyocytes
  Akt activation during simulated ischemia/reperfusion (rat), **270,** 947
  apoptosis
    osmotic stress-induced, regulation by insulin-like growth factor-1, **270,** 1029
    prevention by 17β-estradiol (rat), **268,** 192
    prevention by IGF-1 *in vitro,* role of ERK and PKC (rat), **273,** 736
  atrial, voltage-gated K$^+$ currents, sensitivity to external Ca^{2+} (human), **273,** 10
  connexin 43 gene expression, regulation by cyclical mechanical stretch (neonatal rat), **267,** 551; *erratum,* **273,** 1180
  contraction, acetaldehyde-induced depression of, enhancement by diabetes (rat), **269,** 697
  delayed STAT3 activation induced by angiotensin II, role of autocrine/paracrine secretion of IL-6 family cytokines (mouse, rat), **269,** 798
  differentiation of mouse ES cells into, impairment by additional human chromosome 21, **273,** 219
  hypertrophy, differential regulation of phospholipase C-β isozymes (rat), **275,** 1
  L-type Ca^{2+} channel regulation in, role of calpastatin domain L (guinea pig), **279,** 756
  neonatal, hypertrophy-sensitive gene expression, silencing by tetracycline-inducible CaM kinase II (rat), **274,** 803
  ventricular, VEGF expression and secretion, effects of LPS (rat), **268,** 657
Cardiomyopathy
  effect on α-interferon-inducible protein gene expression (hamster), **267,** 103
Cardiotrophin-1
  circulating, secretion by heart (human), **279,** 320
Carnitine
  levels in brain, control by blood–brain barrier, study with RBE4 cells, **267,** 433
Carnitine palmitoyltransferase I
  liver, gene transcription, regulation by thyroid hormone (rat), **279,** 81
β,β-Carotene 15,15′-dioxygenase
  cloning and expression (chicken), **271,** 334
Carotenoids
  peridinin quenching of singlet oxygen (*Gonyaulax polyedra*), **268,** 496
  role in *Saccharomyces cerevisiae* resistance to oxidative stress, **267,** 953
Carotid artery
  balloon injury-induced neointima formation, inhibition by YC-1 (rat), **279,** 646
  interleukin-1β, IL-1 receptor, and IL-1 receptor antagonist mRNA expression after balloon angioplasty (rat), **271,** 138
  oxidized macrophages in, detection of lipid peroxides and oxysterols (human), **269,** 775
Cartilage
  articular
    apoptosis, proteoglycan degradation, and matrix metalloproteinase expression, effects of ceramide (rabbit), **267,** 438
    proteoglycan synthesis, age-related effects of TGF-β (horse), **274,** 467
  Cbfa1 function and signaling (mouse), **276,** 813
Cartilage oligomeric matrix protein
  antiserum to, megakaryocyte-derived protein immunoreactive with, transient expression in developing liver (rat), **271,** 440
Carvedilol
  effects on isolated heart mitochondria, **276,** 82
Casein kinase I
  substrates, identification by *in vitro* expression cloning screening, **268,** 562
Casein kinase II
  characterization as protein kinase stimulating HIV-1 protease *in vitro,* **275** 434

  phosphorylation of AZT-resistant HIV-1 reverse transcriptase *in vitro:* effects on inhibitor sensitivity, **275,** 26
  phosphorylation of HSP105α and HSP105β, **270,** 927
  phosphorylation of prion protein, **271,** 337
  Physarum fragmin phosphorylated by, dephosphorylation by PP2C-like phosphatase, **279,** 438
Caspase
  activation, attenuation by protein kinase C-η overexpression (MCF-7 cells), **279,** 103
  apoptosis dependent on, in THP-1 cells exposed to oxidized LDL, **273,** 948
  cleavage of p42/SETβ in irradiated MOLT-4 cells, generation of p41 marker for cell death, **278,** 627
  cytochrome *c* release-mediated cascade, activation by 25-hydroxycholesterol (CHO-K1 cells), **278,** 557
  DEVD-caspase activity in human neuroblastoma cells, suppression, role of intracellular labile zinc, **268,** 148
  inhibition, Jurkat T cells rescued from CD95/Fas-induced apoptosis through, functional characterization, **270,** 1009
  initiator, cleavage by TRAIL death receptor DR4, inhibition by p21$^{\mathrm{WAF1/CIP1}}$, **269,** 179
  role in induced apoptosis in luteinized granulosa cells (human), **269,** 542
Caspase-3
  activation
    by cytokine deprivation in hematopoietic cells, prevention by Ras-dependent signals, **267,** 449
    in Molt4 cells by apoptosis-inducing nucleosides from CD57$^+$HLA-DR$^{\mathrm{bright}}$ natural suppressor cell line, **268,** 514
    by thioredoxin and other reduced proteins, **268,** 78
  independent Akt breakdown (COS-7 cells), **276,** 702
  induction by apomine in HL-60 cells, **270,** 240
  inhibition, role in anti-apoptotic activity of 17β-estradiol in rat cardiac myocytes, **268,** 192
  reduced activation in cervical multidrug-resistant cells, correlation with resistance to apoptosis (human), **270,** 415
  related activity, increase in zinc-deficient embryo (rat), **271,** 250
  role in apoptosis in lens epithelial cells from selenite rat model of cataract, **275,** 300
  role in epigallocatechin-3-gallate-mediated apoptosis of human chondrosarcoma cells, **270,** 793
Caspase-8
  active form, localization in mouse L929 cells induced by TNF treatment and polyglutamine aggregates, **270,** 972
  adenovirus-mediated transfer, combined with IκB, induction of apoptosis in gliomas (human), **271,** 544
  long isoform splice variant, dominant expression in peripheral blood lymphocytes (human), **272,** 877
  reconstitution, induction of JB6 cell sensitization to TRAIL, **277,** 311
Caspase-9
  in cell-free system of apoptosis, effect of baculovirus P35 protein (human), **276,** 855
  transduction, induction of apoptosis of A-172 cells resistant to p53-mediated apoptosis, **272,** 667
Caspase-14
  gene structure and mRNA expression during keratinocyte differentiation (human), **277,** 655
Catabolism
  GGT-dependent, GSH, effect on NF-κB (V79 Cl cells), **276,** 1062
  α-ketoisocaproate in liver (human, rat), **276,** 1080
Catalase
  detectable peroxisomes containing, molecular mechanism in fibroblasts from *PEX2*-defective patient, **268,** 31
Cataracts
  advanced glycation end product detection on lens capsule and RAGE mRNA expression by lens epithelial cells (human), **275,** 53
  age-matched lenses with, D-aspartic acid contents in α A-crystallin (human), **278,** 408
  autosomal dominant congenital, genetic linkage analysis of *CP49* gene (human), **270,** 432
  selenite rat model, apoptosis in, **275,** 300
Catechin
  dietary, scavenging of peroxynitrite, effect of bicarbonate, **279,** 692
  O-methylation and glucuronidation in small intestine (rat), **277,** 507
  monomers, antioxidant activity *in vitro* (cocoa), **276,** 945
(+)-Catechin
  rapid H_2O_2 generation upon addition to cell culture media, **273,** 50
Catecholamines
  biosynthesis in cultured adrenal medullary chromaffin cells, inhibition by CGP-42112 (pig), **272,** 544
  secretion from PC12 pheochromocytoma cells, effects of mitochondrial inhibitors and uncouplers, **273,** 17
  synthesis and secretion in cultured PC12 cells, suppression by orexins, **274,** 310
  vesicles containing, heterogeneity in PC12 cells, **270,** 625
Catecholic phenols
  olive oils rich in, effect on isoprostane excretion (human), **278,** 797
α-Catenin
  coordinate recruitment of E-cadherin and ALCAM to cell–cell contacts, **267,** 870
  expression, posttranscriptional regulation, role in Wnt signaling in L cells, **277,** 691
β-Catenin
  downregulation by axin, role in axin-induced apoptosis, **272,** 144
  MAGI-1 interaction with, **270,** 903
  p150 and p180 proteins interacting with, identification (bovine brain), **273,** 712
  signaling in Wnt pathway, regulation, **268,** 243
Cathepsin B
  fusion proteins, misrouting of secretory protein partners (mouse), **276,** 594
  inhibition by peptide from cathepsin K proregion (human), **276,** 924
  synthesis and secretion by osteoclasts, role of pp60$^{c\text{-}src}$ activity, **272,** 116
Cathepsin G
  inactivation by (α-aminoalkyl) diphenylphosphonates (human), **276,** 1235
Cathepsin K
  inhibitors of, pyridoxal propionate derivatives as, structure-based development, **267,** 850
  proregion peptide, inhibition of cysteine proteinases (human), **276,** 924
  synthesis and secretion by osteoclasts, role of pp60$^{c\text{-}src}$ activity, **272,** 116
Cathepsin L
  inhibition by peptide from cathepsin K proregion (human), **276,** 924
  synthesis and secretion by osteoclasts, role of pp60$^{c\text{-}src}$ activity, **272,** 116
Cathepsin L-like protease
  30-kDa, from *Fasciola hepatica,* partial characterization, **277,** 79
Cathepsin Q
  detection in placenta and sequencing (rat), **267,** 791
Cathepsin S
  inhibition by dipeptide α-keto-β-aldehydes, **275,** 401
Cathepsins
  intracellular activities, and immune responses, effects of peroral or intraperitoneal vitamin B_6 (mouse), **272,** 151
Cationic amino acid transporter-2
  role in regulation of NO production, **275,** 715
Caudate nucleus
  cAMP-specific phosphodiesterase PDE7B expression (human), **271,** 575
  differential expression of *WNT-2B* isoforms (human), **275,** 209

Caveolin
  enriched membrane microdomains, restriction of mitogenic phospholipase D activity to, **273,** 77
  translocation into or out of glycolipid-enriched microdomain, effect of glycosylation, **273,** 159
Caveolin-1
  concentration in cleavage furrow, time-lapse analysis, **268,** 82
  knockdown by antisense oligonucleotides, effect on angiogenesis *in vitro* and *in vivo,* **276,** 756; *erratum,* **279,** 305
Cbfa1
  for bone and cartilage (mouse), **276,** 813
  calvarial cells deficent in, multilineage differentiation *in vitro* (mouse), **273,** 630
CBP
  effect on STAT1α activation in glomerular mesangial cells (rat), **273,** 1069
CCAAT enhancer binding protein
  C/EBPδ gene, cloning, characterization, and species-specific autoregulation (sheep), **271,** 346
  isoforms, role in inhibition of IL-1-dependent induction of haptoglobin (IEC-6 cells), **276,** 673
c-Cbl
  adaptor protein CIN85 interacting with, cloning and characterization (human), **268,** 321
CCR3 gene
  induction by ionizing radiation, dependence on cell type, **269,** 546
CCR5
  phosphorylation by FPRL1 activation in monocytes, associated attenuation of selected chemokine responses, **272,** 276
CCT
  cytosolic, proteasome-dependent degradation in mammalian cells, **279,** 712
CD1D gene
  alternative splicing variants in mononuclear cells (human), **276,** 107
CD3ζ
  targeting into glycosphingolipid-enriched membrane microdomains of T cells, phenotypic effects (human), **271,** 589
CD4
  HIV-1-infected T cells carrying, upregulation of apoptosis-associated protein Grb3-3 in, **276,** 362
CD14
  mediation of cellular activation by active glycolipids from *Enterococcus hirae,* **273,** 164
  and phosphatidylinositol, regulatory roles in signaling via Toll-like receptor 4–MD-2, **268,** 172
CD18
  free forms of, large pool in leukocytes (human), **275,** 295
CD23
  peptides from, with inverse RGD sequence, interaction with MHC class II molecule, **267,** 686
CD28
  family, related T cell costimulatory molecule AILIM/ICOS in rat, identification and characterization, **276,** 335
CD36
  ditopic conformation at plasma membrane and N-terminal domain role in intracellular transport (COS-7 cells), **275,** 446
CD36-binding peptide
  from thrombospondin-1, stimulation of resorption by osteoclasts *in vitro,* **270,** 1124
CD39
  modulation of IL-1 release from activated endothelial cells, **270,** 272
CD40
  signaling by, induction and regulation of matrix metalloproteinase-12 in monocyte/macrophages (human), **269,** 808
CD40 ligand
  distal promoter, transcriptional activity, **279,** 245
CD44
  activated, recognition by tumor vasculature-targeted antibody (human), **269** 671
  myoepithelial-specific shedding, mediation by putative chymotrypsin-lik sheddase, **279,** 116
CD45
  cytoplasmic domain, stable interdomain interaction within, effect on enzym stability, **271,** 292
CD62, *see* P-Selectin
CD82
  glycosylation, effects on LDL GEM membrane domain involved in cel adhesion and motility (ldlD 14 cells), **279,** 744
CD95, *see* Fas
CD95 ligand
  expression on antigen-presenting cells, effect on T cell cytotoxicity (mouse) **272,** 395
CD137
  effects on monocyte activation, survival, and proliferation, comparison wit LPS, **273,** 117
cdaA1
  p85 gene regulating cytokinesis initiation in *Tetrahymena,* molecular cloning, **264,** 112; *erratum,* **267,** 478
CDCrel-1 septin gene
  infant- and adult-preferring transcripts, reciprocal expression in neocorte (rat), **273,** 723
cDNA
  cloning by amplification of circularized first strand cDNAs: detection o non-IRE-regulated iron-responsive mRNAs, **275,** 223
  ctgf 3′-UTR segment mediating repressive regulation of gene expressio characterization (mouse), **278,** 119
  differential hybridization: identification of up- and down-regulated genes i vancomycin-resistant *Staphylococcus aureus* strains Mu3 and Mu5 **269,** 485
  library construction from guinea pig organ of Corti, **273,** 84
  for membrane and secreted proteins upregulated during adipocyte differentiation, screening, **272,** 293
  microarrays
    expression profiling in pancreas during acute phase of pancreatiti (mouse), **277,** 660
    in isolation of murine genes differentially expressed in brain, **275,** 532
  reverse transcripts of yeast retrotransposons Ty1 and Ty3, efficient accumulation, role of host Dbr1p, **268,** 112
CEA, *see* Carcinoembryonic antigen
cel gene
  characterization and rapid identification of gene product (*Erwinia chrysanthemi* PY35), **268,** 420
Cell adhesion
  concentration process at, role of cadherin-4 lateral clustering, **276,** 1191
  effect of hepatocyte growth factor (CHO cells), **274,** 772
  Enabled tyrosine phosphorylation dependent on, in *Drosophila* neuronal ce line, **270,** 482
  endothelial cells to fibronectin, enhancement of MKP-1 activation (human **273,** 539
  hepatocarcinoma cells, stimulation by TGF-β1 (human), **274,** 519
  low-density lipoprotein GEM membrane domain involved in, effects o glycosylation of CD82 and α3 and α5 integrins (ldlD 14 cells), **279** 744
  mediation by uncleavable plasma membrane-anchored human macrophag colony-stimulating factor, **276,** 304
  neutrophils to endothelial cells, inhibition by dexamethasone (mouse), **27** 364

- osteoclasts to bone surface in calvaria, regulation by osteoprotegerin ligand (mouse), **274,** 281
- promotion by soluble urokinase receptor, **278,** 440
- role in osteoclast suvival (rabbit), **270,** 550
- sialyl 6-sulfo Lewis X recognition by P- and E-selectins on human lymphoid cell line, **278,** 90

Cell aggregation
- stimulated neutrophils, regulation by NO (human), **274,** 482

Cell attachment
- CHO-K1, mediation by FGF-2, **276,** 399

Cell–cell junctions
- MAGI-1 association: β-catenin interaction, **270,** 903

Cell culture
- hepatocytes (human), **274,** 1
- intestinal M-cell model, expression of specific markers and particle transport (human), **279,** 808
- serum-free long-term cultures of human hepatocytes, **269,** 46

Cell culture media
- rapid H_2O_2 generation on addition of (−)-epigallocatechin, (−)-epigallocatechin gallate, (+)-catechin, and quercetin to, **273,** 50
- tumor cell-derived, tumor vascular endothelial cell remodeling with, *in vitro* study, **268,** 809

Cell cycle
- control by c-Myc, role in c-Myc inhibition of adipocyte differentiation (3T3-L1 cells), **269,** 438
- dysregulation by epigallocatechin-3-gallate (A431 cells), **275,** 328
- G1/S, Mutu I cells, effect of fenretinide, **276,** 1295
- G2/M progression, regulation in breast cancer cells by orphan receptor COUP-TFII by modulation of $p21^{WAF1/CIP1}$, cyclin D1, and cdk2, **270,** 1144
- hepatocarcinoma cells, effects of suppression of TGF-β1 expression (human), **273,** 833
- regulation, relationship to vitamin D receptor expression in keratinocytes (human), **279,** 89
- S-phase, activation subunits for Cdc7 kinases essential for, conserved Dbf4 motifs in, **275,** 228

Cell cycle arrest
- G1, induction by herbimycin A via $p27^{Kip1}$ accumulation in cyclin D1-overexpressing fibroblasts, **267,** 54
- G2/M
  - and apoptosis, norcantharidin-induced, role of p53 in glioblastoma cell lines, **276,** 278
  - UVB-induced, in immortalized skin keratinocytes with defective p53, mechanism, **277,** 107
- role in dominant suppression of glioblastoma growth by $p16^{INK4A}$ expression *in situ* (RT-2 cells), **269,** 718

Cell death, *see also* Apoptosis
- breast cancer cells, progestin effects, **277,** 650
- ionomycin-induced, amelioration by expression of Na^+/Ca^+ exchanger, **276,** 93
- p41 marker for, generation by caspase cleavage of p42/SETβ in irradiated MOLT-4 cells, **278,** 627
- polyglutamine-mediated, analysis in SK-N-BE neuroblastoma cells, **272,** 816
- and prior differentiation, induction by bFGF in olfactory neuroblastoma cells, **279,** 172
- role of necrosis in dominant suppression of glioblastoma growth by $p16^{INK4A}$ expression *in situ* (RT-2 cells), **269,** 718
- TNF-α-induced, attenuation by protein kinase C-η overexpression (MCF-7 cells), **279,** 103

Cell density
- role in regulation of hepatic development by gp130-independent pathway (mouse), **277,** 152

Cell division
- caveolin-1 concentration in cleavage furrow, time-lapse analysis, **268,** 82

Cell-free protein synthesis
- sense codon-dependent introduction of unnatural amino acids into multiple sites of protein, **270,** 1136

Cell-free system of apoptosis
- caspase-9 in, effect of baculovirus P35 protein (human), **276,** 855

Cell growth
- CHO cells, promotion and inhibition, effects of α_1-adrenoceptor subtypes, **272,** 906
- colon cancer cells expressing estrogen receptor β, effects of estrogen and genistein (human), **270,** 425
- colon carcinoma SW480 cells, effects of Fhit protein expression, **278,** 205
- estrogen-dependent, MCF-7 cells, role of SRC-1, **267,** 311
- fibroblasts, promotion by air exposure and association with increased expression of MAP kinase cascade, **270,** 961
- filamentous, regulation by *GPR1* through *FLO11* in *Saccharomyces cerevisiae,* **267,** 164
- lens epithelial cells, keratinocytes, and fibroblasts, effects of lens epithelium-derived growth factor (human), **267,** 373
- long-term, breast cancer cells, progestin effects, **277,** 650
- lung cancer cells, selective inhibition by peptides derived from retinoblastoma protein (human), **267,** 71
- negative regulation by Jumonji (COS-7, NIH-3T3 cells), **274,** 332
- neuroblastoma cells *in vivo,* inhibition by arsenic trioxide (human), **277,** 179
- and oncogenic potential, of human tumor cell lines, effect of inhibition of endogenous AP-1, **278,** 97
- pancreatic cancer cells, stimulation by epiregulin (human), **273,** 1019
- reduction by redox-inactive thioredoxin in WEHI7.2 cells, **274,** 136
- rheumatoid synovial cells, regulation by ceramide, **269,** 70
- role in gene expression induced by lactose and tetracycline repressor–operator combination system (Kit 225 cells), **276,** 546
- suppression in p53-deficient SAOS-2 cells, induction by overexpression of DAN, **278,** 20
- thyroid cells, insulin costimulation of, TSH induction of insulin receptors mediating (human), **279,** 202
- vascular smooth muscle cells, inhibition by ATRAP (rat), **279,** 938

Cell invasion
- anti-invasion-associated myoepithelial-specific CD44 shedding, mediation by putative chymotrypsin-related sheddase, **279,** 116
- breast cancer cells, stimulation by alcohol, **273,** 448
- effect of hepatocyte growth factor (CHO cells), **274,** 772
- enhancement by overexpression of vacuolar ATPase 16-kDa subunit (10T1/2 cells), **278,** 390
- by transformed keratinocytes, modulation by TGF-β_1, role of Ras/MAPK signaling pathway, **273,** 521

Cell lines
- antiproliferative and proapoptotic effects of endogenous oxindoles 5-hydroxyoxindole and isatin, **276,** 379
- BA/F3β, IL-2-stimulated, AP-1 activation in intracellular oxidative environment of, effect of Ref-1 induction, **278,** 462
- C2C12, transfected with mutant myotonin protein kinase cDNA, differential signaling pathways after oxidative stress, **267,** 739
- caveolin-1 concentration in cleavage furrow, time-lapse analysis (COS7, MDCKII, Pam212 cells), **268,** 82
- CH31 B, rescue from antigen receptor-induced apoptosis (mouse), **276,** 417
- CHO-K1, cell attachment, FGF-2 mediation, **276,** 399
- extramitochondrial localization of mortalin/mthsp70/PBP74/GRP75, **275,** 174
- immortalized cells and tumor-derived cells, *REIC* gene downregulation (human), **268,** 20
- OKP, overexpressing ET_B receptor, Na/H exchanger-3 inhibition by endothelin-1, **271,** 807

- Cell migration
  - breast cancer cells
    - metastatic cells, enhancement by phosphatidic acid, **268,** 471
    - stimulation by alcohol, **273,** 448
  - effect of hepatocyte growth factor (CHO cells), **274,** 772
  - endothelial cells
    - effect of conditionally expressed PKC pseudosubstrate peptides (rat), **271,** 499
    - induction by sphingosylphosphorylcholine (bovine, human), **272,** 603
    - microvascular cells, inhibition by hepatocyte growth factor kringle 1–4 (human), **279,** 846
    - regulation by thromboxane A_2, **267,** 245
  - epithelial cells, role of Tyr1330 and Tyr1337 of RON receptor tyrosine kinase C-terminus, **267,** 669
  - fetal skin fibroblasts, bFGF-stimulated, mediation by phospholipase A_2 via arachidonic acid and role of pertussis toxin-sensitive G protein (human), **272,** 648
  - glioma cells, promotion by TGF-β_1 and TGF-β_2 via upregulation of $\alpha_V\beta_3$ integrin expression, **268,** 607
  - hepatocarcinoma cells, stimulation by TGF-β1 (human), **274,** 519
  - neutrophils, mediation by *N*-formylpeptide receptor FPR2 in response to serum amyloid A (mouse), **270,** 331
  - prostate cancer cells, effect of Rho kinase inhibitor Y-27632 (human), **269,** 652
  - stimulation by laminin-5 α3 chain proteolytic fragment (BRL, HaCaT cells), **278,** 614
  - vascular smooth muscle cells, effects of adhesion to fibronectin or laminin, **272,** 298
- Cell morphology
  - hepatocyte, maintenance in serum-free long-term culture (human), **269,** 46
- Cell motility
  - low-density lipoprotein GEM membrane domain involved in, effects of glycosylation of CD82 and α3 and α5 integrins (ldlD 14 cells), **279,** 744
- Cellobiose
  - phytanyl-pyrophosphate-linked, as substrate for bacterial α-mannosyltransferase, **272,** 290
- Cellobiose dehydrogenase
  - recombinant, homologous expression in *Phanerochaete chrysosporium,* **270,** 141
- Cell proliferation
  - accelerated, association with cyclin E upregulation in transgenic mice expressing dominant negative form of retinoic acid receptor, **278,** 229
  - associated prenyltransferase, increased activity in rat liver regeneration, **269,** 226
  - breast cancer MDA MB 231 cells, block by BMP-2 via inhibition of cyclin-dependent kinase-mediated retinoblastoma protein phosphorylation, **272,** 705
  - in colorectal carcinoma, association with elevated RanBP7 mRNA levels (human), **271,** 537
  - endothelial cells
    - aortic cells, stimulated by bFGF, inhibition by human HGF kringle 1 domain (bovine), **277,** 186
    - effects of conditionally expressed PKC pseudosubstrate peptides (rat), **271,** 499
    - effects of somatostatin and octreotide (HECa10 cells), **268,** 567
    - HARP-induced, implications of N- and C-terminal peptides (bovine, human, rat), **274,** 242
    - microvascular cells, inhibition by hepatocyte growth factor kringle 1–4 (human), **279,** 846
  - fibroblasts, autocrine regulation (human), **276,** 785
  - hepatocytes
    - accelerated proliferation, association with cyclin E upregulation in transgenic mice expressing dominant negative form of retinoic acid receptor, **278,** 229
    - additivity of effects of HGF/SF and EGF (rat), **278,** 698
  - inhibition
    - by apomine in tumor cell lines, **270,** 240
    - by 8-Cl-cAMP (SH-SY5Y cells), **273,** 404
    - by endogenous oxindoles 5-hydroxyoxindole and isatin, **276,** 379
  - KV1.1 K$^+$ channel involvement in, analysis in MCF-7 cells, **278,** 272
  - lymphocytes, inhibition by tripeptide *N*-acetyl-Glu-Ser-GlyNH$_2$ from canine spleen, **277,** 562
  - mesangial cells, negative regulation by natriuretic peptide receptor A, role of cGMP-dependent protein kinase (rat), **271,** 374
  - monocytes, comparative effects of CD137 and LPS, **273,** 117
  - neuroblastoma cells, LR11 expression during, analysis (IMR32, PC12 cells), **275,** 365
  - osteoblastic MC3T3-E1 cells, promotion by bovine milk kininogen fragment 1·2, **269,** 628
  - osteoblast-like cells, effect of IL-1β (human), **268,** 60
  - osteoblasts, 17β-estradiol-stimulated, mediation by nitric oxide (human, mouse, rat), **277,** 604
  - pancreatic beta cells, signaling through p38 and p42/44 MAP kinases (murine MIN6 cells), **268,** 541; *erratum,* **271,** 558
  - possible function for Down syndrome critical region gene 2, **272,** 156
  - vascular smooth muscle cells
    - associated expression and distribution of inositol 1,4,5-trisphosphate receptor subtypes (rat), **273,** 907
    - control by integrin signaling through focal adhesion kinase (pig), **272,** 298
    - effects of endothelin ET-1 (1–31) (pig), **275,** 595
    - inhibition by ribozyme to TGF-β1 mRNA (human), **278,** 401
    - regulatory expression of procollagen COOH-terminal proteinase enhancer in, **270,** 1049
- Cellscan
  - fluorescein fluorescence hyperpolarization as early kinetic measure of apoptotic process, **268,** 155
- Cell scattering
  - epithelial cells, role of Tyr1330 and Tyr1337 of RON receptor tyrosine kinase C-terminus, **267,** 669
- Cell stretch, *see* Mechanical stretch
- Cell swelling
  - related osmomechanical stress, regulation of membrane trafficking in polarized epithelial cells (rabbit), **271,** 429
- Cellulase
  - *cel* gene characterization and rapid identification of gene product (*Erwinia chrysanthemi* PY35), **268,** 420
- Cellulase-negative mutant
  - *Hypocrea jecorina,* molecular characterization, **277,** 581
- Cell viability
  - loss by histidine substitution of leucine 325 in glutamate transporter EAAT1 (*Xenopus laevis*), **275,** 382
- Central nervous system
  - apoptosis in, mediation by Tat *in vivo* (rat), **267,** 252
  - estrogen receptor-related receptor γ alternative splicing and expression (mouse), **267,** 532
  - evolutionarily conserved G-protein coupled receptor family SREB expression, **272,** 576
  - neprilysin II isoform expression (rat), **271,** 565; *erratum,* **275,** 247
  - voltage-gated sodium channel α subunit gene *SCN12A* identification (human), **267,** 262
- Centrosomes
  - during mitosis, translin localization *(Xenopus),* **276,** 515
  - poly-(ADP-ribose) polymerase localization, **278,** 385

Ceramide
  C2-ceramide
    effect on cytoplasmic Ca^{2+} levels in human parathyroid cells, **268,** 636
    induction of apoptosis in rat stromal–vascular cultures, **270,** 76
  effects on apoptosis, proteoglycan degradation, and matrix metalloproteinase expression in articular cartilage (rabbit), **267,** 438
  induction of COX-2 and PGE_2 in pulmonary A549 cells, role of NF-κB activation, **277,** 675
  regulation of rheumatoid synovial cell growth, **269,** 70
  relationship to 1,25-dihydroxyvitamin D_3 activation of sphingomyelin turnover and induction of Ca^{2+} influx in osteosarcoma cells, **273,** 95
Cerebellar cortex
  voltage-gated sodium channel α subunit gene *SCN12A* identification (human), **267,** 262
Cerebellar granule cells
  Na^+ channel regulation by calmodulin kinase II (rat), **274,** 394
Cerebellum
  and hippocampus, Cre-mediated gene mutation in mouse brain restricted to, **269,** 149
Cerebral cortex
  Cre-mediated recombination in neurons of Emx1–Cre knock-in mouse, specificity and efficiency, **273,** 661
  Emx1-specific expression of foreign genes using knock-in approach, **270,** 978
  slices, hypoxia/hypoglycemia-induced amino acid release, effects of preconditioning (rat), **276,** 134
Cerebrosides
  enhancement of FcγR- and CR3-mediated neutrophil phagocytosis, **278,** 79
Cerivastatin
  suppression of LPS-induced ICAM-1 expression in bovine aortic endothelial cells, role of Rho GTPase inhibition, **269,** 97
Cerulein
  hyperstimulation pancreatitis, MKPs as early responsive genes during induction (rat), **276,** 680
  induced pancreatitis, effect on TNF-α gene expression in murine pancreatic acinar cells, **268,** 485
Cervical cancer cells, *see also* HeLa cells
  SiHa and HeLa, oncogenic potential and normal growth, effects of endogenous AP-1, **278,** 97
Cervix
  uterine, immunoglobulin binding factor mRNA expression, hormonal control (human), **279,** 898
Cf9
  dependent resistance, putative function of plant VAP27, **270,** 286
c-Fgr
  phosphorylation of prion protein, **271,** 337
c-Fos
  gene expression in liver regenerative models (rat), **272,** 591
  gene transcription induced by PDGF in glomerular mesangial cells, effect of IFN-γ (rat), **273,** 1069
  impaired expression in cultured fibroblasts of patient with insulin resistance, postreceptor signaling defect causing, **268,** 577
  mRNA expression in vascular smooth muscle cells, effects of endothelin ET-1 (1–31) (pig), **275,** 595
  stress-activated protein kinase-dependent induction by Cd^{2+}, mediation by MKK7 (rat), **273,** 718
CGP040116
  prevention of gp120-induced apoptosis in neocortex (rat), **274,** 664
CGP-42112
  inhibition of catecholamine biosynthesis in cultured adrenal medullary chromaffin cells (pig), **272,** 544
CGS-16949A
  for aromatase inhibition, synthesis and evaluation, **267,** 356
Chain shuffling method
  improvement of natural antibody affinity with, **275,** 553
Chalcone synthase
  catalytic cysteine–histidine dyad in, evidence for, **275,** 725
  enzymatic formation of unnatural aromatic polyketides (*Scutellaria baicalensis*), **279,** 190
Chaperone activity
  Hsc70/Hsp40, modulation by Hsp105α and Hsp105β, **272,** 850
  hsp25, retention by hsp25 N-terminal 33-amino-acid deletion variant, **270,** 183
Chaperone-like activity
  α-crystallin
    correlation with aggregate size with increasing temperature (bovine), **268,** 426
    effect of dithiothreitol-destabilized proteins (bovine lens), **276,** 619
    from galactosemic rat lens, **273,** 197
Chaperonin
  CCT, cytosolic, proteasome-dependent degradation in mammalian cells, **279,** 712
Chaperonin 10
  chloroplast, binding of calmodulin (*Arabidopsis thaliana*), **275,** 601
Chara corallina
  fastest myosin from, molecular structure, **270,** 147
Chemiluminescence detection
  reactive oxygen species in live mouse skin exposed to UVA, **269,** 131
Chemokine receptor
  CCR5, phosphorylation by FPRL1 activation in monocytes, associated attenuation of selected chemokine responses, **272,** 276
  CXCR4, *see* CXCR4
Chemokines
  selected, attenuated responses, association with CCR5 phosphorylation by FPRL1 activation in monocytes, **272,** 276
  thymus- and activation-regulated chemokine expression in human corneal fibroblasts, synergistic effect of TNF-α and IL-4, **279,** 1
Chemotactic peptide receptor
  FPRL1, activation in monocytes, CCR5 phosphorylation and attenuated responses to selected chemokines by, **272,** 276
Chemotaxis
  neutrophil
    induction by T-20 inhibitor of HIV-1 cell entry via specific activation of *N*-formylpeptide receptor, **272,** 699
    mediation by *N*-formylpeptide receptor FPR2 in response to serum amyloid A (mouse), **270,** 331
  Ralstonia sp. SJ98
    toward 3-methyl-4-nitrophenol, **275,** 129
    toward nitroaromatic compounds, and subsequent degradation of compounds, **269,** 117
  sphingosine 1-phosphate-stimulated, in endothelial cells, role of G_i protein-linked PLC pathway, **268,** 47
Chemotherapy
  human cancer xenografts, potentiation by sphingomyelin, **268,** 603
Chenodeoxycholate
  reduction of apoptosis-inducing effects of sodium butyrate on human colon adenoma cells, **273,** 45
Chimeric analogs
  ω-conotoxin MVIIA and MVIIC, binding to N- and P/Q-type calcium channels, **269,** 254
Chimeric peptides
  based on HTLV-1 antigens, antigenicity, **276,** 1085
  synthetic, as antigen for immunodiagnosis of HIV-1 infection, **272,** 259
Chimeric proteins
  mini-trypsin inhibitor derived from oil rape proteinase inhibitor type III, expression, purification, and oxidative refolding, **275,** 817
  prorenin, in analysis of prosegment role in determining rate of prorenin activation by acid or trypsin, **267,** 577

Chimeric proteins (*continued*)
- UCP1 and UCP3, in analysis of UCP1 activation by fatty acids (human, rat), **276,** 642

Chitin
- and derivatives, inhibition of NO production by activated RAW 264.7 macrophages, **271,** 229

Chitinase
- cysteine-deficient antifungal protein with structural analogy to, purification from inner shoots of *Allium tuberosum,* **279,** 74
- endochitinase in extract contaminated with exochitinase, assay methods (*Photorhabdus luminescens*), **268,** 302
- related antifungal protein dolichin, isolation from *Dolichos lablab,* **269,** 155

Chitosan
- inhibition of NO production by activated RAW 264.7 macrophages, **271,** 229

Chlamydomonas reinhardtii
- 60S ribosomal protein L10a cDNA, introduction into *yap1* null yeast strain: restoration of resistance to oxidative stress, **267,** 953
- rhodopsin activation *in vivo* by reducing agents and light via disulfide bond cleavage, **275,** 286
- self-splicing rRNA precursor, kinetically efficient form, **273,** 967

Chlorambucil
- activity of allelic variants of Pi class human glutathione *S*-transferase toward, **278,** 258

Chloramphenicol acetyltransferase
- translation, enhancement by region in 3′ UTR of MnSOD RNA, **272,** 164

Chloride
- CFTR-mediated secretion in mouse endometrium, effect of enhanced expression of epithelial Na$^+$ channels, **276,** 40
- parathyroid hormone-activated fluxes, measurement in erythrocytes (human), **269,** 470
- secretion by Calu-3 airway cells, inhibition by imipramine via desensitization of β-adrenergic receptors, **274,** 620

Chloride channel
- Ca^{2+}-activated, modulation by 14-3-3ε (*Xenopus laevis*), **270,** 581
- gallbladder epithelial cell, highly permeable to HCO_3^- (guinea pig), **276,** 312

2-Chloro-adenosine
- induction of glutamate-dependent calcium response in C2C12 myotubes, **277,** 546

8-Chloro-cAMP
- dual anticancer activity (SH-SY5Y cells), **273,** 404

Chlorocatechol 1,2-dioxygenase
- recombinant, structure and activity, effect of histidine tail, **272,** 480

2-Chloro-2′-deoxyadenosine
- phosphorylation, subcellular location of, and synergistic effects of hydroxyurea, **276,** 179

Chlorogenic acid
- dietary, scavenging of peroxynitrite, effect of bicarbonate, **279,** 692

1-(5-Chloronaphthalenesulfonyl)-1H-hexahydro-1,4-diazepine
- inhibition of PKB, effects on metabolic effects of insulin in rat adipocytes, **268,** 315

Chloroplasts
- chaperonin 10 in, binding of calmodulin (*Arabidopsis thaliana*), **275,** 601
- outer surface, binding of annexin via sulfolipid (spinach), **272,** 519
- protein translocation, comparison in *Euglena* and higher plants, **277,** 436

2-(1-Chloropropenyl)-4,5-dihydroxycyclopent-2-enone
- inhibition of IL-6 signaling and Stat3 activation (A23-98), **276,** 447

Chloroquine
- and analogues, interaction with heme, isothermal titration calorimetric study, **276,** 1075
- interference with heme metabolism of *Plasmodium,* **268,** 665

CHO cells
- AMP-activated protein kinase activation by stimulation of G$_q$-coupled receptors, **276,** 16
- axin-induced apoptosis, role of JNK activation and β-catenin downregulation, **272,** 144
- growth promotion and inhibition, effects of α_1-adrenoceptor subtypes, **272,** 906
- ldlD mutant, glycosylation
  - effect on LDL GEM membrane domain involved in cell adhesion and motility, **279,** 744
  - effect on translocation of integrin, Src, and caveolin into or out of glycolipid-enriched microdomain, **273,** 159
- peroxisomal import of proteins with targeting signals PTS1 and PTS2, effect of missense mutation in PEX2 RING finger motif, **270,** 717
- protein phosphatase-1 glycogen targeting subunit G$_M$ overexpression, **275,** 859
- sensitivity to therapeutic agents and adhesion, invasion, and migration, effects of hepatocyte growth factor, **274,** 772
- septide-sensitive tachykinin binding sites, **270,** 668
- temperature-dependent functional expression of plant potassium channel, **274,** 130; *erratum,* **275,** 247
- transfected with rat sodium channel α-subunit, study of role of cytoskeletal integrity in channel function, **276,** 204

CHO-DHFR^{neg} cells
- expressed human acid maltase, in enzyme replacement correction of glycogen storage disease type II, **276,** 917

Cholecystokinin
- PC2 role in normal pro-CCK processing, analysis in PC2 and 7B2 null mice, **273,** 188

Cholecystokinin receptor
- CCK-B, structure and developmental expression (mouse), **272,** 837

Cholera toxin
- effect on hepatic lysosome acidification (rat), **274,** 717
- effect on LPS-induced cytokine gene expression in peritoneal macrophages (mouse), **269,** 570

Cholesterol
- apolipoprotein A-I-mediated efflux, regulation by LXR (RAW 264.7 cells), **274,** 794
- esterification, role of multidrug resistance P-glycoprotein, **279,** 369
- HDL-induced efflux from foam cells, effects of plasmin and kallikrein, **277,** 552
- increased uptake from micelles resulting from MDR1 overexpression in intestinal cell line, **267,** 565
- interaction with daunorubicin binding site of P-glycoprotein (NIH-G185 cells), **276,** 909
- modulation of vascular reactivity to endothelin-1 by stimulation of proinflammatory pathway (rat), **274,** 553
- photosensitive liposomes containing, wavelength-programmed solute release, **276,** 169
- relevance of enhanced secretion of apoB by transfected HepG2 cells overexpressing fibrinogen, **273,** 377
- serum levels in estrogen receptor-α-deficient male mice, **278,** 640

Cholesterol side chain cleavage enzyme
- active site, analysis with substrate–heme complex approach, **274,** 821
- range of azole compounds against, synthesis and biochemical evaluation with substrate–heme complex approach, **275,** 75

Chondrocytes
- articular
  - ERK signaling pathway, activation by *N*-acetylcysteine (bovine, human), **275,** 789
  - nuclear viscoelastic properties (pig), **269,** 781
- *Cbfa1*-deficient calvarial cell differentiation into, *in vitro* study (mouse), **273,** 630

Chondrogenesis
- mesenchymal cells, induction by disruption of actin cytoskeleton, role of PKC-α signaling (chick embryo), **273,** 609

- Chondroid cells
  - CYP1A mRNA detection *in situ* in chemically untreated fish by RT-PCR, **271,** 130
- Chondrosarcoma cells
  - epigallocatechin-3-gallate-mediated apoptosis, role of caspase-3 (human HTB-94 cells), **270,** 793
- Choriocarcinoma cells
  - *MRP1* mRNA, detection by *in situ* RT-PCR (BeWo cells), **275,** 466
  - trichosanthin entry via LDL receptor family members (JAR cells), **270,** 453
- Choroid plexus cells
  - vasopressin V1a receptor signaling (rat), **275,** 322
- Chromaffin cells
  - adrenal medullary, catecholamine biosynthesis in, inhibition by CGP-42112 (pig), **272,** 544
- Chromatin structure
  - telomere domain of human sperm, **279,** 213
- Chromatography
  - dual-tagged recombinant protein purification, **273,** 1058
- Chromium
  - Cr(III)
    - complex, cleavage of DNA, **271,** 731
    - protein degradation by peroxide catalyzed by, role of coordinated ligand, **270,** 749
  - Cr(V)
    - CrO(salen)$^+$ complex containing, cleavage of orosomucoid, relevance to Cr biotoxicity (human), **279,** 980
    - stabilization in bovine serum albumin adduct, **273,** 1138
- Chromogenic substrates
  - for trypsin, based on proteinase binding loop of *Cucurbita maxima* trypsin inhibitor, synthesis, **269,** 81
- Chromogranin A
  - polarized secretion from MDCK cells, **270,** 631
- Chromosomal breakpoint
  - 3q21 in myeloid leukemia, GATA-2 gene localization near, **273,** 239
  - in acute lymphoblastic leukemia, associated genes RanBP17 and close homologue, identification (human, mouse), **278,** 241
- Chromosomal movement
  - C-terminus motor kinesin-like protein KLP-17 involved in, cDNA cloning and expression (nematode), **267,** 643
- Chromosome 1
  - C1orf9 gene assignment to 1q24 (human), **267,** 855
  - tubulointerstitial nephritis antigen-related protein gene localization to 1p34.2-3 (human), **271,** 474
- Chromosome 2
  - *ARHGEF4* isolation in 2q22 (human), **273,** 364
- Chromosome 3
  - *ARHGEF3* isolation in 3p13–21 (human), **273,** 364
  - *CP49* gene mapping (human), **270,** 432
  - gene with ankyrin repeat and double BTB/POZ domain, localization to 3q21 (human), **273,** 991
  - protein-tyrosine phosphatase HD-PTP gene localization to 3p21.3 (human), **278,** 671
  - voltage-gated sodium channel α subunit gene *SCN12A* localization to 3p23–p21.3 (human), **267,** 262
- Chromosome 4
  - 3′-phosphoadenosine 5′-phosphosulfate synthetase 1 gene mapping to 4q24 (human), **268,** 437
- Chromosome 5
  - RanBP17 isolated at 5q34 (human), **278,** 241
  - *βTRCP2* gene localization at 5q35.1 (human), **269,** 103
- Chromosome 6
  - GCMa/GCM1 gene mapping (human), **278,** 134
  - myosin regulatory light chain interacting protein localization to 6p22.3–23 (human), **279,** 879
  - *PEX3* gene localization to 6q23-24 (human), **268,** 704
  - testis-abundant finger protein localization in 6p21.3–p22.1 (human), **276,** 45
  - tubulointerstitial nephritis antigen mapping to 6p11.2–12 (human), **268,** 225
- Chromosome 7
  - epithelial calcium channel mapping to 7q35 (human), **275,** 47
  - small GTPase Rac1 gene localization to 7p22 (human), **277,** 741
- Chromosome 8
  - EBAG9 gene mapping to 8q23 (human), **273,** 654
  - *FGF-20* characterization on 8p21.3–p22 (human), **274,** 337
  - *Frizzled-3* localization to 8p21 (human), **271,** 8
  - *FZD3* localization to 8p21 (human), **273,** 27
  - RanBP16 isolated at 8p11–12 (human), **278,** 241
- Chromosome 9
  - D-2-hydroxy-acid dehydrogenase on 9q, cloning and characterization (human), **268,** 298
  - LIM-homeobox3 gene localization to 9q34.2–34.3 (human), **274,** 49
  - tetrodotoxin-resistant voltage-gated sodium channel α subunit NaT/Scn11a mapping to 9F3-F4 (mouse), **267,** 271
- Chromosome 10
  - GERP mapping to 10q24.3 (human), **279,** 482
  - *M83* mapping to 10q12.3: five-span transmembrane protein gene (rat), **276,** 244
  - meltrin β gene mapping to q21.3–q22 (rat), **270,** 522
  - 3′-phosphoadenosine 5′-phosphosulfate synthetase 2 gene mapping to 10q22–23 (human), **268,** 437
- Chromosome 11
  - characterization of five human genes in 11q13–q22 region, **273,** 90
  - meltrin β gene mapping to A5-B1.1 region (mouse), **270,** 522
  - organic anion transporter 1 gene localization to 11q13.1–q13.2 (human), **275,** 623
- Chromosome 12
  - *BMAL2* gene localization to p12.2–p11.2 (human), **275,** 493
  - CAG repeat domain identification in 12q24.1 (human), **271,** 515; **272,** 400
  - VPS29 localization on 12q24 (human), **277,** 622
- Chromosome 13
  - RAB3D gene localization to A$_{2\text{-}3}$ (mouse), **273,** 877
- Chromosome 14
  - G protein γ2 subunit mapping to 14q21 (human), **272,** 610
  - intronless C14orf4 gene mapped to ARVD1 critical region in 14q24.3, detection and characterization (human), **278,** 766
  - leukotriene B$_4$ receptor locus, genomic organization (human), **274,** 383
- Chromosome 15
  - WDR6 gene mapping to 15q21 (human), **274,** 117
- Chromosome 16
  - *M83* mapping to 16p13.3: five-span transmembrane protein gene (human), **276,** 244
  - VPS35 localization: vacuolar protein sorting 35 (human), **277,** 622
- Chromosome 17
  - *M83* mapping to 17B1: five-span transmembrane protein gene (mouse), **276,** 244
- Chromosome 19
  - kallikrein gene family on 19q13.3–q13.4, genomic organization (human), **276,** 125
  - platelet collagen receptor glycoprotein VI localization to 19q13.4 (human), **277,** 27
  - protein arginine methyltransferase 1 gene localization to 19q13.3 (human), **278,** 349
  - Siglec8 gene mapping to 19q13.4 (human), **278,** 775

- Chromosome 20
  - TGIF2 gene mapping to 20q11.2–12: TALE-superclass homeobox gene (human), **276,** 264
- Chromosome 21
  - Down syndrome critical region on 21q22.2, DSCR5 and DSCR6 genes from, isolation (human), **271,** 693
  - human, specific impairment of cardiogenesis in mouse embryonic stem cells containing, **273,** 219
- Chromosome–plasmid recombination
  - spontaneous mitotic, in *Saccharomyces cerevisiae,* effects of *RAD52* epistasis group genes, **270,** 112
- Chromosomes
  - organic anion transporter family localization (human), **273,** 251
  - poly-(ADP-ribose) polymerase localization, **278,** 385
  - syndrome X-related genetic analysis (rat), **269,** 660
- Chronic granulomatous disease
  - $p67^{phox}$-deficient, *ex vivo* complementation (human), **275,** 854
- Chronic myelogenous leukemia cells
  - antibiotic activity of CRAMP analogues without hemolytic effect, **275,** 904
- Chronic obstructive pulmonary disease
  - erythrocyte alterations in, effects of *N*-acetylcysteine (human), **279,** 552
- Chymotrypsin
  - inactivation by (α-aminoalkyl) diphenylphosphonates (human), **276,** 1235
  - inhibition by complexes of vanadate with hydroxamic acids, **274,** 732
  - putative sheddase related to, mediation of myoepithelial-specific CD44 shedding, **279,** 116
  - transition-state analog complex, NMR signal of low-barrier hydrogen bond in, deuterium isotope effect, **273,** 789
- CIN85 adaptor protein
  - characterization, and identification of components in CIN85 complexes, **278,** 167
  - interacting with c-Cbl, cloning and characterization (human), **268,** 321
- Ciprofibrate
  - induction of fatty acid β-oxidation enzymes by PPARα in heart, kidney, and liver (mouse), **278,** 250
- Cirrhosis
  - NF-κB regulation in hepatic stellate cells during, role of p65 (rat), **273,** 546
- Cisplatin
  - induction of stress-activated protein kinase p38γ activation in melanoma cells (human), **278,** 724
- Cisplatin resistance
  - *Saccharomyces cerevisiae* genes conferring, genome-wide screening, **269,** 767
- Citrate synthase
  - denatured, refolding of, molecular chaperone function of hsp25 N-terminal 33-amino-acid deletion variant, **270,** 183
  - dimer interface, valine substitution for glycine in, effect on stability and activity (*Thermoplasma acidophilum*), **275,** 460
- c-Jun
  - gene encoding, mediation of KAI1 gene activation by etoposide (human), **274,** 370
  - gene expression in liver regenerative models (rat), **272,** 591
  - transcriptional repression of $p21^{(Waf1/Cip1/Sdi1)}$ gene by, role of Sp1 site, **270,** 303
- c-Jun N-terminal kinase
  - activation
    - by axin, role in axin-induced apoptosis, **272,** 144
    - inhibition by TGF-β-induced matrix proteins in L929 fibroblasts, **267,** 194
    - by Rac, role of cytosolic phospholipase A_2, **268,** 231
  - Fas cytotoxicity enhancement mediated by, role of suppression of IκBα expression (L929 cells), **274,** 4
  - induction by tensin, **272,** 717
  - JNK/SAPK pathway, activation by dendritic cell-derived protein kinase DPK (human), **274,** 872
  - and p38 MAP kinase, differential role in c-Myc and s-Myc-mediated apoptosis, **267,** 221
  - stimulation by calcium-sensing receptor in MDCK cells, **275,** 538
- c-Kit
  - exogenous, and EpoR signaling, mimicry of v-ErbA oncoprotein activity **275,** 292
- Class II transactivator
  - and HIV-1 Tat, transcriptional activities, reciprocal modulation, **279,** 494
  - suppression of transcription of thyroid-specific genes, **278,** 58
- Clavaminic acid synthase
  - iron binding ligands of, mutagenesis studies, **279,** 240
- Cleavage furrow
  - caveolin-1 concentration in, as revealed by time-lapse analysis, **268,** 82
- Clenbuterol
  - and hindlimb unweighting, upregulation of heavy chain myosin MHCIα in muscle (rat), **275,** 418
- Clinostat
  - vector-averaged gravity generated by, effect on TNF-α-dependent activation of NF-κB in human osteoblastic HOS-TE85 cells, **279,** 258
- CLN2 protein
  - endopeptidase activity, characterization, **268,** 904
- *Clock*
  - mutant mice, alteration of rhythmic expression of *BMAL1* mRNA in, **268** 164
- α-Clofibrate
  - repression of TNF-α-induced E-selectin expression, role of LRF-1/ATF3 (human), **275,** 406
- *Clostridium difficile*
  - toxin B, activation of MMP-2 in bovine smooth muscle cells, **277,** 43
- *clpP*
  - mutation, effect on early events of sporulation (*Bacillus subtilis*), **279,** 229
- CMCase
  - *cel* gene characterization and rapid identification of gene product (*Erwinia chrysanthemi* PY35), **268,** 420
- c-Myc
  - apoptosis mediated by, differential role of c-Jun N-terminal kinase and p38 MAP kinase pathway, **267,** 221
  - gene expression in liver regenerative models (rat), **272,** 591
  - inhibition of adipocyte differentiation, independence from c-Myc role in cel cycle control (3T3-L1 cells), **269,** 438
  - mRNA, expression in vascular smooth muscle cells, effects of endothelin ET-1 (1–31) (pig), **275,** 595
  - promoter, nuclease-hypersensitive element in, propensity to adop *i*-tetraplex structures (human), **278,** 158; *erratum,* **279,** 306
  - small DNA fragment, transfection of X-ray-induced partially transformed human cells, morphological effects, **272,** 887
  - transcription patterns, correlation with elevated RanBP7 mRNA levels in colorectal carcinoma (human), **271,** 537
- CNF1 toxin
  - deamidation of Glu63 of RhoA, role of short sequence of GTPase switch 2 domain (*Escherichia coli*), **267,** 588
- Coactivators
  - and estrogen receptor, control of reproductive and nonreproductive func tions, review, **270,** 1
  - Gadd45 family proteins as coactivators of nuclear hormone receptors, **272** 193
- Coagulation
  - oxyhemoglobin after modification by Hg(II), inhibition by histidine, **273** 816

Coat protein 1
  characterization in plant cells, **273,** 176
  vesicles coated with, formation, implications of structure of p23 cytoplasmic domain in solution, **271,** 401
cobA
  cotransformed, small fluorophores synthesized by, use in monitoring MscL channel activity (*Salmonella typhimurium*), **279,** 208
Cobalt
  effect on heme oxygenase-1 mRNA expression in vascular endothelial cells (human), **271,** 665
Codons
  synonymous, usage, relationship to protein secondary structural units, **269,** 692
Cofactors
  and estrogen receptor, control of reproductive and nonreproductive functions, review, **270,** 1
  protein inhibitor of activated STAT3 as coregulator of androgen receptor in prostate carcinoma cells, **278,** 9
Cofilin
  phosphorylation by *Drosophila* homolog of LIM-kinase, **276,** 1178
Cognate receptor
  seminal vesicle, testosterone binding, low-molecular-weight cytosolic inhibitor (bovine), **276,** 483
Coiled coil
  gp41 N-terminal, salt bridge to antiviral agent targeted to gp41 core, anti-HIV-1 role, **270,** 153
COL9A2 gene
  allelotypes, correlation with intervertebral disc disease (human), **279,** 398
Cold exposure
  brain mitochondrial carrier protein-1 and uncoupling protein-2 gene regulation during, analysis (rat), **278,** 691
Cold tolerance
  microtubules, conferral by expression of cold-adapted β-tubulins (human), **269,** 787
Colitis
  chronic, E-selectin expression in murine model, **268,** 547
  experimental model, ion channel activity in colonic smooth muscle myocytes in, analysis (mouse), **275,** 637
Collagen
  COL9A2 allelotypes, correlation with intervertebral disc disease (human), **279,** 398
  synthesis by vascular smooth muscle cells from stroke-prone spontaneously hypertensive rat, inhibition by resveratrol, **274,** 61
  three-dimensional sponges, osteoprotegerin expression by bone marrow cells cultured in, age-related decline (human), **268,** 669
  type I, α2 chain gene, microsatellites in, association with systemic sclerosis (human), **272,** 36
Collagen gel contraction
  by hepatic stellate cells, enhancement by lysophosphatidic acid, association with Rho-kinase (rat), **277,** 72
Collagenolytic cysteine proteases
  synthesis and secretion by osteoclasts, role of $pp60^{c\text{-}src}$ activity, **272,** 116
Collagen receptor
  glycoprotein VI
    convulxin binding to, competition with collagen-related peptides, **273,** 246
    molecular cloning, genomic structure, chromosomal localization, and alternative splice forms (human), **277,** 27
  P65, recombinant, role in convulxin-induced platelet activation, **270,** 932
Collagen-related peptides
  competition with convulxin for binding to platelet collagen receptor GPVI, **273,** 246
Colloidal gold
  DNA sensing enhanced by, analysis by quartz crystal microbalance, **274,** 817
Collybistin
  ARHGEF4 with homology to, isolation in 2q22 (human), **273,** 364
Colon
  smooth muscle myocytes, ion channel activity in, alterations in experimental colitis model (mouse), **275,** 637
Colon cancer
  CEA identification as major PHA-L-reactive glycoprotein (human), **273,** 147
  K-*ras* gene-activating mutation, identification (human), **278,** 653
Colon cancer cells
  apoptosis-inducing effects of sodium butyrate, reduction by bile acids (human AA/C1 cells), **273,** 45
  Caco-2 cell line, coculture with Raji cells as human intestinal M-cell model, **279,** 808
  cell growth, effects of Fhit protein expression (SW480 cells), **278,** 205
  differentiation, transcriptional regulation of human dipeptidyl-peptidase IV during, role of hepatocyte nuclear factor 1α and 1β (Caco-2 cells), **270,** 235
  estrogen receptor β-expressing, growth effects of estrogen and genistein (human), **270,** 425
  FGF-20 detection (SW480 cells), **274,** 337
  fibroblast growth factor receptor 4 soluble-form splice variant expressed in, identification (Caco-2 cells), **267,** 658
  α1,3-fucosyltransferase 4 gene expression and transcriptional regulation (COLO201, HT-29, SW48 cells), **273,** 370
  γ-ray-induced DNA strand breaks, gene-specific repair (human), **269,** 433
  homeobox genes HOXB6, B8, C8, C9, and Cdx-1, deregulated expression (human), **272,** 513
  interleukin-18 binding protein gene expression, mediation by interferon-γ (DLD-1 cells), **267,** 960
  major PHA-L-reactive glycoprotein in cell lines and tumors, CEA identification as, **273,** 147
  N-myristoyltransferase inhibitor protein expression and relationship to c-Src levels (human), **273,** 1116
  NF-κB binding in, activation by inhibition of phosphatidylinositol 3-kinase (HT-29 cells), **273,** 853
  staurosporine-induced cell death in relation to P-glycoprotein expression (LoVo cells), **276,** 231
  UDP-glucuronosyltransferase isoforms, immunochemical identification in Caco-2 cell monolayers, **273,** 1053
Colony formation
  mediation by uncleavable plasma membrane-anchored human macrophage colony-stimulating factor, **276,** 304
Colorado tick fever virus
  full-length genome, sequence determination and analysis, **273,** 1121
Colorectal cancer
  elevated RanBP7 mRNA levels in, association with increased proliferation and similarity to c-*myc* transcription pattern (human), **271,** 537
  enhanced detection of deleterious and other germline mutations of hMLH1 and hMSH2 genes in Japanese kindreds, **271,** 120
  frequent altered expression of fragile histidine triad protein (human), **278,** 205
Colorectal cancer cells
  apoptosis, induction by conjugated eicosapentaenoic and docosahexaenoic acids *in vitro,* role of lipid peroxidiation (DLD-1 cells), **270,** 649
  apoptosis-inducing effects of sodium butyrate, effects of bile acids (HT29 cells), **273,** 45
  HT29 human xenograft-bearing mice, chemotherapy, potentiation by sphingomyelin, **268,** 603
  5-lipoxygenase expression during butyrate-induced differentiation (Caco-2 cells), **268,** 778
  peroxisome proliferator-activated receptor-γ expression, selective upregulation by butyrate (Caco-2 cells), **272,** 380

Coltivirus
  type species Colorado tick fever virus, full-length genome sequence determination and analysis, **273,** 1121
Comamonas testosteroni
  3α-hydroxysteroid dehydrogenase/carbonyl reductase, functional expression, purification, and characterization, **272,** 622
Combinatorial chemistry
  definition of linker properties for optimal display of peptide ligands for binding soluble protein targets to TentaGel beads, **269,** 591
Combinatorial libraries
  screening for ARE-selective DNA minor groove binder, **270,** 393
Compactin
  induction of bone morphogenetic protein-2 in osteosarcoma cells (human), **271,** 688
Complementary DNA, *see* cDNA
Complement receptor type 3
  and FcγR, neutrophil phagocytosis mediated by, enhancement by cerebrosides, **278,** 79
Complex I
  brain mitochondrial, inactivation by oxidative modification, **275,** 890
Computational analysis
  Web-based, putative SH2 domain in Janus kinases, **278,** 175
Computer techniques
  gene cloning, **279,** 741
Concanavalin A
  carbohydrate and peptide ligands, functional mimicry between, structural basis, **272,** 843
Conductance
  F_0 subunit c pore, opposing effects of calcium and cGMP (bovine), **274,** 835
Cone–rod homeobox
  transactivation function, p300/CBP as coactivator of, **269,** 410
Confocal laser scanning microscopy
  glioma cell invasion, quantitative analysis in brain slice model (rat), **269,** 513
Conformation
  antiherpetic C5-substituted 2′-deoxyuridines, ^{1}H NMR study, **272,** 64
  aspartate aminotransferase, effects of glycation, **277,** 47
  α-crystallin, effects of aggregation, **275,** 354
  cyclic tachyplesins, antiparallel two-β strand cystine knot framework, relationship to membranolytic selectivity, **267,** 783
  ditopic, CD36 at plasma membrane (COS-7 cells), **275,** 446
  d-TGGCGGC containing two triplet repeats of Fragile X Syndrome, cation-dependent switches in, NMR study, **278,** 833
  estrogen receptor, changes, ^{19}F NMR study (human), **270,** 988
  folded and *extended,* β-Ala moiety in model peptide, collateral existence, **273,** 492
  lactoperoxidase and recombinant lactoperoxidase (bovine), **274,** 756
  oxidized cytochrome *cd*$_1$, freeze-quench NIR-MCD spectroscopy: detection of His/Met *c*-heme coordination (*Paracoccus pantotrophus*), **279,** 674
  polypeptide chain direction reversal mediated by C–H· · ·O hydrogen bond in synthetic peptide helix, **273,** 933
  transketolase, effects of substrates, **275,** 968
Conformational transition
  prothymosin α: Zn^{2+}-mediated structure formation and compaction (human), **267,** 663
Congenital muscular dystrophy
  novel variant, unusual laminin α2 processing in myoblasts from patient with, **277,** 639
Connective tissue growth factor
  ctgf 3′-UTR segment mediating repressive regulation of gene expression, characterization (mouse), **278,** 119
  expression, inhibition by activation of protein kinase C (rat), **275,** 312

  gene expression during liver regeneration after partial hepatectomy an D-galactosamine-induced injury, kinetics (rat), **277,** 448
Connexin 37
  polymorphic variants, functional expression and biophysical properties (hu man), **274,** 216
Connexin 43
  gene expression, regulation by cyclical mechanical stretch in neonatal ra cardiomyocytes, **267,** 551; *erratum,* **273,** 1180
ω-Conotoxin
  chimeric analogs of ω-conotoxin MVIIA and MVIIC, binding to N- an P/Q-type calcium channels, **269,** 254
Constitutively activated receptor
  expression in primary hepatocytes, negative regulation by IL-6 (human **274,** 707
  phenobarbital-elicited activation, in induction of cytochrome P450 genes **277,** 1
Contortrostatin
  activation of ERK2 and tyrosine phosphorylation via distinct pathways, **27** 142
  binding to integrin $\alpha v\beta 5$, **267,** 350
Contrapsin
  gene expression during development, alterations in metallothionein-nu mice, **270,** 458
Convulxin
  binding to platelet collagen receptor GPVI: competition with collagen related peptides, **273,** 246
  induced platelet activation, role of recombinant non-integrin platelet colla gen receptor P65, **270,** 932
Coordinated ligands
  role in protein degradation by peroxide catalyzed by chromium (III), **27** 749
COP I
  coat proteins, characterization in plant cells, **273,** 176
  vesicles coated with, formation, implications of structure of p23 cytoplasmi domain in solution, **271,** 401
Copper
  binding by prion protein, loss in prion disease, **275,** 249
  Cu(II), binding in redox-inactive state by prion protein octapeptide repea region, **267,** 398
  effect on intracellular distribution of ATP7B (Huh7 cells), **275,** 871
  effect on prion protein with polymorphism at position 129, **269,** 72 *erratum,* **271,** 842
  hepatic accumulation, induction of DNA strand breaks in liver cells c Long-Evans Cinnamon strain rats, **276,** 174
  intracellular level, increase by pyrrolidine dithiocarbamate, role in inhibitio of TNF-α-dependent activation of NF-κB in human aortic SMCs, **27** 88
  low-density lipoprotein oxidation induced by, kinetics, dependence on lipi composition and antioxidant content, **268,** 818
  modulation of nitric oxide pathway in glial cells (rat), **275,** 776
  reduction by prion protein N-terminal tandem repeat region, role of trypto phan residues (human), **269,** 491
  role in inhibition of hematopoiesis by dithiocarbamates (human), **274,** 51
  role in refolding of prion protein (mouse), **276,** 1217
Copper chaperones
  for Cu/Zn superoxide dismutase
    molecular cloning and characterization (rat), **275,** 394
    role of Zn-binding residues (human), **276,** 999
Coproporphyrinogen oxidase
  promoter regulatory element, protein binding, cloning (K562 cells), **27** 596

- Corepressors
  - and estrogen receptor control of reproductive and nonreproductive functions, review, **270,** 1
- Corpus callosum
  - normal, in Emx1 mutant mouse with C57BL/6 background, **276,** 649
- Corticosteroids
  - role in angiotensin II modulation of ion transport in proximal tubules (rat), **272,** 423
- Corticotropin-releasing factor
  - role in orexin-induced behaviors (rat), **270,** 318
- Corticotropin-releasing factor type 1 receptor
  - agonist-induced rapid phosphorylation: potential mechanism for homologous desensitization (human), **268,** 572
- COS-1 cells
  - transfected, nuclear localization of rat TIMELESS-like protein, **279,** 131
- Costimulatory molecule
  - T cell, related to CD28/CTLA4 family, identification and characterization: rat AILIM/ICOS, **276,** 335
- *o*-Coumaric acid
  - dietary, scavenging of peroxynitrite, effect of bicarbonate, **279,** 692
- *p*-Coumaric acid
  - dietary, scavenging of peroxynitrite, effect of bicarbonate, **279,** 692
- COUP-TFII
  - regulation of G2/M progression of breast cancer cells by modulation of $p21^{WAF1/CIP1}$, cyclin D1, and cdk2, **270,** 1144
- *CP49* gene
  - mapping and identification of intragenic polymorphic marker for genetic linkage analysis in autosomal dominant congenital cataract (human), **270,** 432
- CpG islands
  - characterization of promoter of murine *mac25* gene, **279,** 251
  - intronic, of *Igf2r, de novo* methylation, association with decreased antisense RNA expression in aged mice, **274,** 722
- C-phycocyanin
  - from *Spirulina platensis,* selective inhibition of cyclooxygenase-2, **277,** 599
- CPI-17
  - phosphorylation by protein kinase N, **274,** 825
- CRAMP analogues
  - antibiotic activity against bacterial, fungal, and tumor cells without hemolytic effect, **275,** 904
- Cre
  - recombination mediated by, specificity and efficiency in Emx1–Cre knock-in mouse, **273,** 661
- CREB
  - activation in HEK293 cells, regulation by nucleoredoxin, glutaredoxin, and thioredoxin, **274,** 177; *erratum,* **275,** 247
  - activation by protein kinase A, inhibition by Tip60, **269,** 758
- CREB-binding protein
  - interaction of viral interferon regulatory factor 1 of Kaposi's sarcoma-associated herpesvirus with, **270,** 23
  - p300/CBP, coactivation of cone–rod homeobox transcription factor, **269,** 410
  - as target of HTLV-1 Tax in synoviocyte activation, analysis, **269,** 584
- Cre/loxP
  - Emx1-specific expression of foreign genes using knock-in approach, **270,** 978
- Cre/*loxP*-expression-switching system
  - adenovirus/adeno-associated virus vector using, mediation of site-specific integration of transgene, **273,** 473
- Cre/loxP recombination system
  - Cre-mediated gene mutation in mouse brain restricted to cerebellum and hippocampus, **269,** 149
  - human telomerase expression: extension of normal fibroblast life span, **273,** 1095
- Cre recombinase
  - targeted expression, in spermatocyte-specific gene excision (mouse), **272,** 125
- CRF$_1$ receptor, *see* Corticotropin-releasing factor type 1 receptor
- *Crithidia fasciculata*
  - sensitivity to α-difluoromethylornithine and metabolic turnover of ornithine decarboxylase, **279,** 663
- Crk
  - association with STAT5, induction by thrombopoietin and interleukin-2, **278,** 299
- Crk-I
  - identification as component of CIN85 complexes, **278,** 167
- Crk-II
  - differential interaction with PDGF α and β receptors, role of internal tyrosine phosphorylation, **270,** 28
  - identification as component of CIN85 complexes, **278,** 167
- CRLR, *see* Calcitonin receptor-like receptor
- CrmA gene
  - mice transfected with, inhibition of Fas-mediated fulminant hepatitis in, **273,** 101
- Crosslinking
  - B cell receptor in Burkitt's lymphoma B cells, associated changes in gene expression, **277,** 124
  - proton-translocating pyridine nucleotide transhydrogenase α and β subunits, role in transmembrane helix orientation and spatial relationships (*Escherichia coli*), **273,** 955; *erratum,* **277,** 782
- Crosstalk
  - between phospholipase A$_2$ and cAMP–protein kinase A pathway in isolated rat islets, **269,** 242
- Crotonic acid
  - induction of mitochondrial permeability transition *in vitro* (rat), **272,** 431
- CRP2
  - LIM domain-containing, rich in cysteine and glycine, specific interaction with CRP2BP (human), **274,** 655
- CRP2BP
  - specific interaction with cysteine- and glycine-rich LIM domain protein CRP2 (human), **274,** 655
- CRP-ductin
  - subform vomeroglandin, strong expression in glands associated with mouse vomeronasal organ, **268,** 275
- Cruzipain
  - inhibition by nitric oxide (*Trypanosoma cruzi*), **270,** 437
- Cry1Ac protoxin
  - from *Bacillus thuringiensis* sp. *kurstaki* HD73, binding to surface proteins in mouse small intestine, **271,** 54
- Cry3Aa
  - recombinant, insecticidal activity against Andean potato weevil, **279,** 653
- α-Crystallin
  - chaperone-like activity, effect of dithiothreitol-destabilized proteins (bovine lens), **276,** 619
  - correlation of chaperone-like activity and aggregate size with increasing temperature (bovine), **268,** 426
  - facilitation of reactivation of hydrogen peroxide-inactivated rhodanese, **274,** 461
  - from galactosemic rat lens, functional and structural studies, **273,** 197
  - high-molecular-weight aggregates, formation mechanisms (human), **275,** 354
  - modification by kynurenine, cysteine identification as initial site of, **276,** 216
- α A-Crystallin
  - from normal and age-matched cataractous lenses, D-aspartic acid contents (human), **278,** 408

- Crystallization
  - 17β-hydroxysteroid dehydrogenase type 1, analysis with DHEA and DHT at elevated temperature, **277,** 100
  - proteins, improvement of crystal quality with magnets, **275,** 274
  - selenomethionyl β-ketoacyl–acyl carrier protein synthase III (*Escherichia coli*), **270,** 100
- c-Src
  - deregulation in absence of truncating mutation at codon 531 in bladder carcinoma (human), **273,** 425
  - levels in colon cancer cells, relationship to *N*-myristoyltransferase inhibitor protein expression (human), **273,** 1116
- *CSX1* gene
  - cardiac, transcriptional regulation (human), **272,** 749
- C-tetrad
  - NMR observation in structure of SV40 repeat sequence GGGCGG, **270,** 967
- CTLA4
  - family, related T cell costimulatory molecule AILIM/ICOS in rat, identification and characterization, **276,** 335
  - SHP-2 binding to, absence of direct YVKM/YFIP motif recognition, **269,** 279
- C-type lectins
  - carbohydrate recognition domains, expression and properties (*Trimeresurus stejnegeri*), **271,** 677
- CUG-binding protein
  - specific binding to UG dinucleotide repeats in yeast three-hybrid system, **277,** 518
- Cullin-1
  - modification by ubiquitin-like protein Nedd8, enhancement of SCF^{skp2} activity toward p27^{kip1}, **270,** 1093
- Culture medium
  - rapid H_2O_2 generation on addition of (−)-epigallocatechin, (−)-epigallocatechin gallate, (+)-catechin, and quercetin to, **273,** 50
  - tumor cell-derived, tumor vascular endothelial cell remodeling with, *in vitro* study, **268,** 809
- Cumylperoxy radicals
  - interaction with DMPO: quantification of spin-trapping kinetics, **270,** 125
- *Cunninghamella*
  - *C. echinulata* and *C. elegans,* cytochrome P450 oxidoreductase from, cloning and characterization, **268,** 345
- Cuticle
  - phenoloxidase inhibitor from, characterization (*Manduca sexta*), **268,** 379
- CW-1
  - purification from cheeseweed and characterization, **279,** 669
- CW-2
  - purification from cheeseweed and characterization, **279,** 669
- CXCR4
  - HIV-1 infection dependent on
    - block by cyclic zinc-dithiocarbamate-*S,S*′-dioxide, **272,** 351
    - inhibition by extracellular HIV-1 Tat, **270,** 992
  - role in immediate and neurotoxic effects of HIV gp120 (rat), **274,** 212
  - solubilization, **274,** 153
- CXXC domain
  - PCCX1 with, regulation by proteolysis, **271,** 305
- Cyanide
  - effect on stimulation of catecholamine secretion from pheochromocytoma cells, **273,** 17
- Cyanopropylperoxy radicals
  - interaction with DMPO: quantification of spin-trapping kinetics, **270,** 125
- Cyclic AMP
  - agents elevating, stimulus-specific inhibition of IL-5, **273,** 811; *erratum,* **275,** 713
  - anion conductances activated by, role in guinea pig gallbladder: origin of HCO_3^- conductance, **276,** 312
  - dependent pathway, role in wortmannin promotion of insulin secretion fro pancreatic β cells, **270,** 798
  - effect on protein kinase C isoform distribution in HL60 cells, **274,** 596
  - induction by H_2S in modulation of NMDA receptor, **267,** 129
  - inhibition of agonist-induced heparin-binding EGF-like growth factor gen expression independently of effects on p42/p44 MAPK activation, **27** 558
  - and insulin, dexamethasone, and $[Ca^{2+}]_i$ changes, effects on G6Pase com ponents p36 and p46 in HepG2 cells, **272,** 41
  - mitogenesis signaling by TSH via, in canine thyrocytes, role of Ras activa tion, **273,** 154
  - modulation of cyclooxygenase-2 expression in lipopolysaccharide stimulated monocytes (human), **278,** 790
  - role in activation of Rap1 in thyroid cells (dog), **267,** 7
  - RXRα downregulation mediated by, role of phosphorylation of RXR serine 27 by PKA (human), **279,** 853
  - specific cyclic-nucleotide phosphodiesterase PDE7B, cloning and charac terization (human, mouse), **272,** 186
- Cyclic AMP-dependent protein kinase, *see* Protein kinase A
- Cyclic AMP–protein kinase A pathway
  - restraining effect on islet phospholipase A_2 activation (rat), **269,** 242
- Cyclic depsipeptide inhibitor
  - callipeltin A inhibitor of cardiac Na^+/Ca^{2+} exchanger, **279,** 219
- Cyclic GMP
  - and calcium, opposing effects on conductance of F_0 subunit c pore (bovine **274,** 835
  - elevation by B-NOD (human), **275,** 350
  - role in biphasic effects of NO in primary osteoblasts (rat), **274,** 477
  - vascular, stimulation by YC-1 (rat), **279,** 646
- Cyclic GMP-dependent protein kinase
  - role in negative regulation of MAP kinase and mesangial cell proliferatio by natriuretic peptide receptor A (rat), **271,** 374
- Cyclic-GMP phosphodiesterase gene
  - expression of three isoforms in human penile cavernosum, **268,** 628
  - identification of three alternative first exons and intronic promoter (human **268,** 596
- Cyclic-nucleotide phosphodiesterase
  - cAMP-specific, human and mouse PDE7B, cloning and characterization **272,** 186
- Cyclic stretch
  - regulation of endothelial cell-derived lipase expression in endothelial cell **272,** 90
- Cyclic tachyplesins
  - membranolytic selectivity, effect of antiparallel two-β strand cystine kno framework, **267,** 783
- Cyclic urea inhibitors
  - for improved binding of HIV-1 aspartic protease, computational design, **26** 384
- Cyclic zinc-dithiocarbamate-*S,S*′-dioxide
  - block of CXCR4-mediated HIV-1 infection, **272,** 351
- Cyclin
  - related protein associated with cdk3 *in vivo,* molecular cloning (mouse **273,** 442; *erratum,* **274,** 880
- Cyclin A
  - associated kinase activity, inhibition by β3-endonexin, **267,** 947
  - p55^{CDC} association with, and p55^{CDC} phosphorylation by cyclin A–Cdk complex, **268,** 530
- Cyclin A2
  - overexpression in liver tumors (mouse), **274,** 188
- Cyclin A–Cdk2 complex
  - p55^{CDC} phosphorylation by, **268,** 530
- Cyclin D1
  - cooperative action with p21 in activation of Cdk4, **267,** 388

  - expression, and DNA synthesis, induction by prostaglandin $F_{2\alpha}$ via early signaling mechanisms in Swiss 3T3 cells, **270,** 11
  - expression/activity modulation in breast cancer cells by COUP-TFII, role in regulation of G2/M progression, **270,** 1144
  - expression in vascular smooth muscle cells, effects of endothelin ET-1 (1–31) (pig), **275,** 595
  - fibroblasts overexpressing, G1 arrest, induction by herbimycin A via $p27^{Kip1}$ accumulation, **267,** 54
- Cyclin D2
  - expression in vascular smooth muscle cells, effects of endothelin ET-1 (1–31) (pig), **275,** 595
- Cyclin D3
  - expression in vascular smooth muscle cells, effects of endothelin ET-1 (1–31) (pig), **275,** 595
- Cyclin-dependent kinase
  - Cdc2-related, with high molecular mass and PITAI/VRE motifs, identification and characterization (sea urchin), **279,** 832
  - Cdc7, S-phase-essential activation subunits for, conserved Dbf4 motifs in, **275,** 228
  - Cdc20
    - association with cyclin A and phosphorylation by cyclin A–Cdk2 complex, **268,** 530
    - phosphorylation, negative regulation of mammalian cyclosome/APC in mitotic checkpoint, **271,** 299
  - Cdc42, role in *Helicobacter pylori*-induced formation of stress fibers and membrane ruffles in AGS gastric adenocarcinoma cells, **269,** 247
  - Cdc42Hs, regulation of urokinase receptor transcription, **270,** 892
  - Cdk2
    - complex with cyclin E, phosphorylation by CDK-activating kinase, block by N-terminal domains of cyclin-dependent kinase inhibitory proteins, **271,** 469
    - cyclin A–Cdk2 complex, $p55^{CDC}$ phosphorylation by, **268,** 530
    - cyclin E upregulation and accelerated hepatocyte growth associated with, in transgenic mice expressing dominant negative form of retinoic acid receptor, **278,** 229
    - expression/activity modulation in breast cancer cells by COUP-TFII, role in regulation of G2/M progression, **270,** 1144
  - Cdk3, associated cyclin-like protein, molecular cloning (mouse), **273,** 442; *erratum,* **274,** 880
  - Cdk4
    - activation, dependence on subunit rearrangement in complexes, **267,** 388
    - epithelial cells overexpressing, TGF-β sensitivity, restoration by pyridopyrimidines (Mv1Lu cells), **272,** 794
    - inhibition by fascaplysin, **275,** 877
    - interaction with p16, regulation by oxidative stress, **275,** 764
  - Cdk5, p35 activating, processing to truncated form by calpain in acutely injured neuronal cells (rat), **274,** 16; *erratum,* **276,** 390
  - CDK10 gene isoforms (human), **276,** 271; *erratum,* **279,** 738
  - pyridopyrimidine inhibitors of, restoration of TGF-β sensitivity in Cdk4-overexpressing mink lung epithelial cells, **272,** 794
  - retinoblastoma protein phosphorylation mediated by, role in block of breast cancer MDA MB 231 cell proliferation by BMP-2, **272,** 705
- Cyclin-dependent kinase-activating kinase
  - phosphorylation of cdk2/cyclin E, block by N-terminal domains of cyclin-dependent kinase inhibitory proteins, **271,** 469
- Cyclin-dependent kinase inhibitors
  - p27, N-terminal domain, block of cdk2/cyclin E phosphorylation by CDK-activating kinase, **271,** 469
- Cyclin E
  - upregulation in transgenic mice expressing dominant negative form of retinoic acid receptor, association with accelerated growth of hepatocytes, **278,** 229
- Cyclin E–Cdk2 complex
  - phosphorylation by CDK-activating kinase, block by N-terminal domains of cyclin-dependent kinase inhibitory proteins, **271,** 469
- Cycloheximide
  - acetoxyl analogue E-73, block of TNF-induced NF-κB signaling pathway, **277,** 330
- Cyclooxygenase
  - expression in vascular endothelium, effects of shear stress in biomechanical perfusion model, **269,** 257
- Cyclooxygenase-1
  - coupling to prostanoid synthases in hepatic macrophages (rat), **276,** 488
- Cyclooxygenase-2
  - coupling to prostanoid synthases in hepatic macrophages (rat), **276,** 488
  - expression
    - enhanced expression, role in gp120-induced apoptosis in neocortex (rat), **274,** 664
    - in lipopolysaccharide-stimulated monocytes, modulation by cAMP, prostaglandin E_2, and NSAIDs (human), **278,** 790
    - in lipopolysaccharide-stimulated RAW 264.7 macrophages, upregulation by prostaglandin E_2, **272,** 744
    - in rheumatoid synovial cells, induction by nitric oxide (human), **268,** 928
  - gene expression, induction by 4-hydroxy-2-nonenal (rat), **273,** 437
  - induction by ceramide in pulmonary A549 cells, role of NF-κB activation, **277,** 675
  - inhibition
    - effects on cardiac function in myocardial infarction (rat), **273,** 772
    - prevention of insulin-dependent diabetes in low-dose streptozotocin-treated mice, **273,** 699
  - prostaglandin E_2 synthesis dependent on, in macrophages, inhibition by salicylate metabolites (mouse), **274,** 197
  - role in cholesterol modulation of vascular reactivity to endothelin-1 (rat), **274,** 553
  - role in protective effect of 17β-estradiol on hypercholesterolemic aorta (rabbit), **275,** 696
  - selective inhibition
    - with antisense oligodeoxynucleotide, effect on induction of adjuvant-induced arthritis (rat), **269,** 415
    - by C-phycocyanin from *Spirulina platensis,* **277,** 599
  - transcription regulation by GTPases (NIH 3T3 cells), **276,** 406
- Cyclopentenone
  - bioactive derivatives, inhibition of IL-6 signaling and Stat3 activation (A23-98), **276,** 447
- Cyclopentenone prostaglandins
  - smooth muscle cell preconditioning by, protection against toxic effects of oxidized low-density lipoprotein (human), **269,** 327
- Cyclosome
  - mammalian, negative regulation in mitotic checkpoint by Cdc20/Fizzy phosphorylation, **271,** 299
- Cyclosporin A
  - binding by ubiquitin, **277,** 325
  - effects on pathological hypertrophy during congestive heart failure transition (rat), **273,** 347
  - induction of atypical heat shock response (BSC-1, F9, HeLa cells), **269,** 464
- *Cyp1a-1*
  - downregulation in hepatoma Hepa-1c1c7 cells by bisphenol A (mouse), **277,** 594
- *CYP2D6*
  - polymorphisms, and anti-KLM-1, in patients with chronic hepatitis C, **270,** 922
- CYP4F2 gene
  - leukotriene B_4 ω-hydroxylase encoded by, regulation in HepG2 cells by retinoic acids, **279,** 864

CYRL
  cloning and expression in testis, lung, and spleen (rat), **267,** 697
Cystathionine ketimine
  priming effect on superoxide generation in neutrophils (human), **269,** 297
Cystathionine sulfoxide
  priming effect on superoxide generation in neutrophils (human), **269,** 297
Cystatin A
  gene transcription in keratinocytes, increase by AP-2γ (human), **278,** 719
Cysteine
  in acetolactate synthase, structural and functional roles, **271,** 801
  conserved residues in Bcl-2, role in antiapoptotic action, **277,** 171
  Cys 160 and not Cys 3 identified as site of *in vitro* palmitoylation on $G_{s\alpha}$, **270,** 131
  dipeptidyl peptidase III residue 176, site-directed mutagenesis (rat), **276,** 553
  functional role in protein kinase CK2 regulatory subunit, analysis with pCMB, **267,** 427
  highly reactive residues in rodent hemoglobin, **275,** 517
  and His, tryptophan in proximity to, role in active site of alkaline protease, **270,** 910
  Id2 helix-loop-helix domain C42, role in homodimerization and function, **273,** 1042
  identification as initial site of α-crystallin modification by kynurenine, **276,** 216
  LIM domain protein CRP2 rich in, specific interaction with CRP2BP (human), **274,** 655
  mutations on recombinant deacetoxycephalosporin C synthase, effects on catalysis of penicillin expansion, **267,** 445
  replacement by serine in firefly luciferase, effect on luminescence activity, **267,** 394
  role in tellurite resistance mediated by TehAB determinant, **277,** 394
  type-1 ribosome-inactivating protein cysteine 242 microenvironment (iris), **275,** 481
Cysteine–histidine dyad
  catalytic, in chalcone synthase, evidence for, **275,** 725
Cysteine proteinases
  in bone cells, stimulation by human growth hormone via IGF-I (rabbit), **268,** 875
  inhibition
    by peptide from cathepsin K proregion (human), **276,** 924
    by S-nitrosylated α_1-protease inhibitor (human), **267,** 918
Cysteine-rich domains
  and/or disintegrin-like domains, from *Bothrops atrox* hemorrhagin, induction of edema, **276,** 29
Cysteine-rich protein
  disintegrin-like halysetin, from *Agkistrodon halys* venom, purification, characterization, and cDNA sequence, **278,** 112
Cysteine sulfinic acid
  methylene blue-photosensitized oxidation, **270,** 782
Cysteinyl leukotriene receptor
  $CysLT_2$, molecular characterization and tissue distribution (human), **274,** 316
Cystic fibrosis
  associated *Burkholderia cepacia,* exopolysaccharide synthesis in, enzymes leading to nucleotide sugar producers for, **276,** 71
Cystic fibrosis transmembrane conductance regulator
  anion conductance mediated by, regulation of Na^+-K^+-pump activity in Calu-3 human airway cells, **274,** 230
  hydrolysis of ATP by domain of, pharmacology and effects of G551D mutation, **271,** 518
  mediated Cl^- secretion in mouse endometrium, effect of enhanced expression of epithelial Na^+ channels, **276,** 40
  mutant ΔF508, upregulation by combination of sodium butyrate and low temperature, **271,** 659
  normal epicardial to endocardial gradient of CFTR mRNA expression, loss in hypertrophied rabbit left ventricle, **278,** 144
Cytochrome b_5
  from outer mitochondrial membrane, kinetic trapping of hemin in, analysis (rat), **273,** 467
Cytochrome *c*
  apoprotein, binding to GroEL, electrostatic interactions in, fluorescence correlation spectroscopic study, **267,** 300
  apoptosis dependent on, induction by hydroxytyrosol (HL-60 cells), **278,** 733
  release by mitochondria
    caspase cascade mediated by, activation by 25-hydroxycholesterol (CHO-K1 cells), **278,** 557
    in heart, induction by arachidonic acid (rat), **277,** 128
    induction by ganglioside GD3 and mimetics (rat), **276,** 1210
  role in induction of apoptosis by pyrrolidine dithiocarbamate (HL-60 cells), **268,** 942
  tetraheme, from *Desulfovibrio,* expression in *Escherichia coli,* **268,** 688
Cytochrome cd_1
  oxidized, conformer with His/Met *c*-heme coordination, freeze-quench NIR-MCD spectroscopic study (*Paracoccus pantotrophus*), **279,** 674
Cytochrome *c* oxidase
  assembly, effect of P(174)L mutation in *hSCO1* gene (human), **279,** 341
  inhibition by NO, mechanisms, **274,** 183
  mitochondrial, deficiency, SCO1 and COX17 gene characterization (human), **276,** 530
Cytochrome-*c* peroxidase
  interactions with lysine peptides (yeast), **268,** 395
Cytochrome P450
  arachidonic acid metabolites produced by, role in modulation of ion transport in proximal tubules by angiotensin II (rat), **272,** 423
  evolution, implications of evolutionary studies of sterol 14-demethylase, **273,** 799
  gene induction, phenobarbital-elicited activation of nuclear receptor CAR in, **277,** 1
  heterologous, engineering in *Acinetobacter,* **276,** 797
  interactions with drug-metabolizing enzymes, affinity chromatographic study, **273,** 1048
Cytochrome P450 1A
  RT-PCR detection in pharyngeal epithelium and chondroid cells from chemically untreated fish and role in craniofacial skeletal development, **271,** 130
Cytochrome P450 1A1
  active, targeting to periplasmic space of *Escherichia coli,* **279,** 803
  association with microsomal epoxide hydrolase and UDP-glucuronosyltransferase, **273,** 1048
  gene expression regulation, role of serum, **267,** 572
  gene knockout, effect on hepatic constitutive expression of other genes in [*Ah*] battery (mouse), **267,** 184
  induction by prototypical inducers in human hepatocytes, **273,** 333
Cytochrome P450 1A2
  association with P450 2B4, high-pressure spectroscopy studies (rabbit liver) **276,** 1005
  constitutive and inducible mRNA expression in HepG2 cells, quantitation with RT-PCR, **267,** 756
  induction by prototypical inducers in human hepatocytes, **273,** 333
Cytochrome P450 2A
  high-level expression in suncus lung and activation of 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone, **269,** 393
Cytochrome P450 2B1
  gene expression, suppression by retinoic acids (rat), **277,** 66

Cytochrome P450 2B2
  gene, phenobarbitone responsiveness, role of 5′-proximal DNA region, demonstration in liver *in vivo* (rat), **268,** 734
  gene expression, suppression by retinoic acids (rat), **277,** 66
Cytochrome P450 2B4
  association with P450 1A2, high-pressure spectroscopy studies (rabbit liver), **276,** 1005
  effects of mutations and substrate binding, EPR studies, **276,** 762
  lacking NH$_2$-terminal hydrophobic sequence, residue 285 of, role in electron transfer from NADPH-cytochrome P450 reductase, **270,** 777
  ternary complex formation in, optical biosensor study, **273,** 750
Cytochrome P450 2B9
  activation in liver in response to β-estradiol, comparison in male C57BL/6, DBA/2, and hybrid B6D2F1 mice, **279,** 288
Cytochrome P450 2B10
  activation in liver in response to β-estradiol, comparison in male C57BL/6, DBA/2, and hybrid B6D2F1 mice, **279,** 288
Cytochrome P450 2C9
  catalytic function, role of arginines 97 and 108, **270,** 983
  constitutive and inducible mRNA expression in HepG2 cells, quantitation with RT-PCR, **267,** 756
  effects of prototypical inducers in human hepatocytes, **273,** 333
Cytochrome P450 2C19
  effects of prototypical inducers in human hepatocytes, **273,** 333
Cytochrome P450 2E1
  constitutive and inducible expression in leptin-deficient *ob/ob* mice, **268,** 337
  constitutive and inducible mRNA expression in HepG2 cells, quantitation with RT-PCR, **267,** 756
  ethanol-induced, effect on inhibition of proteasome activity by alcohol (mouse), **279,** 23
Cytochrome P450 3A
  metabolism of ergot alkaloids in liver (bovine), **274,** 746
  metabolism of tocopherols dependent on, and inhibition by sesamin (HepG2/C3A cells, rat hepatocytes), **277,** 531
Cytochrome P450 3A4
  constitutive and inducible mRNA expression in HepG2 cells, quantitation with RT-PCR, **267,** 756
  induction by prototypical inducers in human hepatocytes, **273,** 333
Cytochrome P450 3A7
  bacterial expression system for, development, **269,** 623
Cytochrome P450 4B1
  possible risk factor for bladder cancer in humans, **277,** 776
Cytochrome P450 4F2
  CYP4F2 gene encoding leukotriene B$_4$ ω-hydroxylase, regulation in HepG2 cells by retinoic acids, **279,** 864
Cytochrome P450 4G11
  gene cloning and expression in *Trichogramma cacoeciae* and *Apis mellifera,* **268,** 677
Cytochrome P450 4G12
  gene cloning and expression in *Trichogramma cacoeciae* and *Apis mellifera,* **268,** 677
Cytochrome P450 4G15
  isolation, sequence, and expression in nervous system (*Drosophila melanogaster*), **273,** 1132
Cytochrome P450 27A1
  metabolism by vitamin D$_3$ (human), **273,** 977
Cytochrome P450 48A1
  gene cloning and expression in *Trichogramma cacoeciae* and *Apis mellifera,* **268,** 677
Cytochrome P450 48A2
  gene cloning and expression in *Trichogramma cacoeciae* and *Apis mellifera,* **268,** 677
Cytochrome P450 51
  molecular evolution studies, **273,** 799
Cytochrome P450 105D1
  immobilized heterologous, cofactor recycling with, **279,** 708
Cytochrome P450 106A2
  substrate binding, probing by FTIR studies of iron ligand CO stretch vibration, **269,** 737
Cytochrome P450$_{cam}$
  and electrode, clay-bridged electron transfer between, **268,** 740
Cytochrome P450 oxidoreductase
  cloning and characterization from zygomycete fungus *Cunninghamella,* **268,** 345
Cytokeratins
  expression in serum-free long-term cultures of human hepatocytes, **269,** 46
Cytokine receptor-like molecule-2
  cloning: type I cytokine receptor preferentially expressed in hematopoietic cells (mouse), **272,** 224
Cytokines
  angiogenic, secretion by cancer epithelial cells, inhibition by silymarin, **276,** 371
  apoptosis mediated by, in islets of Langerhans, protective effect of IGF-I (dog), **277,** 455
  chemotactic, keratinocyte-derived, expression, modulation by NO *in vitro* and during cutaneous wound repair *in vivo* (mouse), **274,** 689
  cytotoxicity in βTC cells induced by, prevention by PACAP via inhibition of iNOS expression, **278,** 211
  deprivation in hematopoietic cells, caspase-3 activation and apoptosis induced by, prevention by Ras-dependent signals, **267,** 449
  endotoxin-induced release, amelioration by thymulin–Zn^{2+} (human), **274,** 500
  gene expression in peritoneal macrophages, effects of cholera toxin and 8-bromo-cAMP (mouse), **269,** 570
  IL-6 family
    activation of STATs induced by, inhibition by parthenolide, **267,** 329
    autocrine/paracrine secretion, role in angiotensin II-induced delayed STAT3 activation (mouse, rat), **269,** 798
  induction and regulation of matrix metalloproteinase-12 in monocyte/macrophages (human), **269,** 808
  inflammatory
    macromolecular glycolipids from *Enterococcus hirae* inducing, separation and effects on cellular activation, **273,** 164
    regulation of endothelial cell-derived lipase expression in endothelial cells, **272,** 90
  modulation of membrane-bound and soluble RANKL expression (mouse), **275,** 768
  secretion by human mast cells, effects of α-melanocyte-stimulating hormone, **278,** 14
Cytokinesis
  caveolin-1 concentration in cleavage furrow, time-lapse analysis, **268,** 82
  initiation in *Tetrahymena,* molecular cloning of p85 gene regulating, **264,** 112; *erratum,* **267,** 478
Cytomatrix protein
  Bassoon, membrane association (rat), **275,** 43
Cytomegalovirus
  human, IE1 gene product of, upregulation of IL-8 gene expression, **279,** 298
Cytosine nucleoside analogs
  drug resistance, conferral by ribozymes against deoxycytidine kinase, **278,** 569
Cytoskeletal proteins
  association with Enigma homologue protein via PDZ domain (rat), **272,** 505
  intermediate filament-associated protein IFAP300 identification as hamster plectin homolog, **273,** 183

Cytoskeleton
  actin, reorganization, induction by *Drosophila* homolog of LIM-kinase, **276,** 1178
  associated taxol-sensitive kinase activity (CV-1 cells), **277,** 525
  comparative effects of constitutive and transient expression of phosphatidylinositol 3-kinase (mouse), **272,** 822
  control, formin family proteins in, **267,** 479
  disruption, induction of chondrogenesis of mesenchymal cells by activation of PKC-α signaling (chick embryo), **273,** 609
  Helicobacter pylori-induced changes in gastric adenocarcinoma AGS cells, role of rac and cdc42, **269,** 247
  integrity, role in functional properties of sodium channels, **275,** 839; **276,** 204
Cytosol
  low-molecular-weight substance, inhibition of testosterone binding in seminal vesicles (bovine), **276,** 483
Cytosolic factors
  role in intranuclear binding of HIV-1 VPR, **270,** 1055
Cytotoxicity
  C(5) $2'$-deoxyuridines, role of C5-substituent, **272,** 64
  cytokine-induced, in βTC cells, prevention by PACAP via inhibition of iNOS expression, **278,** 211
  hydrogen peroxide, prevention by GPI 6150 via inhibition of poly(ADP-ribose) polymerase (P388D1 cells), **278,** 590
  islet amyloid polypeptide fibrils, mechanisms: IAPP effects on oxidative stress responses and LDL uptake in insulin-producing cell lines, **267,** 619
  noninsecticidal parasporal proteins of *Bacillus thuringiensis* serovar *shandongiensis* isolate, preferential effects on leukemic T cells, **272,** 218
  norcantharidin, against tumors, role of p53, **276,** 278
  recombinant bFGF–rViscumin fusion proteins to B16 melanoma cells, **277,** 499

D

DAN
  overexpression, induction of growth suppression in p53-deficient SAOS-2 cells, **278,** 20
Daunorubicin
  P-glycoprotein site binding to, interaction with cholesterol (NIH-G185 cells), **276,** 909
Daxx
  interaction with sentrin and Ubc9, **279,** 6
Dbf4 motifs
  identification as conserved motifs in activation subunits for Cdc7 kinases essential for S-phase, **275,** 228
Dbl
  activation after ACK1-dependent tyrosine phosphorylation, **268,** 141
  $G\alpha_{13}$ association with, role in RhoA activation (NIH 3T3 cells), **277,** 718
DBR1 gene
  yeast, mutations in, effects on life cycles of Ty1 and Ty3 retrotransposons, **268,** 112
Dbr1p
  role in efficient accumulation of reverse transcripts by yeast retrotransposons Ty1 and Ty3, **268,** 112
dcw cluster
  producing kirromycin, isolation and characterization (*Streptomyces collinus*), **268,** 282
DD4
  cDNA, encoding Ca^{2+}-binding protein, molecular cloning (*Penaeus japonicus*), **276,** 286
DD-peptidase
  inhibition by complexes of vanadate with hydroxamic acids, **274,** 732
DDT
  inhibition of gap junctional intercellular communication, reversal by resveratrol (rat), **275,** 804
Deacetoxycephalosporin C synthase
  recombinant, cysteine mutations in, effects on catalysis of penicillin expansion, **267,** 445
Deacetylase
  SIR2-like protein activity as, role of NAD$^+$, **278,** 685
Deacetylase inhibitors
  inhibition of IL-1-dependent induction of haptoglobin, role of CCAAT/enhancer-binding protein isoforms (IEC-6 cells), **276,** 673
Deafness dystonia peptide 1
  cDNA cloning and expression (mouse), **273,** 759
Deamidation
  RhoA glutamine 63 by *E. coli* CNF1 toxin, role of short sequence of GTPase switch 2 domain, **267,** 588
Death receptor
  TRAIL, *see* TRAIL receptor
Decorin
  quiescence-induced expression, regulation (human), **269,** 604
Deencryption
  cellular tissue factor, role of cytoplasmic domain (BHK cells), **272,** 332
Degranulation
  IgE receptor-triggered exocytosis in RBL-2H3 mast cells, role of Hrs binding protein, **277,** 752
Dehydroepiandrosterone
  in analysis of crystallization of estrogenic 17β-hydroxysteroid dehydrogenase at elevated temperature, **277,** 100
  effects on bioreduction of disulfides in glucose 6-phosphate dehydrogenase-deficient cells, **273,** 846
  glucose uptake induced by, role of atypical and conventional protein kinase C (rat), **277,** 361
Deinococcus radiodurans
  Yellow-like protein, similarity to *Drosophila yellow-B* cDNA, **270,** 773
Deletion mutants
  Asp f 2 allergen of *Aspergillus fumigatus,* antibody binding of, **270,** 1128
Deletions
  terminal, in C5 protein, effects on promotion of RNase P catalysis, **268,** 118
Delorazepam
  identification in *Artemisia dracunculus:* endogenous formation of benzodiazepines in plants, **269,** 290
Delta1
  physical interaction with Notch1 and Notch3 receptors, **276,** 385
Dementia
  associated with HIV gp120 exposure, role of CXCR4 receptor (rat), **274,** 212
Dendrites
  translocation of ferritin H chain mRNA (rat), **272,** 789
Dendritic cells
  activated, KE04 gene differentially expressed by, identification and characterization (human), **279,** 487
  differentiation and maturation, inhibition by vitamin D analogs (mouse), **270,** 701
  and macrophages, differentiation of human mononuclear phagocytes to, differential expression of NF-κB during, **268,** 99
  monocyte-derived, maturation, analysis by microarray hybridization (human), **275,** 731
  presentation of lipid component of lipoprotein from *Borrelia burgdorferi* (human), **267,** 897
  protein kinase DPK derived from, cloning and activation of ERK1/ERK2 and JNK/SAPK pathways (human), **274,** 872

Denervation
  effect on expression of insulin-like growth factor binding protein mRNAs in rat skeletal muscle, **273,** 282
  GLUT4 gene elements responsive to, localization (mouse), **267,** 744
Dengue type 2 virus
  from French West Indies, genomic sequence, **277,** 89
Dentate gyrus
  and granule cells of cerebellum, Cre-mediated gene mutation in mouse brain restricted to, **269,** 149
Dentinogenesis
  associated expression of subtilisin-like proprotein convertase PACE4 (rat), **272,** 410
Deoxoartemisinin
  NMR studies, **274,** 359
Deoxycholate
  reduction of apoptosis-inducing effects of sodium butyrate on human colon adenoma cells, **273,** 45
Deoxycytidine kinase
  ribozymes against, potential to confer drug resistance to cytosine nucleoside analogs, **278,** 569
15-Deoxy-12,14-prostaglandin J$_2$
  effect on vascular endothelial growth factor expression in vascular smooth muscle cells (human), **271,** 571
15-Deoxy-Δ12,14-prostaglandin J$_2$
  inhibition of lung cancer cell growth via induction of apoptosis (human), **270,** 400
  repression of TNF-α-induced E-selectin expression, role of LRF-1/ATF3 (human), **275,** 406
Deoxyribonuclease I
  classification into pancreas, parotid, and pancreas–parotid types in mammals, **269,** 481
2′-Deoxy-L-ribonucleoside 5′-triphosphates
  recognition by human telomerase, **279,** 475
Deoxyribonucleotide triphosphatase
  inhibition by nucleic acids (pig, yeast), **276,** 823
2′-Deoxyuridines
  C5-substituted, antiherpetic, ^{1}H NMR conformational study, **272,** 64
Dephosphorylation
  casein kinase II-phosphorylated *Physarum* fragmin by PP2C-like phosphatase, **279,** 438
Depolarizing stimuli
  reduction of Ca^{2+}/calmodulin-dependent protein kinase II activity in rat islets of Langerhans, **270,** 1119
Dermatan sulfate
  enzymatic reconstruction, **270,** 588
Des-acyl ghrelin
  and ghrelin, identification as major forms of ghrelin peptide in gastrointestinal tissue (rat), **279,** 909
Δ^6-Desaturase
  Mucor rouxii, with high similarity to plant Δ^6-desaturase, cloning and heterologous expression in *Saccharomyces cerevisiae,* **279,** 17
Desensitization
  homologous, human CRF$_1$ receptor, mechanism: rapid agonist-induced phosphorylation, **268,** 572
Desmethylselegiline
  stimulation of synthesis of NGF, BDNF, and GDNF in cultured astrocytes (mouse), **279,** 751
Desmin
  phosphorylation by p21-activated kinase at sites different from Rho-associated kinase, **272,** 712
  role in generation of tension by skeletal muscle (mouse), **278,** 419
Desmocollin
  DSC1 and *DSC3* genes encoding, genomic organization and amplification (human), **276,** 454
Desulfovibrio desulfuricans
  aldehyde oxidoreductase, biochemical/spectroscopic characterization and X-ray analysis, **268,** 745
  tetraheme cytochrome *c,* expression in *Escherichia coli,* **268,** 688
Desulfovibrio gigas
  flavoredoxin gene cloning, **272,** 653
Desulfurization
  functional analysis of thermophilic desulfurizing enzyme genes from *Paenibacillus* sp. A11-2, **270,** 81
Deuterium isotope effect
  on NMR signal of low-barrier hydrogen bond in transition-state analog complex of chymotrypsin, **273,** 789
DEVD-caspase
  activity suppression in human neuroblastoma cells, role of intracellular labile zinc, **268,** 148
Development
  4G2 gene with expression regulated during, identification in *Xenopus laevis,* **267,** 558
  associated changes of pH sensitivity of cardiac muscle to Ca^{2+} regulation, role of troponin I isoform switching (rabbit), **267,** 912
  calcitonin receptor gene expression during, site analysis in transgenic mouse, **274,** 124
  CCK-B receptor gene expression in, analysis (mouse), **272,** 837
  chromosomal movement in, KLP-17 protein involved in, cDNA cloning and expression (*Caenorhabditis elegans*), **267,** 643
  craniofacial skeleton, role of CYP1A in vertebrates, **271,** 130
  Down syndrome critical region gene 2 expression in mouse during, **272,** 156
  early, expression of mitochondrial D-loop binding protein during, regulation (sea urchin), **277,** 299
  gastric mucosal neonate/infant-specific pepsinogen expression changes during, analysis (rat), **267,** 806
  gene expression during, alterations in metallothionein-null mice, **270,** 458
  hepatic, cell density-dependent regulation by gp130-independent pathway (mouse), **277,** 152
  lymphocytes, role of adenosine deaminase, review, **272,** 311
  maf-1 mRNA distribution in kidney during, *in situ* hybridization histochemical study (rat), **272,** 777
  postimplantation, nonredundant roles of elongation factor MEN (mouse), **279,** 563
  postnatal, reciprocal expression of infant- and adult-preferring transcripts of CDCrel-1 septin gene in neocortex (rat), **273,** 723
  retina, early stage, selective expression of gene retinovin (chicken embryo), **276,** 12
Dexamethasone
  induction of increased expression of RAMP1 and CRLR mRNA in human VSMCs, **270,** 1063
  inhibition of TNFα-induced MIP-2 expression and neutrophil adhesion to endothelial cells (mouse), **271,** 364
  and insulin, cAMP, and [Ca^{2+}]$_i$ changes, effects on G6Pase components p36 and p46 in HepG2 cells, **272,** 41
  insulin resistance induced by, role of atypical and conventional protein kinase C (rat), **277,** 361
  stimulation of *Ubc* promoter in L6 myocytes, **274,** 537
Diabetes
  acute, effect on ubiquitin–proteasome proteolytic pathway in heart and skeletal muscle (rat), **276,** 1255
  enhancement of acetaldehyde-induced depression of cardiomyocyte contraction (rat), **269,** 697
  glucose levels in, effect of systemic administration of HVJ viral coat–liposome complex containing human insulin vector (mouse), **273,** 666

Diabetes (*continued*)
  insulin-dependent
    prevention by COX-2 inhibition in low-dose streptozotocin-treated mice, **273,** 699
    role of *WFS1* gene Arg456His missense mutation on nonautoimmune genetic basis, **268,** 612
  maternally inherited diabetes and deafness syndrome, mitochondrial DNA variations in patients with, **277,** 771
  MODY, association with hepatocyte nuclear factor-1α loss-of-function mutations P112L and Q466X (human), **279,** 792
  non-insulin-dependent
    insulin resistance in, associated elevation of protein-tyrosine phosphatase 1B expression and activity in skeletal muscle (rat), **274,** 583
    leptin-deficient *ob/ob* mouse model, constitutive and inducible expression of CYP2E1, **268,** 337
    patient with mutations in calcium sensing receptor gene and mitochondrial DNA, **278,** 808
    resistance, conferral by Pro12Ala polymorphism in PPARγ2 (human), **271,** 212
  in transgenic mice expressing Reg I, **278,** 368
Diabolin
  induction of false fertilization in sea urchin eggs (kelp), **272,** 691
4,5-Diaminofluorescein diacetate
  direct evidence of nitric oxide presence in mitochondria, **272,** 129
Diazepam
  identification in *Solanum tuberosum:* endogenous formation of benzodiazepines in plants, **269,** 290
Dibenzothiophene
  thermophilic enzymes desulfurizing, genes from *Paenibacillus* sp. A11-2 encoding, operon structure and functional analysis, **270,** 81
6,3′-Dibromoflavone
  identification as high-affinity ligand of brain benzodiazepine binding site with agonistic properties (rat), **273,** 694
Dibutyryl cAMP
  upregulation of Ssf-1 mRNA expression in HL-60 cells, **275,** 37
Dichloro-(2,2′:6′,2″-terpyridine)-platinum(II) dihydrate
  effect on pyruvate dehydrogenase kinase activity, **267,** 500
Diclofenac
  in study of B-C loop of CYP2C9: importance of arginines 97 and 108 in catalytic function, **270,** 983
Dictyostelium
  myosin II regulation, role of tail domains, **271,** 75
Dictyostelium discoideum
  cellular starvation response, role of glucose-regulated protein 94, **274,** 323
Diet
  ascorbate and iron supplementation, effects on DNA damage (human), **277,** 535
  fatty acids in, upregulation of UCP2 expression in 3T3-L1 preadipocytes, **277,** 541
  phenolics in, scavenging of peroxynitrite, effect of bicarbonate, **279,** 692
  pro-atherosclerotic, reduction of paraoxonase activity (rabbit), **269,** 232; *erratum,* **270,** 676
5-Diethoxyphosphoryl-5-methyl-1-pyrroline N-oxide
  with spin trapped superoxide radicals, EPR detection using liquid nitrogen freezing, **275,** 895
Diethylamine diazeniumdiolate
  inhibition of platelet aggregation independently of cGMP (human), **279,** 412
Diethyl pyrocarbonate
  effect on pyruvate dehydrogenase kinase activity, **267,** 500
Diethylstilbestrol
  sulfation by human cytosolic sulfotransferases, **267,** 80
Differential display
  ultraviolet-sensitive gene detection (human), **274,** 859
Differentially methylated region
  oocyte-specific, of *U2afbp-rs/U2af1-rs1* gene, role in imprinted methylation, **268,** 590
Differentiation
  adipocytes
    inhibition by c-Myc, independence from c-Myc role in cell cycle control (3T3-L1 cells), **269,** 438
    insulin signaling pathways during, proteins involved in, regulation (human), **276,** 162
    membrane and secreted proteins upregulated during, identification (3T3-L1 cells), **272,** 293
    regulation by retinoblastoma protein phosphorylation via PI 3-kinase and mTOR pathway (3T3-L1 cells), **275,** 115
    STAT6 activation during, effect of IL-4 (3T3-L1 cells), **267,** 516
  bone marrow cells into hepatocyte lineage *in vitro,* induction by HGF (rat), **279,** 500
  breast cancer cells, promotion by intracellular FGF-2 (T-47D cells), **277,** 255
  butyrate-induced, associated 5-lipoxygenase expression in colorectal carcinoma Caco-2 cells, **268,** 778
  Caco-2 cells, transcriptional regulation of human dipeptidyl-peptidase IV during, role of hepatocyte nuclear factor 1α and 1β, **270,** 235
  cardiac myoblasts H9c2, effect of phosphatidylinositol 3-kinase (rat), **276,** 502
  and cardiogenesis, in mouse ES cells *in vitro,* effect of additional human chromosome 21, **273,** 219
  and death, induction by bFGF in olfactory neuroblastoma cells, **279,** 172
  dendritic cells, inhibition by vitamin D analogs (mouse), **270,** 701
  Dictyostelium discoideum, starvation-associated, role of glucose-regulated protein 94, **274,** 323
  effect on cytoplasmic distribution and *in vivo* RNA association of proteins recognized by 3′-UTR stability element of α-globin mRNA in erythroleukemic cells, **279,** 40
  embryonic dopaminergic neurons, promotion by human GDNF (rat), **273,** 902
  endothelial cells, effect of conditionally expressed PKC pseudosubstrate peptides (rat), **271,** 499
  F9 cells, regulating pattern of *mDab2* gene expression during, **275,** 189
  gastric surface mucous cells in culture, promotion by air–liquid interface (mouse), **271,** 741
  granulocytic, factors inducing, upregulation of Ssf-1 mRNA expression in HL-60 cells, **275,** 37
  hematopoietic cells, embryonic stem cell-derived, Id gene regulation (mouse), **276,** 803
  4-hydroxynonenal-induced, MEL cells, role of PKC activity translocation, **272,** 75
  keratinocytes
    caspase-14 mRNA expression during, **277,** 655
    expression and effects of p63 and p73 during, *in vitro* analysis, **273,** 342
    role of E-cadherin at cell periphery *in vitro* (human), **269,** 369
  leukemia cell, induction by recombinant modulin P48 derived from *Mycoplasma fermentans* (human, mouse), **269,** 284
  monocyte lineage, role of *Hex* (mouse), **276,** 1155; *erratum,* **279,** 739
  monocytes
    IL-6-induced rapid gene repression at onset of, analysis (mouse), **267,** 863
    in vitro, expression of retinoid receptors during, **270,** 17
  mononuclear phagocytes to macrophages and dendritic cells, differential expression of NF-κB during (human), **268,** 99
  multilineage, *Cbfa1*-deficient calvarial cells *in vitro* (mouse), **273,** 630
  multilineage potential of TBR31-2 bone marrow stromal cell line established from ts-SV40 T antigen gene transgenic mice, **268,** 450
  myeloid, enhanced p73 expression during, analysis (human), **277,** 62

  - myoblasts from patient with novel variant of congenital muscular dystrophy, laminin α2 processing in, **277,** 639
  - myogenic, promotion by insulin-like growth factor-II overexpression in mouse embryonic stem cells, **277,** 631
  - neuroblastoma cells
    - LR11 expression during, analysis (IMR32, PC12 cells), **275,** 365
    - role of protein kinase C-θ (human), **279,** 589
    - upregulation of *neugrin* gene and *m-neugrin* gene with, **279,** 526
  - neuronal, *see* Neuronal differentiation
  - osteoblasts
    - BMP-2-induced, in mesenchymal progenitor cell line C3H10T1/2, role of ERK, **268,** 757
    - 17β-estradiol-stimulated, mediation by nitric oxide (human, mouse, rat), **277,** 604
  - preadipocytes
    - differential expression of adipocyte amino acid transporter during, transactivation by SP1 and SP3 (3T3-L1 cells), **271,** 100
    - STAT6 activation during, effect of IL-4 (3T3-L1 cells), **267,** 516
  - retinal progenitors transplanted into subretinal space, *in vitro* study (rat), **268,** 842
  - skeletal myoblasts *in vitro,* role of SPARC (chicken), **271,** 630
  - squamous, tracheal surface epithelial cells, downregulation of Muc1 mucin (hamster), **271,** 641
- Diffusion chamber
  - in studies of non-steady-state O$_2$ diffusion in metmyoglobin solutions, **276,** 773
- α-Difluoromethylornithine
  - sensitivity of trypanosomatid protozoa to, **279,** 663
- Digital fluorescence imaging
  - trafficking of endosomes containing LDL in brain astroglial cells, **269,** 25
- Dihydrodiol dehydrogenase
  - catalytic function, roles of His-79 and Tyr-180, **278,** 333
- 7,8-Dihydroneopterin
  - oxidation by hypochlorous acid with formation of neopterin, **275,** 307
- Dihydropteridine reductase
  - NADH-ferric reductase activity associated with, **271,** 788
- Dihydropyrimidine dehydrogenase
  - *DPYD* gene encoding, promoter for, cloning and characterization (human), **271,** 28
- Dihydrotestosterone
  - in analysis of crystallization of estrogenic 17β-hydroxysteroid dehydrogenase at elevated temperature, **277,** 100
  - induction of NAD$^+$-linked 15-hydroxyprostaglandin dehydrogenase expression in human prostate cancer cells, **276,** 77
- 4,5-Dihydroxy-2-propenylcyclopent-2-enone
  - inhibition of IL-6 signaling and Stat3 activation (A23-98), **276,** 447
- 1,25-Dihydroxyvitamin D$_3$
  - activation of sphingomyelin turnover in osteosarcoma cells without sphingolipid-induced changes in cytosolic Ca^{2+}, **273,** 95
  - and PGE$_2$ and PTH, differential stimulation of IL-6 in stromal/osteoblastic cells, **270,** 1080
  - regulation of p57^{Kip2} gene in primary osteoblasts (rat), **269,** 422
  - transcriptional downregulation of PMCA1 gene by, mediation by gene promoter region, **277,** 722
- 1α,25-Dihydroxyvitamin D$_3$
  - and analog, inhibition of dendritic cell differentiation and maturation, **270,** 701
  - selective promtion of ICAM-3 expression in leukemic mast cells (human), **273,** 1104
- Dimerization
  - E2-2 heterodimerization with HASH-1 in neuroblastoma cells (human), **274,** 22
  - Id2 homodimerization, role of cysteine residue C42 in helix-loop-helix domain, **273,** 1042
  - prion protein: predictions for fibril formation, **278,** 646
- 5,5-Dimethyl-1-pyrroline-*N*-oxide
  - interactions with free radicals: quantification of spin-trapping kinetics, **270,** 125
- Dinitrophenol
  - effect on stimulation of catecholamine secretion from pheochromocytoma cells, **273,** 17
- Dinucleotide repeats
  - in type I collagen α2 chain gene, association with systemic sclerosis (human), **272,** 36
  - UG, specific binding of CUG-binding protein in yeast three-hybrid system, **277,** 518
- Dipeptide α-keto-β-aldehydes
  - inhibition of cathepsin S, **275,** 401
- Dipeptidyl peptidase III
  - alteration by site-directed mutagenesis (rat), **276,** 553
  - identification in neutrophils (human), **273,** 393
- Dipeptidyl peptidase IV
  - mRNA expression in pokeweed mitogen-stimulated T cells, suppression by DP IV inhibition (human), **274,** 410
  - transcriptional regulation during differentiation of Caco-2 cells, role of hepatocyte nuclear factor 1α and 1β, **270,** 235
- Diphenyleneiodonium
  - effect on rat RBL-2H3 mast cell functions, **276,** 742
- 2,2-Diphenyl-1-picrylhydrazyl radical
  - scavenging by aqueous extract of *Ilex paraguariensis,* **269,** 357
- Diphtheria toxin
  - elongation factor 2 ADP-ribosylation catalyzed by, cytoplasmic inhibitor of, detection in liver cells (rat), **269,** 553
  - interactions with receptor, molecular characterization, **275,** 374
- Diphtheria toxin receptor
  - interactions with toxin, molecular characterization, **275,** 374
- Diptericin
  - *DptB* gene, expression and evolution (*Drosophila melanogaster*), **279,** 574
- Directed evolution
  - enhancement of L-aspartase activity from *Escherichia coli* W, **276,** 346
- Disaccharides
  - peanut agglutinin-binding, role in α-galactosidase stimulation of acetylcholine receptor aggregation in skeletal muscle cells, **270,** 899
- Disheveled
  - domain requirement for interaction and function in Wnt signaling (yeast), **276,** 1162
- Disintegrin-like domains
  - and/or cysteine-rich domain, from *Bothrops atrox* hemorrhagin, induction of edema, **276,** 29
- Disintegrin-like protein
  - halysetin, purification, characterization, and cDNA sequence (*Agkistrodon halys* venom), **278,** 112
- Disintegrins
  - ADAM 12-L, retention in *trans*-Golgi network (human), **275,** 261
  - EC3, effects on human and murine α4 integrin and lymphocyte infiltration of Langerhans islets in pancreas and salivary glands of NOD mice (*Echis carinatus*), **267,** 413
  - salmosin, suppressive mechanism in B16 melanoma cell metastasis, **275,** 169
- Dissociation energy
  - agglutinated red blood cells, evaluation (human), **277,** 381
- Distamycin
  - analogs lacking leading amide unit at N-terminus, DNA binding properties, **267,** 139

Disulfide bonds
- cleavage by reducing agents and light in activation of rhodopsin in *Chlamydomonas in vivo,* **275,** 286
- proteolytic fragments of gastric mucin bound by, identification as 100- and 140-kDa proteins, **270,** 722

Disulfides
- antithrombotic, structure–activity relationships, **273,** 421
- bioreduction in glucose 6-phosphate dehydrogenase-deficient cells, effects of dehydroepiandrosterone, glutathione depletion, and phenylarsine oxide, **273,** 846

Dithiocarbamates
- inhibition of hematopoiesis via copper-dependent mechanism (human), **274,** 513

Dithiothreitol
- activation of rhodopsin in *Chlamydomonas in vivo* by disulfide bond cleavage, **275,** 286
- destabilized proteins, effect on bovine lens α-crystallin, **276,** 619
- reduced, stimulation of caspase-3 activity, **268,** 78

Dityrosine
- protein, immunochemical detection in atherosclerotic lesion of ApoE-deficient mice using novel monoclonal antibody, **275,** 11

Divalent cation homeostasis
- defect in, induction by disruption of aldose reductase gene (mouse), **277,** 281

Divalent cations
- effects on structure of human recombinant prothymosin α, **267,** 663

D-loop binding protein
- mitochondrial, expression, regulation during early development (sea urchin), **277,** 299

DMBT1 gene
- regulatory regions, identification (human), **270,** 673

DMO gene
- sexually dimorphic expression in tilapia, **272,** 662; *erratum,* **277,** 781

DMPO
- interactions with free radicals: quantification of spin-trapping kinetics, **270,** 125

DMRT1 gene
- sexually dimorphic expression in tilapia, **272,** 662; *erratum,* **277,** 781

DNA
- 50-kb fragments, lack in DNA fragmentation factor 45-deficient thymocytes upon activation of apoptosis (mouse), **274,** 225
- aldolase B gene origin/promoter, overlapping set of elements in, regulation of transcription and autonomous replication (rat), **278,** 760
- annealing, capillary electrophoresis method, **272,** 251
- anti-dsDNA IgG autoantibodies, binding properties, determination by light chain (human), **271,** 240
- base periodicity in genes and genomes, Fourier signals characterizing, vectors of Shannon information from, **268,** 289
- binding
  - by *BanI* restriction endonuclease in major groove, **269,** 35
  - by BRCT regions of BRCA1 and XRCC1, **279,** 678
  - by distamycin analogs lacking leading amide unit at N-terminus, **267,** 139
  - by HSNP-C′ from *Sulfolobus acidocaldarius,* **267,** 614
- calmodulin binding protein EICBP with motif binding to, from *Arabidopsis,* **279,** 762
- cell-targeted delivery, protein–DNA complexes for, molecular organization, **278,** 455
- cleavage
  - by Cr(III) complex, **271,** 731
  - induction by 9-anilinoacridine inhibitors of topoisomerase II (*Plasmodium falciparum*), **269,** 406
- c-*myc* promoter, nuclease-hypersensitive element in, adoption of *i*-tetraplex structures (human), **278,** 158; *erratum,* **279,** 306
- complementary, *see* cDNA
- CYP2B2 gene 5′-proximal region, role in phenobarbitone responsiveness i liver *in vivo* (rat), **268,** 734
- damage, effects of ascorbate and iron supplementation (human), **277,** 535
- degraded, lipotransfection, induction of apoptosis and inhibition of mitosi (Rat-1 cells), **270,** 406
- d-TGGCGGC with two triplet repeats of Fragile X Syndrome, cation dependent conformational switches, NMR study, **278,** 833
- electric field-mediated encapsulation into large liposomes, **267,** 838
- extrachromosomal, screening in *Salmonella abortus equi:* large plasmid encoding heavy metal resistance, **272,** 6
- four-way junction, binding of mitochondrial transcription factor A (human) **271,** 492
- fragmentation in skeletal muscle during tumor growth, relationship to cance cachexia (mouse, rat), **270,** 533
- gene gun-mediated delivery into rodent brain tissue *in vivo,* **270,** 163
- helix stabilizing properties of HSNP-C′ from *Sulfolobus acidocaldarius* **267,** 614
- HIV-LTR, Sp1 bound to, formation of complex with mutant $p53^{His273}$, **279** 383
- induction of apoptosis in electroporated U937 cells, **270,** 94
- major motif for differential expression regulation of adipocyte amino aci transporter, SP1-like *cis*-element identification as, **271,** 91
- methylation, in bacteria, **276,** 1261
- minor groove, ARE-selective ligands of, screening by combinatorial ap proach, **270,** 393
- mitochondrial, *see* Mitochondrial DNA
- naked, improved VEGF expression in mouse skeletal muscles by, **272,** 230 *erratum,* **276,** 390
- oxidative damage due to, aberrant processing in systemic lupus erythema tosus (human), **273,** 894
- protein interactions with, analysis by capillary electrophoresis, **272,** 251
- repetitive
  - highly repetitive rat DNA component *Xmn*I fragment, transcription mod ulation by, **279,** 282
  - SV40 repeat sequence GGGCGG, NMR observation of C-tetrad in struc ture of, **270,** 967
- ribosomal, preferential cleavage sites for *Sau3A* restriction endonucleas (human), **274,** 11
- sense codons, dependent introduction of unnatural amino acids into multipl sites of protein, **270,** 1136
- sensing, colloidal gold-enhanced, analysis by quartz crystal microbalance **274,** 817
- sequence recognition by proflavine-derived Tröger base, enantiospecificity **273,** 681
- strand breaks, in liver cells of Long-Evans Cinnamon strain rats, inductio by hepatic copper accumulation, **276,** 174
- supercoiled, p53 binding to consensus sequence in, modulation by mono clonal antibodies, **267,** 934
- synthesis, induction by prostaglandin $F_{2\alpha}$ via early signaling mechanisms i Swiss 3T3 cells, **270,** 11
- tamoxifen adducts, HPLC analysis using postcolumn online photochemica activation, **273,** 40
- telomeric, double-stranded, binding of nucleolin *in vitro,* **268,** 909
- TT virus, replicative forms in human bone marrow cells, **270,** 657
- uracil-containing, excision repair in oocyte mitochondrial extract (*Xenopu laevis*), **278,** 395

DNA fragmentation factor 45
- thymocytes deficient in, lack of 50-kb DNA fragments upon activation o apoptosis (mouse), **274,** 225

DNA immunization
- in humans, compact plasmid vectors for, **279,** 548

DnaK/J
  synthesis, role in magnetic field stimulation of transposition in *E. coli,* **270,** 745
DNA-PK
  autophosphorylation, independent Ku70 nuclear translocation (HeLa-S3 cells), **276,** 1105
DNA polymerase
  mammalian, selective inhibition by epolactaene, **273,** 784
  thermostable, reversible binding of melanin and inhibition, **271,** 726
DNA polymerase β
  alternative mRNA forms, lack of tumor specificity and production by alternative splicing, **268,** 1
DNA polymerase δ
  interaction with *Thermococcus fumicolans* PCNA, **276,** 600
DNA repair
  damage by UVC, Xeroderma pigmentosum complementation group A protein as processivity factor in, **271,** 782
  excision repair of uracil-containing DNA in oocyte mitochondrial extract (*Xenopus laevis*), **278,** 395
  γ-ray-induced strand breaks, gene-specific repair in colon cancer cells (human), **269,** 433
  role of *rhp23*$^+$ gene (*Schizosaccharomyces pombe*), **268,** 210
DNA/RNA chimeras
  circular dumbbell oligonucleotides, inhibition of HIV-1 replication, **270,** 953
DNase γ
  monoclonal antibodies specific to, characterization and use in DNase γ detection in nuclei of apoptotic thymocytes (rat), **275,** 343
DNA topoisomerase II
  9-anilinoacridine inhibitors of, induction of DNA cleavage (*Plasmodium falciparum*), **269,** 406
  selective inhibition by epolactaene (human), **273,** 784
DNA vaccines
  encoding heat shock protein, suppression of *Helicobacter pylori*-induced gastritis (mouse), **277,** 159
  malaria, immunization into liver by gene gun, protection against lethal challenge of *Plasmodium berghei* sporozoite, **271,** 107
Docosahexaenoic acid
  conjugated, induction of apoptosis in cultured tumor cells, role of lipid peroxidation (human), **270,** 649
Dolichin
  chitinase-like antifungal protein isolated from *Dolichos lablab,* **269,** 155
Dopamine
  conjugation with glutathione, catalysis by glutathione *S*-transferase M2-2 (human), **274,** 32
  effect on Ca^{2+}-induced release from clonal neuronal cells, effect of erythropoietin, **279,** 293
  potentiation of MPP^+-induced mitochondrial dysfunction, **268,** 916
Dopa *o*-quinones
  conjugation with glutathione, catalysis by glutathione *S*-transferase M2-2 (human), **274,** 32
Dorsal lateral geniculate nucleus
  apoptosis in, after monocular deprivation, role of glutamate signaling, NO production, and PARP activation (rat), **278,** 360
Dorsal root ganglia
  cellular voltage-dependent calcium currents, inhibitory effect of NO (rat), **271,** 509
Double C2 protein
  Doc2γ isoform, without Ca^{2+}-dependent phospholipid binding activity (mouse), **276,** 626
Doublesex/Mab-3-domain genes
  DMRT1 and *DMO,* sexually dimorphic expression in tilapia, **272,** 662; *erratum,* **277,** 781
Down syndrome
  heart disease in, potential model: impaired cardiogenesis in mouse ES cells containing human chromosome 21, **273,** 219
  reduction of neuroendocrine-specific protein C in brain of patients with, **276,** 329
Down syndrome critical region
  DSCR2 gene expression during mouse development and in human cell lines, **272,** 156
  DSCR5 and DSCR6 gene isolation on chromosome 21q22.2 (human), **271,** 693
Doxorubicin
  cardiomyocyte apoptosis induced by, effect of insulin-like growth factor-1, **270,** 1029
DPK
  cloning, and activation of ERK1/ERK2 and JNK/SAPK pathways (human), **274,** 872
DPYD gene
  promoter for, cloning and characterization (human), **271,** 28
DR4
  initiator caspase cleavage by, inhibition by $p21^{WAF1/CIP1}$, **269,** 179
Drug delivery
  potential utility of wavelength-programmed solute release from photosensitive liposomes, **276,** 169
Drug design
  computational, cyclic urea inhibitors for improved binding of HIV-1 aspartic protease, **268,** 384
  range of azole compounds against cholesterol side chain cleavage enzyme, substrate–heme complex approach, **275,** 75
Drug resistance
  activity of allelic variants of Pi class human glutathione *S*-transferase toward chlorambucil, **278,** 258
  AZT, role of reverse transcriptase phosphorylation: casein kinase II phosphorylation of HIV-1 RT *in vitro,* **275,** 26
  cytosine nucleoside analogs, conferral by ribozymes against deoxycytidine kinase, **278,** 569
  enhanced, in cells coexpressing ErbB2 with EGF receptor or ErbB3, **277,** 757
DSCR2 gene
  expression during mouse development and in human cell lines, **272,** 156
DSCR5 gene
  isolation from Down syndrome critical region on chromosome 21q22.2 (human), **271,** 693
DSCR6 gene
  isolation from Down syndrome critical region on chromosome 21q22.2 (human), **271,** 693
Dual-label monoclonal antibody technique
  quantification of E-selectin expression in murine model of chronic colitis, **268,** 547
Dual-specificity protein phosphatase
  FYVE-DSP1, molecular cloning (human), **270,** 222
Duchenne muscular dystrophy
  myoblasts from, expressing telomerase gene, transplantation in SCID mice, **272,** 362
Duffy antigen
  N-terminal domain, soluble chimeric protein containing, expression and binding properties, **273,** 705
dUTPase
  trimeric, altered subunit communication in subfamilies of, **279,** 534
Dynamin-like protein
  alternatively spliced variants in brain, binding as substrates to glycogen synthase kinase 3β (rat), **268,** 893

Dynein
Tctex2-related outer arm light chain, phosphorylation at activation of sperm motility, **256,** 177; *erratum,* **268,** 952
β-Dystroglycan
interaction with growth factor receptor 2, **274,** 93
Dystrophin
related short 71-kDa product, expression in mitochondria (mouse, rat), **274,** 275
Dystrophin gene
cryptic exon in intron 2, evolution from intron by acquisition of consensus sequences for splicing during anthropoid evolution (human), **267,** 321

E

E2-2
expression in neuroblastoma cells and formation of functional complex with HASH-1 (human), **274,** 22
E3 ubiquitin ligase
activity, of *Drosophila* von Hippel-Lindau tumor suppressor complex, **276,** 355
E7
human papillomavirus, expression in mouse fibroblast model of HPV-associated tumorigenesis, **270,** 119
E-73
block of TNF-induced NF-κB signaling pathway, **277,** 330
Ear
anti-inflammatory response *in vivo* due to inhibition of MAP kinase kinase (mouse), **268,** 647
EBAG9 gene
promoter analysis and chromosomal mapping (human), **273,** 654
EC3
effects on human and murine α4 integrin and lymphocyte infiltration of Langerhans islets in pancreas and salivary glands of NOD mice (*Echis carinatus*), **267,** 413
*Eco*KI
localization in bacterial cell, **270,** 46
Edema
induction by disintegrin-like/cysteine-rich domains from *Bothrops atrox* hemorrhagin (mouse), **276,** 29
Edg1
sphingosine 1-phosphate receptor expressed in embryonic brain, characterization (zebrafish), **279,** 139
Edg6
as putative sphingosine 1-phosphate receptor coupling to Ca^{2+} signaling pathway, **268,** 583
Edg7
variant HOFNH30, identification as G-protein-coupled receptor for lysophosphatidic acid (human), **273,** 805
Eggs
calcium oscillations in mouse, cytosolic soluble protein factor triggering, detection in chicken and *Xenopus* sperm, **268,** 947
false fertilization, induction by kelp diabolin (sea urchin), **272,** 691
fertilized, colocalization of proteoliposomes with endogenous mitochondria (mouse), **278,** 183
NAADP$^+$ binding, characterization (sea urchin), **276,** 112
Sepia officinalis, release of waterborne pheromonal peptide ILME, **275,** 217
Ehrlich carcinoma cells
transplantation in mice, hepatic zinc response via metallothionein induction after, **270,** 1140
Eicosanoids
gene expression and metabolite production in vascular endothelium, effects of shear stress, in biomechanical perfusion model, **269,** 257
Eicosapentaenoic acids
conjugated, induction of apoptosis in cultured tumor cells, role of lipi peroxidation (human), **270,** 649
stimulation of leptin mRNA expression and leptin secretion in adipocytes i *vitro* (3T3-L1 cells), **270,** 343
eIF4G
overproduction, effect on cap- and IRES-dependent protein synthesis i mouse mammary carcinoma cells, **277,** 117
Eker rat
Tsc2 gene mutant model of renal cell carcinoma, *Erc* gene preferentiall expressed in, mapping and cDNA sequence, **275,** 134
Elastase
human HDL modified by, uptake by murine macrophages, **271,** 386
inhibition by hsp25 N-terminal 33-amino-acid deletion variant, **270,** 183
Elastin
short β-turn in, protein A minidomain with, effect of sodium sulfate, **27** 899
Elcatonin
effect on osteoinduction by recombinant human bone morphogeneti protein-2 (rat), **269,** 317
Electric field
mediation of DNA encapsulation into large liposomes, **267,** 838
oscillating, action on cells, mechanism, **272,** 634
Electrogenic nature
sodium-dependent multivitamin transport (rat), **270,** 836
Electron microscopy
TT virus particles recovered from sera and feces of infected humans, **27** 718
Electron paramagnetic resonance
aldehyde oxidoreductase isolated from *Desulfovibrio desulfuricans,* **26** 745
DEPMPO–superoxide radical detection, using liquid nitrogen freezing, **27** 895
effects of mutations and substrate binding on cytochrome P450 2B4, **27** 762
nitric oxide effects on erythrocyte membrane fluidity in essential hyperten sion (human), **275,** 946
Electron paramagnetic resonance spin trapping, *see* Spin trapping
Electron transfer
clay-bridged, between cytochrome $P450_{cam}$ and electrode, **268,** 740
from NADPH-cytochrome P450 reductase, role of residue 285 in CYP2B lacking NH$_2$-terminal hydrophobic sequence, **270,** 777
Electron transport chain
ferredoxin on, region with aspartates 57 and 60, role in interactions wit photosystem I (*Synechocystis* sp. PCC 6803), **271,** 647
Electrophysiology
calcium-permeable channels rat ECaC and mouse CaT1 in kidney, **274,** 34 *erratum,* **279,** 738
connexin 37 polymorphic variants (human), **274,** 216
Electroporation
apoptosis induction by introduced DNA in U937 cells, **270,** 94
Electrostatic interactions
in charged substrate binding to GroEL, fluorescence correlation spectro scopic study, **267,** 300
Elk-1
transcriptional activation dependent on, role in impaired c-fos expression i fibroblasts from patient with insulin resistance, **268,** 577
Elongation factor
MEN, nonredundant roles in postimplantation development (mouse), **27** 563
Elongation factor 1α
identification as substrate of Rho-associated kinase (rat liver), **278,** 72

- Elongation factor 2
  - ADP-ribosylation catalyzed by diphtheria toxin or endogenous transferase, cytoplasmic inhibitor of, detection in liver cells (rat), **269,** 553
- Embryo
  - Bigh3 gene expression (mouse), **274,** 267
  - estrogen receptor-related receptor γ expression (mouse), **267,** 532
  - *frizzled-10A* and *frizzled-10B* gene expression (*Xenopus laevis*), **278,** 377
  - αP integrin, cloning and characterization (sea urchin), **272,** 929
  - *in vitro* translation extracts, preparation from *Drosophila,* **270,** 473
  - lethal effects of homozygous glutamate cysteine ligase catalytic subunit gene knockout (mouse), **279,** 324
  - Mcl-1a from nucleus, cloning and characterization, **279,** 725
  - preimplantation, estrogen receptor-mediated effects of bisphenol A (mouse), **270,** 918
  - *Xlim-1* gene expression, RNA interference with, analysis (*Xenopus laevis*), **274,** 434
  - zinc-deficient, caspase-3-like activity and apoptosis (rat), **271,** 250
- Embryo-abundant protein
  - ginkbilobin with sequence similarity to, isolation from *Ginkgo biloba* seeds, **279,** 407
- Embryogenesis
  - embryoid body model, endothelial-specific expression, role of *flt-1* promoter (mouse), **276,** 1089
- Embryoid body
  - embryogenesis model, endothelial-specific expression in, role of *flt-1* promoter (mouse), **276,** 1089
- Embryonal carcinoma cells
  - cyclosporin A-induced atypical heat shock response (F9 cells), **269,** 464
  - differentiation, regulating pattern of *mDab2* gene expression during (F9 cells), **275,** 189
  - neuronal differentiation, effects of anti-sense mouse deafness dystonia peptide 1 (P19 cells), **273,** 759
  - Nurr1 response element activating tyrosine hydroxylase gene promoter, identification (F9 cells), **274,** 590
  - vinculin-deficient, cell mechanics, single-cell analysis with magnetic tweezer (F9 cells), **277,** 93
- Embryonic stem cells
  - cryopreserved neural progenitor cells derived from, neuronal differentiation (mouse), **271,** 418
  - derived hematopoietic differentiation, Id gene regulation (mouse), **276,** 803
  - with human chromosome 21, specific impairment of cardiogenesis in mouse, **273,** 219
  - human insulin-like growth factor-II overexpression, promotion of myogenic differentiation (mouse), **277,** 631
- Emerin
  - direct interaction with lamin A, **267,** 709
- Emx1
  - Emx1–Cre knock-in mouse, Cre-mediated recombination in, specificity and efficiency, **273,** 661
  - Emx1-specific expression of foreign genes using knock-in approach, **270,** 978
  - mutant mouse with C57BL/6 background, normal corpus callosum, **276,** 649
- Enabled
  - adhesion-dependent tyrosine phosphorylation in *Drosophila* neuronal cell line, **270,** 482
- Enantioselectivity
  - DNA sequence recognition by proflavine-derived Tröger base, **273,** 681
  - human telomerase for 2′-deoxy-L-ribonucleoside 5′-triphosphates, **279,** 475
- Endo-β-*N*-acetylglucosaminidase A
  - immobilized, synthesis of neoglycoenzymes using homogeneous N-linked oligosaccharides, **267,** 134
- Endocannabinoids
  - levels in anterior pituitary gland, sex steroid influence (rat), **270,** 260
- Endocervical cells
  - multidrug-resistant, resistance to apoptosis, correlation with reduced caspase-3 activation and enhanced antiapoptotic protein expression (human), **270,** 415
- Endochitinase
  - *Photorhabdus luminescens,* assay in extract contaminated with exochitinase, **268,** 302
- Endoglucanase
  - thermostable, from hyperthermophilic *Aquifex aeolicus* VF5, cloning and characterization, **279,** 420
- Endometrial carcinoma cells
  - telomerase activity, suppression by hammerhead ribozyme targeting 5′-end of hTERT mRNA (AN3CA, Ishikawa cells), **273,** 316
- Endometrium
  - CFTR-mediated Cl$^-$ secretion, effect of enhanced expression of epithelial Na$^+$ channels (mouse), **276,** 40
  - endothelial cells, angiopoietin-1 and -2 and Tie2 expression, effects of hypoxia and inflammation (human), **275,** 159
  - tryptophan 2,3-dioxygenase induction during implantation (mouse), **274,** 166
- Endomorphin-2
  - stereoisomeric analogues, synthesis, opioid receptor binding, and solution conformation, **276,** 7
- β3-Endonexin
  - inhibition of cyclin A-associated kinase, **267,** 947
- Endooligopeptidase A
  - as predominant cytosolic oligopeptidase of rabbit brain, **269,** 7; *erratum,* **272,** 309
- Endopeptidase
  - tripeptidyl peptidase-I/CLN2 protein activity as, characterization, **268,** 904
- Endoplasmic reticulum
  - Ca^{2+} loss, initiation of ER protein degradation, monitoring with apoaequorin, **268,** 711
  - p125 localization associated with, regions required for, **279,** 144
  - parathyroid hormone-related peptide targeting into, inefficiency of signal sequence for, **273,** 621
  - proteins associated with, degradation initiated by loss of ER Ca^{2+}, monitoring with apoaequorin, **268,** 711
  - testis, Ca^{2+} pump inhibition, role in cell death induction by estrogenic alkylphenols (rat), **277,** 568
  - tyrosinase associated with, degradation, role of oligosaccharide trimming, **271,** 22
  - unfolded protein response in human cells, gene regulation during, **278,** 530
- Endosomes
  - EGF receptor trafficking via, in response to EGF, delay in waved-2 mouse liver, **267,** 881
  - late, ATP7B localization to, effect of copper (Huh7 cells), **275,** 871
  - LDL-containing, trafficking in brain astroglial cells, digital fluorescence imaging, **269,** 25
  - related structures in supranuclear region, rab4 localization, **268,** 847
- Endostatin
  - inhibition of microvessel formation in *ex vivo* rat aortic ring angiogenesis assay, **268,** 183
- Endothelial cell-derived lipase
  - regulated expression in vascular endothelial cells, **272,** 90
- Endothelial cells
  - acid ceramidase and neutral/alkaline ceramidase activities, active release (mouse), **275,** 746
  - aortic, *see* Aortic endothelial cells
  - bradykinin-stimulated Ca^{2+} signaling and NO production, effect of midkine (pig), **276,** 830
  - brain, immortalized RBE4 cells, in study of control of cerebral carnitine levels by blood–brain barrier, **267,** 433

- Endothelial cells (*continued*)
  - coronary artery
    - endothelial cell-derived lipase expression, regulation (human), **272,** 90
    - matrix metalloproteinase activity, enhancement by HGF (human), **272,** 900
  - endometrial, angiopoietin-1 and -2 and Tie2 expression, effects of hypoxia and inflammation (human), **275,** 159
  - Hsp70 downregulation during hypoxia (human), **274,** 542
  - human umbilical vein, *see* Human umbilical vein endothelial cells
  - MAP kinase phosphatase-1 activation, enhancement by adhesion to fibronectin (human), **273,** 539
  - microvascular
    - dermal, matrix metalloproteinase activity, enhancement by HGF (human), **272,** 900
    - growth, effects of thiol and sulfodiimine metalloproteinase inhibitors (human), **274,** 780
    - proliferation and migration, inhibition by hepatocyte growth factor kringle 1–4 (human), **279,** 846
    - pulmonary, functional expression of NAD(P)H oxidase p47 (mouse), **278,** 584
  - migration, regulation by thromboxane A$_2$, **267,** 245
  - migration and morphogenesis, induction by sphingosylphosphorylcholine (bovine, human), **272,** 603
  - neutrophil adhesion to, inhibition by dexamethasone (mouse), **271,** 364
  - proliferation, migration, and differentiation, effect of conditionally expressed PKC pseudosubstrate peptides (rat), **271,** 499
  - proliferation induced by HARP, implications of N- and C-terminal peptides (bovine, human, rat), **274,** 242
  - proliferation and VEGF secretion, effects of somatostatin and octreotide (murine HECa10 cells), **268,** 567
- Endothelial function
  - superoxide as messenger of, review, **278,** 1
- Endothelin-1
  - ET-1 (1-31)
    - biological activity in vascular smooth muscle cells (pig), **275,** 595
    - effect on umbilical artery (human), **270,** 622
  - induction of NAD(P)H oxidase in endothelial cells (human), **269,** 713
  - inhibition of Na/H exchanger-3 in ET$_B$ receptor-overexpressing OKP cells, **271,** 807
  - vascular reactivity to, modulation by cholesterol by stimulation of proinflammatory pathway (rat), **274,** 553
- Endothelin B receptor
  - mutations in Hirschsprung disease patients, functional analysis, **275,** 524
  - OKP cells overexpressing, Na/H exchanger-3 inhibition by endothelin-1, **271,** 807
- Endothelin-converting enzyme-1
  - induction in gastric mucosal injury by indomethacin (rat), **269,** 377
  - suppression during buccal mucosal ulcer healing, effect of chronic alcohol ingestion (rat), **271,** 318
  - upregulation in gastric mucosal inflammatory responses to *Helicobacter pylori* lipopolysaccharide (mouse), **267,** 801
- Endothelium
  - arterial relaxation by human leptin dependent on, role of NO (rat), **273,** 745
  - dysfunction in multiple risk factor syndrome, protection by *in vivo klotho* gene delivery (rat), **276,** 767
  - embryoid model of embryogenesis, role of *flt-1* promoter (mouse), **276,** 1089
  - hypotonic stress-induced NO production, dependence on endogenous ATP (bovine), **274,** 736
  - vascular, eicosanoid gene expression and metabolite production, effects of shear stress, in biomechanical perfusion model (human), **269,** 257
- Endotoxin, *see* Lipopolysaccharide
- Endotoxin shock
  - regulation of genes for iNOS and urea cycle enzymes in rat liver during **268,** 221
- Energy homeostasis
  - abnormal, induction by disruption of *klotho* gene (mouse), **278,** 665
  - regulation, central effects of neuromedin U (rat), **277,** 191
- Energy interconversion
  - ATP synthesis and heat production during Ca^{2+} efflux by sarcoplasmic reticulum Ca^{2+}-ATPase, **276,** 35
- Energy metabolism
  - cardiac, *in vivo* metabolic imaging in transgenic mice, **271,** 222
- Enigma homologue protein
  - association with cytoskeletal proteins via PDZ domain (rat), **272,** 505
- Enolase-1, *see* 2-Phosphoglycerate hydrolase
- ENT1 gene
  - genomic organization and expression (mouse), **277,** 200
- *Enterobacter aerogenes*
  - UDP-sugar hydrolase gene, cloning and characterization, **269,** 526
- *Enterobacter cloacae*
  - toxin forming oligomers and binding to proteins, induction of oxidative stress in leukocytes, **274,** 649
- *Enterococcus hirae*
  - cytokine-inducing macromolecular glycolipids from, separation method and effects on cellular activation, **273,** 164
- Environmental stress
  - effects on expression of glyceraldehyde-3-phosphate dehydrogenase gene (*Pleurotus sajor-caju*), **278,** 192
- Enzyme sensors
  - peptide-displaying, antibody-mediated modulation, molecular mechanisms, **275,** 360
- Eosinophils
  - antigen-induced recruitment into mouse airways, effect of JAK2 blockade by tyrphostin AG-490, **270,** 209
  - C5a-stimulated, phosphatidylinositol 4,5-bisphosphate-3-kinase activation and phosphatidylinositol 3,4,5-trisphosphate formation (human), **269,** 816
  - interleukin-8 production, inhibition by surfactant protein A (human), **270,** 831
- Eotaxin
  - gene induction by ionizing radiation, dependence on cell type, **269,** 546
- Epicatechin
  - dietary, scavenging of peroxynitrite, effect of bicarbonate, **279,** 692
  - hydrolysis of cocoa procyanidins in gastric milieu to, **272,** 236
  - O-methylation and glucuronidation in small intestine (rat), **277,** 507
- Epidermal growth factor
  - effect on UCP3 mRNA levels in skeletal muscle and adipose tissue afte systemic administration (rat), **279,** 914
  - EGF receptor internalization and endosomal trafficking in response to, dela in waved-2 mouse liver, **267,** 881
  - and hepatocyte growth factor, additivity of proliferative effects on hepatocytes (rat), **278,** 698
- Epidermal growth factor receptor
  - cells coexpressing ErbB2 with EGF receptor or ErbB3, enhanced dru resistance in, **277,** 757
  - deletion variant EGFRvIII, small peptide targeted against, design, **275,** 63
  - internalization and endosomal trafficking in response to EGF, delay i waved-2 mouse liver, **267,** 881
  - mediated signaling, role of adaptor protein CIN85 via interaction with c-Cbl **268,** 321
- Epidermis
  - ion distribution in, visual imaging, **272,** 134
  - S100A12 expression, comparison with MRP-14 (human), **275,** 865

Epidermoid carcinoma cells
  carrier-mediated uptake of rhodamine 123 and implications for use in MDR research (KB-3-1, KB-8-5 cells), **279,** 124
  cell cycle dysregulation by epigallocatechin-3-gallate (A431 cells), **275,** 328
Epididymis
  AQP9 localization (rat), **276,** 1118
(−)-Epigallocatechin
  rapid H_2O_2 generation upon addition to cell culture media, **273,** 50
(−)-Epigallocatechin gallate
  inhibition of histamine release from basophilic leukemia RBL-2H3 cells, role of tyrosine phosphorylation pathway, **274,** 603; *erratum,* **276,** 391
  rapid H_2O_2 generation upon addition to cell culture media, **273,** 50
Epigallocatechin-3-gallate
  dysregulation of cell cycle (A431 cells), **275,** 328
  mediated apoptosis of human chondrosarcoma cells, role of caspase-3, **270,** 793
Epiregulin
  upregulation in pancreatic cancer and stimulation of pancreatic cancer cell growth (human), **273,** 1019
Epithelial calcium channel
  gene structure and chromosomal mapping (human), **275,** 47
Epithelial cells
  adenoviral vector cytotoxicity, dependence on transgene encoded, **274,** 767
  and corneal fibroblasts and leukemic cell lines, ion-gated sodium channel in, paradoxical effects of mineralocorticoids, **270,** 811
  functions of SAP family proteins, review, **269,** 1
  gene expression and apoptosis, effects of human telomerase reverse transcriptase expressed in rabbit cells, **278,** 503
  HPV-16 oncoprotein-positive, expression of angiogenesis modulators, **277,** 55
  polarized, membrane trafficking in, osmomechanical regulation (rabbit), **271,** 429
  scattering and migration, role of Tyr1330 and Tyr1337 of RON receptor tyrosine kinase C-terminus, **267,** 669
Epithelium
  alveolar
    differential expression of apoptosis factors, redox sensitivity and role of NF-κB-selective targeting (rat), **271,** 257
    immunomodulation by thymulin–Zn^{2+} (human), **274,** 500
  endometrial, CFTR-mediated Cl^- secretion, effect of enhanced expression of epithelial Na^+ channels (mouse), **276,** 40
  gastric surface, mucous cells from, differentiation in culture, promotion by air–liquid interface (mouse), **271,** 741
  pharyngeal, CYP1A mRNA detection *in situ* in chemically untreated fish by RT-PCR, **271,** 130
  pulmonary, expression of functionally distinct forms of NKXX2.1 protein, **270,** 462
  S100A12 expression, comparison with MRP-14 (human), **275,** 865
  sulfatase and sulfotransferase gene superfamilies, expression profiling (human), **277,** 236; *erratum,* **279,** 306
Epitopes
  cytoplasmic, for monoclonal antibody HK 12.18, location on H,K-ATPase α subunit, **273,** 942
  orientation impact on chimeric peptide antigenicity, **276,** 1085
  protective helper T cell, mapping on influenza A virus hemagglutinin, **270,** 190
Epitope tag
  insertions, probing of topology of glutamate receptor GluR1 subunit with, **276,** 157
Epolactaene
  selective inhibition of mammalian DNA polymerases and human DNA topoisomerase II, **273,** 784
Epoxide hydrolase
  microsomal, association with cytochrome P450 1A1, **273,** 1048
  microsomal, polymorphisms, role in Parkinson's disease (human), **269,** 676
EPR spin trapping, *see* Spin trapping
Epsilon
  as initiator of translation of CAT mRNA in *Escherichia coli,* **273,** 528
Epsilon sequence
  enhancing activity in *Escherichia coli* and *Agrobacterium tumefaciens,* **269,** 508
ϵ transcription
  germline, IL-4-induced, in human B cell line, role of Shc, **268,** 54
Equal symbol Fourier transforms
  vectors of Shannon information from Fourier signals characterizing base periodicity in genes and genomes, **268,** 289
Equistatin
  structural and functional domains (sea anemone), **269,** 732
erbB2–erbB3 receptor complex
  association with focal adhesion kinase in Schwann cells, induction by neuregulin, **271,** 414
ErbB receptors
  enhanced drug resistance in cells coexpressing ErbB2 with EGF receptor or ErbB3, **277,** 757
Erc gene
  preferentially expressed in renal cell carcinoma in *Tsc2* gene mutant rat model, mapping and cDNA sequence, **275,** 134
Ergot alkaloids
  hepatic metabolism by cytochrome P450 (bovine), **274,** 746
ERK, *see* Extracellular signal-regulated kinase
Erwinia chrysanthemi PY35
  cel and *pel* characterization and rapid identification of gene products, **268,** 420
Erythroblasts
  ferritin mRNA translation, regulation in primary cells (chicken), **275,** 292
Erythrocyte precursor cells
  calpain activator protein localization to inner surface of plasma membrane, **272,** 472
Erythrocytes
  agglutination by monoclonal antibodies, energy evaluation (human), **277,** 381
  alterations in chronic obstructive pulmonary disease, effects of *N*-acetylcysteine (human), **279,** 552
  extracellular reduction of ascorbate free radical (human), **267,** 118
  from Fanconi's anemia patients and their parents, changes of spectrin in, **273,** 899
  hemolysis by tryptophan analogs of indolicidin (rat), **274,** 714
  IgG-coated, augmentation of LPS-stimulated TNF-α secretion and TNF-α mRNA levels and stability in macrophages (sheep), **271,** 70
  interactions with amyloid β peptides, implications for Aβ quantitation in plasma (human), **268,** 750
  loaded with *in vitro* translated Bcl-2 and cleaved fragment, hemoglobin release from, induction by Bcl-2 antibodies (sheep), **270,** 816
  membrane fluidity in essential hypertension, effects of NO, EPR study (human), **275,** 946
  S-nitrosothiols, quantitation in response to LPS challenge (rat), **273,** 22
  p40/GPR69A characterization as peripheral membrane protein related to lantibiotic synthetase component C, **275,** 69
  parathyroid hormone-activated chloride fluxes, measurement (human), **269,** 470
  sickle, and normal cells, NO-mediated heme oxidation and β-globin nitrosation (human), **275,** 962
Erythroid progenitors
  antiapoptotic effects of erythropoietin, mediation by activation of Akt/FKHRL1 pathway (human), **275,** 16

- Erythroleukemia cells
  - apoptosis
    - induced by H_2O_2 under serum deprivation, inhibition by antisense c-*jun* (F-MEL cells), **271,** 747
    - induction by activation of lipoxygenase isozymes (K562 cells), **272,** 345
  - differentiation-dependent cytoplasmic distribution and *in vivo* RNA association of proteins recognized by 3′-UTR stability element of α-globin mRNA (MEL-707 cells), **279,** 40
  - 4-hydroxynonenal-induced differentiation, role of PKC activity translocation (MEL cells), **272,** 75
- Erythromycin
  - suppression of activator protein-1 and NF-κB activation in bronchial epithelial cells (human), **267,** 124
- Erythropoiesis
  - mammalian, advanced stage of, distinct FMRP polysomal population at, **275,** 608
- Erythropoietin
  - antiapoptotic effects in primary human erythroid progenitors, mediation by activation of Akt/FKHRL1 pathway, **275,** 16
  - effect on Ca^{2+}-induced neurotransmitter release from clonal neuronal cells, **279,** 293
  - induction in hypoxic cells, suppression by zinc: inhibition of HIF-1β nuclear translocation, **268,** 652
  - signal peptide, efficiency for HIV_{MN}-1 gp120 expression (COS-7 cells), **273,** 557
- Erythropoietin receptor
  - signaling, and exogenous c-Kit, mimicry of v-ErbA oncoprotein activity, **275,** 292
- *Escherichia coli*
  - antibacterial effects of tryptophan analogs of indolicidin, **274,** 714
  - antibiotic activity of CRAMP analogues without hemolytic effect, **275,** 904
  - aqualysin I translocation across cytoplasmic membrane, role of COOH-terminal pro-sequence, **277,** 216
  - CAT mRNA translation, epsilon as initiator of, **273,** 528
  - CNF1 toxin, deamidation of Glu63 of RhoA, role of short sequence of GTPase switch 2 domain, **267,** 588
  - CYP3A7 expression system, development, **269,** 623
  - epsilon sequence enhancing activity, **269,** 508
  - exopolyphosphatase, polyphosphate binding to, effects of monovalent ions, **274,** 236
  - expression studies
    - *Comamonas testosteroni* 3α-hydroxysteroid dehydrogenase/carbonyl reductase, **272,** 622
    - *Desulfovibrio* tetraheme cytochrome *c,* **268,** 688
    - high-level expression of antimicrobial peptide by fusion partner reinforcing formation of inclusion bodies, **277,** 575
    - human CYP27A1, **273,** 977
    - human glial cell line-derived neurotrophic factor, **268,** 692
  - genome, distinct types of nucleotide sequences in, **272,** 571
  - glycolytic pathway, dynamic behavior, modulation by ADP, **271,** 244
  - growth suppression by induction of expression of mammalian genes with transmembrane or ATPase domains, **268,** 553
  - localization of type I restriction–modification enzyme *Eco*KI, **270,** 46
  - melibiose carrier, interaction between helix XI and helices I, II, and V in, **268,** 409
  - 3-methyladenine–DNA glycosylase I, 3D structure, computer modeling and experimental evidence, **268,** 724
  - mutants deficient in Um_{2552} 23S rRNA methyltransferase RrmJ/FTSJ, translational defects in, **271,** 714
  - O111 strain, antimicrobial activity of Korean native goat lactoferrin and identification of essential domain, **268,** 333
  - *oxyR* strain, spontaneous mutation in, characterization, **279,** 427
  - penicillin acylase precursor, active site for autocatalytic processing, **272,** 199
  - periplasmic space, targeting of active cytochrome P450 1A1 to, **279,** 803
  - polyamine distribution, **271,** 559
  - ppGpp-dependent *leuO* expression under stress, **276,** 64
  - proton-translocating pyridine nucleotide transhydrogenase transmembrane helix orientation and spatial relationships, role of α and β subunit crosslinking, **273,** 955; *erratum,* **277,** 782
  - pyruvate formate-lyase-activating enzyme with $[3Fe–4S]^+$ cluster, anaerobic isolation, **269,** 451
  - recombinant antibody expression, **275,** 553
  - selenomethionyl β-ketoacyl–acyl carrier protein synthase III, expression, purification, and crystallization, **270,** 100
  - tellurite resistance mediated by TehAB determinant, role of cysteine residues, **277,** 394
- *Escherichia coli* W
  - L-aspartase activity from, enhancement by directed evolution, **276,** 346
- Esophageal tumors
  - *PSCA* expression (human), **275,** 783
- ESR spin trapping, *see* Spin trapping
- EST based *in silico* gene cloning
  - characterization of five human genes in 11q13–q22 region, **273,** 90
- Esterase
  - related activity of aggregated amyloid β 1–42 fragment, pathological implication, **267,** 733
- Esterification
  - cholesterol, role of multidrug resistance P-glycoprotein, **279,** 369
  - retinol, reduction in MCF-7 cells, **279,** 920
- 17β-Estradiol
  - antimitogenic effects on VSMCs, estrogen receptor-independent mediation by methoxyestradiols, **278,** 27
  - effect on angiotensin II-induced changes in IP_3 content and PKC activity in anterior pituitary, **275,** 7
  - effect on neuronal Swedish-mutated β-amyloid precursor protein metabolism, **271,** 82
  - effect on NO-dependent pial arteriolar dilation in ovariectomized female rat, **269,** 165
  - inhibition of TNF-α-induced NF-κB activation in MCF-7 breast cancer cells by increasing NF-κB p105 level, **279,** 47
  - and interleukin-1β, effect on cell proliferation in human osteoblast-like cells, **268,** 60
  - and phenobarbital, effects on CYP2B9 and CYP2B10 activation in liver in C57BL/6 and DBA/2 male mice, **279,** 288
  - prevention of apoptosis in rat cardiac myocytes, **268,** 192
  - protective effect on hypercholesterolemic aorta, role of cyclooxygenase 2 (rabbit), **275,** 696
  - stimulated human and rodent osteoblast proliferation and differentiation, mediation by nitric oxide, **277,** 604
- Estradiol-17β sulfotransferase
  - activity in osteosarcoma D17 cells, **273,** 505
- Estrogen
  - chronic depletion and repletion, effects on NO-dependent pial arteriolar dilation in female rat, **269,** 165
  - control of immunoglobulin binding factor mRNA expression in uterine cervix (human), **279,** 898
  - effects on growth of colon cancer cells expressing estrogen receptor β (human), **270,** 425
  - MCF-7 cell growth dependent on, role of SRC-1, **267,** 311
  - related chemicals in environment, sulfation by human cytosolic sulfotransferases, **267,** 80
- Estrogenic alkylphenols
  - induction of cell death by inhibition of testis endoplasmic reticulum Ca^{2+} pumps (rat), **277,** 568

- Estrogen receptor
  - conformational changes, ^{19}F NMR study (human), **270,** 988
  - control of reproductive and nonreproductive functions, review, **270,** 1
  - mechanisms independent of, in mediation by methoxyestradiols of antimitogenic effects of estradiol on VSMCs, **278,** 27
  - mediation of bisphenol A effects on preimplantation mouse embryos, **270,** 918
- Estrogen receptor α
  - male mice deficient in, obesity and disturbed lipoprotein profile, **278,** 640
- Estrogen receptor β
  - colon cancer cells expressing, growth effects of estrogen and genistein (human), **270,** 425
  - gene polymorphism, association with bone mineral density (human), **269,** 537
  - lacking exon 5, dominant negative activity on ERα and ERβ, **279,** 814
  - promoter cloning and characterization (human), **275,** 682
- Estrogen receptor-related receptor γ
  - alternative splicing and expression (mouse), **267,** 532
- Estrogen-responsive gene
  - in human breast cancer cells, WISP-2 as, **275,** 108
- Estrogen sulfotransferase
  - substrate-binding cleft, site-directed mutagenesis (human), **276,** 224
- Estrone sulfatase
  - inhibition by sulfamate-containing compounds, role of pK_a, **272,** 583
- Ethanol
  - chronic ingestion, effect on endothelin-converting enzyme-1 suppression during buccal mucosal ulcer healing (rat), **271,** 318
  - cytochrome P450 2E1 induced by, effect on inhibition of proteasome activity by alcohol (mouse), **279,** 23
  - cytotoxicity to cultured hepatocytes, suppression by geranylgeranylacetone (rat), **275,** 825
  - induction of HSP70 in brain, regulation by glutathione redox state (rat), **269,** 397
  - Kupffer cell tolerance and sensitization to endotoxin caused by, role of interleukin-1 receptor-associated kinase (mouse), **277,** 686
  - treatment of male rat, associated cyclic expression of alcohol dehydrogenase, **274,** 684
  - volitional consumption, effect on overall serotonin metabolism (Syrian golden hamster), **271,** 823
- 3-Ethyl-3-(4′-aminophenyl)-piperidine-2,6-dione
  - for aromatase inhibition, synthesis and evaluation, **267,** 356
- 3-Ethyl-3-(4′-aminophenyl)-pyrrolidine-2,5-dione
  - for aromatase inhibition, synthesis and evaluation, **267,** 356
- Ethylene
  - induction of calmodulin binding protein EICBP (*Arabidopsis*), **279,** 762
- (±)-(*E*)-4-Ethyl-2-[(*E*)-hydroxyimino]-5-nitro-3-hexenamide
  - inhibition of cruzipain from *Trypanosoma cruzi,* **270,** 437
- *N*-Ethylmaleimide-sensitive factor
  - association with nuclear envelope (PC12 cells), **274,** 559
- Ethyl methanesulfonate
  - and UV and trimethylpsoralen, mutations induced in *Caenorhabditis elegans* by, **269,** 64
- 3-Ethyl-3-(4′-pyridyl)-piperidine-2,6-dione
  - for aromatase inhibition, synthesis and evaluation, **267,** 356
- 17α-Ethynylestradiol
  - sulfation by human cytosolic sulfotransferases, **267,** 80
- Etoposide
  - activation of KAI1 gene, mediation by p53 and c-Jun genes (human), **274,** 370
- *Euglena gracilis*
  - and higher plants, protein translocation in chloroplasts of, comparison, **277,** 436
- Eukaryotic initiation factor 2
  - α subunit, functional complementation by, in yeast GCN2-mediated pathway (wheat), **279,** 468
- Eukaryotic initiation factor 4A
  - homology with human nuclear matrix protein hNMP 265, **267,** 339
- Evolution
  - *Attacin/Diptericin* gene family (*Drosophila melanogaster*), **279,** 574
  - cryptic exon in dystrophin gene intron 2, evolution from intron by acquisition of consensus sequences for splicing during anthropoid evolution (human), **267,** 321
  - cytochrome P450, implications of evolutionary studies of sterol 14-demethylase, **273,** 799
  - directed, enhancement of L-aspartase activity from *Escherichia coli* W, **276,** 346
  - neuropeptide Y receptor y6 gene (guinea pig), **277,** 264
  - oxidatively stable alkaline proteases from alkaliphilic *Bacillus* spp., **279,** 313
  - peptide transporters: molecular recognition templates of peptides, **267,** 283
  - pyrethroid resistance mutations in S6 transmembrane segments of voltage-gated sodium channel, **278,** 516
  - pyridoxal-5′-phosphate-dependent enzymes, **270,** 576
  - vitamin D receptor a and b (flounder), **270,** 40
- Ewing sarcoma
  - related tumors, inhibition by EWS Fli-1 antisense nanocapsules (mouse), **279,** 401
- EWS Fli-1
  - antisense nanocapsules, inhibition of Ewing sarcoma-related tumor (mouse), **279,** 401
- Exercise
  - GLUT4 gene elements responsive to, localization (mouse), **267,** 744
  - induction of isoform-specific increase in 5′AMP-activated protein kinase activity in skeletal muscle (human), **273,** 1150
  - oxidative stress induced by, in skeletal muscle, protective effects of flavonoid supplementation (rat), **274,** 389
  - swimming, induction of peroxisome proliferator-activated receptor γ coactivator-1 (rat), **274,** 350
- Exochitinase
  - endochitinase in extract contaminated with, assay methods (*Photorhabdus luminescens*), **268,** 302
- Exocytosis
  - in dissociated pancreatic acinar cells, VEC-DIC microscopy (guinea pig), **277,** 134
  - IgE receptor-triggered, in RBL-2H3 mast cells, role of Hrs binding protein, **277,** 752
  - platelet, molecular mechanisms (human), **267,** 875
  - regulated, compensatory membrane retrieval after, role of rab4, **268,** 847
- Exon–intron organization
  - *mDab2* gene (mouse), **275,** 189
  - porin isoform 1 gene promoter region (human), **270,** 787
  - prostaglandin $F_{2\alpha}$ receptor gene 5′-flanking region (rat), **278,** 278
  - Ssf-1 gene (human), **275,** 37
  - *Synaptotagmin* gene family, **270,** 528
  - VPATPD gene encoding vacuolar proton ATPase subunit D (human), **279,** 543
- Exons
  - *Ad4BP/SF-1* gene: identification of novel first exons and tissue- and species-specific usage (human, mouse, rat), **278,** 63
  - alternative usage, of rat septins, **275,** 180
  - three alternative first exons of human PDE5A gene, identification, **268,** 596
- Exopolyphosphatase
  - polyphosphate binding to, effects of monovalent ions (*Escherichia coli*), **274,** 236

- Exopolysaccharide
  - phytanyl-pyrophosphate-linked substrate for bacterial α-mannosyltransferase, **272,** 290
  - produced by clinical isolate of *Burkholderia cepacia,* structural study, **273,** 1088
  - synthesis in *Burkholderia cepacia,* enzymes leading to nucleotide sugar producers for, **276,** 71
- Experimental autoimmune encephalomyelitis
  - effects of apoptosis inhibitors (mouse), **267,** 826
  - progression, suppression by intrathecal administration of neutralizing antibody against Fas ligand (mouse), **275,** 164
- Expressed sequence tags
  - characterization of novel and identified genes in guinea pig organ of Corti, **273,** 84
- Expression array analysis
  - age-dependent changes in expression of senescence-accelerated mouse hippocampal proteins, **272,** 657
- EXT1
  - association with EXT2 in Golgi apparatus, **268,** 860
- EXT2
  - association with EXT1 in Golgi apparatus, **268,** 860
- Extracellular matrix
  - associated mRNAs and proteins, AGE-mediated induction by LECs in bovine lens epithelial explants, **275,** 53
  - chord-like structure formation dependent on, regulation by non-transmembrane form of Jagged-1 (NIH-3T3 cells), **268,** 853
  - components of, cooperation in activation of phosphatidylinositol-4-phosphate 5-kinase, **279,** 931
  - in FGF-2 cell attachment mediation (CHO-K1 cells), **276,** 399
  - homeostasis, in fibroblasts, autocrine regulation (human), **276,** 785
  - superoxide dismutase, in lung, purification and characterization (mouse), **275,** 542
- Extracellular matrix proteins
  - TGF-β-induced, role in modulation of cellular response to cytotoxic effect of TNF in L929 fibroblasts, **267,** 194
- Extracellular signal-regulated kinase
  - activation
    - by angiotensin II in vascular smooth muscle cells, effects of thiazolidinediones, **273,** 1144
    - role in insulin stimulation of NO production in osteoblast UMR-106 cells, **278,** 712
  - as antiapoptotic signal of IGF-1 in cultured cardiomyocytes (rat), **273,** 736
  - ERK1/2, activation
    - by dendritic cell-derived protein kinase DPK (human), **274,** 872
    - by p55 TNF receptor, role of FAN (mouse), **274,** 506
    - in VSMCs in response to PDGF and bFGF, support by fibronectin and laminin, **272,** 298
  - ERK2
    - activation by contortrostatin by pathway differing from that for induction of tyrosine phosphorylation, **274,** 142
    - substrates, identification by *in vitro* expression cloning screening, **268,** 562
  - ERK pathway, and p38 kinase pathway, differential regulation of vascular endothelial growth factor expression in oncogene-transformed cell lines, **270,** 108
  - identification of taxol-sensitive kinase activity in CV-1 cells, **277,** 525
  - inhibition, effect on binding of Nrf2 and induction of GCS genes, **278,** 484
  - mitogenesis dependent on, induction by monoamine oxidase B via H_2O_2 generation (HEK293 cells), **271,** 181
  - phosphorylation, coordination by PDGF: prevention of v-Ha-Ras-dependent apoptosis (human), **267,** 33
  - role in BMP-2-induced osteoblastic differentiation of mesenchymal progenitor cell line C3H10T1/2, **268,** 757
  - role in gliosis induced during recovery from metabolic inhibition (rat), **267,** 892
  - role in induction of mesenchymal cell chondrogenesis by disruption of actin cytoskeleton (chick embryo), **273,** 609
  - signaling pathway in articular chondrocytes, activation by *N*-acetylcysteine (bovine, human), **275,** 789
- Extremely low frequency magnetic field
  - enhancement of X-ray-induced mutations in NF-κB-inhibited cells, **276,** 238
- Eye
  - *frizzled-10A* gene expression (*Xenopus laevis*), **278,** 377
  - mammalian, adult, identification of neural progenitors in, **270,** 517
  - monocular deprivation, apoptosis in dorsal lateral geniculate nucleus after, role of glutamate signaling, NO production, and PARP activation (rat), **278,** 360

F

- Fab fragment
  - Fab–antibody conjugate, targeting of recombinant adenovirus vector to HCC cells with, **272,** 497
- Falcipain
  - inhibition by nitric oxide
    - *Plasmodium falciparum,* **267,** 190
    - *Trypanosoma cruzi,* **270,** 437
- Familial amyloidotic polyneuropathy
  - cardiac amyloid formation in, role of wild-type transthyretin (human), **274,** 702
  - two transthyretin variants with protective effects on, comparison, **270,** 1024
- Familial chylomicronemia
  - mutation causing, identification in APOE-CI-CIV-CII gene cluster (human), **273,** 1084
- FAN
  - role in activation of ERK1/2 and cytosolic phospholipase A_2 by p55 TNF receptor (mouse), **274,** 506
- FANCA
  - interactions with FANCC and FANCG, yeast two-hybrid analysis, **268,** 73
- FANCC
  - interactions with FANCA and FANCG, yeast two-hybrid analysis, **268,** 73
- FANCG
  - interactions with FANCA and FANCC, yeast two-hybrid analysis, **268,** 73
- Fanconi's anemia
  - spectrin changes in erythrocytes of patients and their parents, **273,** 899
- Fanconi's anemia proteins
  - interactions, yeast two-hybrid analysis, **268,** 73
- Farnesyl diphosphate synthase
  - regulation in *Saccharomyces cerevisiae,* **267,** 473
- Fas
  - apoptosis induced by, Jurkat T cells rescued by caspase inhibition from, functional characterization, **270,** 1009
  - cytotoxicity, c-Jun N-terminal kinase-mediated enhancement, role of suppression of IκBα expression (L929 cells), **274,** 4
  - fulminant hepatitis mediated by, inhibition in CrmA gene-transfected mice, **273,** 101
  - interaction with HIPK2 in 293T cells, **277,** 513
  - phospholipase D activation mediated by, role of Ras (A20 cells), **271,** 328
  - shear stress-dependent expression in human umbilical vein endothelial cells, **278,** 740
- Fas-binding protein
  - Daxx, interaction with sentrin and Ubc9, **279,** 6
- Fascaplysin
  - inhibition of cyclin-dependent kinase 4, **275,** 877
- Fas ligand
  - expression on antigen-presenting cells, effect on T cell cytotoxicity (mouse), **272,** 395
- Fast gene isolation procedure
  - gene cloning, **272,** 477
- Fat
  - *KCNJ9* gene expression (human), **274,** 302

- Fatty acid amide hydrolase
  - catalysis by, identification of serine residues involved in, **264,** 316; *erratum,* **267,** 676
  - inhibition by 2-arachidonoylglycerol and anandamide via activation of lipoxygenase pathway of arachidonate cascade, **278,** 576
- Δ^6-Fatty acid desaturase
  - chimera with Δ^8-sphingolipid desaturase: substrate binding site analysis, **279,** 779
- Δ9 Fatty acid desaturase
  - palmitoyl-CoA-specific, from *Caenorhabditis elegans,* **272,** 263
- Fatty acids
  - activation of UCP1, chimeric protein studies (human, rat), **276,** 642
  - dietary, upregulation of UCP2 expression in 3T3-L1 preadipocytes, **277,** 541
  - free, changes during tetraethylammonium-induced long-term potentiation in hippocampal slices (rat), **267,** 208
  - metabolism, induction of fatty acid β-oxidation enzymes by PPARα in heart, kidney, and liver (mouse), **278,** 250
  - transcriptional regulation of membrane lipid biosynthesis, **273,** 1
- FcεRI
  - β chain polymorphisms, effects on IgE-mediated mast cell activation (mouse), **273,** 765; *erratum,* **274,** 880
- Fc receptors
  - FcγR, and CR3, neutrophil phagocytosis mediated by, enhancement by cerebrosides, **278,** 79
- FE65-related protein
  - C-terminus, apoptosis inhibitory domain, characterization (mouse), **276,** 843
- Feces
  - supernatant, human TT virus genotype 1a in, transmission to chimpanzees (human), **278,** 470
  - TT virus particles recovered from infected humans, visualization, **279,** 718
- Feeding
  - inhibition by anti-orexin after central injection in fasted rats, **267,** 527
  - regulation, neuropeptide Y Y5 receptor role, analysis with selective antagonist L-152,804 (rat), **272,** 169
- Fe^{2+}/histidine-Fe^{3+}
  - induced lipid peroxidation, susceptibility of small and large phospholipid unilamellar vesicles, **273,** 72
- Fe^{2+}-H_2O_2
  - induced lipid peroxidation, susceptibility of small and large phospholipid unilamellar vesicles, **273,** 72
- FEM1B gene
  - sequence, organization, and expression (human), **267,** 317
- Fenofibrate
  - activation of PPARα, effects on secretion of matrix metalloproteinase 9 and IL-8 in THP-1 monocytic cells, **267,** 345
  - effects on serum triglycerides and body weight, comparison to rosiglitazone (mouse, rat), **271,** 445
- Fenretinide
  - effect on G_1/S cell cycle in Mutu I cells, **276,** 1295
- Fenton reaction
  - organic, metal-independent: hydroxyl radical production by pentachlorophenol metabolites and H_2O_2, **270,** 942
- Fenton's reagent
  - lipid peroxidation induced by, susceptibility of small and large phospholipid unilamellar vesicles, **273,** 72
- Ferredoxin
  - on electron transfer complex, region with aspartates 57 and 60, role in interactions with photosystem I (*Synechocystis* sp. PCC 6803), **271,** 647
- Ferritin
  - H chain mRNA, dendritic translocation (rat), **272,** 789
  - light chain, mRNA levels in lens (guinea pig, human), **270,** 349
  - mRNA, translation, regulation in primary erythroblasts (chicken), **275,** 292
- Ferrylhemoglobin
  - role in heme degradation during oxyhemoglobin autoxidation, **273,** 839
- Fertilization
  - acrosome reaction induction in chicken spermatozoa by inner perivitelline-derived N-linked glycans, **278,** 84
  - false, induction by kelp diabolin in sea urchin eggs, **272,** 691
  - gene expression in oviduct during mouse preimplantation period, analysis with suppression subtractive hybridization, **277,** 680
- Ferulic acid
  - dietary, scavenging of peroxynitrite, effect of bicarbonate, **279,** 692
- Fetus
  - PTH/PTHrP receptor promoter activity, role of methylation (human), **267,** 482
- F_0F_1-ATPase
  - subunit c, identity with 3.5-kDa polypeptide in rat liver mitochondria with Ca^{2+}-modulated phosphorylation, **270,** 741
- Fibrinogen
  - transfected HepG2 cells overexpressing, enhanced secretion of apoB by, **273,** 377
- Fibroblast growth factor
  - translocation to endothelial cell nucleus by microtubule- and lysosome-independent pathway (human), **273,** 551
- Fibroblast growth factor 1
  - binding to binary complex of heparin and immunoglobulin-like modules of FGF receptor 2, **272,** 830
  - and FGF-2, mitogenic activities, differential regulation related to kinetics of binding to heparan sulfate in breast cancer cells, **267,** 770
- Fibroblast growth factor 2
  - aortic endothelial cell proliferation stimulated by, inhibition by human HGF kringle 1 domain (bovine), **277,** 186
  - binding to binary complex of heparin and immunoglobulin-like modules of FGF receptor 2, **272,** 830
  - cell attachment mediation (CHO-K1 cells), **276,** 399
  - expression in cell lines positive for HPV-16 oncoproteins, **277,** 55
  - fetal skin fibroblast migration stimulated by, mediation by phospholipase A_2 via arachidonic acid and role of pertussis toxin-sensitive G protein (human), **272,** 648
  - and FGF-1, mitogenic activities, differential regulation related to kinetics of binding to heparan sulfate in breast cancer cells, **267,** 770
  - induction of differentiation and death of olfactory neuroblastoma cells, **279,** 172
  - intracellular, promotion of differentiation of T-47D breast cancer cells, **277,** 255
  - proximal promoter-independent activation of far-upstream FGF-inducible response element of syndecan-1 gene, **278,** 432
  - recombinant, fusion protein with rViscumin, cytotoxicity to B16 melanoma cells, **277,** 499
- Fibroblast growth factor 6
  - *Fgf/6* −/− mutant mice, skeletal muscle regeneration in, **272,** 138
- Fibroblast growth factor 7
  - binding to binary complex of heparin and immunoglobulin-like modules of FGF receptor 2, **272,** 830
- Fibroblast growth factor 8
  - isoforms, expression in LNCaP cells, effects of retinoic acid, **272,** 98
- Fibroblast growth factor 10
  - as major ligand for FGF receptor 2 IIIb in mouse multi-organ development, **277,** 643
- Fibroblast growth factor 20
  - gene cloning and characterization on chromosome 8p21.3-p22 (human), **274,** 337
  - preferential expression in substantia nigra pars compacta (rat), **277,** 355
- Fibroblast growth factor 23
  - expressed in ventrolateral thalamic nucleus of brain, identification, **277,** 494

- Fibroblast growth factor-inducible response element
  - far-upstream, for syndecan-1 gene, proximal promoter-independent activation, **278,** 432
- Fibroblast growth factor receptor
  - *HrFGFR,* characterization (*Halocynthia roretzi*), **275,** 503
- Fibroblast growth factor receptor 1
  - isoforms in FGF-2 cell attachment mediation (CHO-K1 cells), **276,** 399
- Fibroblast growth factor receptor 2
  - immunoglobulin-like modules, binary complexes with heparin, ligand binding properties, **272,** 830
- Fibroblast growth factor receptor 2 IIIb
  - in mouse multi-organ development, FGF10 as major ligand for, **277,** 643
- Fibroblast growth factor receptor 4
  - promoters, identification and characterization (human, mouse), **276,** 493
  - soluble-form splice variant expressed in human gastrointestinal epithelial cells, **267,** 658
- Fibroblasts
  - apoptosis
    - cardiac cells, induced by osmotic stress, regulation by insulin-like growth factor 1 (rat), **273,** 322
    - heat shock-induced, suppression by heat shock-induced activation of Akt (NIH3T3 cells), **278,** 306
    - induction by degraded DNA lipotransfection (Rat-1 cells), **270,** 406
    - regulation by PDGF-α-receptor, role of Shf (NIH3T3 cells), **278,** 537
  - cell lines
    - amyotrophic lateral sclerosis patients, elevated MnSOD levels in, **273,** 359
    - Leigh-like patients, combined enzymatic complex I and III deficiency associated with mutations in nuclear-encoded *NDUFS4* gene, **275,** 63
  - constitutive expression of phosphatidylinositol 3-kinase, comparison with transient expression (mouse), **272,** 822
  - corneal
    - and epithelial cells and leukemic cell lines, ion-gated sodium channel in, paradoxical effects of mineralocorticoids, **270,** 811
    - expression of thymus- and activation-regulated chemokine, synergistic effect of TNF-α and IL-4 (human), **279,** 1
  - COX-2 transcription, regulation by GTPases (NIH 3T3 cells), **276,** 406
  - cyclin D1 expression and DNA synthesis, induction by prostaglandin F$_{2\alpha}$ via early signaling mechanisms (Swiss 3T3 cells), **270,** 11
  - cyclin D1-overexpressing, G1 arrest, induction by herbimycin A via p27$^{\mathrm{Kip1}}$ accumulation, **267,** 54
  - cytotoxic effect of tumor necrosis factor, response to, modulation by TGF-β-induced matrix proteins (L929 cells), **267,** 194
  - dermal, *eotaxin* and *CCR3* induction by ionizing radiation (human), **269,** 546
  - drug resistance, enhancement in cells coexpressing ErbB2 with EGF receptor or ErbB3 (NIH 3T3 cells), **277,** 757
  - Fas cytotoxicity, c-Jun N-terminal kinase-mediated enhancement, role of suppression of IκBα expression (L929 cells), **274,** 4
  - fetal skin, migration stimulated by bFGF, mediation by phospholipase A$_2$ via arachidonic acid and role of pertussis toxin-sensitive G protein (human), **272,** 648
  - gingival, Toll-like receptor 4-mediated signal pathway, induction by *Porphyromonas gingivalis* LPS (human), **273,** 1161
  - growth, promotion by air exposure and association with increased expression of MAP kinase cascade (3T3 cells), **270,** 961
  - growth and survival, effects of lens epithelium-derived growth factor (human), **267,** 373
  - hepatocyte growth factor/scatter factor gene expression, regulation
    - by *N*-acetylcysteine (MRC-5 cells), **279,** 108
    - by TGF-β1, mechanism (MRC-5 cells), **271,** 203
  - hormone-evoked Ca^{2+} release, effect of calcium-modulating cyclophilin ligand (NIH3T3 cells), **276,** 97
  - human uterine cervical and rabbit, progelatinase A/proMMP-2 activation by *E. coli*-derived serine proteinase, **268,** 128
  - induced by TNF treatment and polyglutamine aggregates, localization of active form of caspase-8 (L929 cells), **270,** 972
  - invasiveness with concomitant MMP-2 induction, enhancement by vacuolar ATPase 16-kDa subunit overexpression (10T1/2 cells), **278,** 390
  - lacking pyruvate dehydrogenase complex, expression of PDH-E$_1\alpha$ recombinant His mutants (human), **270,** 1068
  - matrix-dependent chord-like structure formation, regulation by non-transmembrane form of Jagged-1 (NIH-3T3 cells), **268,** 853
  - mitosis, inhibition by degraded DNA lipotransfection (Rat-1 cells), **270,** 406
  - mouse model for study of human papillomavirus-associated tumorigenesis (3T3-A31 cells), **270,** 119
  - muscle, gene delivery by two-step transfer system (human), **275,** 931
  - myostatin gene localization in regenerating skeletal muscle (rat), **270,** 510
  - normal, life span, extension by transient expression of telomerase (human), **273,** 1095
  - Nurr1 response element activating tyrosine hydroxylase gene promoter, identification (L tk$^-$ cells), **274,** 590
  - oxidative stress and tumor suppressor p53, effect of LDL in MRC5 human cells, **276,** 718
  - partially transformed, X-ray induced, morphological alteration by transfection with small c-myc DNA sequence (human), **272,** 887
  - from patient with insulin resistance, postreceptor signaling defect impairing c-fos expression in, **268,** 577
  - periosteal, prostaglandin G/H synthase-2 mRNA expression, effect of pulsating fluid flow, comparison with osteocytes and osteoblasts (chicken), **268,** 414
  - from *PEX2*-defective patient, molecular mechanism of detectable catalase-containing peroxisomes in, **268,** 31
  - proliferation and extracellular matrix homeostasis, autocrine regulation (human), **276,** 785
  - quiescence-induced expression of quiescin Q6, decorin, and ribosomal protein S29, regulation (human), **269,** 604
  - replicative senescence, mammalian Sin3A and Sin3B expression during, analysis (WI-38 cells), **275,** 455
  - RhoA activation by association of Gα_{13} with Dbl (NIH 3T3 cells), **277,** 718
  - sulfatase and sulfotransferase gene superfamilies, expression profiling (human), **277,** 236; *erratum,* **279,** 306
  - transformation by hepatitis C virus NS4B in cooperation with Ha-*ras* oncogene (NIH3T3 cells), **267,** 581
  - translation of heterologous RNA in, enhancement by region in 3′ UTR of MnSOD RNA (NIH 3T3 cells), **272,** 164
  - Wnt signaling in L cells, role of posttranscriptional regulation of α-catenin expression, **277,** 691
  - X-ray-induced transformation, suppression by extremely low-frequency magnetic fields (C3H10T1/2 cells), **271,** 323
- Fibronectin
  - adhesion of VSMCs to, effect on proliferation, migration, and activation of intracellular signaling pathways, **272,** 298
  - association with focal adhesion kinase, role in precartilage condensation of chick mesenchymal cells, **278,** 522
  - endothelial cell adhesion to, enhancement of MKP-1 activation (human), **273,** 539
  - and laminin, cooperation in activation of phosphatidylinositol-4-phosphate 5-kinase, **279,** 931
  - promoter, transactivation by HTLV-I Tax, via NF-κB pathway, **276,** 579
- Fibrosis
  - hepatic, induced by pig serum, prevention by GdCl$_3$-enhanced production of interstitial collagenase by Kupffer cells (rat), **267,** 290

Firefly luciferase
  bioluminescent *Mycobacterium aurum* expressing, for screening of antimycobacterial drugs, **279,** 457
  cysteine-free, retention of luminescence activity, **267,** 394
  generation of two low-molecular-weight light-emitting species, **270,** 247
Fizzy, *see* Cyclin-dependent kinase, Cdc20
Flavonoids
  apigenin and others, effects on vitamin D receptor expression and vitamin D responsiveness in human keratinocytes, **268,** 237
  baicalin, HIV-1 infection inhibition at viral entry level, **276,** 534
  supplementation with, protective effects against exercise-induced oxidative stress in skeletal muscle (rat), **274,** 389
Flavoredoxin
  gene cloning (*Desulfovibrio gigas*), **272,** 653
Flk-1/KDR
  response of Kaposi's sarcoma cells of different origin to HIV-Tat through, **273,** 267
FLO11 gene
  in regulation of filamentous growth in *Saccharomyces cerevisiae* by *GPR1,* **267,** 164
Flow chamber
  evaluation of energy of red blood cell agglutination by monoclonal antibodies (human), **277,** 381
Flow conditions
  targeting of liposomes carrying recombinant fragments of platelet membrane glycoprotein Ibα to immobilized von Willebrand factor under, **270,** 755
Flow cytometry
  assay of platelet activation status, **273,** 565
  parameters, for platelet activation measured by P-selectin expression, **269,** 85
flt-1 promoter
  role in endothelial-specific expression in embryoid body model of embryogenesis (mouse), **276,** 1089
Flt3 ligand
  induction of tyrosine phosphorylation of Gab1 and Gab2, **277,** 195
Fluid flow
  pulsating, effect on prostaglandin G/H synthase-2 mRNA expression in osteocytes and other osteogenic cells (chicken), **268,** 414
Fluid shear stress
  stimulation of prostaglandin and nitric oxide release in bone marrow-derived preosteoclast-like cells (rat), **270,** 643
Fluid transport
  by aquaporin-1, role of protein kinase A-dependent phosphorylation of AQP-1, **273,** 328
Fluorescein
  fluorescence hyperpolarization, as early kinetic measure of apoptotic process, **268,** 155
Fluorescence
  tryptophan and derivatives, effects of pressure, **269,** 681
  tryptophan NH$\cdot\cdot\pi$ bond in acid-denatured interleukin-2, **279,** 770
  tryptophan octyl ester, effects of reverse micellar environments, **277,** 13
Fluorescence correlation spectroscopy
  electrostatic interactions in binding of charged substrate to GroEL, **267,** 300
Fluorescence hyperpolarization
  fluorescein, as early kinetic measure of apoptotic process, **268,** 155
Fluorescence polarization
  fluorescein, as early kinetic measure of apoptotic process, **268,** 155
Fluorometric assay
  endochitinase and exochitinase activity (*Photorhabdus luminescens*), **268,** 302
Fluorophores
  small, use in monitoring MscL channel activity (*Salmonella typhimurium*), **279,** 208
5-Fluorouracil
  chemotherapy of human cancer xenografts, potentiation by sphingomyelin, **268,** 603
  induction of apoptosis in salivary gland cancer cells via suppression of NF-κB activity (human), **273,** 1168
FMN
  role in azo reduction of methyl red by neuronal nitric-oxide synthase, **275,** 752
FMRP
  associated mRNP particle, YB1/p50 as component of, identification (mouse), **279,** 904
  RNAs interacting with, analysis, **275,** 973
Foam cells
  macrophage, HDL-induced cholesterol efflux from, effects of plasmin and kallikrein, **277,** 552
Focal adhesion kinase
  association with erbB2–erbB3 receptor complex in Schwann cells, induction by neuregulin, **271,** 414
  association with fibronectin and paxillin, role in precartilage condensation of chick mesenchymal cells, **278,** 522
  integrin signaling through, control of VSMC proliferation and phenotype by, **272,** 298
  N-terminal domain, nuclear localization and apoptotic regulation (HUVEC), **276,** 1068
  tyrosine phosphorylation, stimulation
    by sphingosine 1-phosphate in endothelial cells via G_i protein-linked PLC pathway, **268,** 47
    by transforming growth factor β1 in hepatocarcinoma cells (human), **274,** 519
Focal adhesion protein
  formation, kinetic determination, **271,** 553
Focal ischemia
  effect on gelatinase content in brain (rat), **278,** 803
Follicle-stimulating hormone receptor
  newt testis, cloning, characterization, and expression, **275,** 121
Food intake
  inhibition by anti-orexin after central injection in fasted rats, **267,** 527
  regulation, neuropeptide Y Y5 receptor role, analysis with selective antagonist L-152,804 (rat), **272,** 169
Force
  generated by single kinesin molecule, temperature dependence, **272,** 895
Formic acid
  dissolution of aggregates of N-terminal huntingtin fragment containing expanded polyglutamine tract, **277,** 386
Formin family proteins
  in cytoskeletal control, **267,** 479
N-Formylpeptide receptor
  activation, role in neutrophil chemoattraction by T-20 inhibitor of HIV-1 cell entry, **272,** 699
  FPR2, on neutrophils, identification as receptor for serum amyloid A (mouse), **270,** 331
4G2 protein
  novel gene family with developmentally regulated gene expression in *Xenopus laevis,* **267,** 558
Fourier transform infrared spectroscopy
  CYP106A2 binding of substrate, studies based on iron ligand CO stretch vibration, **269,** 737
Fourier transforms
  characterizing base periodicity in genes and genomes, vectors of Shannon information from, **268,** 289

- 14-3-3 protein
  - ε isoform, modulation of Ca^{2+}-activated Cl^- channel (*Xenopus laevis*), **270,** 581
  - functional interaction with mizoribine, **274,** 87
- FPRL1
  - activation in monocytes, phosphorylation of CCR5 and attenuation of responses to selected chemokines by, **272,** 276
- Fragile histidine triad protein
  - frequent altered expression in human colorectal adenomas, **278,** 205
- Fragile X mental retardation protein
  - distinct polysomal population at advanced stage of mammalian erythropoiesis, **275,** 608
- Fragile X syndrome
  - related repeats, d-TGGCGGC with, cation-dependent conformational switches in, NMR study, **278,** 833
  - related RNA binding protein FMRP, RNAs interacting with, analysis, **275,** 973
- Fragmin
  - casein kinase II-phosphorylated, dephosphorylation by PP2C-like phosphatase (*Physarum polycephalum*), **279,** 438
- Free radicals
  - role in photodynamic therapy, physicochemical modeling: quantification of spin-trapping kinetics, **270,** 125
  - water-soluble, sources of, induced lipid peroxidation in small and large phospholipid unilamellar vesicles, **273,** 72
- *Frizzled-3* gene
  - on chromosome 8p21, molecular cloning and genomic structure (human), **271,** 8
  - identification, structure, and expression (human), **273,** 27
- *Frizzled-10A* gene
  - genomic clone isolation, and expression in adult *Xenopus laevis* tissues and embryos, **278,** 377
- *Frizzled-10B* gene
  - genomic clone isolation, and expression in adult *Xenopus laevis* tissues and embryos, **278,** 377
- Fructose-1,6-bisphosphatase
  - crystal quality, improvement using magnets (snake), **275,** 274
  - sensitivity to AMP inhibition, decrease by muscle aldolase (rabbit), **275,** 611
- FtsA
  - interaction with FtsZ, role of conserved Phe376 residue at extreme C-terminus of FtsZ (*Staphylococcus aureus*), **270,** 387
- FtsZ
  - conserved Phe376 residue at extreme C-terminus, role in FtsA–FtsZ interaction (*Staphylococcus aureus*), **270,** 387
- *ftsZ* cluster
  - *Streptomyces collinus,* cloning and sequencing, **268,** 282
- *ftsZ* gene
  - cloning and characterization (*Thermoplasma acidophilum*), **275,** 936
- L-Fucose
  - mode of recognition by fucose-binding legume lectins, **268,** 262; *erratum,* **270,** 329
- α1,3-Fucosyltransferase 4
  - gene expression and transcriptional regulation in myeloid and colon adenocarcinoma cell lines (human), **273,** 370
- $\alpha1\rightarrow3$Fucosyltransferases
  - GDP-fucose-protected pyridoxal-5′-phosphate/$NaBH_4$-sensitive lysine in, correspondence to Lys^{300} in FucT-IV, **273,** 870
- Fulminant hepatitis
  - Fas-mediated, inhibition in CrmA gene-transfected mice, **273,** 101
- Fungi
  - antibiotic activity of CRAMP analogues without hemolytic effect, **275,** 904
- 6-Furfuryladenine, *see* Kinetin
- *Fusarium graminearum*
  - effects of CW-1 and CW-2 purified from cheeseweed, **279,** 669
- *FUS/CHOP* chimera
  - myxoid liposarcoma with, analysis (human), **279,** 838
- Fusion proteins
  - asparaginase linked to protective scFV, characterization, **276,** 197
  - cathepsin-B, misrouting of secretory protein partners (mouse), **276,** 594
  - high-level expression of antimicrobial peptide by fusion partner reinforcing formation of inclusion bodies, **277,** 575
  - MBP-C5, in analysis of effects of terminal deletions in C5 protein on RNase P catalysis, **268,** 118
- Fv fragments
  - single-chain
    - functional, baculoviral display, **275,** 84
    - high-affinity, from single rabbit immunized with multiple haptens, **268,** 398
    - protective, fused with asparaginase, characterization, **276,** 197
- FXYD2 gene
  - encoding γ subunit of Na,K-ATPase, genomic organization (human), **279,** 196
- Fyn tyrosine kinase
  - transgenic, mouse carrying, locomoter activity, **276,** 707
- FYVE domain
  - dual-specificity protein phosphatase with, molecular cloning: FYVE-DSP1 (human), **270,** 222

G

- Gab1
  - tyrosine phosphorylation induced by Flt3 ligand and association with Shp-2, Grb2, and PI3 kinase, **277,** 195
- Gab2
  - tyrosine phosphorylation induced by Flt3 ligand and association with Shp-2, Grb2, and PI3 kinase, **277,** 195
- GABA
  - hypoxia/hypoglycemia-induced release from rat brain cortical slices, effects of preconditioning, **276,** 134
- GABA binding protein
  - high-affinity bacterial, isolation and characterization, **268,** 65
- GADD34
  - interaction with KIF3A, **267,** 593
- Gadd45 proteins
  - as coactivators of nuclear hormone receptors, **272,** 193
- Gadolinium
  - activation of p42/44 and p38 MAP kinase: induction of mitogenic responses in osteoblastic MC3T3-E1 cells, **279,** 363
- Gadolinium chloride
  - enhancement of interstitial collagenase production in Kupffer cells, prevention of pig serum-induced rat liver fibrosis, **267,** 290
- Gal3p
  - galactokinase signature sequence in, disruption in *Saccharomyces cerevisiae,* effect on signal transduction, **273,** 824
- Galactokinase
  - signature sequence, disruption in Gal3p of *Saccharomyces cerevisiae,* effect on signal transduction, **273,** 824
- D-Galactosamine
  - liver regeneration after injury induced by, connective tissue growth factor gene expression during, kinetics (rat), **277,** 448
- Galactosemia
  - lens α-crystallin from rats with, functional and structural studies, **273,** 197
- Galactose-1-phosphate uridyltransferase
  - yeast deficient in, rescue by UDP-glucose pyrophosphorylase overexpression, **271,** 392
- α-Galactosidase
  - stimulation of acetylcholine receptor aggregation in skeletal muscle cells via PNA-binding carbohydrates, **270,** 899

β-Galactosidase
  complex with DNA for cell-targeted DNA delivery, molecular organization, **278,** 455
  Emx1-specific expression using knock-in approach, **270,** 978
  peptide-displaying sensor, antibody-mediated modulation, molecular mechanisms, **275,** 360
Galactosylation
  serum IgA1 Fc O-glycosylated hinge peptides, decrease in IgA nephropathy, mass spectrometric study (human), **271,** 268
β-1,4-Galactosyltransferase I
  functional soluble forms, expression in *Pichia pastoris,* **267,** 169
  gene expression in hepatocarcinoma cells, effects of suppression of TGF-β1 expression (human), **273,** 833
β-1,4-Galactosyltransferase V
  and *N*-acetylglucosaminyltransferase V, genes encoding, correlated expression in cancer cells (human), **276,** 1019
Galanin receptor
  mammalian, related receptor from *Drosophila melanogaster,* molecular cloning and genomic organization, **269,** 91
Gallbladder epithelial cells
  anion channel highly permeable to HCO_3^- (guinea pig), **276,** 312
Gallic acid
  dietary, scavenging of peroxynitrite, effect of bicarbonate, **279,** 692
Galloyl esters
  synthetic, inhibition of squalene epoxidase, **270,** 137
GalNAc α2-6-sialyltransferases
  ST6GalNAc I and II, acceptor substrate specificities: redefined substrate specificity of ST6GalNAc II (mouse), **272,** 94
Gamma radiation
  DNA strand breaks induced by, gene-specific repair in colon cancer cells (human), **269,** 433
Ganglioside
  GD3, and mimetics, induction of cytochrome *c* release from mitochondria (rat), **276,** 1210
Gap junctions
  associated connexin 37, polymorphic variants, functional expression and biophysical properties (human), **274,** 216
  intercellular communication, tumor promoter-induced inhibition, reversal by resveratrol (rat), **275,** 804
gar-1
  alternative splicing (*Caenorhabditis elegans*), **268,** 354
Gas chromatography–mass spectrometry
  5-hydroxy-2-aminovaleric acid measurement as specific marker of iron-mediated oxidation of Pro and Arg side-chain residues of LDL apoB100, **270,** 852
Gastric acid
  secretion, effect of ghrelin (rat), **276,** 905
Gastric cancer cells
  differential expression of *WNT-2B* isoforms (human), **275,** 209
  Helicobacter pylori-induced formation of stress fibers and membrane ruffles, role of rac and cdc42 (AGS cells), **269,** 247
Gastric carcinoma
  soluble guanylyl cyclase β_2 subunit expression (human), **271,** 64
Gastric juice
  simulated, decomposition of cocoa procyanidins in, **272,** 236
Gastric motility
  effect of ghrelin (rat), **276,** 905
Gastric tumors
  PSCA expression (human), **275,** 783
Gastrin
  antral synthesis and secretion and effect of achlorhydria in carboxypeptidase E-deficient mice, **267,** 638
Gastritis
  Helicobacter pylori-induced, suppression by DNA vaccines encoding heat shock protein (mouse), **277,** 159
Gastrointestinal epithelial cells
  fibroblast growth factor receptor 4 soluble-form splice variant expressed in, identification (human), **267,** 658
Gastrointestinal tissue
  des-acyl ghrelin and ghrelin identification as major forms of ghrelin peptide (rat), **279,** 909
Gastrointestinal tract
  adenosine deaminase function (mouse), **269,** 749
GATA
  regulation by K-7174 in reduction of endothelial VCAM-1 induction by inflammatory cytokines (human), **272,** 370
GATA-1
  differing antineurogenic effects of GATA-1a and -1b, molecular basis (*Xenopus laevis*), **273,** 614
GATA-2
  gene, localization near 3q21 breakpoints in myeloid leukemia, **273,** 239
Gating properties
  Shaker K^+ channel, modulation by amino acid substitution within S2 and S4 transmembrane segments, **275,** 720
GCIP
  p29 interacting with, localization in nucleus (HeLa cells), **279,** 732
GCMa/GCM1 gene
  genomic organization, chromosomal localization, and complete 22-kb DNA sequence (human), **278,** 134
GCN2
  yeast GCN2-mediated pathway, functional complementation by wheat eIF2α in, **279,** 468
GDP-fucose
  pyridoxal-5′-phosphate/$NaBH_4$-sensitive lysine protected by, in $\alpha1\rightarrow3$fucosyltransferases, correspondence to Lys^{300} in FucT-IV, **273,** 870
Gelatinase
  content in brain, estimation and effect of focal ischemia (rat), **278,** 803
Gene amplification
  TALE-superclass homeobox gene TGIF2 in ovarian cancer cell lines, **276,** 264
GeneChip
  gene scanning for determination of uterine genes involved in implantation (mouse), **272,** 531
Gene delivery
  klotho in vivo, effect on endothelial dysfunction in multiple risk factor syndrome (rat), **276,** 767
  into muscle cells by two-step transfer system (human), **275,** 931
  receptor-mediated, in demonstration of role of 5′-proximal DNA region in phenobarbitone responsiveness of CYP2B2 gene in liver *in vivo,* **268,** 734
Gene excision
  spermatocyte-specific, by targeted expression of Cre recombinase (mouse), **272,** 125
Gene expression
  estrogen-responsive human breast cancer cells: WISP-2 as E2-responsive gene, **275,** 108
  hypoxia-induced, restoration by ARNT2 to ARNT-deficient ES cells and hepatocytes, **273,** 231
  liver, comprehensive profile (human), **269,** 110
  oviduct during mouse preimplantation period, analysis with suppression subtractive hybridization, **277,** 680
  pancreatic cells in response to acute pancreatitis, profiling with cDNA microarrays (mouse), **277,** 660
  repressive regulation, characterization of mouse *ctgf* 3′-UTR segment mediating, **278,** 119

- Gene gun
  - mediated DNA delivery into rodent brain tissue *in vivo,* **270,** 163
- Gene regulation
  - artificial antisense RNA regulation in fission yeast and human cells, comparison, **268,** 8
  - by salt, **278,** 269
  - transcriptional
    - COX-2 by GTPases, **276,** 406
    - in DT40 chicken B cell line, individual roles of histone H1 variants, **268,** 501
    - suppression of thyroid-specific gene transcription by class II transactivator, **278,** 58
- Genes
  - alkaloid-synthesizing-enzyme-related, animal and plant members, **271,** 191
  - amplification with fast gene isolation procedure, **272,** 477
  - with ankyrin repeat and double BTB/POZ domain, molecular cloning and characterization (human), **273,** 991
  - base periodicity, Fourier signals characterizing, vectors of Shannon information from, **268,** 289
  - in bean leaves, responses induced by herbivory and herbivore-induced volatiles, **277,** 305
  - cloning at computer screen, **279,** 741
  - differentially expressed in early response phase during liver regeneration, identification and characterization (rat), **278,** 318
  - estrogen receptor-controlled, review, **270,** 1
  - identification by computational and experimental analysis (human), **272,** 801
  - murine, differentially expressed in brain, isolation with cDNA microarray, **275,** 532
  - prion protein, differentially expressed mRNA found in prion-infected mouse brain and N2A cells but not in uninfected mice, **251,** 423; *corrigendum,* **279,** 1016
  - prolactin-releasing peptide receptor 5′-flanking region, cloning and characterization (human), **276,** 411
  - rapid repression induced by IL-6 at onset of monocyte differentiation (mouse), **267,** 863
  - transgenes, site-specific integration by adenovirus/adeno-associated virus vector using Cre/*loxP*-expression-switching system, **273,** 473
  - ultraviolet-sensitive, detection by differential mRNA display and role of Rheb in UV susceptibility (human), **274,** 859
  - uterine, involved in implantation, determination by application of GeneChip (mouse), **272,** 531
  - in vancomycin-resistant *Staphylococcus aureus* strains Mu3 and Mu50, up- and down-regulated gene identification, **269,** 485
- Gene structure
  - ACT gene (human), **273,** 776
  - cardiac type phosphodiesterase 3A (human), **268,** 827
  - caspase-14 (human keratinocytes), **277,** 655
  - epithelial calcium channel (human), **275,** 47
  - insulin/IGF-like peptide from *Caenorhabditis elegans,* **273,** 431
  - Munc18-2 (mouse), **276,** 817
  - *PAPSS1* and *PAPSS2* (human), **268,** 437
  - porin isoform 1 gene (human), **270,** 787
  - small GTPase Rac1 (human), **277,** 741
- Gene therapy
  - cell-targeted DNA delivery in, protein–DNA complexes for, molecular organization, **278,** 455
  - HGF/NK2, effect on U87 malignant glioma phenotype: antagonist of scatter factor/hepatocyte growth factor, **273,** 287
  - inhibitory effects of antisense oligonucleotides in experimentally infected mouse model of influenza A virus, **279,** 158
  - ischemic diseases, implications of improved VEGF by naked DNA in mouse skeletal muscles, **272,** 230; *erratum,* **276,** 390
  - systemic administration of HVJ viral coat–liposome complex containing human insulin vector (mouse), **273,** 666
- Genetics
  - and cotransformation approach, in verification of protein–protein interactions in yeast two-hybrid system, **277,** 589
  - mitochondrial ALDH2 deficiency in Japanese: increased risk for late-onset Alzheimer's disease, **273,** 192
- Gene transfer
  - apoptosis induction by introduced DNA in electroporated U937 cells, **270,** 94
  - into cells expressing HIV envelope glycoprotein, retroviral vector for, **271,** 672
  - efficiency in bacteria, **276,** 1261
  - gene gun-mediated DNA delivery into rodent brain tissue *in vivo,* **270,** 163
- Genistein
  - effective dosage on bone and uterus in ovariectomized mouse, **274,** 697
  - effects on growth of colon cancer cells expressing estrogen receptor β (human), **270,** 425
  - induction of apoptosis in RPE-J cells via opening of mitochondrial permeability transition pore, **276,** 151
- Genomes
  - base periodicity, Fourier signals characterizing, vectors of Shannon information from, **268,** 289
  - genome-wide detection of unknown subtle mutations in bacteria by combination of MutS and RDA, **268,** 535
- Genomic imprinting
  - imprinted methylation of *U2afbp-rs/U2af1-rs1* gene, role of oocyte-specific methylated region, **268,** 590
- Genomic organization
  - ABCA7: tandem linkage with minor histocompatibility antigen HA-1 gene (human), **278,** 782
  - AE2 anion exchanger gene (mouse), **276,** 117
  - allatostatin preprohormone (*Drosophila melanogaster*), **273,** 1126
  - allatostatin receptor DAR-2 (*Drosophila melanogaster*), **273,** 571
  - Apo2/TRAIL gene (human), **278,** 747
  - desmosomal cadherin genes *DSC1* and *DSC3* (human), **276,** 454
  - *Drosophila* receptor structurally related to mammalian galanin receptor, **269,** 91
  - ENT1 gene (mouse), **277,** 200
  - epidermal type II keratin genes K1 and K5 (human), **274,** 149
  - FEM1B gene (human), **267,** 317
  - FXYD2 gene encoding γ subunit of Na,K-ATPase (human), **279,** 196
  - GCMa/GCM1 gene (human), **278,** 134
  - glucagon receptor gene 5′-flanking region, comparison in mouse and rat, **272,** 912
  - glutathione reductase gene: cDNA and mitochondrial leader sequences (human), **269,** 366
  - junctophilin subtype genes (human), **273,** 920
  - kallikrein gene family on chromosome 19q13.3–q13.4 (human), **276,** 125
  - keratin 15 and 19 genes (human), **267,** 462
  - leukotriene B_4 receptor locus of chromosome 14 (human), **274,** 383
  - liver-specific organic anion transporter-1 (mouse), **272,** 563
  - *mouse disabled 2* gene, **275,** 189
  - *MVP* gene 5′-regulatory region, **278,** 125
  - ninein gene (human), **279,** 989
  - peptidylglycine α-hydroxylating monooxygenase (sea anemone), **277,** 7
  - *PEX2* gene encoding 35-kDa peroxisomal membrane protein (human), **273,** 985
  - *PEX3* gene (human), **268,** 704
  - protein arginine methyltransferase 1 gene (human), **278,** 349
  - RAB3D gene (mouse), **273,** 877
  - Rab11 family members (mouse), **269,** 611
  - Ssf-1 gene (human), **275,** 37

  tubulointerstitial nephritis antigen-related protein gene (human), **271,** 474
  UDP-glucose dehydrogenase gene (human), **275,** 981
Genomic structure
  angiopoietin-2 (chicken), **275,** 643
  Bigh3 gene (mouse), **274,** 267
  brain link protein-1 (human brain), **276,** 982
  CCK-B receptor (mouse), **272,** 837
  Frizzled-3 gene on chromosome 8p21 (human), **271,** 8; **273,** 27
  glycoprotein VI from platelets (human), **277,** 27
  G protein γ2 subunit (human), **272,** 610
  KCNJ9 gene (human), **274,** 302
  LIM-homeobox3 gene (human), **274,** 49
  organic anion transporter 1 gene (human), **275,** 623
  synaptotagmin II protein: comparison of exon–intron organization of *Synaptotagmin* gene family, **270,** 528
  ubiquitin fusion gene Uba80 and pseudogene (human), **270,** 1106
  UGT2B7 gene (human), **272,** 616
Genotoxic drugs
  induction of apoptosis and inhibition of mitosis, mimicking by degraded DNA lipotransfection (Rat-1 cells), **270,** 406
Genotoxic stress
  cellular response, role of transcriptional interference between p53 and NF-κB RelA (mouse), **272,** 375
GENSCAN
  identification of human genes, **272,** 801
Geranylgeranylacetone
  enhancement of thioredoxin expression and suppression of ethanol cytotoxicity in cultured hepatocytes (rat), **275,** 825
Germinal vesicles
  breakdown, role of RhoA (mouse), **273,** 997
Germline ϵ transcription
  IL-4-induced, in human B cell line, role of Shc, **268,** 54
GERP
  structure, expression, and chromosomal mapping (human), **279,** 482
GGA proteins
  and γ-adaptin, interacting with γ-synergin, adaptor γ ear homology domain conservation in, **271,** 719
GGGCGG repeat
  SV40, NMR observation of C-tetrad in structure of, **270,** 967
GGT, *see* γ-Glutamyltranspeptidase
Ghrelin
  central effects on growth hormone release (rat), **275,** 477
  and des-acyl ghrelin, identification as major forms of ghrelin peptide in gastrointestinal tissue (rat), **279,** 909
  effect on gastric acid secretion and motility (rat), **276,** 905
Giardia lamblia
  proteins, amino acid usage in, **279,** 996
Ginkbilobin
  with sequence similarity to embryo-abundant protein, isolation from *Ginkgo biloba* seeds, **279,** 407
Ginseng
  American, quinqueginsin isolation from roots: anti-HIV, antifungal, ribonuclease, and cell-free translation-inhibitory activities, **269,** 203
GLCLC
  γ-glutamylcysteine synthetase catalytic subunit, expression, induction by inhibition of 26S proteasome, **270,** 311
Glial cell line-derived neurotrophic factor
  recombinant, preparation by baculovirus expression system and biological activity (human), **273,** 902
  structure–function analysis (human), **268,** 692
  synthesis in cultured astrocytes
    stimulation by desmethylselegiline and selegiline (mouse), **279,** 751
    upregulation by apomorphine (mouse), **272,** 18
Glial cells
  leptin receptor expression and IL-1β induction in primary culture (mouse), **273,** 312
  nitric oxide pathway, modulation by copper (rat), **275,** 776
Glibenclamide
  induction of apoptosis by sustained enhancement of Ca^{2+} influx into RINm5F cells, **271,** 422
  inhibition of acyl-CoA:cholesterol acyltransferase, **277,** 417
Glioblastoma cells
  A-172 cells resistant to p53-mediated apoptosis, apoptosis of, induction by transduction of Apaf-1 or caspase-9, **272,** 667
  differential expression of *WNT-2B* isoforms (human), **275,** 209
  growth, dominant suppression by $p16^{INK4A}$ expression *in situ* via necrosis and cell cycle arrest (RT-2 cells), **269,** 718
  norcantharidin-induced cytotoxicity, role of p53 (RT-2 cells, U251 cells), **276,** 278
Glioma
  U87MG cell-derived, inhibition by scatter factor/hepatocyte growth factor antagonist HGF/NK2 (human), **273,** 287
Glioma cells
  apoptosis, induction by IκB combined with adenovirus-mediated caspase 8 transfer (human), **271,** 544
  expression of proteinase converting human plasminogen to Kringle 1–5-containing fragments (BT325 cells), **278,** 821
  hypoxia-inducible factor-1 activity, inhibition by iNOS expression (C6 cells), **279,** 30
  inducible nitric-oxide synthase gene expression, role of NF-κB signaling (C6 cells), **275,** 268
  insulin-like growth factor I gene expression, reduction by glucose starvation (C6 cells), **269,** 336
  invasion by, quantitative analysis by confocal laser scanning microscopy in brain slice model (rat), **269,** 513
  matrix metalloproteinase expression, effects of bcl-2-related proteins (rat), **273,** 411
  migration, promotion by TGF-β_1 and TGF-β_2 via upregulation of $\alpha_V\beta_3$ integrin expression (human LN-18, LN-229 cells), **268,** 607
  NF-κB-inhibited, X-ray-induced mutations in, enhancement by magnetic field exposure (MO54 cells), **276,** 238
  nitric oxide pathway, modulation by copper (C6 cells), **275,** 776
Gliosis
  induced during recovery from metabolic inhibition, role of extracellular signal-regulated kinase (rat), **267,** 892
Gliotoxin
  fungal, targeting of onset of superoxide generation by NADPH oxidase of human neutrophils, **268,** 716
α-Globin
  mRNA 3′-UTR stability element, proteins recognized by, differentiation-dependent cytoplasmic distribution and *in vivo* RNA association in erythroleukemic cells, **279,** 40
β-Globin
  chicken 5′HS4 insulators, reduction of variability in transgenic founder mice, **273,** 1015
  nitric oxide-mediated nitrosation in normal and sickle erythrocytes (human), **275,** 962
α_{2u}-Globulin
  multigene family, tissue- and sex-specific mRNA expression (rat), **272,** 337
Glomerular mesangial cells, *see* Mesangial cells
Glomeruli
  increased number in kidney of transgenic mice expressing truncated type II activin receptor, **268,** 445
GLP-1 peptide
  hypothalamic, mRNA expression, effect of leptin (mouse, rat), **269,** 331

Glucagon
  pre-proprotein in brain stem, mRNA expression, effect of leptin (rat), **269,** 331
Glucagon-like peptide 1
  stimulation of glucose-dependent activity of IDX-1 transactivating domain in pancreatic β INS-1 cells, **274,** 616
Glucagon receptor
  gene 5′-flanking region, structure and function, comparison in mouse and rat, **272,** 912
Glucocorticoid receptor
  interaction with 14-3-3η protein, enhancement by mizoribine, **274,** 87
Glucocorticoid resistance
  in thymocytes from mice expressing T cell receptor transgene, **276,** 189
Glucocorticoids
  effects on NF-κB binding in transcription of ICAM-1 gene (U937 cells), **273,** 1008
  lymphocyte apoptosis induced by, review, **279,** 307
  role in upregulation of ubiquitin ligase E3α gene expression in skeletal muscle during sepsis (rat), **267,** 504
Glucokinase
  expression regulation in isolated human pancreatic islets, role of glucose and glucose metabolism, **268,** 491
Gluconeogenesis
  implications of pyruvate cycling in *Manduca sexta,* **274,** 787
6-*O*-α-Glucopyranosyl-glucopyranose
  regiospecific transglycolytic synthesis and structural characterization, **274,** 99
Glucosamine
  adipocyte insulin resistance model based on, development (3T3-L1 cells), **273,** 1033
  inhibition of inducible nitric oxide synthesis (RAW 264.7 murine macrophages, rat), **279,** 234
Glucosaminylphosphatidylinositol
  water-soluble analogue, in studies of activities causing palmitoylation of inositol on GPI anchors, **267,** 296
Glucose
  consumption by βTC3 insulinoma cells, effects of pH (mouse), **273,** 937
  dehydroepiandrosterone-induced uptake, role of atypical and conventional protein kinase C (rat), **277,** 361
  deprivation, effect on GLUT1 targeting in 3T3-L1 adipocytes, **273,** 859
  effect on ADP-ribosylation of $G\alpha_{olf}$ and $G\alpha_s$ subunits in pancreatic beta cells, **271,** 86
  and glucose metabolism, role in regulation of glucokinase expression in isolated human pancreatic islets, **268,** 491
  IDX-1 transactivating domain activity dependent on, increase by glucagon-like peptide 1 in pancreatic β INS-1 cells, **274,** 616
  increased flux, adipocyte insulin resistance model based on, development (3T3-L1 cells), **273,** 1033
  insulin-stimulated transport, implications of quantitation of SNARE protein levels in 3T3-L1 cells adipocytes, **270,** 841
  levels in diabetic mouse, effect of systemic administration of HVJ viral coat–liposome complex containing human insulin vector, **273,** 666
  stimulation of p135 O-glycosylation in pancreatic islets (rat), **267,** 26
  thermophilic apoglucose dehydrogenase as nonconsuming sensor, **274,** 727
  transport, stimulation by insulin, prevention by PKB inhibition (rat adipocytes), **268,** 315
  uptake of, stimulation, role of AMP-activated protein kinase activation by stimulation of G_q-coupled receptors, **276,** 16
Glucose-6-phosphatase
  components p36 and p46 in, effects of insulin, cAMP, dexamethasone, and $[Ca^{2+}]_i$ changes in HepG2 cells, **272,** 41
  in insulin-secreting cell line INS-1, analysis, **275,** 103
Glucose 6-phosphate dehydrogenase
  cells deficient in, bioreduction of disulfides, effects of dehydroepiandrosterone, glutathione depletion, and phenylarsine oxide, **273,** 846
Glucose-regulated protein 75
  extramitochondrial localization of mortalin/mthsp70/PBP74/GRP75, **275,** 174
Glucose-regulated protein 94
  expression in mouse hepatocytes, PPARα-dependent alteration, **277,** 699
  role in starvation response of *Dictyostelium discoideum* cells, **274,** 323
Glucose starvation
  reduction of IGF-I mRNA in C6 glioma and GH3 pituitary adenoma cells, **269,** 336
Glucose tolerance
  effect of disruption of *klotho* gene (mouse), **278,** 665
Glucose transporter
  GLUT1, targeting in 3T3-L1 adipocytes, effects of glucose deprivation, **273,** 859
  GLUT4, translocation
    role of AMP-activated protein kinase activation by stimulation of G_q-coupled receptors, **276,** 16
    stimulation by insulin, prevention by PKB inhibition (rat adipocytes), **268,** 315
  GLUT4 gene, denervation- and exercise-responsive elements in, localization (mouse), **267,** 744
  insulin-dependent Glut4, expression in blastocysts (bovine), **271,** 753
Glucuronidation
  catechin and epicatechin in small intestine (rat), **277,** 507
Glutaconic acid
  induction of mitochondrial permeability transition *in vitro* (rat), **272,** 431
Glutamate
  calcium response in C2C12 myotubes dependent on, induction by 2-chloroadenosine, **277,** 546
  hypoxia/hypoglycemia-induced release from rat brain cortical slices, effects of preconditioning, **276,** 134
  signaling, role in apoptosis in dorsal lateral geniculate nucleus after monocular deprivation (rat), **278,** 360
Glutamate cysteine ligase
  catalytic subunit gene knockout: embryonic lethal effects in *Gclc*(−/−) mouse and and glutathione deficiency *Gclc*(+/−) mouse, **279,** 324
L-Glutamate decarboxylase
  brain, expression and large-scale production (human), **267,** 777
Glutamate receptor
  δ2 subunit, juxtamembrane segment required for plasma membrane localization, identification (MDCK cells), **275,** 565
  topology of GluR1 subunit, probing with epitope-tag insertions, **276,** 157
Glutamate transporter
  EAAT1, histidine substitution of leucine 325, effect on cell viability (*Xenopus laevis*), **275,** 382
Glutamic acid
  lactam derivatives of α-melanotropin substituted with, **272,** 23
Glutamine
  Glu63 of RhoA, deamidation by *E. coli* CNF1 toxin, role of short sequence of GTPase switch 2 domain, **267,** 588
γ-Glutamylcysteine synthetase
  attenuated expression by ribozyme transfection, enhancement of insulin secretion by MIN6 pancreatic β cells, **278,** 236
  catalytic subunit GLCLC, expression, induction by inhibition of 26S proteasome, **270,** 311
  GCS genes, induction, inhibitory effects of ERK and p38 MAP kinase inhibition, **278,** 484
γ-Glutamyl substrates
  cooperative binding, characterization: kinetics of mammalian glutathione synthetase, **275,** 577

γ-Glutamyltranspeptidase
  dependent GSH catabolism, effect on NF-κB (V79 Cl cells), **276,** 1062
Glutaredoxin
  regulation of NF-κB, AP-1, and CREB activation in HEK293 cells, **274,** 177; *erratum,* **275,** 247
Glutaric acid
  induction of mitochondrial permeability transition *in vitro* (rat), **272,** 431
Glutathione
  conjugation with dopamine and dopa *o*-quinones, catalysis by glutathione *S*-transferase M2-2 (human), **274,** 32
  copper-catalyzed oxidation, inhibitory effects of prion protein octapeptide region, **267,** 398
  deficiency, induction by heterozygous glutamate cysteine ligase catalytic subunit gene knockout (mouse), **279,** 324
  depletion of, effects on bioreduction of disulfides in glucose 6-phosphate dehydrogenase-deficient cells, **273,** 846
  GGT-dependent catabolism, effect on NF-κB (V79 Cl cells), **276,** 1062
  MRP1-mediated transport, verapamil analogs modulating, structure–activity studies, **275,** 795
  redox state, regulation of HSP70 induction in brain after ethanol administration (rat), **269,** 397
  reduced, stimulation of caspase-3 activity, **268,** 78
  synthesis, regulation: induction of γ-glutamylcysteine synthetase catalytic subunit GLCLC by inhibition of 26S proteasome, **270,** 311
  transport into mitochondria, role of voltage-dependent anion channels (yeast), **276,** 940
Glutathione peroxidase
  expression in endothelial cells, enhancement by shear stress, **273,** 66
Glutathione peroxidase-1
  mitochondrial, effects on induced and basal oxidative damage to mtDNA in T47D cells, **272,** 416
Glutathione reductase
  amino acid sequence, frequency and Markov chain analysis (human), **268,** 823
  gene structural organization: cDNA and mitochondrial leader sequences (human), **269,** 366
Glutathione synthetase
  mammalian, kinetics: characterization of γ-glutamyl substrate cooperative binding, **275,** 577
Glutathione *S*-transferase
  dimeric GSTP1-1, tyrosine 50 at subunit interface of, role in stability and catalytic function (human), **271,** 59
  fusion with *Helicobacter pylori* VacA: exotoxin C-terminal ~100-residue segment role in binding to HeLa cells, **278,** 449
  GSTM1 polymorphism, role in Parkinson's disease (human), **269,** 676
  GST M2-2, catalysis of conjugation of dopamine and dopa *o*-quinones (human), **274,** 32
  Pi class, allelic variants, activity toward chlorambucil (human), **278,** 258
Glycans
  high-mannose, accessibility in HIV-1 gp120, analysis by *in vitro* interaction with mannose-binding lectins, **274,** 455
  N-linked, inner perivitelline-derived, induction of acrosomal exocytosis in chicken spermatozoa, **278,** 84
  signaling dependent on, mediation by O-linked GlcNAc transferase, **271,** 275
N-Glycan structure
  in osteopontin from human bone, **268,** 814
Glycation
  aspartate aminotransferase, associated conformational changes, **277,** 47
  effects of advanced glycation end products on lens epithelial cells *in vitro* (bovine, human), **275,** 53
Glyceraldehyde-3-phosphate dehydrogenase
  cytosolic, expression on surface of *Streptococcus pyogenes,* **278,** 826
  gene isolation and characterization (*Pleurotus sajor-caju*), **278,** 192
  NAD$^+$-binding fold, identification as RNA-binding domain, **275,** 253
Glyceryl trinitrate
  inhibition of platelet aggregation independently of cGMP (human), **279,** 412
  nitric oxide release from, pathway for, **274,** 255
Glycine
  LIM domain protein CRP2 rich in, specific interaction with CRP2BP (human), **274,** 655
Glycogen
  protein phosphatase-1 G_M subunit targeting, overexpression in CHO cells, **275,** 859
Glycogen storage disease type II
  correction by enzyme replacement with recombinant human acid maltase, **276,** 917
Glycogen synthase 3β
  regulation of ninein oligomerization (human), **279,** 989
Glycogen synthase kinase 3β
  activation-dependent induction in human T cells, suppression by alanyl aminopeptidase inhibition, **273,** 62
  binding of alternatively spliced variants of brain dynamin-like protein as substrates (rat), **268,** 893
  tau protein phosphorylation by, effects of PKNα and protein kinase C, **273,** 209
Glycolipid-enriched microdomain
  translocation of integrin, Src, and caveolin into or out of, effect of glycosylation, **273,** 159
Glycolipids
  cytokine-inducing macromolecular, from *Enterococcus hirae,* separation method and effects on cellular activation, **273,** 164
Glycolysis
  in *Escherichia coli,* dynamic behavior, modulation by ADP, **271,** 244
  in yeast stress response: stimulation of yeast 3-phosphoglycerate kinase gene promoter by paraquat, **270,** 1036
Glycoprotein Ibα
  recombinant fragments, liposomes carrying, targeting to immobilized von Willebrand factor under flow conditions, **270,** 755
  thrombin bound to, as serine protease producing macromolecular activators of phagocytosis from platelets (human), **270,** 377
Glycoprotein VI
  convulxin binding to, competition with collagen-related peptides, **273,** 246
  molecular cloning, genomic structure, chromosomal localization, and alternative splice forms (human), **277,** 27
Glycoproteins
  HIV-1 envelope, gene transfer into cells expressing, retroviral vector for, **271,** 672
  major PHA-L-reactive, in colon carcinoma cell lines and tumors, CEA identification as, **273,** 147
  ubiquitin-like, isolation *(Pleurotus ostreatus),* **276,** 587
Glycosaminoglycans
  netrin-1 C-terminus binding to, analysis, **271,** 287
Glycosphingolipids
  T-cell membrane microdomains enriched in, CD3ζ targeting into, phenotypic effects (human), **271,** 589
Glycosylation
  CD82 and α3 and α5 integrins, effect on LDL GEM membrane domain involved in cell adhesion and motility (ldlD 14 cells), **279,** 744
  effect on translocation of integrin, Src, and caveolin into or out of glycolipid-enriched microdomain, **273,** 159
  hemoglobin, effect on Hb S-nitrosylation (human), **271,** 217
  N-linked, inhibition, effect on apoptosis (BHK21 cells), **276,** 965
O-Glycosylation
  p135 in pancreatic islets, stimulation by glucose and streptozotocin (rat), **267,** 26

Glycosylphosphatidylinositol anchor
  T-cadherin, lipoprotein binding (human), **276,** 1240
  HDL-binding protein with, identification on macrophages (human), **272,** 864
  inositol palmitoylation on, activities causing, analysis with water-soluble analogue of glucosaminylphosphatidylinositol, **267,** 296
Glycosyltransferases
  bacterial, phytanyl-pyrophosphate-linked substrates for, **272,** 290
  histo-blood group *ABO* enzymes, gene enhancer structures and transcriptional activities (human), **273,** 459
Glycoxidation
  inhibition by kinetin *in vitro,* **276,** 1265
Glyoxals
  inhibition of cathepsin S, **275,** 401
Gold
  colloidal, DNA sensing enhanced by, analysis by quartz crystal microbalance, **274,** 817
  oligonucleotide-capped nanoparticles, in assay for selective determination of polynucleotides using AFM imaging, **279,** 265
Golgi apparatus
  EXT1 association with EXT2, **268,** 860
  p125 localization associated with, regions required for, **279,** 144
  prenylated Rab acceptor localization and role in Golgi structure and function (mouse), **275,** 509
Golgi network
  ADAM 12-L retention in *trans*-Golgi network (human), **275,** 261
Gonadotropin
  release, hypothalamic peptide inhibiting, isolation, characterization, and localization (quail), **275,** 661
Gonadotropin-inhibitory hormone
  isolation from hypothalamus, characterization, and localization (quail), **275,** 661
Gonadotropin-releasing hormone
  novel form in brain of teleost fish medaka, **276,** 298
Gonadotropin-releasing hormone receptor
  gene, identification of upstream promoter (human), **270,** 766
Gonyaulax polyedra
  peridinin from, quenching of singlet oxygen, **268,** 496
gp41
  coiled-coil regions, HIV entry inhibitors targeted to, development, **269,** 641
  salt bridge between N-terminal coiled coil and antiviral agent targeted to gp41 core, role in anti-HIV-1 activity, **270,** 153
gp120
  accessibility of high-mannose glycans in, analysis by *in vitro* interaction with mannose-binding lectins, **274,** 455
  expression in COS-7 cells, erythropoietin signal peptide for, efficiency, **273,** 557
  immediate and neurotoxic effects, role of CXCR4 receptor (rat), **274,** 212
  neocortical apoptosis induced by, role of cyclooxygenase-2 and prevention by NMDA receptor antagonists and U-74389G (rat), **274,** 664
gp130
  role in cell density-dependent regulation of hepatic development (mouse), **277,** 152
GPI 6150
  prevention of hydrogen peroxide cytotoxicity by inhibition of poly(ADP-ribose) polymerase (P388D1 cells), **278,** 590
G-protein-coupled receptors
  cloning from sea anemone nervous system, **271,** 761
  evolutionarily conserved SREB family expressed in central nervous system, **272,** 576
  GPR1 gene, regulation of filamentous growth through *FLO11* in *Saccharomyces cerevisiae,* **267,** 164
  GPR5/XCR1, viral macrophage inflammatory protein-II as ligand for, and expression in tissues and cells, **268,** 938
  GPR66, neuromedin U as ligand (rat), **276,** 435
  G_q-coupled receptors, stimulation of, activation of AMP-activated protein kinase (CHO cells), **276,** 16
  HOFNH30, identification as receptor for lysophosphatidic acid (human), **273,** 805
  homologous to *Xenopus PSP24* and human GPR45, brain-specific expression, **276,** 952
  p40/GPR69A characterization as peripheral membrane protein related to lantibiotic synthetase component C, **275,** 69
  prostaglandin EP3 receptor, receptor isoform-specific interaction with muskelin, **276,** 350
  sphingosine 1-phosphate receptor expressed in embryonic brain, characterization (zebrafish), **279,** 139
G protein-linked acetylcholine receptor
  gar-1 encoding, alternative splicing (*Caenorhabditis elegans*), **268,** 354
G proteins
  $G\alpha_{13}$, association with Dbl, role in RhoA activation (NIH 3T3 cells), **277,** 718
  $G_{\alpha16}$ Ala^{228} residue, role in C5a receptor induction of $G_{\alpha16}$-mediated inositol phosphate release, **278,** 426
  $G\alpha_{olf}$ and $G\alpha_s$ subunits, ADP-ribosylation in pancreatic beta cells, decrease by high glucose, **271,** 86
  γ2 subunit, gene cloning, characterization, and mapping (human), **272,** 610
  G_i, linked phospholipase C pathway, role in sphingosine 1-phosphate stimulation of tyrosine phosphorylation of $p125^{FAK}$ and chemotaxis of endothelial cells, **268,** 47
  G_{i3} and G_s in rat alveolar macrophages and G_s in HEK293 cells transfected with human $VPAC_1$ receptor, activation by VIP, **272,** 922
  G_o, interaction with HIV-1 Nef in transfected COS-7 cells, **270,** 570
  $G_{s\alpha}$
    NAD-induced endogenous ADP-ribosylation, evidence against, **270,** 203
    palmitoylation *in vitro,* Cys 160 as site of, **270,** 131
  pertussis toxin-sensitive, role in phospholipase A_2 mediation of bFGF-stimulated fetal skin fibroblast migration via arachidonic acid (human), **272,** 648
Granule cells
  of cerebellum, and hippocampus, Cre-mediated gene mutation in mouse brain restricted to, **269,** 149
Granule membranes
  basophilic leukemia cells, syntaxin-3 and VAMP-7 expression (rat), **271,** 36
α-Granules
  release, role in platelet exocytosis (human), **267,** 875
Granulocyte colony-stimulating factor
  complex with G-CSF receptor, in homology modeling of human leptin/leptin receptor complex, **275,** 154
  with modified C-terminus, biological activity (human), **267,** 924
  upregulation of Ssf-1 mRNA expression in HL-60 cells, **275,** 37
Granulocyte colony-stimulating factor receptor
  complex with G-CSF, in homology modeling of human leptin/leptin receptor complex, **275,** 154
Granulocyte–macrophage colony-stimulating factor
  induction and regulation of matrix metalloproteinase-12 in monocyte/macrophages (human), **269,** 808
  neutrophils stimulated by, cDNA representational difference analysis (human), **277,** 401
Granulocyte–macrophage progenitors
  cells derived from, high-efficiency formation of osteoclasts (human, mouse), **267,** 943
Granulocytic differentiation
  factors inducing, upregulation of Ssf-1 mRNA expression in HL-60 cells, **275,** 37
Granulocytin
  activation of macrophage-like cells (mouse), **275,** 850

Granulopoiesis
  bone marrow cells *in vitro,* effects of swainsonine and *N*-butyldeoxynojirimycin: suppression of neutrophil maturation (human), **269,** 219
  stimulation by granulocyte colony-stimulating factor with modified C-terminus (human), **267,** 924
Granulosa cells
  luteinized, induced apoptosis in, role of mitochondria and caspases (human), **269,** 542
  ovarian, aromatase activity, inhibition by troglitazone (human), **271,** 710
  type-I pituitary adenylate cyclase activating polypeptide receptor gene expression induced by LH, mediation by progesterone receptor activation (rat), **277,** 270
Grass carp reovirus
  genome segments 1, 2, and 3, sequence, **274,** 762; *erratum,* **276,** 391
Grb2
  association with Gab1 and Gab2, **277,** 195
  identification as component of CIN85 complexes, **278,** 167
Grb3-3
  apoptosis-associated, upregulation in HIV-1-infected human CD4$^+$ lymphocytes, **276,** 362
Green fluorescent protein
  engineered metal binding sites on, **268,** 462
Green tea
  epigallocatechin-3-gallate
    dysregulation of cell cycle (A431 cells), **275,** 328
    human chondrosarcoma cell apoptosis mediated by, role of caspase-3, **270,** 793
  polyphenols in, inhibition of squalene epoxidase, **268,** 767
GroEL
  apical domain, hydrophilic residues at, role in GroES binding and attenuation of polypeptide binding, **267,** 842
  in bacterial expression system for CYP3A7, **269,** 623
  binding of charged substrate, electrostatic interactions in, fluorescence correlation spectroscopic study, **267,** 300
GroES
  binding to GroEL, role of hydrophilic residues at GroEL apical domain, **267,** 842
Growth
  skeletal, in adult GHR −/− mice, **267,** 603
Growth factor-like protein
  capillary permeability-increasing, purification from *Vipera lebetina* venom, **268,** 69
Growth factor receptor 2
  interaction with β-dystroglycan, **274,** 93
Growth hormone
  cDNA, homologous single copy, growth efficiency of transgenic tilapia carrying, **267,** 466
  effect on morphology of preantral follicles from 11-day-old mice in *in vitro* culture, **268,** 36
  phospholipase C-β isozyme expression in neonatal rat cardiomyocytes stimulated by, **275,** 1
  release, central effects of ghrelin (rat), **275,** 477
  reversal of desensitization of P2Y$_2$ receptors in mesangial cells (rat), **270,** 594
Growth hormone receptor
  GHR −/− mice, skeletal proportions and adult bone metabolism, **267,** 603
Growth hormone-releasing hormone
  elevated response of pituitary somatotrophinomas *in vitro,* association with polymorphism in GHRH receptor gene (human), **275,** 33
Growth hormone-releasing hormone receptor
  gene polymorphism, association with elevated response to GHRH by human pituitary somatotrophinomas *in vitro,* **275,** 33
Growth hormone secretagogue receptor
  adenosine as partial agonist (pig), **276,** 1306
Growth inhibition
  Escherichia coli, by induction of expression of mammalian genes with transmembrane or ATPase domains, **268,** 553
  lymphocyte, by tripeptide *N*-acetyl-Glu-Ser-GlyNH$_2$ from canine spleen, **277,** 562
GTPase
  GP-1 family, GTPBP2 identification as member of, in human and mouse, **272,** 456
  Ras- and Rho-family
    in COX-2 transcription regulation (NIH 3T3 cells), **276,** 406
    regulation of urokinase receptor transcription, **270,** 892
  switch 2 domain, of RhoA, portion of, role in deamidation of RhoA Glu63 by *E. coli* CNF1 toxin, **267,** 588
GTPBP2 gene
  identification as member of GP-1 family of GTPases (human, mouse), **272,** 456
GTP cyclohydrolase I
  coinduction in hepatocytes stimulated to produce NO (rat), **276,** 633
Guanidine hydrochloride
  apo- and *holo-α*-lactalbumin in, quenching by acrylamide, **269,** 709
Guanine nucleotide exchange factors
  Dbl, activation following ACK1-dependent tyrosine phosphorylation, **268,** 141
  isolation of RhoGEFs *ARHGEF3* and *ARHGEF4* in 3p13–21 and 2q22 (human), **273,** 364
Guanylate cyclase
  membrane-bound, GC-A, regulatory protein for, molecular cloning (rat brain), **278,** 106
  soluble, β_2 subunit, human-specific frameshift and expression in gastric carcinoma, **271,** 64
Guanylate cyclase regulatory protein
  for membrane-bound GC-A, molecular cloning (rat brain), **278,** 106
Guanylin
  downregulation in mouse and human intestinal adenomas, **273,** 225
Guanylyl cyclase, *see* Guanylate cyclase
Gulf War Syndrome
  self-reporting veterans, paraoxonase levels, **276,** 729

H

Halothane
  effect on oligomerization of sarcoplasmic reticulum Ca^{2+}-ATPase (rabbit), **271,** 770
Halysetin
  purification, characterization, and cDNA sequence: disintegrin-like/Cys-rich protein (*Agkistrodon halys* venom), **278,** 112
Hammerhead ribozymes
  hepatitis Bx sequence-targeted, inhibitory effects in cultured cells, *in situ* demonstration, **268,** 728
  inosine$^{15.1}$-hammerhead ribozyme inhibition of transthyretin-met30 expression in HepG2 cells, **279,** 970
  suppression of telomerase activity, 5′-end of hTERT mRNA as target for, **273,** 316
Hap1
  heme regulatory elements in, functional analysis, **273,** 584
HAP complex
  binding to CAE-element in *cbh2* promoter in cellulase-negative mutant of *Hypocrea jecorina,* **277,** 581
Haptens
  multiple, high-affinity scFvs from single rabbit immunized with, **268,** 398
Haptoglobin
  IL-1-dependent induction, inhibition by deactylase inhibitors (IEC-6 cells), **276,** 673

Ha-*ras* oncogene
  in cooperation with hepatitis C virus NS4B, transformation of NIH3T3 cells, **267,** 581
HARP
  endothelial cell proliferation induced by, implications of N- and C-terminal peptides (bovine, human, rat), **274,** 242
HASH-1
  expression in neuroblastoma cells and formation of functional complex with E2-2 (human), **274,** 22
H$^+$-ATPase
  vacuolar, *see* Vacuolar H$^+$-ATPase
HBV enhancer 1 (Enh1)
  and hepatitis B virus X protein role in hypoxia-induced angiogenesis, **268,** 456
Heart
  N-acetylglucosamine-6-*O*-sulfotransferase GlcNAc6ST-4 expression (human), **274,** 291
  amino acid transporter A subtype ATA1 expression (human), **273,** 1175
  amyloid formation in patients with familial amyloid polyneuropathy, role of wild-type transthyretin, **274,** 702
  bioenergetics, *in vivo* metabolic imaging in transgenic mice, **271,** 222
  callipeltin A effects on bovine cardiac Na$^+$/Ca^{2+} exchanger and induction of positive inotropic effect in guinea pig atria, **279,** 219
  cAMP-specific phosphodiesterase PDE7B expression (human), **271,** 575
  cardiomyopathic, α-interferon-inducible protein gene expression (hamster), **267,** 103
  Csx/Nkx2-5 transgenic mice, upregulation of natriuretic peptides in ventricle, **270,** 1074
  cysteinyl leukotriene CysLT$_2$ receptor expression (human), **274,** 316
  ENT1 gene expression (mouse), **277,** 200
  frizzled-10B gene expression (*Xenopus laevis*), **278,** 377
  function in myocardial infarction, improvement by cyclooxygenase-2 inhibition (rat), **273,** 772
  homeobox gene *CSX1,* transcriptional regulation (human), **272,** 749
  Homer 1a and 1c transcript detection in muscle (rat), **279,** 348
  ischemia–reperfusion *in vivo,* protective effect of heme oxygenase-1 induction (rat), **279,** 582
  isolated, HSP27 translocation to sarcomere induced by ischemic preconditioning (rat), **269,** 137
  junctophilin subtype gene expression (human), **273,** 920
  and liver and kidney and suprachiasmatic nucleus, differential regulation of *BMAL1* mRNA in *Clock* mutant mice, **268,** 164
  muscle contractility, enhancement by endogenous inhibitor of Na/Ca exchange (bovine), **277,** 138
  Peroxiredoxin V gene short transcript expression (mouse), **270,** 356
  response to PPARα activation, comparison with kidney and liver (mouse), **278,** 250
  secretion of circulating cardiotrophin-1 (human), **279,** 320
  α-tubulin isoform tuba8 preferentially expressed in, cloning and sequencing (human, mouse), **270,** 1111
  ubiquitin–proteasome proteolytic pathway, effect of acute diabetes (rat), **276,** 1255
  voltage-dependent calcium channel β_{2a} subunit, cloning (human), **267,** 156
  Wnt16 isoform expression (human), **278,** 814
Heart failure
  hypertrophied rabbit left ventricle, loss of normal epicardial to endocardial gradient of CFTR mRNA expression, **278,** 144
  transition from hypertrophy to, and cardiac calcineurin expression and roles (rat), **273,** 347
Heat
  insensitive component in dNTPase (pig, yeast), **276,** 823
  production during Ca^{2+} efflux by sarcoplasmic reticulum Ca^{2+}-ATPase, **276,** 35
Heat shock
  activation of LEDGF gene (Cos 7 cells, LECs), **276,** 1320
  induction of Akt activation: role in suppression of heat shock-induced apoptosis of NIH3T3 cells, **278,** 306
  induction of Akt breakdown (COS-7 cells), **276,** 702
  induction of efflux through MscL (*Salmonella typhimurium*), **279,** 208
Heat shock cognate proteins
  Hsc70/Hsp40, chaperone activities, modulation by Hsp105α and Hsp105β, **272,** 850
Heat shock protein
  DnaK/J, synthesis, role in magnetic field stimulation of transposition in *E. coli,* **270,** 745
  DNA vaccines encoding, suppression of *Helicobacter pylori*-induced gastritis (mouse), **277,** 159
  gene expression in brain under stress, induction by sucrose diet feeding (rat), **274,** 355
Heat shock protein 25
  N-terminal 33-amino-acid deletion variant, retention of oligomerization and functional properties, **270,** 183
Heat shock protein 27
  association with tubulin/microtubules in HeLa cells, **271,** 164
  expression and hyperphosphorylation, induction by cyclosporin A (BSC-1, F9, HeLa cells), **269,** 464
  translocation to sarcomere, induction by ischemic preconditioning in isolated rat hearts, **269,** 137
Heat shock protein 60
  identification as high-affinity HDL binding protein, **277,** 228
Heat shock protein 70
  downregulation
    in endothelial cells during hypoxia (human), **274,** 542
    during unfolded protein response in human cells, **278,** 530
  induction in brain after ethanol administration, regulation by glutathione redox state (rat), **269,** 397
  mitochondrial: extramitochondrial localization of mortalin/mthsp70/PBP74/GRP75, **275,** 174
Heat shock protein 72
  induction in lung by pancreatitis, role of neutrophils and xanthine oxidases (rat), **273,** 1078
Heat shock protein 90
  binding sites, localization in human hepatitis B virus polymerase, **269,** 191
  Hsp90β, N- and C-terminal fragments, interactions with hepatitis B virus polymerase, **274,** 203
Heat shock protein 105
  Hsp105α and Hsp105β
    modulation of chaperone activities of Hsc70/Hsp40, **272,** 850
    phosphorylation by casein kinase II, **270,** 927
Heat shock transcription factors
  HSF1 and HSF2, activation by cyclosporin A (BSC-1, F9, HeLa cells), **269,** 464
  HSF2, competition with catalytic subunit of protein phosphatase 2A for binding to PR65/A subunit, molecular basis, **272,** 84
Heavy metal resistance
  large plasmids encoding, characterization in *Salmonella abortus equi,* **272,** 6
HeLa cells
  angiogenic balance and tumorigenicity, effects of chronic IFN-α exposure, **277,** 410
  artificial antisense RNA regulation in, comparison with fission yeast, **268,** 8
  binding by *Helicobacter pylori* VacA, role of C-terminal ~100-residue segment role, **278,** 449
  cyclosporin A-induced atypical heat shock response, **269,** 464
  heat shock protein 27 association with tubulin/microtubules, **271,** 164
  HeLa S3, differential expression of *WNT-2B* isoforms, **275,** 209

- oncogenic potential and normal growth, effects of endogenous AP-1, **278,** 97
- susceptibility to noninsecticidal parasporal proteins of *Bacillus thuringiensis* serovar *shandongiensis* isolate, **272,** 218
- thioredoxin interaction with VDUP1, detection in yeast two-hybrid system, **271,** 796

Helices
- helix XI in melibiose carrier of *E. coli,* interactions with helices I, II, and V, **268,** 409

Helicobacter pylori
- gastritis induced by, suppression by DNA vaccines encoding heat shock protein (mouse), **277,** 159
- induction of stress fiber and membrane ruffle formation in gastric adenocarcinoma AGS cells, role of rac and cdc42, **269,** 247
- lipopolysaccharide, gastric mucosal inflammatory responses to, associated upregulation of endothelin-converting enzyme-1, **267,** 801
- VacA, fusion with GST, analysis: exotoxin C-terminal $\sim$100-residue segment role in binding to HeLa cells, **278,** 449

Helix stabilizing nucleoid protein
- HSNP-C′, biochemical characterization and helix stabilizing properties (*Sulfolobus acidocaldarius*), **267,** 614

Helper T cells
- protective responses, mapping of influenza A virus hemagglutinin epitope eliciting, **270,** 190
- type 2
  - clone, protein tyrosine phosphorylation in, induction by ubiquitin-like polypeptide (mouse), **274,** 565
  - immune responses mediated by, effects of peroral or intraperitoneal vitamin B$_6$ (mouse), **272,** 151

Hemagglutinating virus of Japan
- HVJ viral coat–liposome complex containing human insulin vector, systemic administration, effect on glucose level of diabetic mouse, **273,** 666

Hemagglutinin
- influenza A virus, mapping of protective helper T cell epitope, **270,** 190

Hematopoiesis
- inhibition by dithiocarbamates via copper-dependent mechanism (human), **274,** 513

Hematopoietic cells
- apoptosis induced by IL-2 withdrawal, inhibition by MAJN (BAF-B03 β cells), **270,** 267
- CRLM-2 type I cytokine receptor preferentially expressed in, cloning, **272,** 224
- cytokine deprivation, caspase-3 activation and apoptosis induced by, prevention by Ras-dependent signals, **267,** 449
- differentiation, embryonic stem cell-derived, Id gene regulation (mouse), **276,** 803
- interferon-dependent activation of phosphatidylinositol 3′-kinase, pathways regulating, **270,** 158

Hematopoietic supportive cells
- bone marrow stromal cell lines, isolation of PDZ-containing myosin (mouse), **270,** 67

Heme
- bound to myoglobin apoprotein, enhancement of myoglobin oxidation of lipids, **269,** 647
- degradation during autoxidation of oxyhemoglobin, **273,** 839
- Fe^{3+}/Fe^{2+} reduction potential, effect of water, **268,** 683
- interaction with chloroquine and analogues, isothermal titration calorimetric study, **276,** 1075
- lactoperoxidase fragment binding, isolation (bovine), **274,** 756
- metabolism in *Plasmodium,* as target of antimalarial drugs, **268,** 665
- nitric oxide-mediated oxidation in normal and sickle erythrocytes (human), **275,** 962
- reactivity, control in *Aplysia limacina* myoglobin, effect of engineering of His(E7), **269,** 58
- regulatory elements of Hap1, functional analysis, **273,** 584
- substrate–heme complex approach, in analysis of cholesterol side chain cleavage active site, **274,** 821

Heme oxygenase
- expression and localization in placental villi (human), **276,** 1136

Heme oxygenase-1
- induction
  - increase of CO in exhaled air of critically ill patients, **267,** 423
  - modulation of *cis*-aconitase activity in lens epithelial cells, **270,** 324
  - protective effect against cardiac ischemia–reperfusion *in vivo* (rat), **279,** 582
- repression by hypoxia in vascular endothelial cells (human), **271,** 665

Hemicholinium-3-sensitive choline transporter
- gene encoding, molecular cloning (human), **276,** 862

Hemin
- kinetic trapping in cytochrome b_5 from outer mitochondrial membrane (rat), **273,** 467

Hemodynamic forces
- endothelial cell apoptosis sensitive to, mediation by integrin-associated protein and thrombospondin-1 (human), **271,** 584

Hemoglobin, *see also* Oxyhemoglobin
- assembly, synergistic effect of surface and interface β-chain residues, **270,** 683
- biocatalytic oxidation of PAHs, improvement by Hb chemical modification, **273,** 820; *erratum,* **275,** 713
- glycosylated, enhanced S-nitrosylation in, analysis (human), **271,** 217
- heme oxidation and β-globin nitrosation mediated by NO, in normal and sickle erythrocytes (human), **275,** 962
- release by red blood cells loaded with *in vitro* translated Bcl-2 and cleaved fragment, induction by Bcl-2 antibodies, **270,** 816
- rodent, highly reactive cysteine residues in, **275,** 517

Hemolymph
- silkworm, inhibition of baculovirus-induced insect cell apoptosis, **271,** 186

Hemolysis
- absence during antibiotic action of CRAMP analogues against bacterial, fungal, and tumor cells (human), **275,** 904
- by tryptophan analogs of indolicidin, **274,** 714

Hemorrhagin
- *Bothrops atrox,* disintegrin-like/cysteine-rich domains from, induction of edema, **276,** 29

Heparanase
- Hpa2, cloning and expression profiling (human), **276,** 1170

Heparan sulfate
- binding of FGF-1 and FGF-2, kinetics, role in differential mitogenic effects of FGFs in breast cancer cells, **267,** 770
- on biochip, enzymatic modification of, effect on interaction with antithrombin III, **276,** 292
- cell-associated proteoglycans, in FGF-2 cell attachment mediation (CHO-K1 cells), **276,** 399

Heparin
- binary complexes with immunoglobulin-like modules of FGF receptor 2, ligand binding properties, **272,** 830
- binding activity of TFPI-2 (HT-1080 cells), **276,** 1286
- interaction with lipoprotein lipase, role of enzyme C-terminal domain, **271,** 15
- proteoglycans binding, neurocan identification as, **272,** 449

Heparin affin regulatory peptide
- endothelial cell proliferation induced by, implications of N- and C-terminal peptides (bovine, human, rat), **274,** 242

Heparin-binding EGF-like growth factor
  agonist-induced gene expression, inhibition by cAMP independently of effects on p42/p44 MAPK activation, **277,** 558
Heparin-binding protein
  major, antithrombin III identification in porcine aqueous humor as, **272,** 1
Hepatitis
  fulminant, Fas-mediated, inhibition in CrmA gene-transfected mice, **273,** 101
Hepatitis B virus
  HBx region, hammerhead ribozymes targeting, inhibitory effects in cultured cells, *in situ* demonstration, **268,** 728
  polymerase
    HSP90 binding sites in, localization (human), **269,** 191
    interactions with N- and C-terminal fragments of Hsp90β, **274,** 203
  preS surface protein, cellular receptors specific for, detection on cell lines of extrahepatic origin, **277,** 246
  X protein
    expression in hepatocellular carcinomas (human), **276,** 885
    mediation of hypoxia-induced angiogenesis in hepatocarcinogenesis, **268,** 456
    selective transcriptional regulatory activity in human liver cells, **272,** 525
Hepatitis C
  chronic, *CYP2D6* polymorphisms and anti-KLM-1 in patients with, **270,** 922
Hepatitis C virus
  core protein, formation of complex with p21Waf1/Cip1/Sdi1, **273,** 479
  NS3 protease, RNA aptamer-binding site, identification, **279,** 557
  NS4A, lack of activity in I25A/I29A mutant, restoration by N-biotinylation, **267,** 278
  NS4B, transformation of NIH3T3 cells in cooperation with Ha-*ras* oncogene, **267,** 581
  RNA-dependent RNA polymerase, catalysis of RNA synthesis *de novo,* **268,** 798
  therapy by intermittent treatment with interferon: enhancement of priming effect, **278,** 599
Hepatoblastoma cells
  HepG2, *see* HepG2 cells
Hepatocarcinogenesis
  hypoxia-induced angiogenesis in, mediation by hepatitis B virus X protein, **268,** 456
Hepatocarcinoma cells
  cell cycle and β-1,4-galactosyltransferase 1 gene expression, effects of suppression of TGF-β1 expression (human), **273,** 833
  HepG2, *see* HepG2 cells
  TGF-β1-modulated expression of α5β1 integrin and integrin-mediated signaling (human), **274,** 519
Hepatocellular carcinoma
  p53-overexpressing, downregulation of proapoptotic proteins Bax and Bcl-X_s in, **273,** 54
Hepatocellular carcinoma cells
  constitutive IL-8 gene expression, role of PEA3 and AP-1 (HCC, HepG2 cells), **279,** 166
  expression of hepatitis B virus X variants (human), **276,** 885
  Hep3B, zinc effect on hypoxic induction of erythropoietin mRNA, mechanisms, **268,** 652
  hepatitis B virus X protein role in hypoxia-induced angiogenesis, **268,** 456
  HepG2, *see* HepG2 cells
  recombinant adenovirus vector targeting to, using bifunctional Fab–antibody conjugate (human), **272,** 497
Hepatocyte growth factor
  effect on sensitivity of chemotherapeutic agents and stimulation of cell adhesion, invasion, and migration (CHO cells), **274,** 772
  enhancement of matrix metalloproteinase activity in endothelial cells (human), **272,** 900
  and epidermal growth factor, additivity of proliferative effects on hepatocytes (rat), **278,** 698
  gene expression
    in fibroblasts, regulation by TGF-β1, mechanism (MRC-5 cells), **271,** 203
    in liver regenerative models (rat), **272,** 591
    in MRC-5 cells, regulation by *N*-acetylcysteine, **279,** 108
  gene promoter of, repression by AP2 transcription factor, **272,** 882
  gene transfer, mediated by adenovirus, prevention of lethal liver failure (rat), **278,** 338
  induction of bone marrow cell differentiation into hepatocyte lineage *in vitro* (rat), **279,** 500
  kringle 1 domain, effects on bovine aortic endothelial cell proliferation stimulated by bFGF and on apoptosis (human), **277,** 186
  kringle 1–4 domains, inhibition of microvascular endothelial cell proliferation and migration (human), **279,** 846
  SF/HGF antagonist HGF/NK2, inhibition of glioma (human), **273,** 287
Hepatocyte nuclear factor 1α
  gene encoding, identification of retinoic acid-responsive elements (Hep3B cells), **276,** 837
  loss-of-function mutations P112L and Q466X, associated MODY (human), **279,** 792
  role in transcriptional regulation of human dipeptidyl-peptidase IV during differentiation of Caco-2 cells, **270,** 235
Hepatocyte nuclear factor 1β
  role in transcriptional regulation of human dipeptidyl-peptidase IV during differentiation of Caco-2 cells, **270,** 235
Hepatocyte nuclear factor 3β
  interaction with OTX2, **267,** 64
Hepatocyte nuclear factor 4
  interactions with peroxisome proliferator response element present at positions −681/−669 in hepatic 3-ketoacyl-CoA thiolase B gene (rat), **269,** 347
Hepatocyte nuclear factor 4α
  gene encoding, identification of retinoic acid-responsive elements (Hep3B cells), **276,** 837
Hepatocytes
  accelerated growth, association with cyclin E upregulation in transgenic mice expressing dominant negative form of retinoic acid receptor, **278,** 229
  ARNT2 activation of hypoxia-induced transcription from HRE, **273,** 231
  bone marrow cell differentiation into, induction by HGF *in vitro* (rat), **279,** 500
  culture systems (human), **274,** 1
  cytochrome P450 3A-dependent metabolism of tocopherols and inhibition by sesamin (rat), **277,** 531
  DNA strand breaks induced by hepatic copper accumulation in Long-Evans Cinnamon strain rats, **276,** 174
  effects of prototypical inducers on induction of cytochromes P450 1A1, 1A2, 3A4, 2C9, and 2C19 and MDR-1 and MRP-1, **273,** 333
  expression of homologous rat SULT1C2 sulfotransferases, **272,** 242
  GRP94 expression, PPARα-dependent alteration (mouse), **277,** 699
  isolated, photodynamic modulation of adrenergic receptors (rat), **277,** 705
  matrix metalloproteinases derived from, regulation and significance in liver remodeling (mouse), **272,** 681
  pregnane X receptor and constitutively activated receptor expression in primary culture, negative regulation by IL-6 (human), **274,** 707
  proliferation, additivity of effects of HGF/SF and EGF (rat), **278,** 698
  prostaglandin $F_{2\alpha}$ receptor gene 5′-flanking region transcriptional control functions (rat), **278,** 278
  serum-free long-term cultures (human), **269,** 46
  stimulated to produce NO, GTP cyclohydrolase I coinduction (rat), **276,** 633
  thioredoxin expression and ethanol cytotoxicity *in vitro,* effects of geranylgeranylacetone (rat), **275,** 825

Hepatoma
- oyster mushroom lectin with activity against, isolation and sequence studies (mouse), **275,** 810

Hepatoma cells
- apoptosis, synergistic induction by IFN-γ and TNF-α (Hepa1-6 cells), **272,** 674
- ascites, transplantation in mice, subsequent hepatic zinc response via metallothionein induction (7974F cells), **270,** 1140
- downregulation of murine *Cyp1a-1* by bisphenol A (Hepa-1c1c7 cells), **277,** 594
- HepG2, *see* HepG2 cells
- role of regucalcin: review, **276,** 1

HepG2 cells
- apoA-I ligand domain interacting with high-affinity binding sites on, **267,** 541
- C3A subclone, CYP3A-dependent metabolism of tocopherols and inhibition by sesamin, **277,** 531
- constitutive IL-8 gene expression, role of PEA3 and AP-1, **279,** 166
- constitutive and inducible CYP mRNA expression, quantitation with RT-PCR, **267,** 756
- CYP4F2 leukotriene B$_4$ ω-hydroxylase, regulation by retinoic acids, **279,** 864
- endogenous androgen receptor levels, effect of proteasome inhibition, **276,** 144
- glucose 6-phosphatase components p36 and p46 in, effects of insulin, cAMP, dexamethasone, and $[Ca^{2+}]_i$ changes, **272,** 41
- *MRP1* mRNA, detection by *in situ* RT-PCR, **275,** 466
- secretion of 5′-carboxychroman metabolite of γ-tocopherol, **269,** 580
- transfected, overexpressing fibrinogen, enhanced secretion of apoB, **273,** 377
- transthyretin-met30 expression, inhibition of inosine$^{15.1}$-hammerhead ribozymes, **279,** 970

Herbicide tolerance
- in acetolactate synthase, amino acid residues conferring, identification (tobacco), **279,** 462

Herbimycin A
- induction of G1 arrest by p27^{Kip1} accumulation in cyclin D1-overexpressing fibroblasts, **267,** 54

Herbivory
- gene responses induced by, in bean leaves, **277,** 305

Hereditary multiple exostoses
- gene products EXT1 and EXT2, association in Golgi apparatus, **268,** 860

Hereditary nonpolyposis colorectal cancer
- enhanced detection of deleterious and other germline mutations of hMLH1 and hMSH2 genes in Japanese kindreds, **271,** 120

Hereditary pancreatitis
- gain-of-function mutations associated with, enhancement of cationic trypsinogen autoactivation (human), **278,** 286

Herpes simplex virus type 2
- UL37 protein, nuclear export signal identification, **276,** 1248

Heteronuclear correlation spectroscopy
- proton-detected 2D C,H correlation, assignment of overlapping ^{1}H NMR signals in carp seminal plasma, **269,** 76

Heterotypic interactions
- among C- and N-terminal domains of *LIM15/DMC1* and *RAD51* from basidiomycete *Coprinus cinereus,* **275,** 97

Hexa-*N*-acetylchitohexaose
- inhibition of NO production by activated RAW 264.7 macrophages, **271,** 229

N^ϵ-(Hexanonyl)lysine,
- monoclonal antibody to, preparation and use in evaluation of effects of flavonoid supplementation on exercise-induced oxidative stress in skeletal muscle (rat), **274,** 389

Hexokinase
- type II isozyme, anabolic function in hepatic lipid synthesis (mouse), **270,** 886

Hey1 gene
- promoter, analysis in human and mouse, **275,** 652

HGF/NK2
- inhibition of glioma: antagonist of scatter factor/hepatocyte growth factor (human), **273,** 287

High-density lipoprotein
- apoA-I ligand domain interacting with high-affinity binding sites on HepG2 cells, **267,** 541
- effect on release of TNF-α, IL-1β, and IL-8 by human neutrophils, **268,** 405
- GPI-anchored protein binding to, identification on macrophages (human), **272,** 864
- induced cholesterol efflux from foam cells, effects of plasmin and kallikrein, **277,** 552
- inhibition of assembly of amyloid β peptides into fibrils, **270,** 62
- modification by elastase, enhancement of uptake by murine macrophages (human), **271,** 386
- protection of endothelial cells from TNF-α-induced apoptosis (human), **272,** 872

High-density lipoprotein binding protein
- high-affinity, heat shock protein 60 identification as, **277,** 228

High-mannose glycans
- accessibility in HIV-1 gp120, analysis by *in vitro* interaction with mannose-binding lectins, **274,** 455

High-performance liquid chromatography
- and electrospray tandem MS, simultaneous measurement of 8-oxo-2′-deoxyguanosine and 8-oxo-2′-deoxyadenosine, **277,** 764
- with postcolumn online photochemical activation, tamoxifen–DNA adducts, **273,** 40

High-pressure spectroscopy
- cytochrome P450 2B4 association with P450 1A2, **276,** 1005

Hinokitol
- inhibition of platelet-type arachidonate 12-lipoxygenase, **275,** 885

HIPK2
- interactions with TRADD, CD95, and TNF-R1 in 293T cells, **277,** 513

Hippocampal cells
- immortalized, retinoic acid-induced downregulation of MARCKS in, alteration by myristoylation, **276,** 183

Hippocampus
- and cerebellum, Cre-mediated gene mutation in mouse brain restricted to, **269,** 149
- Cre-mediated recombination in neurons of Emx1–Cre knock-in mouse, specificity and efficiency, **273,** 661
- Emx1-specific expression of foreign genes using knock-in approach, **270,** 978
- neovascularization with blood–brain barrier breakdown in delayed neuronal death (gerbil), **273,** 637
- protein expression, changes in senescence-accelerated mouse, identification by expression array analysis, **272,** 657
- tetraethylammonium-induced long-term potentiation in tissue slices, associated changes in free fatty acids and acyl-CoAs (rat), **267,** 208
- voltage-gated sodium channel α subunit gene *SCN12A* identification (human), **267,** 262
- zinc and zinc transporter 3 deficiencies, acceleration of brain aging (rat), **279,** 505

Hippostasin
- kallikrein-like protease isoform expressed in human brain and prostate, **272,** 205

Hirschsprung disease
- endothelin-B receptor mutations in patients, functional analysis, **275,** 524

Histamine H2 receptor
  mediated dual signaling, structural requirements for, mapping (human), **276,** 539
Histamine H4 receptor
  molecular cloning and characterization (human), **279,** 615
Histamine release
  from basophilic leukemia RBL-2H3 cells, inhibition by epigallocatechin gallate, role of tyrosine phosphorylation pathway, **274,** 603; *erratum,* **276,** 391
  from human mast cells, effects of α-melanocyte-stimulating hormone, **278,** 14
  from RBL-2H3 mast cells, effect of diphenyleneiodonium (rat), **276,** 742
Histidine
  catalytic role of His-79 in D-xylose/dihydrodiol dehydrogenase, **278,** 333
  and Cys, tryptophan in proximity to, role in active site of alkaline protease, **270,** 910
  functional role in PepT1, **272,** 726
  H159A mutant, enolase 1 (yeast), **276,** 1199
  His(E7), engineering of, effect on control of heme reactivity in *Aplysia limacina* myoglobin, **269,** 58
  inhibition of mercurial poisoning, **273,** 816
  as iron-binding ligands of clavaminic acid synthase, mutagenesis studies, **279,** 240
  pyruvate dehydrogenase-$E_1\alpha$ recombinant histidine mutants, expression in human fibroblasts lacking PDH complex, **270,** 1068
  role in pyruvate dehydrogenase kinase activity, **267,** 500
  zinc–histidine complexes as nucleation centers for growth of ZnS nanocrystals, **272,** 29
Histidine decarboxylase
  proteolysis by m-calpain *in vitro* (rat), **271,** 777
Histidine tail
  effects on structure and activity of recombinant chlorocatechol 1,2-dioxygenase, **272,** 480
Histone acetyltransferase-1
  chicken p46 polypeptide region required for interaction with, **279,** 95
Histones
  acetylation, mammalian Sin3A and Sin3B involved in, expression during aging and replicative senescence, **275,** 455
  chromatin structure of telomere domain of human sperm, **279,** 213
  H1 variants, individual roles in transcription regulation in DT40 chicken B cell line, **268,** 501
  H2B and H4, chicken p46 polypeptide regions required for interaction with, **279,** 95
H,K-ATPase
  α subunit, localization of cytoplasmic epitope for monoclonal antibody HK 12.18 on, **273,** 942
HL-60 cells
  antiproliferative and preapoptotic activities of apomine, **270,** 240
  apoptosis
    cytochrome *c*-dependent, induction by hydroxytyrosol, **278,** 733
    induction by pyrrolidine dithiocarbamate via cytochrome *c*-dependent mechanism, **268,** 942
  differentiation and apoptosis induction by recombinant modulin P48 derived from *Mycoplasma fermentans,* **269,** 284
  α1,3-fucosyltransferase 4 gene expression and transcriptional regulation, **273,** 370
  oxidative stress effect of myeloperoxidase-catalyzed phenoxyl radicals of vitamin E homologue 2,2,5,7,8-pentamethyl-6-hydroxychromane, **270,** 1086
  protein kinase C isoforms, differential redistribution by cAMP, **274,** 596
  Ssf-1 mRNA expression, upregulation by agents inducing granulocytic differentiation, **275,** 37
  vascular endothelial growth factor mRNA expression, **270,** 709
hMLH1
  deleterious and other germline mutations, detection in Japanese hereditary nonpolyposis colorectal cancer kindreds, **271,** 120
hMSH2
  deleterious and other germline mutations, detection in Japanese hereditary nonpolyposis colorectal cancer kindreds, **271,** 120
HOFNH30
  identification as G-protein-coupled receptor for lysophosphatidic acid (human), **273,** 805
Homeobox genes
  HB9, mRNA localization during early feather development (chick), **276,** 1112
  Hex, role in onset of embryonic liver development and monocyte lineage development (mouse), **276,** 1155; *erratum,* **279,** 739
  HOXB6, B8, C8, C9, and Cdx-1, deregulated expression in colon cancer cell lines (human), **272,** 513
  TGIF2, of TALE superclass, amplification and overexpression in ovarian cancer cell lines, **276,** 264
Homeodomains
  Nkx2.2, cooperatively acting nuclear localization signals in, **270,** 695
  ZFH-4 protein (mouse), **273,** 686
Homeoproteins
  IDX-1, transactivating domain glucose-dependent activity, increase by glucagon-like peptide 1 in pancreatic β INS-1 cells, **274,** 616
Homeostasis
  divalent cation, defect in, induction by disruption of aldose reductase gene (mouse), **277,** 281
  energy
    effect of disruption of *klotho* gene (mouse), **278,** 665
    regulation, central effects of neuromedin U (rat), **277,** 191
  extracellular matrix, in fibroblasts, autocrine regulation (human), **276,** 785
Homer 1
  transcripts Homer 1a and 1c, detection in skeletal and cardiac muscles (rat), **279,** 348
Homocysteine
  effect on PAI-1 and tPA gene expression and secretion in vascular endothelial and smooth muscle cells, **272,** 182
  plasma, interrelations with intracellular *S*-adenosylhomocysteine (rat), **271,** 47
  protein-bound, formation in human plasma, mechanisms, **277,** 668
  vasoconstriction of human umbilical artery induced by, protective effect of melatonin, **277,** 470
Homologous desensitization
  CRF$_1$ receptor, potential mechanism: rapid agonist-induced phosphorylation (human), **268,** 572
Homology modeling
  cytochrome P450 2C9: Arg97 and Arg108 importance in catalytic function, **270,** 983
  human leptin/leptin receptor complex, **275,** 154
  VAP27, with AsMSP1 and VAMP, **270,** 286
Homotypic interactions
  among C- and N-terminal domains of *LIM15/DMC1* and *RAD51* from basidiomycete *Coprinus cinereus,* **275,** 97
Hormone-binding domain
  human estrogen receptor, conformational changes, ^{19}F NMR study, **270,** 988
Hormone-sensitive lipase
  phosphorylation, relationship to substrate-dependent lipolysis induced by isoproterenol, **274,** 631
Horseradish peroxidase
  iron methylchlorin-reconstituted, compound I, II, and III states of, preparation and characterization, **279,** 1011
Hrs binding protein
  role in IgE receptor-triggered oxocytosis in RBL-2H3 mast cells, **277,** 752

hSCO1 gene
- P(174)L mutation, effect on assembly of cytochrome *c* oxidase (human), **279,** 341

Hsl7p
- identification as protein methyltransferase (yeast), **274,** 105

HSNP-C′
- biochemical characterization and helix stabilizing properties (*Sulfolobus acidocaldarius*), **267,** 614

hTERT
- human, functional compatibility with rabbit telomerase RNA, **278,** 503
- mRNA, 5′-end, as target for suppression of telomerase activity by hammerhead ribozyme, **273,** 316

Human cytomegalovirus
- IE2 protein, physical and functional interaction with Wilms' tumor suppressor WT1, **267,** 59

Human growth hormone
- stimulation of proteinases of rabbit bone cells via IGF-I, **268,** 875

Human immunodeficiency virus
- inhibition by mushroom ubiquitin-like protein, **276,** 587
- LTR DNA, Sp1 bound to, formation of complex with mutant $p53^{His273}$, **279,** 383

Human immunodeficiency virus type 1
- antiviral agent targeted to gp41 core of, anti-HIV activity, role of salt bridge between agent and N-terminal coiled coil of gp41, **270,** 153
- aspartic protease, improved binding, computational design of cyclic urea inhibitors for, **268,** 384
- $CD4^+$ lymphocytes infected with, upregulation of apoptosis-associated protein Grb3-3 in, **276,** 362
- cell entry by, T-20 peptide inhibiting, chemotactic effect on neutrophils by specific activation of *N*-formylpeptide receptor, **272,** 699
- cells chronically infected with, apoptosis, selective induction by adenine *in vitro,* **273,** 1025
- cells infected with, prolonged survival of, promotion by Nef and Vpr proteins, **267,** 677
- coreceptor CXCR4, solubilization, **274,** 153
- envelope glycoprotein, gene transfer into cells expressing, retroviral vector for, **271,** 672
- gene expression in MT-4 cells, activity of essential transcription factors for, suppression by dialyzable leukocyte extract, **273,** 1099
- gp41 coiled-coil regions, HIV entry inhibitors targeted to, development, **269,** 641
- gp120
  - accessibility of high-mannose glycans in, analysis by *in vitro* interaction with mannose-binding lectins, **274,** 455
  - apoptosis in neocortex induced by, role of cyclooxygenase-2 and prevention by NMDA receptor antagonists and U-74389G (rat), **274,** 664
  - immediate and neurotoxic effects, role of CXCR4 receptor (rat), **274,** 212
- $gp120_{MN}$, expression, erythropoietin signal peptide for, efficiency (COS-7 cells), **273,** 557
- incompletely spliced RNAs, nuclear ribonucleoprotein particle containing, identification, **268,** 509
- infection
  - CXCR4-dependent, peripheral blood mononuclear cells, inhibition by extracellular HIV-1 Tat, **270,** 992
  - CXCR4-mediated, MAGI and MAGIC-5 cells, block by cyclic zinc-dithiocarbamate-*S,S*′-dioxide, **272,** 351
  - immunodiagnosis, chimeric synthetic peptide as antigen for, **272,** 259
  - inhibition at viral entry level by baicalin, **276,** 534
- Nef protein, interaction with G_o proteins in transfected COS-7 cells, **270,** 570
- protease
  - stimulation, casein kinase as protein kinase responsible for, **275,** 434
  - tryptophan side chains in dimerization and hinge regions, unfolding kinetics by real-time NMR, **269,** 387
  - variant, sense codon-dependent introduction of unnatural amino acids into, **270,** 1136
- replication, inhibition by circular dumbbell RNA/DNA chimeric oligonucleotides, **270,** 953
- reverse transcriptase, AZT-resistant, phosphorylation by casein kinase II *in vitro:* effects on inhibitor sensitivity, **275,** 26
- Tat
  - mediation of apoptosis in central nervous system *in vivo* (rat), **267,** 252
  - and MHC class II transactivator CIITA, transcriptional activities, reciprocal modulation, **279,** 494
  - response of Kaposi's sarcoma cells of different origin to, through Flk-1/KDR, **273,** 267
- VPR protein, intranuclear binding, role of cytosolic factors, **270,** 1055

Human papillomavirus type 16
- associated tumorigenesis, mouse fibroblast model for study of, **270,** 119
- oncoproteins, cell lines positive for, expression of angiogenesis modulators, **277,** 55

Human serum albumin
- S-nitrosylated, inhibition of protein-tyrosine-phosphatases, **268,** 310

Human T-cell lymphotropic virus type I
- antigens, chimeric synthetic peptides based on, **276,** 1085
- *tax* gene, induction of IL-8 secretion by autocrine mechanism and effect on IL-16 in transfected Jurkat cells, **273,** 865
- Tax protein
  - targeting of CREB-binding protein in synoviocyte activation, **269,** 584
  - transactivation of fibronectin promoter via NF-κB pathway, **276,** 579

Human umbilical vein endothelial cells
- activated, IL-1 release from, modulation by CD39, **270,** 272
- angiogenesis, effect of caveolin-1 knockdown by antisense oligonucleotides, **276,** 756; *erratum,* **279,** 305
- angiopoietin-2 upregulation by TNF-α, **269,** 361
- anti-angiogenic potential of silymarin, **276,** 371
- endothelial cell-derived lipase expression, regulation, **272,** 90
- heme oxygenase-1 repression by hypoxia, **271,** 665
- integrin-associated protein and thrombospondin-1 as mechanosensitive death mediators for, **271,** 584
- matrix metalloproteinase-2 activation by lipopolysaccharide via NF-κB-dependent pathway, **269,** 401
- NAD(P)H oxidase induction by endothelin-1, **269,** 713
- N-terminal domain FAK, nuclear localization and apoptotic regulation, **276,** 1068
- PAI-1 and tPA gene expression and secretion, effect of homocysteine, **272,** 182
- proliferation induced by HARP, implications of N- and C-terminal peptides, **274,** 242
- quiescence-induced expression of quiescin Q6, decorin, and ribosomal protein S29, regulation, **269,** 604
- E-selectin expression induced by TNF-α, repression by PPAR activators, role of LRF-1/ATF3, **275,** 406
- shear stress-dependent expression of apoptosis-regulating genes, **278,** 740
- sphingosine 1-phosphate stimulation of tyrosine phosphorylation of $p125^{FAK}$ and chemotaxis via G_i protein-linked PLC pathway, **268,** 47
- TNF-α-induced apoptosis, protective effect of high-density lipoprotein, **272,** 872
- TNF-α-stimulated, accumulation of phosphodiesterase 4D and 7A mRNA, **274,** 415
- TNF-α stimulation of MCP-1 expression, mediation by Akt/PKB signal transduction, **276,** 791
- vascular cell adhesion molecule-1 expression, selective inhibition by α-tocopherol (human), **274,** 609

Humoral hypercalcemia of malignancy
  cancer cells causing, expression of mRNA encoding secreted form of ODF/TRANCE inducing osteoclast formation, **269,** 532
  Leydig cell model, parathyroid hormone-related peptide secretion in, role of extracellular calcium-sensing receptor, **269,** 427
Huntingtin
  N-terminal fragment containing expanded polyglutamine tract, aggregates of, dissolution by formic acid, **277,** 386
HuR
  binding to protein-binding segments in 3′-untranslated region of neurofibromin mRNA, **267,** 726
Hyaluronidase
  testicular, in reconstruction of dermatan sulfate (bovine), **270,** 588
Hybridization
  microarray, analysis of monocyte-derived dendritic cell maturation (human), **275,** 731
  small cytoplasmic RNA to 3′ UTR of MnSOD mRNA, inhibition of gene expression (human), **274,** 641
Hybridization assay
  real-time monitoring of oligonucleotides in biological samples, **268,** 92
Hydrogen
  ions, distribution in human epidermis, visual imaging, **272,** 134
Hydrogen bonds
  C–H· · ·O, mediation of reversal of polypeptide chain direction in synthetic peptide helix, **273,** 933
  low-barrier, in transition-state analog complex of chymotrypsin, NMR signal of, deuterium isotope effect, **273,** 789
  Trp NH· · ·π in acid-denatured interleukin-2, fluorescence, **279,** 770
Hydrogen peroxide
  activation of Ca^{2+}-independent phospholipase A$_2$ in U$_m$ cells (rat), **276,** 613
  chromium(III)-catalyzed protein degradation by, role of coordinated ligand, **270,** 749
  Cu,Zn-superoxide dismutase peroxidative activity with, protection by anions, **274,** 57
  cytotoxicity, prevention by GPI 6150 via inhibition of poly(ADP-ribose) polymerase (P388D1 cells), **278,** 590
  effect on p16 interaction with Cdk4, **275,** 764
  Fe^{2+}-H$_2$O$_2$-induced lipid peroxidation, susceptibility of small and large phospholipid unilamellar vesicles, **273,** 72
  generation by monoamine oxidase B, in induction of ERK-dependent mitogenesis (HEK-293 cells), **271,** 181
  hepatic endogenous, detection in bile of selenium-deficient rat, **271,** 699
  induction of apoptosis under serum deprivation, inhibition by antisense c-*jun* in F-MEL cells, **271,** 747
  induction of PKCδ tyrosine phosphorylation independently of protein-tyrosine phosphatase inhibition (CHO, COS-7 cells), **273,** 960
  modulation of serum amine oxidase (bovine), **267,** 174
  O$_2$ production from, role of Na$^+$/K$^+$-ATPase, **274,** 750
  pentachlorophenol metabolites in presence of, production of hydroxyl radicals, **270,** 942
  rapid generation on addition of (−)-epigallocatechin, (−)-epigallocatechin gallate, (+)-catechin, and quercetin to cell culture media, **273,** 50
  rhodanese inactivated by, reactivation, facilitation by α-crystallin, **274,** 461
  role in heme degradation during oxyhemoglobin autoxidation, **273,** 839
Hydrogen sulfide
  induction of cAMP and modulation of NMDA receptor, **267,** 129
Hydrolysis
  VX by organophosphorus hydrolase, enhancement by enzyme mutagenesis, **279,** 516
Hydroperoxy fatty acids
  lipoxygenase-generated, induction of apoptosis in erythroleukemia and neuroblastoma cells (human), **272,** 345
Hydroperoxy radicals
  interaction with DMPO: quantification of spin-trapping kinetics, **270,** 125
Hydrophobic clustering
  in acid-denatured interleukin-2, **279,** 770
Hydrostatic pressure
  facilitation of *ex vivo* adenovirus gene transfer into aorta (rabbit), **274,** 422
Hydroxamic acids
  complexes with vanadate, inhibition of serine amidohydrolases, **274,** 732
D-2-Hydroxy-acid dehydrogenase
  chromosome 9q, cloning and characterization (human), **268,** 298
4-Hydroxy-(2*E*)-alkenals
  formation by nonenzymatic oxygenation of (3*Z*)-alkenals in plant extracts, **277,** 112
5-Hydroxy-2-aminovaleric acid
  as specific marker of iron-mediated oxidation of Pro and Arg side-chain residues of LDL apoB-100, **270,** 852
Hydroxyarylamine sulfotransferase
  two homologous rat SULT1C2 sulfotransferases, enzymatic properties, expression, and lysosomal location, **272,** 242
25-Hydroxycholesterol
  activation of cytochrome *c* release-mediated caspase cascade (CHO-K1 cells), **278,** 557
5-Hydroxy-2,3-dimethylcyclopent-2-enone
  inhibition of IL-6 signaling and Stat3 activation (A23-98), **276,** 447
12(*S*)-Hydroxyeicosatetraenoic acid
  activation of phosphatidylinositol 3-kinase, **275,** 690
5-Hydroxyindole-3-acetic acid
  urinary levels, effect of volitional ethanol consumption (Syrian golden hamster), **271,** 823
15β-Hydroxylase
  substrate binding, probing by FTIR studies of iron ligand CO stretch vibration, **269,** 737
Hydroxyl radicals
  production by pentachlorophenol metabolites and H$_2$O$_2$, **270,** 942
  scavenging
    by C-phycocyanin *in vivo* and *in vitro* (rat), **275,** 20
    by thioredoxin, **277,** 443
3-Hydroxy-3-methylglutaryl-CoA reductase
  regulation in *Saccharomyces cerevisiae,* **267,** 473
4-Hydroxynonenal
  induced MEL cell differentiation, role of PKC activity translocation, **272,** 75
4-Hydroxy-2-nonenal
  induction of cyclooxygenase-2 gene expression (rat), **273,** 437
5-Hydroxyoxindole
  endogenous, antiproliferative and proapoptotic effects, **276,** 379
3α-Hydroxy-4-pregnen-20-one
  plasma membrane receptors for, detection and characterization in MCF-7 breast cancer cells, **272,** 731
15-Hydroxyprostaglandin dehydrogenase (NAD$^+$)
  expression in human prostate cancer cells, induction by androgens, **276,** 77
11β-Hydroxysteroid dehydrogenase
  type 1, downregulation in liver by PPARα agonists (mouse), **279,** 330
  type 1, nonglycosylated form, enzymatic activity (human), **276,** 428
17β-Hydroxysteroid dehydrogenase
  crystal quality, improvement using magnets (human), **275,** 274
  estrogenic, crystallization, analysis with DHEA and DHT at elevated temperature, **277,** 100
  type I, cDNA cloning from Japanese eel ovary, **279,** 451
3α-Hydroxysteroid dehydrogenase/carbonyl reductase
  functional expression, purification, and characterization (*Comamonas testosteroni*), **272,** 622

- 5-Hydroxytryptophol
  - urinary levels, effect of volitional ethanol consumption (Syrian golden hamster), **271,** 823
- Hydroxytyrosol
  - induction of cytochrome *c*-dependent apoptosis (HL-60 cells), **278,** 733
  - olive oil rich in, effect on isoprostane excretion (human), **278,** 797
- Hydroxyurea
  - synergistic effects, and subcellular location of phosphorylation of nucleoside analogs, **276,** 179
- 25-Hydroxyvitamin D binding protein
  - from intestinal cells, characterization (human), **275,** 845
- Hypercalcemia
  - induction by disruption of aldose reductase gene (mouse), **277,** 281
- Hypercalciuria
  - induction by disruption of aldose reductase gene (mouse), **277,** 281
- Hypercholesterolemia
  - affected rabbit, aortic expression of LOX-1, **276,** 1100
  - in aorta, protective effect of 17β-estradiol, role of cyclooxygenase 2 (rabbit), **275,** 696
  - oxidized LDL uptake by monocyte-macrophages in, inhibition by losartan (human), **273,** 417
- Hyperglycemia
  - modulation of thrombospondin-1 (rat), **267,** 257
- Hyperleptinemia
  - adenovirus-induced, slow recovery of body fat lost during, analysis in rats, **279,** 786
  - analysis in female patients with spinal ligament ossification, **267,** 752
- Hyperlipidemia
  - postprandial, tissues of rat model with, differential expression of lipoprotein lipase gene, **277,** 423
- Hypermagnesemia
  - induction by disruption of aldose reductase gene (mouse), **277,** 281
- Hyperosmotic stress
  - in bronchial epithelial cells, induction of IL-8 production, role of reactive oxygen intermediates (human), **276,** 571
- Hyperplasia
  - hepatic, induced by lead nitrate, gene expression of neurotrophins and receptors (rat), **275,** 472
  - intimal, in rat arteries, effect on expression of procollagen COOH-terminal proteinase enhancer, **270,** 1049
- Hypertension
  - essential, NO effects on erythrocyte membrane fluidity in, EPR study (human), **275,** 946
- Hypertrophy
  - cardiac, transition to heart failure, associated cardiac calcineurin expression and roles (rat), **273,** 347
  - cardiomyocyte, differential regulation of phospholipase C-β isozymes (rat), **275,** 1
  - gene expression sensitive to, in neonate cardiomyocytes, silencing by tetracycline-inducible CaM kinase II (rat), **274,** 803
- Hypochlorous acid
  - oxidation of 7,8-dihydroneopterin with formation of neopterin, **275,** 307
- *Hypocrea jecorina*
  - cellulase-negative mutant, molecular characterization, **277,** 581
- Hypoglycemia
  - and hypoxia, induced amino acid release from rat brain cortical slices, effects of preconditioning, **276,** 134
- Hyponatremia
  - systemic, effect on aquaporin-4 immunoreactivity in brain (rat), **270,** 495
- Hypothalamus
  - GLP-1 peptide mRNA expression, effect of leptin (mouse, rat), **269,** 331
  - melanin-concentrating hormone and orexin gene expression, differential regulation in agouti-related protein/melanocortin-4 system (mouse, rat), **268,** 88
  - peptide inhibiting gonadotropin release, isolation, characterization, and localization (quail), **275,** 661
  - prepro-orexin and orexin receptor expression, effects of leptin treatment (rat), **269,** 41
- Hypotonic stress
  - NO production induced by, in endothelium, dependence on endogenous ATP (bovine), **274,** 736
- Hypoxanthine–guanine phosphoribosyltransferase
  - chimeric, with segments from *Plasmodium falciparum* and human, substrate specificity, **272,** 596
- Hypoxanthine–guanine–xanthine phosphoribosyltransferase
  - multiple active states (*Plasmodium falciparum*), **279,** 433
- Hypoxia
  - associated downregulation of Hsp70 by endothelial cells (human), **274,** 542
  - effect on NO production and nitric-oxide synthase expression in rat smooth muscle cells, **268,** 329
  - and hypoglycemia, induced amino acid release from rat brain cortical slices, effects of preconditioning, **276,** 134
  - induced angiogenesis in hepatocarcinogenesis, mediation by hepatitis B virus X protein, **268,** 456
  - induction of expression of 43-kDa protein PROXY-1 in normal and malignant cells, **276,** 321
  - neural response, role of ARNT2, **273,** 231
  - regulation of angiopoietin-2 expression by human endometrial endothelial cells, **275,** 159
  - repression of heme oxygenase-1 in vascular endothelial cells (human), **271,** 665
  - vascular endothelial growth factor transcriptional activation induced by, inhibition by serum, **267,** 334
- Hypoxia-inducible factor-1
  - ARNT2 complexation with, and ARNT2 role in tumor angiogenesis and neural response to hypoxia, **273,** 231
  - DNA-binding activity, inhibition by iNOS expression (C6 glioma cells), **279,** 30
  - inactivation by zinc: accumulation of HIF-1α and inhibition of HIF-1β nuclear translocation, **268,** 652
  - induction by nitric oxide, mediation via phosphatidylinositol 3-kinase pathway (LLC-PK$_1$ cells), **278,** 263

I

- IAPP, *see* Islet amyloid polypeptide
- ICAM-1, *see* Intercellular adhesion molecule-1
- ICOS
  - identification and characterization: T cell costimulatory molecule related to CD28/CTLA4 family (rat), **276,** 335
- ICPP
  - capillary permeability-increasing, purification (*Vipera lebetina* venom), **268,** 69
- Id
  - gene regulation during embryonic stem cell-derived hematopoietic differentiation (mouse), **276,** 803
- Id2
  - homodimerization and function, role of cysteine residue C42 role in helix-loop-helix domain, **273,** 1042
- IDX-1
  - transactivating domain, glucose-dependent activity, increase by glucagon-like peptide 1 in pancreatic β INS-1 cells, **274,** 616
- IE1 protein
  - human cytomegalovirus, upregulation of IL-8 gene expression, **279,** 298
  - role in synergistic transactivation by IE1 and IE2, analysis by artificial recruitment of Sp1 or TBP, **269,** 302

- IE2 protein
  - human cytomegalovirus, physical and functional interaction with Wilms' tumor suppressor WT1, **267,** 59
  - and IE1, synergistic transactivation by, role of IE1 in, analysis by artificial recruitment of Sp1 or TBP, **269,** 302
- IgG-binding domains
  - synthetic, baculoviral display, **275,** 84
- IκB
  - combined with adenovirus-mediated caspase 8 transfer, induction of apoptosis in gliomas (human), **271,** 544
  - tumor necrosis factor-induced degradation, block by E-73, **277,** 330
- IκBα
  - degradation mediated by TNF, suppression in L929 fibroblasts by TGF-β-induced matrix proteins, **267,** 194
  - expression, suppression of, role in c-Jun N-terminal kinase-mediated enhancement of Fas cytotoxicity (L929 cells), **274,** 4
  - mutant IκB$\alpha_{SS\rightarrow AA}$, block of NF-κB nuclear translocation and induction of inducible nitric-oxide synthase, **275,** 268
- IK channel
  - fibroblast, prominence in prostate cancer cell electrophysiology, **269,** 457
- Ileum
  - resveratrol absorption (rat), **272,** 212
- *Ilex paraguariensis* extract
  - aqueous, antioxidant properties, **269,** 357
- ILME
  - waterborne pheromonal peptide released by eggs of *Sepia officinalis,* **275,** 217
- Image selected *in vivo* spectroscopy
  - metabolic imaging of cardiac bioenergetics in transgenic mouse, **271,** 222
- Imaging
  - AFM, and oligonucleotide-capped gold nanoparticles, selective determination of polynucleotides using, **279,** 265
  - reactive oxygen species in live mouse skin exposed to UVA, **269,** 131
- Imipramine
  - inhibition of Cl^- secretion by desensitization of β-adrenergic receptors in Calu-3 airway cells, **274,** 620
- Immortalization
  - cellular, subsequent mitochondrial D-loop RNA expression (human), **276,** 439
  - *REIC* gene downregulation in human immortalized cells and human tumor-derived cell lines, **268,** 20
- Immune electron microscopy
  - TT virus particles recovered from sera and feces of infected humans, **279,** 718
- Immune responses
  - and intracellular cathepsin activities, effects of peroral or intraperitoneal vitamin B_6 (mouse), **272,** 151
- Immunization
  - generation of high-affinity scFvs from single rabbit immunized with multiple haptens, **268,** 398
  - malaria DNA vaccine into liver by gene gun, protection against lethal challenge of *Plasmodium berghei* sporozoite, **271,** 107
  - with peptides conjugated to P64k, elicitation of anti-PorA antibodies, **277,** 51
- Immunoaffinity chromatography
  - yeast proteasome regulatory complex isolation, **273,** 509
- Immunoblotting
  - aquaporin-7 localization in kidney (mouse, rat), **277,** 164
  - X,K-ATPase β subunit isoform detection in skeletal muscle (human), **277,** 430
- Immunocytochemistry
  - aquaporin-7 localization in kidney (mouse, rat), **277,** 164
- Immunoglobulin
  - oxidation, effects of vitamin C supplementation (human), **273,** 729
- Immunoglobulin A1
  - Fc O-glycosylated hinge peptides, sialylation and galactosylation in IgA nephropathy, mass spectrometric study (human), **271,** 268
- Immunoglobulin A receptor
  - FcαR, triggered Ca^{2+} signals, characterization (human), **276,** 749
- Immunoglobulin binding factor
  - mRNA expression in uterine cervix, hormonal control (human), **279,** 898
- Immunoglobulin E
  - binding of deletion mutants of *Aspergillus fumigatus* allergen Asp f 2, **270,** 1128
  - mast cell activation mediated by, effects of polymorphisms in FcεRI β chain (mouse), **273,** 765; *erratum,* **274,** 880
- Immunoglobulin E receptor
  - exocytosis in RBL-2H3 mast cells triggered by, role of Hrs binding protein, **277,** 752
- Immunoglobulin G
  - anti-dsDNA IgG autoantibodies, binding properties, determination by light chain (human), **271,** 240
  - erythrocytes coated with, augmentation of LPS-stimulated TNF-α secretion and TNF-α mRNA levels and stability in macrophages, **271,** 70
- Immunoglobulin G receptor
  - FcγR, mediated phagocytosis in macrophages, PKC-α role (RAW 264.7), **276,** 472
- Immunoglobulin heavy chain C region
  - IL-4-induced germline ε transcription in human B cell line, role of Shc, **268,** 54
- Immunoglobulin-like modules
  - from fibroblast growth factor receptor 2, binary complexes with heparin, ligand binding properties, **272,** 830
- Immunophilins
  - ubiquitin identification as, **277,** 325
- Immunoproteasomes
  - tissue distribution (rat), **277,** 348
- Immunosuppression
  - transient, osteoinduction by BMP-2 via adenoviral vector under, analysis (rat), **267,** 382
- Implantation
  - tryptophan 2,3-dioxygenase induction in endometrium during, analysis (mouse), **274,** 166
  - uterine genes involved in, determination by application of GeneChip (mouse), **272,** 531
- Importin α
  - yeast, interaction with NLS of prothymosin α, role in nuclear uptake of cargos, **274,** 548
- Importin-β superfamily
  - RanBP17 and close homologue RanBP16, identification (human, mouse), **278,** 241
- Inclusion bodies
  - formation of, high-level expression in *E. coli* of antimicrobial peptide by fusion partner reinforcing, **277,** 575
- Indolicidin
  - tryptophan analogs, antibacterial and hemolytic activities, **274,** 714
- Indomethacin
  - induction of endothelin-converting enzyme-1 in gastric mucosal injury (rat), **269,** 377
- Inflammation
  - acute and chronic, regulation of TWEAK mRNA in, analysis (mouse), **279,** 162
  - cutaneous, upon stinging by box jellyfish, proteinaceous toxin causing, identification, **275,** 582

  - gastric mucosal, in response to *Helicobacter pylori* lipopolysaccharide, associated upregulation of endothelin-converting enzyme-1 (mouse), **267,** 801
  - phosphodiesterase 4D and 7A mRNA accumulation in response to TNF-α (HUVEC cells), **274,** 415
  - pro-inflammatory pathway, stimulation, role in cholesterol modulation of vascular reactivity to endothelin-1 (rat), **274,** 553
  - regulation of angiopoietin-2 expression by human endometrial endothelial cells, **275,** 159

- Influenza A virus
  - experimentally infected mouse model, inhibitory effects of antisense oligonucleotides, **279,** 158
  - hemagglutinin, mapping of protective helper T cell epitope, **270,** 190
- Infrared spectroscopy
  - CYP106A2 binding of substrate, studies based on iron ligand CO stretch vibration, **269,** 737
- Inhibition kinetic study
  - with substrates with mismatch basepairs: *BanI* restriction endonuclease binding in DNA major groove, **269,** 35
- Initiator caspase
  - cleavage by TRAIL death receptor DR4, inhibition by p21$^{\mathrm{WAF1/CIP1}}$, **269,** 179
- Inner perivitelline layer
  - N-linked glycans derived from, induction of acrosomal exocytosis in chicken spermatozoa, **278,** 84
- Inorganic phosphate transporter
  - NPT1, *p*-aminohippuric acid transport at renal apical membrane mediated by, **270,** 254
- Inorganic polyphosphate/ATP-NAD kinase
  - of *Micrococcus flavus* and *Mycobacterium tuberculosis* H37Rv, **276,** 57
- Inosine$^{15.1}$-hammerhead ribozymes
  - inhibition of transthyretin-met30 expression in HepG2 cells, **279,** 970
- Inositol
  - palmitoylation on GPI anchors, activities causing, analysis with water-soluble analogue of glucosaminylphosphatidylinositol, **267,** 296
- Inositol phosphates
  - $G_{\alpha 16}$-mediated release, induction by C5a receptor, role of $G_{\alpha 16}$ Ala^{228} residue, **278,** 426
  - synthesis, effects of adenosine-derived non-phosphate antagonists of P2Y$_1$ purinoceptors, **272,** 327
- Inositol 1,4,5-trisphosphate
  - content in anterior pituitary, angiotensin II-induced changes, effects of 17β-estradiol and progesterone (rat), **275,** 7
- Inositol 1,4,5-trisphosphate receptors
  - human brain type I, full-length and truncated recombinant, expression in mammalian and insect cells, **273,** 123
  - subtype expression and distribution in proliferating vascular smooth muscle cells (rat), **273,** 907
  - types 1 and 2, heterooligomer of, detection as tetramer expressed in hepatic membrane fraction (rat), **267,** 928
- Inotropism
  - oositive inotropic effect induction in guinea pig atria by callipeltin A, **279,** 219
- Insect cells
  - Sf9
    - baculovirus-induced apoptosis, inhibition by silkworm hemolymph, **271,** 186
    - expression of mamba toxin MT7 selectively blocking M$_1$ muscarinic receptors, **271,** 435
  - Sf9 and Sf21, baculovirus-mediated expression of human brain type I full-length and truncated recombinant inositol 1,4,5-trisphosphate receptor, **273,** 123
  - Sf21, multidrug resistance associated protein 1 and yeast cadmium factor 1 expressed in, functional comparison, **270,** 608
- *In situ* hybridization
  - prion protein mRNA analysis in brain and placenta (sheep), **273,** 890
- *In situ* hybridization histochemistry
  - analysis of developmental expression of *maf*-1 mRNA in kidney (rat), **272,** 777
- Insulin
  - activation of Akt and MAP kinase, dependence on phosphatidylinositol 3-kinase in adipocytes (rat), **274,** 845
  - and cAMP, dexamethasone, and [Ca^{2+}]$_i$ changes, effects on G6Pase components p36 and p46 in HepG2 cells, **272,** 41
  - cells producing, expression of melanin-concentrating hormone receptors, **275,** 709
  - cells secreting, functional inhibition by NO, partial protection by γ-tocopherol, **277,** 334
  - costimulation of growth in human thyroid cells, insulin receptors mediating, induction by TSH, **279,** 202
  - dependent phosphorylation, 70-kDa protein, in adipocyte light microsomes (rat), **276,** 1302
  - dual effect on *in vitro* leptin secretion by adipose tissue (human), **276,** 477
  - effect on plasminogen activator inhibitor-1 release by preadipocytes and adipocytes (human), **279,** 984
  - enhancement of cellular prion protein gene expression in immortalized murine neuronal precursor cell lines, **268,** 763
  - human vector, HVJ viral coat–liposome complex containing, systemic administration, effect on glucose level of diabetic mouse, **273,** 666
  - metabolic effects in rat adipocytes, effects of PKB/Akt inhibition, **268,** 315
  - and PDGF, signaling mediated by, differential regulation by low-molecular-weight protein-tyrosine phosphatase (NIH-IR cells), **270,** 564
  - regulation of leptin receptor expression in neuroblastoma cells (human), **271,** 703
  - secreting cell line INS-1, glucose-6-phosphatase system in, **275,** 103
  - secretion
    - by βTC3 insulinoma cells, effects of pH (mouse), **273,** 937
    - Ca^{2+} desensitization of, mechanisms: CaMK II activity reduction in islets by depolarizing stimuli, **270,** 1119
    - by pancreatic beta cells
      - correlation with expression of 150-kDa oxygen-regulated protein (mouse), **267,** 831
      - enhancement by attenuation of γ-glutamylcysteine synthetase expression by ribozyme transfection (MIN6 cells), **278,** 236
      - promotion by wortmannin via cAMP-dependent pathway, **270,** 798
    - restraining effect of cAMP–protein kinase A pathway on phospholipase A$_2$ in isolated rat islets, **269,** 242
    - sulfonylurea-induced, drug-induced desensitization, **271,** 234
  - sensitivity to, effect of disruption of *klotho* gene (mouse), **278,** 665
  - signaling pathways in differentiating human adipocytes, proteins involved in, regulation, **276,** 162
  - stimulated glucose transport, implications of quantitation of SNARE protein levels in 3T3-L1 cells adipocytes, **270,** 841
  - stimulation of nitric oxide production via ERK in osteoblast UMR-106 cells, **278,** 712
- Insulin/IGF-like peptide
  - from *Caenorhabditis elegans,* molecular cloning and characterization, **273,** 431
- Insulin-like growth factor
  - upregulation by low-intensity pulsed ultrasound in mouse ST2 bone marrow-derived stromal cells, **268,** 216
- Insulin-like growth factor I
  - anchorage-independent activation of MAP kinase through phosphatidylinositol 3-kinase in MCF-7 cells, **272,** 111
  - antiapoptotic effects on cultured cardiomyocytes, role of ERK and PKC (rat), **273,** 736

Insulin-like growth factor I (*continued*)
  effect on plasminogen activator inhibitor-1 release by preadipocytes and adipocytes (human), **279,** 984
  gene expression in C6 glioma and GH3 pituitary adenoma cells, reduction by glucose starvation, **269,** 336
  phospholipase C-β isozyme expression in neonatal rat cardiomyocytes stimulated by, **275,** 1
  protective effect against apoptosis in isolated islets of Langerhans (dog), **277,** 455
  regulation of apoptosis induced by osmotic stress in cardiac myocytes, **270,** 1029
  regulation of cardiac fibroblast apoptosis induced by osmotic stress (rat), **273,** 322
  role in human growth hormone stimulation of proteinases in rabbit bone cells, **268,** 875
Insulin-like growth factor I receptor
  cytoplasmic domain, autophosphorylation, **279,** 955
  interaction of suppressor of cytokine signaling-3 with, **278,** 38
Insulin-like growth factor II
  induction of interleukin-6 expression via NF-κB activation in psoriasis (human), **278,** 312
  mRNA expression and protein synthesis, effect of bioglass 45S5 ionic products (human), **276,** 461
  overexpression in mouse embryonic stem cells, promotion of myogenic differentiation, **277,** 631
  promoter usage in cancerous and benign breast, prostate, and bladder tissues and confirmation of tenth exon (human), **268,** 886
Insulin-like growth factor II receptor
  intronic CpG islands, *de novo* methylation, association with decreased antisense RNA expression in aged mice, **274,** 722
  translocation, stimulation by insulin, prevention by PKB inhibition (rat adipocytes), **268,** 315
Insulin-like growth factor binding protein
  transcripts, phenotypic expression in muscle *in vitro* and *in vivo* (mouse, rat), **273,** 282
Insulin-like growth factor binding protein-3
  cleavage by ADAM 12-S, **278,** 511
Insulin-like growth factor binding protein-5
  cleavage by ADAM 12-S, **278,** 511
  mRNA abundance in intestinal smooth muscle, regulation (rat), **275,** 422
Insulin-like growth factor binding protein-7
  gene methylation and downregulation, association with liver tumorigenesis in SV40 T/t antigen transgenic mice, **267,** 109
Insulinoma cells
  apoptosis, induction by glibenclamide via sustained enhancement of Ca^{2+} influx (RINm5F cells), **271,** 422
  βTC3 cells, effects of pH (mouse), **273,** 937
  functional inhibition by NO, partial protection by γ-tocopherol (RINm5F cells), **277,** 334
  glucose-6-phosphatase system (INS-1 cells), **275,** 103
  hamster HIT-T15 and rat RINm5F, differential effects of fibrillar IAPP on oxidative stress responses and LDL uptake, **267,** 619
  melanin-concentrating hormone receptor expression and MCH stimulation of insulin release (CRI-GI, RINm5F cells), **275,** 709
Insulin receptors
  mediating insulin costimulation of growth in human thyroid cells, induction by TSH, **279,** 202
Insulin receptor substrate
  pathway, role in IFN-dependent activation of phosphatidylinositol 3′-kinase, **270,** 158
Insulin receptor substrate 3
  characterization in liver-derived cells (rat), **272,** 953
Insulin resistance
  adipocyte models of, comparison: increased glucose flux vs. glucosamine treatment (3T3-L1 cells), **273,** 1033
  dexamethasone-induced, role of atypical and conventional protein kinase C (rat), **277,** 361
  fibroblasts from patient with, postreceptor signaling defect impairing c-fos expression in, **268,** 577
  potentiation of islet phospholipase A_2 activation (mouse), **272,** 539
  in type II diabetes, associated elevation of protein-tyrosine phosphatase 1B expression and activity in skeletal muscle (rat), **274,** 583
Insulin-signaling proteins
  regulation in differentiating human adipocytes, **276,** 162
Integrin
  melanoma cell adherence and proliferation mediated by, blocking by salmosin (B16 cells), **275,** 169
  signaling via focal adhesion kinase, control of VSMC proliferation and phenotype, **272,** 298
  signaling mediated by, in hepatocarcinoma cells, modulation by TGF-β1 (human), **274,** 519
  translocation into or out of glycolipid-enriched microdomain, effect of glycosylation, **273,** 159
α3 Integrin
  glycosylation, effects on LDL GEM membrane domain involved in cell adhesion and motility (ldlD 14 cells), **279,** 744
α4 Integrin
  human and murine, inhibition by EC3 disintegrin from *Echis carinatus,* **267,** 413
α5 Integrin
  glycosylation, effects on LDL GEM membrane domain involved in cell adhesion and motility (ldlD 14 cells), **279,** 744
α5β1 Integrin
  regulated interaction with osteopontin (K562 cells), **267,** 764
  TGF-β1-modulated expression in hepatocarcinoma cells (human), **274,** 519
αP Integrin
  cloning and characterization in sea urchin embryos, **272,** 929
$\alpha_V\beta_3$ Integrin
  expression upregulation, role in promotion of glioma cell migration by TGF-β_1 and TGF-β_2, **268,** 607
$\alpha_V\beta5$ Integrin
  binding of contortrostatin, **267,** 350
β2-Integrin
  neutrophil, upregulation, blocking by p38 MAP kinase inhibitor, **270,** 858
Integrin-associated protein
  as endothelial mechanosensitive death mediator (human), **271,** 584
Intercellular adhesion molecule-1
  gene transcription, NF-κB binding in, glucocorticoid effects (U937 cells), **273,** 1008
  lipopolysaccharide-induced expression in bovine aortic endothelial cells, suppression by cerivastatin via Rho GTPase, **269,** 97
  tumor necrosis factor-induced expression, block by E-73, **277,** 330
Intercellular adhesion molecule-3
  expression in leukemic mast cells, selective promotion by 1α,25-dihydroxyvitamin D_3 (human), **273,** 1104
Intercellular communication
  gap junctional, tumor promoter-induced inhibition, reversal by resveratrol (rat), **275,** 804
Interferon-α
  impairment of angiogenic balance and suppression of tumorigenicity in HeLa cells, **277,** 410
  phosphatidylinositol 3′-kinase activation dependent on, pathways regulating, **270,** 158
Interferon-α 2b
  activation of human $p27^{Kip1}$ promoter, **269,** 31

Interferon-α signaling
  promotion of nucleus-to-cytoplasm redistribution of p95Vav and formation of complex involving Vav, Ku80, and Tyk2, **267,** 692
Interferon-β
  intermittent treatment with, enhancement of priming effect, **278,** 599
Interferon-γ
  effect on PDGF-induced c-*fos* gene transcription in glomerular mesangial cells (rat), **273,** 1069
  effect on TRANCE-induced osteoclastogenesis, **276,** 868
  mediation of IL-18 binding protein gene expression in nonleukocytic cells (human), **267,** 960
  modulation of membrane-bound and soluble RANKL expression (mouse), **275,** 768
  and TNF-α, synergistic induction of apoptosis in hepatoma Hepa1-6 cells, **272,** 674
α-Interferon-inducible protein
  gene expression, increase in cardiomyopathic heart (hamster), **267,** 103
Interferon regulatory factor 1
  viral, of Kaposi's sarcoma-associated herpesvirus, interaction with CREB-binding protein, **270,** 23
Interleukin-1
  haptoglobin induction dependent on, inhibition by deactylase inhibitors (IEC-6 cells), **276,** 673
  release from activated endothelial cells, modulation by CD39, **270,** 272
Interleukin-1α
  cancer cell-derived, role in autocrine and paracrine induction of prometastatic genes in breast cancer, **275,** 60
Interleukin-1β
  effects on aromatase activity and cell proliferation in human osteoblast-like cells, **268,** 60
  effects on regulation of MUC2 gene and protein expression in airway epithelial cells (human), **274,** 112
  expression
    association with *in vivo* sciatic nerve regeneration enhanced by conditioning lesion to contralateral nerve (rat), **267,** 715
    in monocytes, upregulation by monocyte chemotactic protein 1 (human), **277,** 37
  gene expression in liver regenerative models (rat), **272,** 591
  and IL-1Ra, imbalanced production in bronchial asthma (human), **276,** 607
  induction of endothelial VCAM-1, reduction by K-7174 via regulation of GATA (human), **272,** 370
  induction and regulation of matrix metalloproteinase-12 in monocyte/macrophages (human), **269,** 808
  modulation of membrane-bound and soluble RANKL expression (mouse), **275,** 768
  mRNA expression in carotid artery after balloon angioplasty (rat), **271,** 138
  release by human neutrophils, effects of HDL, apo AI, and serum amyloid A, **268,** 405
  transcripts, induction by leptin in cultured glial cells (mouse), **273,** 312
Interleukin-1 receptor
  mRNA expression in carotid artery after balloon angioplasty (rat), **271,** 138
Interleukin-1 receptor antagonist
  IL-1Ra, and IL-1β, imbalanced production in bronchial asthma (human), **276,** 607
  mRNA expression in carotid artery after balloon angioplasty (rat), **271,** 138
Interleukin-1 receptor-associated kinase
  role in tolerance and sensitization to endotoxin in Kupffer cells caused by acute ethanol, **277,** 686
Interleukin-2
  acid-denatured, hydrophobic clustering in, and fluorescence of Trp NH$\cdots\pi$ bond, **279,** 770
  BA/F3β cells stimulated by, AP-1 activation in intracellular oxidative environment of, effect of Ref-1 induction, **278,** 462
  induction of Crk association with STAT5, **278,** 299
  withdrawal, induced apoptosis in BAF-B03 β cells, inhibition by MAJN, **270,** 267
Interleukin-3 receptor
  related protein CYRL, cloning and expression in testis, lung, and spleen (rat), **267,** 697
Interleukin-4
  effect on STAT6 activation in 3T3-L1 cells at various stages of differentiation, **267,** 516
  induced germline ϵ transcription in human B cell line, role of Shc, **268,** 54
  promoter, NFAT/AP-1 site P5 (human), **270,** 1016
  and TNF-α, synergistic effects on expression of thymus- and activation-regulated chemokine in human corneal fibroblasts, **279,** 1
Interleukin-5
  stimulus-specific inhibition by cAMP-elevating agents and IL-10, differential mechanisms of action, **273,** 811; *erratum,* **275,** 713
Interleukin-6
  differential stimulation by PGE_2 and calcemic hormones in stromal/osteoblastic cells, **270,** 1080
  expression
    in breast cancer, role of cancer cell-derived interleukin 1α, **275,** 60
    in mesangial cells, effects of native and oxidized LDL and modulation by lovastatin (human), **267,** 536
    in psoriasis, induction by IGF-II via NF-κB activation (human), **278,** 312
  increase, association with Stat3 inhibition in acute hepatic failure (rat), **273,** 129
  induction in mammalian cells by macromolecular glycolipids from *Enterococcus hirae,* **273,** 164
  induction of rapid gene repression at onset of monocyte differentiation (mouse), **267,** 863
  modulation of membrane-bound and soluble RANKL expression (mouse), **275,** 768
  negative regulation of pregnane X receptor and constitutively activated receptor expression in primary hepatocytes (human), **274,** 707
  related cytokines
    activation of STATs induced by, inhibition by parthenolide, **267,** 329
    autocrine/paracrine secretion, role in angiotensin II-induced delayed STAT3 activation (mouse, rat), **269,** 798
  signaling inhibition by cyclopentenone derivatives (A23-98), **276,** 447
  and TNF-α, LPS-induced production in mouse peritoneal neutrophils, differential modulation by prostaglandin E_2 receptors EP2 and EP4, **278,** 224
Interleukin-8
  constitutive gene expression in hepatoma cells, role of PEA3 and AP-1, **279,** 166
  expression
    in breast cancer, role of cancer cell-derived interleukin 1α, **275,** 60
    in cell lines positive for HPV-16 oncoproteins, **277,** 55
  gene expression upregulation by IE1 gene product of human cytomegalovirus, **279,** 298
  production
    by eosinophils, inhibition by surfactant protein A, **270,** 831
    induced by hyperosmotic stress in bronchial epithelial cells, role of reactive oxygen intermediates (human), **276,** 571
  release by human neutrophils, effects of HDL, apo AI, and serum amyloid A, **268,** 405
  secretion
    by autocrine mechanism, induction by HTLV-1 *tax* gene in transfected Jurkat cells, **273,** 865
    in THP-1 monocytic cells, effects of activation of PPARα or PPARγ, **267,** 345

Interleukin-10
  cytoprotective pathway sensitive to, partial amplification by thymulin–Zn^{2+} (human), **274,** 500
  stimulus-specific inhibition of IL-5, **273,** 811; *erratum,* **275,** 713
Interleukin-11
  modulation of membrane-bound and soluble RANKL expression (mouse), **275,** 768
Interleukin-12
  malaria DNA vaccine with, immunization into liver by gene gun, protection against lethal challenge of *Plasmodium berghei* sporozoite, **271,** 107
Interleukin-13
  modulation of membrane-bound and soluble RANKL expression (mouse), **275,** 768
Interleukin-16
  expression and secretion, effects of HTLV-1 *tax* gene in transfected Jurkat cells, **273,** 865
Interleukin-17
  modulation of membrane-bound and soluble RANKL expression (mouse), **275,** 768
Interleukin-18
  induction in mammalian cells by macromolecular glycolipids from *Enterococcus hirae,* **273,** 164
Interleukin-18 binding protein
  gene expression in nonleukocytic cells, mediation by interferon-γ (human), **267,** 960
Intermediate filament-associated protein
  IFAP300, identification as hamster plectin ortholog, **273,** 183
Intermediate filaments
  vimentin binding of acetylated and oxidized LDL, **267,** 49
Internal ribosome entry site
  protein synthesis dependent on, increase by overproduction of eIF4G in mouse mammary carcinoma cells, **277,** 117
Interstitial collagenase
  $GdCl_3$-enhanced production in Kupffer cells, prevention of pig serum-induced rat liver fibrosis, **267,** 290
Intervertebral disc disease
  correlation with COL9A2 allelotypes (human), **279,** 398
Intestinal adenomas
  mouse and human, guanylin downregulation in, **273,** 225
Intestinal cells
  25-hydroxyvitamin D binding protein from, characterization (human), **275,** 845
  T84, transcription factor-like gene, identification (human), **276,** 660
Intestinal epithelial cells
  antianoikic function of trefoil factor 3 on, signaling by NF-κB (IEC-18 cells), **274,** 576
  cAMP inhibition of agonist-induced heparin-binding EGF-like growth factor gene expression independently of effects on p42/p44 MAPK activation (RIE-1 cells), **277,** 558
  CCAAT/enhancer-binding protein isoforms, role in inhibition of IL-1-dependent induction of haptoglobin (rat), **276,** 673
  MDR1 overexpression resulting in increased cholesterol uptake from micelles (rat IEC-18 cells), **267,** 565
Intestinal ischemia/reperfusion injury
  associated attenuated nitric-oxide synthase activity and protein expression (rat), **269,** 160
Intestine
  IGFBP-5 mRNA abundance in smooth muscle cells, regulation (rat), **275,** 422
Intracellular traffic
  enhanced Rab content and prenyltransferase activity during rat liver regeneration, **269,** 226
Intracellular transport
  CD36, role of N-terminal domain (COS-7 cells), **275,** 446
Intracisternal A-particle-like element
  expression in rat ovary, **278,** 48
Intranuclear binding
  by HIV-1 regulatory protein VPR, role of cytosolic factors, **270,** 1055
Intrathecal injection
  neutralizing antibody against Fas ligand, suppression of EAE progression (mouse), **275,** 164
Intron
  self-splicing, of T4 ribonucleotide reductase, restoration of mRNA splicing by second-site intragenic suppressor in, **268,** 359
Intron–exon structure
  thrombopoietin gene (mouse), **276,** 137
Intronic promoter
  human PDE5A gene, identification, **268,** 596
In vitro expression cloning screening
  identification of casein kinase I substrates, **268,** 562
Ion channels
  activity in colonic smooth muscle myocytes, alterations in experimental colitis model (mouse), **275,** 637
  function, role of SAP family proteins: review, **269,** 1
Ionizing radiation
  cell-type-dependent induction of *eotaxin* and *CCR3,* **269,** 546
Ionomycin
  deencryption of cellular tissue factor, role of TF cytoplasmic domain (BHK cells), **272,** 332
  induced cell death, amelioration by expression of Na^+/Ca^+ exchanger, **276,** 93
Ions
  distribution in human epidermis, visual imaging, **272,** 134
  free, along plasma membrane, effects of electric field, **272,** 634
Ion transport
  in proximal tubules, modulation by angiotensin II through CYP metabolites (rat), **272,** 423
Ire1p
  Kar2p/BiP dissociation from, induction of unfolded protein response in yeast, **279,** 445
IRIP
  cysteine 242 microenvironment in, analysis (iris), **275,** 481
Iron
  and ascorbate, supplementation, effects on DNA damage (human), **277,** 535
  effect on dihydropteridine reductase mRNA levels, **271,** 788
  in heme, Fe^{3+}/Fe^{2+} reduction potential, effect of water, **268,** 683
  ligand in CYP106A2, FTIR study of CO stretch vibration, substrate binding studies based on, **269,** 737
  mediated oxidation of Pro and Arg side-chain residues of LDL apoB-100, 5-hydroxy-2-aminovaleric acid as specific marker, **270,** 852
Iron-binding ligands
  clavaminic acid synthase, mutagenesis studies, **279,** 240
Iron(II)-diethyldithiocarbamate
  in spin trapping of vascular nitric oxide, **275,** 672
Iron methylchlorin
  horseradish peroxidase and myoglobin reconstituted with, compound I, II, and III states of, preparation and characterization, **279,** 1011
Iron(II)–nitrosoalkane complexes
  formation catalyzed by microperoxidase 8, **278,** 217
Iron-responsive element
  non-IRE-regulated iron-responsive mRNAs, detection, **275,** 223
Iron–sulfur clusters
  characterization in active pyruvate formate-lyase-activating enzyme isolated under anaerobic conditions (*Escherichia coli*), **269,** 451

IRSp53/BAIAP2
  Src homology 3 domain-containing, Rho-dependent binding of mDia (mouse), **271,** 626
Isatin
  endogenous, antiproliferative and proapoptotic effects, **276,** 379
Ischemia
  acute myocardial, S100A1 as marker for, evaluation (human), **274,** 865
  delayed neuronal death after, neovascularization with blood–brain barrier breakdown in, analysis (gerbil), **273,** 637
  focal, effect on gelatinase content in brain (rat), **278,** 803
  renal, associated injury, ATP-sensitive potassium channel mRNA expression after, analysis (rat), **269,** 618
Ischemia/reperfusion
  simulated, in cardiac myocytes, Akt activation during, **270,** 947
Ischemia/reperfusion injury
  cardiac, protective effect of heme oxygenase-1 induction *in vivo* (rat), **279,** 582
  hepatic, role of NO synthase (mouse), **276,** 851
  intestinal, associated attenuated nitric-oxide synthase activity and protein expression (rat), **269,** 160
Ischemic diseases
  gene therapy, implications of improved VEGF by naked DNA in mouse skeletal muscles, **272,** 230; *erratum,* **276,** 390
Ischemic preconditioning
  induction of HSP27 translocation to sarcomere in isolated rat hearts, **269,** 137
Islet amyloid polypeptide
  fibrillar, differential effects on oxidative stress responses and LDL uptake in insulin-producing cell lines, **267,** 619
Islets of Langerhans
  isolated, survival, mediation by phosphatidylinositol 3-kinase signaling to Akt (dog), **277,** 455
  melanin-concentrating hormone receptor expression (rat), **275,** 709
Isobutyl nitrite
  inhalation, effects on tissue NOS III expression and tyrosine nitration and phosphorylation (rat), **275,** 335
Isomaltose
  regiospecific transglycolytic synthesis and structural characterization, **274,** 99
Isometric tension
  generation by skinned fibers and intact skeletal muscles from desmin-deficient mice, **278,** 419
Isoprostane
  excretion, decrease by olive oils rich in catecholic phenols (human), **278,** 797
Isoproterenol
  substrate-dependent lipolysis induced by, relationship to phosphorylation of perilipin and hormone-sensitive lipase, **274,** 631
Isoproturon
  derivative, in generation of high-affinity scFvs from single rabbit immunized with multiple haptens, **268,** 398
Isothermal titration calorimetry
  for interaction of chloroquine and analogues with heme, **276,** 1075
i-tetraplex structures
  adoption by nuclease-hypersensitive element in human c-*myc* promoter, **278,** 158; *erratum,* **279,** 306

J

J8/7 elements
  in conserved core of group I intron ribozymes, characterization (*Tetrahymena*), **267,** 85
Jacalin-related lectin
  complete amino acid sequence of Japanese chestnut agglutinin, **276,** 23
Jagged1
  non-transmembrane form, regulation of formation of matrix-dependent chord-like structures (NIH-3T3 cells), **268,** 853
  physical interaction with Notch1 and Notch3 receptors, **276,** 385
Jagged2
  physical interaction with Notch1 and Notch3 receptors, **276,** 385
JAK2
  activation of erythropoietin receptor linked to, role in EPO inhibition of Ca^{2+}-induced neurotransmitter release from PC12 cells, **279,** 293
  blockade by tyrphostin AG-490, effect on antigen-induced eosinophil recruitment into mouse airways, **270,** 209
Jak3
  binding by MAJN, **270,** 267
Jak/STAT pathway
  linkage with α adrenergic receptor in vascular smooth muscle cells, **268,** 25
Janus kinase
  putative SH2 domain in, computational and functional analysis, **278,** 175
Janus kinase-3
  WHI-P131 inhibiting, effect on survival of transgenic murine model of amyotrophic lateral sclerosis, **267,** 22
Janus kinase binding protein 1
  human, yeast homolog Hsl7p, identification as protein methyltranferase, **274,** 105
Jasmonic acid
  and light signals, regulation of *OsPR1b* gene (rice), **278,** 290
Jejunum
  resveratrol absorption as resveratrol glucuronide (rat), **272,** 212
Jumonji
  nuclear localization and negative regulation of cell growth (COS-7, NIH-3T3 cells), **274,** 332
Jun a 2
  purification, identification, and cDNA cloning (mountain cedar pollen), **275,** 195
Junctional adhesion molecule
  phosphorylation by PKC, on platelet activation (rabbit), **276,** 873
Junctophilin
  subtype genes, characterization (human), **273,** 920
Jurkat cells
  apoptotic, binding of anti-band 3 antibody via sialylated poly-*N*-acetyllactosaminyl saccharide chains, **275,** 412
  interleukin-8 and IL-16 expression and secretion, effects of HTLV-1 *tax* gene in transfected cells, **273,** 865
  JB6 variant, sensitization to TRAIL by caspase-8 reconstitution, **277,** 311
  rescued from CD95/Fas-induced apoptosis through inhibition of caspases, functional characterization, **270,** 1009
  uptake and *in situ* binding of peptide agonist for calmodulin, **277,** 462
Juvenile hormone-hydrolyzing esterase
  JHER, baculovirus-expressed, distinct structural and kinetic properties, **272,** 12; *erratum,* **273,** 1180
Juvenile retinoschisis
  X-linked, associated with 4-base pair insertion at codon 55 of XLRS1 gene, **268,** 370

K

K-7174
  reduction of endothelial VCAM-1 induction by inflammatory cytokines via regulation of GATA (human), **272,** 370
KAI1 gene
  activation by etoposide, mediation by p53 and c-Jun genes (human), **274,** 370
  promoter region organization and gene targeting by p53, **278,** 499
Kainate receptor/channel
  regulation, role of SAP family proteins: review, **269,** 1

- Kallikrein
  - effect on HDL-induced cholesterol efflux from foam cells, **277,** 552
  - gene family on chromosome 19q13.3–q13.4, genomic organization (human), **276,** 125
- Kallikrein-like protease
  - from snake venom, expression: engineering of autocatalytic site in fusion protein for protein refolding, **275,** 924
  - TLSP/hippostasin isoform expressed in human brain and prostate, **272,** 205
- Kaposi's sarcoma-associated herpesvirus
  - viral interferon regulatory factor 1 of, interaction with CREB-binding protein, **270,** 23
- Kaposi's sarcoma cells
  - with differing origins, response to HIV-Tat through Flk-1/KDR, **273,** 267
- Kar2p/BiP
  - dissociation from Ire1p, induction of unfolded protein response in yeast, **279,** 445
- Kassinatuerin-1
  - broad-spectrum antimicrobial, isolation from skin of Hyperoliid frog *Kassina senegalensis,* **268,** 433
- KB-R7943
  - inhibition of store-operated Ca^{2+} entry in cultured neurons and astrocytes (rat), **279,** 354
- *KCNJ9* gene
  - genomic structure and expression (human), **274,** 302
- KCRF
  - expression cloning (rat), **274,** 852
- KDR
  - response of Kaposi's sarcoma cells of different origin to HIV-Tat through, **273,** 267
- KE04 gene
  - differentially expressed by activated dendritic cells, identification and characterization (human), **279,** 487
- Keratin
  - epidermal type II, genes K1 and K5, genomic organization and amplification (human), **274,** 149
- Keratin 15
  - genomic organization and gene amplification (human), **267,** 462
- Keratin 19
  - genomic organization and gene amplification (human), **267,** 462
- Keratinocyte growth factor
  - upregulation in MCF-7 breast cancer cells by vitamin D, **273,** 675
- Keratinocytes
  - chemotactic cytokines derived from, expression, modulation by NO *in vitro* and during cutaneous wound repair *in vivo* (mouse), **274,** 689
  - cystatin A gene transcription, increase by AP-2γ (human), **278,** 719
  - differentiating
    - caspase-14 mRNA expression during, **277,** 655
    - expression and effects of p63 and p73 (human), **273,** 342
  - differentiation, role of E-cadherin at cell periphery *in vitro* (human), **269,** 369
  - dividing, caveolin-1 concentration in cleavage furrow (Pam212 cells), **268,** 82
  - growth and survival, effects of lens epithelium-derived growth factor (human), **267,** 373
  - immortalized cells with defective p53 in skin, UVB-induced cell cycle arrest in G2/M phase, mechanism, **277,** 107
  - interleukin-18 binding protein gene expression, mediation by interferon-γ (HaCaT cells), **267,** 960
  - oral, *in vitro* life span extension by retinoic acid, molecular mechanisms (human), **268,** 268
  - sulfatase and sulfotransferase gene superfamilies, expression profiling (human), **277,** 236; *erratum,* **279,** 306
  - transformed, urokinase production and invasiveness, modulation by TGF-β_1, role of Ras/MAPK signaling pathway, **273,** 521
  - vitamin D receptor expression in relation to cell cycle control (human), **279,** 89
  - vitamin D receptor expression and vitamin D responsiveness, suppression by apigenin (human), **268,** 237
- β-Ketoacyl–acyl carrier protein synthase III
  - selenomethionyl-derivative, expression, purification, and crystallization (*Escherichia coli*), **270,** 100
- 3-Ketoacyl-CoA thiolase B gene
  - hepatic, peroxisome proliferator response element present at positions −681/−669 in, interactions with PPARα and HNF-4 (rat), **269,** 347
- α-Ketoisocaproate
  - catabolism in liver (human, rat), **276,** 1080
- KIAA0313
  - identification as 180-kDA β-catenin-interacting protein isolated from bovine brain, **273,** 712
- KIAA0705
  - identification as 150-kDA β-catenin-interacting protein isolated from bovine brain, **273,** 712
- KIAP
  - identification, cloning, expression, and function (human), **279,** 820
- Kidney
  - *N*-acetylglucosamine-6-*O*-sulfotransferase GlcNAc6ST-4 expression (mouse), **274,** 291
  - apical membrane, *p*-aminohippuric acid transport mediated by human inorganic phosphate transporter NPT1, **270,** 254
  - aquaporin-7 localization by RT-PCR, immunoblotting, and immunocytochemistry (mouse, rat), **277,** 164
  - ATP-sensitive potassium channel mRNA expression after ischemic injury (rat), **269,** 618
  - calcium-permeable channels rat ECaC and mouse CaT1, electrophysiologic characteristics, **274,** 344; *erratum,* **279,** 738
  - ENT1 gene expression (mouse), **277,** 200
  - expression of homologous rat SULT1C2 sulfotransferases, **272,** 242
  - fetal, differential expression of *WNT-2B* isoforms (human), **275,** 209
  - *frizzled-10A* gene expression (*Xenopus laevis*), **278,** 377
  - and heart and liver and suprachiasmatic nucleus, differential regulation of *BMAL1* mRNA in *Clock* mutant mice, **268,** 164
  - ion transport in proximal tubules, modulation by angiotensin II through CYP metabolites (rat), **272,** 423
  - Klotho protein detection with monoclonal antibodies (human, mouse), **267,** 597
  - *maf*-1 gene, developmental mRNA expression, *in situ* hybridization histochemical study (rat), **272,** 777
  - organic anion transporter 1 gene expression *in vivo* (human), **275,** 623
  - *Peroxiredoxin V* gene short transcript expression (mouse), **270,** 356
  - polyethylenimine uptake *in vivo* (rat), **278,** 414
  - PTH/PTHrP receptor promoter activity, role of methylation (human), **267,** 482
  - response to PPARα activation, comparison with heart and liver (mouse), **278,** 250
  - transgenic mice expressing truncated type II activin receptor, increased number of glomeruli, **268,** 445
  - Wnt16 isoform expression (human), **278,** 814
- Kidney cells
  - AP-1, CREB, and NF-κB activation, differential regulation by nucleoredoxin, glutaredoxin, and thioredoxin (HEK293 cells), **274,** 177; *erratum,* **275,** 247
  - apoptotic threshold, regulation by TRAF protein translocation (HEK293 cells), **272,** 936
  - autocrine motility factor/phosphohexose isomerase expression (COS7 cells), **273,** 213
  - c-Jun N-terminal kinase stimulation by calcium-sensing receptor (MDCK cells), **275,** 538

- cyclosporin A-induced atypical heat shock response (BSC-1 cells), **269,** 464
- dividing, caveolin-1 concentration in cleavage furrow (COS7, MDCKII cells), **268,** 82
- embryonic
  - ERK-dependent mitogenesis, induction by monoamine oxidase B via H_2O_2 generation (HEK 293 cells), **271,** 181
  - HIPK2 interactions with TRADD, CD95, and TNF-R1 (293T cells), **277,** 513
- fatty acid amide hydrolase catalytic activity, serine residues involved in, identification (COS-7 cells), **264,** 316; *erratum,* **267,** 676
- functional characterization of cloned amago salmon thyrotropin receptors (COS-7 cells), **276,** 258
- G_o protein interaction with HIV-1 Nef in transfected COS-7 cells, **270,** 570
- HEK293 cells transfected with $VPAC_1$ receptor, G_s activation by VIP, **272,** 922
- HIV_{MN}-1 gp120 expression, erythropoietin signal peptide for, efficiency (COS-7 cells), **273,** 557
- hypoxia-inducible-factor-1 induction by nitric oxide, mediation via phosphatidylinositol 3-kinase pathway ($LLC\text{-}PK_1$ cells), **278,** 263
- mammalian, expression of full-length and truncated recombinant human brain type I inositol 1,4,5-trisphosphate receptor (COS-7, HEK-293 cells), **273,** 123
- mDia1 activation and action in formation of parallel stress fibers, mechanisms (MDCK cells), **274,** 68
- mechanisms of zinc effect on hypoxic induction of erythropoietin mRNA (293 cells), **268,** 652
- mesangial, IL-18 binding protein gene expression in primary cells, mediation by IFN-γ (human), **267,** 960
- nitric oxide presence within, direct evidence (COS-1 cells), **272,** 129
- nitric oxide release from NO–aspirin and glyceryl nitrate (LLC-PK1 cells), **274,** 255
- Nurr1 response element activating tyrosine hydroxylase gene promoter, identification (CV1 cells), **274,** 590
- peptide-mediated transcytosis of phage display vectors (MDCK cells), **276,** 251
- peroxisome proliferator-activated receptor γ 2 P12A mutant transcriptional activity (COS cells), **268,** 178
- PMCA1 gene transcriptional downregulation by 1,25-dihydroxyitamin D_3, mediation by gene promoter region (MDBK cells), **277,** 722
- polarized secretion of bovine chromogranin A (MDCK cells), **270,** 631
- rat sodium-dependent multivitamin transporter expressed in, electrogenic nature of activity (COS-7 cells), **270,** 836
- taxol-sensitive kinase activity (CV-1 cells), **277,** 525
- wild-type and Swedish mutated HEK293 cells expressing βAPP, secretion of sAPPα and Aβ, effects of Rab 11 overexpression or constitutively active Rab11, **275,** 910

KIF3A
- GADD34 interaction with, **267,** 593

Kinesin
- KIF3A, GADD34 interaction with, **267,** 593
- single molecules, force, velocity, and processivity of, temperature dependence, **272,** 895

Kinesin-like calmodulin-binding protein
- motor and tail domains, bundling of microtubules by, regulation by Ca^{2+}/calmodulin (*Arabidopsis*), **267,** 201

Kinesin-like proteins
- C-terminus, KLP-17, cDNA cloning and expression: role in chromosomal movement (*Caenorhabditis elegans*), **267,** 643

Kinetics
- betaine aldehyde dehydrogenase from kidney (pig), **269,** 596
- cathepsin L-like protease (*Fasciola hepatica*), **277,** 79
- CTGF gene expression during liver regeneration after partial hepatectomy and D-galactosamine-induced injury (rat), **277,** 448
- focal adhesion protein formation, **271,** 553
- inhibition study using substrates with mismatch basepairs: *BanI* restriction endonuclease binding in DNA major groove, **269,** 35
- juvenile hormone-hydrolyzing esterase JHER, **272,** 12; *erratum,* **273,** 1180
- self-splicing rRNA precursor in *Chlamydomonas,* **273,** 967
- spin trapping, quantification: free radicals in photodynamic therapy, **270,** 125
- trypsin chromogenic substrates based on proteinase binding loop of *Cucurbita maxima* trypsin inhibitor, **269,** 81

Kinetin
- identification in human urine, **279,** 69
- inhibition of protein oxidation and glycoxidation *in vitro,* **276,** 1265
- and light signals, regulation of *OsPR1b* gene (rice), **278,** 290

Kininogen fragment 1·2,
- from bovine milk, promotion of proliferation of osteoblastic MC3T3-E1 cells, **269,** 628

Kir6.2
- direct photoaffinity labeling by [γ-^{32}P]ATP-[γ]4-azidoanilide, **272,** 316

Kirromycin
- dcw cluster producing, isolation and characterization (*Streptomyces collinus*), **268,** 282

Klebsiella pneumoniae
- antibiotic resistance, membrane permeability modifications involved in, **274,** 496

Klotho
- monoclonal antibodies, establishment, and detection of Klotho protein in kidney (human, mouse), **267,** 597

klotho
- disruption, effect on energy homeostasis (mouse), **278,** 665
- *in vivo* delivery, effect on endothelial dysfunction in multiple risk factor syndrome (rat), **276,** 767

Klp1
- cDNA cloning (K562 cells), **273,** 596

KLP-17
- cDNA cloning and expression: retrograde motor protein (*Caenorhabditis elegans*), **267,** 643

Knock-in
- Emx1-specific expression of foreign genes using, **270,** 978

Knockout mouse
- FGF10, in analysis of FGF10 role in organogenesis: major ligand for FGF receptor 2 IIIb, **277,** 643
- lacking smooth muscle calponin, mechanical measurements of intact vascular smooth muscle strips, **279,** 150

K-*ras*
- activation, relationship to β1–6 branching of N-linked carbohydrate on CEA in colon carcinoma cells, **273,** 147
- mutation activating, identification in primary colon adenocarcinoma (human), **278,** 653

Ku70
- translocation to nucleus independent of Ku-80 translocation and DNA-PK autophosphorylation (HeLa-S3 cells), **276,** 1105

Ku80
- formation of complex involving Vav and Tyk2, promotion by IFN-α signaling, **267,** 692
- nuclear translocation of Ku70 in HeLa-S3 cells independent of, **276,** 1105

Kunitz family protease inhibitor
- identification in skin secretions of tomato frog, **279,** 961

Kupffer cells
- interstitial collagenase production enhanced by $GdCl_3$, prevention of pig serum-induced rat liver fibrosis, **267,** 290
- tolerance and sensitization to endotoxin caused by acute ethanol, role of interleukin-1 receptor-associated kinase (mouse), **277,** 686

Kynurenine
  α-crystallin modification by, cysteine identification as initial site of, **276,** 216

L

L-152,804
  orally active, as selective antagonist of neuropeptide Y Y5 receptor, **272,** 169
α-Lactalbumin
  apo- and *holo-*αLA, quenching by acrylamide in guanidine hydrochloride (bovine), **269,** 709
  disulfide-reduced apoprotein, binding to GroEL, electrostatic interactions in, fluorescence correlation spectroscopic study, **267,** 300
β-Lactamase
  inhibition by complexes of vanadate with hydroxamic acids, **274,** 732
  peptide-displaying sensor, antibody-mediated modulation, molecular mechanisms, **275,** 360
Lactate
  production by βTC3 insulinoma cells, effects of pH (mouse), **273,** 937
Lactoferrin
  antimicrobial peptide of, and identification of essential domain (Korean native goat), **268,** 333
  surface expression by resting neutrophils (human), **275,** 241
β-Lactoglobulin
  promoter, effect of multiple copies: lack of function as locus control region, **272,** 284
Lactoperoxidase
  PCR cloning and baculovirus expression (human), **271,** 831
  structure and biochemical properties, comparison with recombinant enzyme (bovine), **274,** 756
Lactose
  –tetracycline repressor–operator combination system, gene expression, role of cell growth (Kit 225 cells), **276,** 546
LacZ
  artificial antisense RNA regulation in fission yeast and human cells, comparison, **268,** 8
LAMB3 gene
  differential expression between small cell and non-small cell lung carcinomas (human), **275,** 440
LAMC2 gene
  differential expression between small cell and non-small cell lung carcinomas (human), **275,** 440
Lamin A
  direct interaction with emerin, **267,** 709
Lamin A/C
  promoter, identification of retinoic acid-responsive element in, **269,** 197
Lamin B
  carboxyl methylation in pancreatic beta cells (hamster, rat), **268,** 249
Laminin
  adhesion of VSMCs to, effect on proliferation, migration, and activation of intracellular signaling pathways, **272,** 298
  and fibronectin, cooperation in activation of phosphatidylinositol-4-phosphate 5-kinase, **279,** 931
Laminin α2
  unusual processing in myoblasts from patient with novel variant of congenital muscular dystrophy, **277,** 639
Laminin-5
  α3 chain, proteolytic fragment of, isolation and activity, **278,** 614
  LAMB3 and LAMC2 genes encoding chains of, expression in small cell and non-small cell lung carcinoma (human), **275,** 440
LanC-like protein 1
  p40/GPR69A characterization as peripheral membrane protein, **275,** 69
Lanthanide ions
  competitive inhibition of malic enzymes (human), **274,** 440
Lantibiotic synthetase
  component C, p40/GPR69A characterization as peripheral membrane protein related to, **275,** 69
Large unilamellar vesicles
  lipid peroxidation induced by water-soluble free radical sources, **273,** 72
Late infantile neuronal ceroid lipofuscinosis
  tripeptidyl peptidase-I/CLN2 protein deficient in, endopeptidase activity, characterization, **268,** 904
Lattice corneal amyloid dystrophy type 1
  relevance of amyloid fibril creation from native and Arg124Cys mutated βIGH3$_{(110-131)}$ peptides, **273,** 649
Lead nitrate
  hepatic hyperplasia induced by, gene expression of neurotrophins and receptors (rat), **275,** 472
Leaves
  gene responses induced by herbivory and herbivore-induced volatiles (lima bean), **277,** 305
Lebocin
  cDNA cloning and characterization as inducible immune gene with downstream insertion element (*Trichoplusia ni*), **269,** 803
Lecithin:retinol acyl transferase
  smaller transcript expression in MCF-7 cells, **279,** 920
Lectin-like oxidized low-density lipoprotein receptor-1
  expression, increase by TGF-β_1 (bovine, mouse), **272,** 357
  expression in hypercholesterolemia (rabbit aorta), **276,** 1100
Lectins
  C-type, of *Trimeresurus stejnegeri,* expression and properties of carbohydrate recognition domains, **271,** 677
  fucose-binding, from legumes, mode of recognition of L-fucose, **268,** 262; *erratum,* **270,** 329
  Japanese chestnut agglutinin, complete amino acid sequence, **276,** 23
  mannose-binding
    in analysis of accessibility of high-mannose glycans in HIV-1 gp120, **274,** 455
    gene promoter variants, binding properties (human), **275,** 617
  Microcystis aeruginosa M228, gene cloning, **273,** 499
  oyster mushroom, with antihepatoma and antisarcoma activities, isolation and sequence studies, **275,** 810
LEDGF, *see* Lens epithelium-derived growth factor
Leigh disease
  fibroblast cell lines, combined enzymatic complex I and III deficiency associated with mutations in nuclear-encoded *NDUFS4* gene, **275,** 63
Leishmania donovani
  arsenite-resistant, putative P-glycoprotein expression, downregulation by verapamil, **271,** 615
Leishmania major
  infected mouse, role of PSAPs in lysosome, **276,** 693
Leishmania mexicana
  sensitivity to α-difluoromethylornithine and metabolic turnover of ornithine decarboxylase, **279,** 663
Lemna major
  sensitivity to UVB, **276,** 970
Lens
  autosomal dominant congenital cataract, genetic linkage analysis of *CP49* gene (human), **270,** 432
  α-crystallin isolated from, cysteine as initial site of modification by kynurenine (bovine), **276,** 216
  epithelium, antithrombin III detection (human), **272,** 1
  ferritin light chain mRNA levels (guinea pig, human), **270,** 349
  galactosemic rat, α-crystallin from, functional and structural studies, **273,** 197

  high-molecular-weight α-crystallin aggregates, formation mechanisms (human), **275,** 354
  normal, and age-matched cataractous lenses, D-aspartic acid contents in α A-crystallin (human), **278,** 408
Lens epithelial cell-derived growth factor, *see* Lens epithelium-derived growth factor
Lens epithelial cells
  cis-aconitase activity, modulation by heme oxygenase-1 induction (rabbit), **270,** 324
  apoptosis in rat selenite model of cataract, role of m-calpain and caspase-3, **275,** 300
  effects of advanced glycation end products *in vitro* (bovine, human), **275,** 53
  growth and survival, effects of lens epithelium-derived growth factor (human), **267,** 373
Lens epithelium-derived growth factor
  effects on growth and survival of lens epithelial cells, keratinocytes, and fibroblasts (human), **267,** 373
  gene encoding, activation by thermal and oxidative stresses (Cos 7 cells, LECs), **276,** 1320
Leptin
  adipocyte resistance to, in obesity, role of suppressors of cytokine signaling (rat), **277,** 20
  effect on hypothalamic GLP-1 peptide and brain stem pre-proglucagon mRNA expression (mouse, rat), **269,** 331
  effect on prepro-orexin and orexin receptor expression in rat hypothalamus, **269,** 41
  endothelium-dependent arterial relaxation in rat, role of NO (human), **273,** 745
  induction of IL-1β in primary cultured glial cells (mouse), **273,** 312
  mRNA expression and secretion in adipocytes *in vitro,* stimulation by eicosapentaenoic acids (3T3-L1 cells), **270,** 343
  ob/ob mice deficient in, constitutive and inducible expression of CYP2E1, **268,** 337
  regulation of leptin receptor expression in neuroblastoma cells (human), **271,** 703
  release by mammalian tissue, regulation, **274,** 571
  role in ossification of spinal ligaments, analysis in female patients, **267,** 752
  secretion by adipose tissue *in vitro,* dual effect of insulin (human), **276,** 477
  serum levels in estrogen receptor-α-deficient male mice, **278,** 640
Leptin/leptin receptor complex
  homology modeling (human), **275,** 154
Leptin receptor
  expression on glial cells (mouse), **273,** 312
  expression in neuroblastoma cells, differential regulation by insulin and leptin (human), **271,** 703
  leptin complex with, homology modeling (human), **275,** 154
  partial gene deletion in transgenic mice
    contrasting obesity phenotypes uncovered by, **269,** 502
    effect on expression of membrane-bound isoforms, **269,** 496
Leucine zipper protein
  RBP95, binding to retinoblastoma protein (human), **275,** 141
  ZAK, cloning and expression (human), **274,** 811
L-Leucyl L-leucine methyl ester
  cell-type specificity (mouse), **272,** 687
Leukemia cells
  ACT gene expression (human), **273,** 776
  and corneal fibroblasts and epithelial cells, ion-gated sodium channel in, paradoxical effects of mineralocorticoids, **270,** 811
  differentiation and apoptosis, induction by recombinant modulin P48 derived from *Mycoplasma fermentans* (human, mouse), **269,** 284
  effects of borato-1,2-diaminocyclohexane platinum(II) (L1210 cells), **270,** 383
  effects of osteoprotegerin ligand, modulation by osteoprotegerin and calcitonin (FLG29.1 cells), **279,** 391
Leukemic mast cells
  constitutive vitamin D_3 receptor expression, and selective promotion of ICAM-3 expression by 1α,25-dihydroxyvitamin D_3 (human), **273,** 1104
Leukemic T cells, *see* T-cell leukemia cells
Leukocyte elastase inhibitor
  hinge region, mutations in, elimination of inhibitory activity (pig), **274,** 841
Leukocytes
  apoptotic cells in peripheral blood from highly pathogenic SHIV-inoculated monkey, direct detection, **268,** 868
  dialyzable extract, suppression of activity of essential transcription factors for HIV-1 gene expression in MT-4 cells, **273,** 1099
  genes with ankyrin repeat and double BTB/POZ domain, molecular cloning and characterization (human), **273,** 991
  large pool of free forms of CD18 (human), **275,** 295
  oxidative stress, induction by *Enterobacter cloacae* toxin forming oligomers and binding to proteins, **274,** 649
  peripheral blood, cysteinyl leukotriene $CysLT_2$ receptor expression (human), **274,** 316
  S100A12 expression, comparison with MRP-14 (human), **275,** 865
Leukotriene B_4 ω-hydroxylase
  CYP4F2 gene-encoded, regulation by retinoic acids in HepG2 cells, **279,** 864
Leukotriene B_4 receptor
  cDNA cloning and characterization (human), **274,** 377
  genomic organization of locus of chromosome 14 (human), **274,** 383
Leukotriene B_4 receptor-1
  first-generation monoclonal antibodies identifying, production, characterization, and application (human), **279,** 520
Leukotriene C_4
  moat1 transporting, molecular identification (rat), **275,** 831
  MRP1-mediated transport, verapamil analogs modulating, structure–activity studies, **275,** 795
leuO
  ppGpp-dependent expression in bacteria under stress, **276,** 64
Leydig cells
  model of humoral hypercalcemia of malignancy, parathyroid hormone-related peptide secretion, role of extracellular calcium-sensing receptor (rat), **269,** 427
LGP85
  accumulation in secondary lysosomes, role of Asp(470) and Glu(471) in carboxyl cytoplasmic tail (HepG2 cells), **270,** 557
Life span
  human oral keratinocytes *in vitro,* extension by retinoic acid, molecular mechanisms, **268,** 268
Ligaments
  spinal, ossification in female patients, role of leptin, **267,** 752
Light
  activation of rhodopsin in *Chlamydomonas in vivo* by disulfide bond cleavage, **275,** 286
  and phytohormones, regulation of *OsPR1b* gene (rice), **278,** 290
  wavelength-programmed solute release from photosensitive liposomes, **276,** 169
Light chain
  natural antibody, dominant role in protein antigen binding, **268,** 390
Light emission
  firefly luciferase: generation of two low-molecular-weight light-emitting species, **270,** 247
LIM1
  interaction with OTX2, **267,** 64

LIM15/DMC1
  and *RAD51,* interactions of C- and N-teminal domains (*Coprinus cinereus*), **275,** 97
LIM-homeobox3 gene
  genomic structure, chromosomal localization, and expression pattern (human), **274,** 49
LIM-kinase
  Drosophila homolog, phosphorylation of cofilin, **276,** 1178
LIMP II
  accumulation in secondary lysosomes, role of Asp(470) and Glu(471) in carboxyl cytoplasmic tail (HepG2 cells), **270,** 557
LIM proteins
  ACT gene structure and expression in tumor cell lines (human), **273,** 776
  cysteine- and glycine-rich CRP2, specific interaction with CRP2BP (human), **274,** 655
Lipid bicelles
  proteins in, molecular alignment: quantitative evaluation of effects induced in 2D COSY spectra, **272,** 694
Lipidosin
  with acyl-CoA synthetase activity, identification in adrenoleukodystrophy target tissues (mouse), **279,** 62
Lipid peroxidation
  deletion of nanodomain organization of artificial membranes by, **270,** 448
  detection in oxidized macrophages from human carotid artery and aortic atherosclerotic lesion in apolipoprotein E-deficient mice, **269,** 775
  inhibition by aqueous extract of *Ilex paraguariensis,* **269,** 357
  by oxidatively modified myoglobin, role of apoprotein-bound heme, **269,** 647
  radical-induced, inhibition by C-phycocyanin in rat liver microsomes, **275,** 20
  role in induction of tumor cell apoptosis by conjugated eicosapentaenoic and docosahexaenoic acids *in vitro* (human), **270,** 649
  in small and large phospholipid unilamellar vesicles, induced by water-soluble free radical sources, **273,** 72
Lipids
  composition in LDL, effect on kinetics of copper-induced LDL oxidation, **268,** 818
  in lipoprotein, structure, antigenicity, and presentation via human dendritic cells (*Borrelia burgdorferi*), **267,** 897
  synthesis in liver, anabolic function of type II isozyme of hexokinase (mouse), **270,** 886
Lipoamide dehydrogenase
  patients deficient in, ATP synthesis (human), **269,** 382
Lipogenesis
  induction by progestins and androgens, associated increased expression of Spot 14 in T47-D breast cancer cells, **269,** 209
Lipolysis
  substrate-dependent, induced by isoproterenol, relationship to phosphorylation of perilipin and hormone-sensitive lipase, **274,** 631
Lipoma
  patients bearing pathogenic mitochondrial DNA mutations, uncoupling protein-1 mRNA expression in, **278,** 800
Lipopolysaccharide, *see also* Endotoxin shock
  activation of matrix metalloproteinase-2 in endothelial cells via NF-κB-dependent pathway (human), **269,** 401
  activation of TNF-α gene expression in murine pancreatic acinar cells induced by, **268,** 485
  comparison with CD137 in effects on monocyte activation, survival, and proliferation, **273,** 117
  cytokine release induced by, amelioration by thymulin–Zn^{2+} (human), **274,** 500
  effects on vascular endothelial growth factor expression and secretion in rat ventricular myocytes, **268,** 657
  endothelial cells stimulated by, IL-1 release, modulation by CD39, **270,** 272
  Escherichia coli, serine proteinase in, activation of human progelatinase A/proMMP-2, **268,** 128
  Helicobacter pylori, gastric mucosal inflammatory responses to, associated upregulation of endothelin-converting enzyme-1, **267,** 801
  ICAM-1 expression in bovine aortic endothelial cells induced by, suppression by cerivastatin via Rho GTPase, **269,** 97
  induction of cytokine gene expression in peritoneal macrophages, effects of cholera toxin and 8-bromo-cAMP (mouse), **269,** 570
  macrophages stimulated by, cyclooxygenase-2 expression, upregulation by prostaglandin E_2 (RAW 264.7 cells), **272,** 744
  monocytes stimulated by, cyclooxygenase-2 expression, modulation by cAMP, prostaglandin E_2, and NSAIDs (human), **278,** 790
  and nitric oxide, induction of MIP-1γ gene transcription in ANA-1 murine macrophages, **277,** 617
  S-nitrosothiol formation in blood of rats treated with, **273,** 22
  Porphyromonas gingivalis, induction of Toll-like receptor 4-mediated signal pathway in gingival fibroblasts (human), **273,** 1161
  signaling via Toll-like receptor 4–MD-2, regulatory roles of CD14 and phosphatidylinositol, **268,** 172
  stimulation of TNF-α secretion by macrophages, augmentation by IgG-coated erythrocytes, **271,** 70
  TNF-α and IL-6 production in mouse peritoneal neutrophils induced by, differential modulation by prostaglandin E_2 receptors EP2 and EP4, **278,** 224
  tolerance and sensitization in Kupffer cells, caused by acute ethanol, role of interleukin-1 receptor-associated kinase (mouse), **277,** 686
Lipoprotein lipase
  gene expression in tissues of rat model with visceral obesity and postprandial hyperlipidemia, **277,** 423
  human, C_2C_{12} muscle cells transfected with, increased intracellular triglyceride in, **270,** 997
  interaction with heparin and lipoproteins, role of C-terminal domain, **271,** 15
Lipoproteins
  binding by T-cadherin glycosyl phosphatidylinositol anchor (human), **276,** 1240
  disturbed profile in estrogen receptor-α-deficient male mice, **278,** 640
  interaction with lipoprotein lipase, role of enzyme C-terminal domain, **271,** 15
  lipid component, structure, antigenicity, and presentation via human dendritic cells (*Borrelia burgdorferi*), **267,** 897
Liposomes
  catechin monomer and procyanidin antioxidant activity (human), **276,** 945
  HVJ viral coat–liposome complex containing human insulin vector, systemic administration, effect on glucose level of diabetic mouse, **273,** 666
  large, electric field-mediated DNA encapsulation into, **267,** 838
  photosensitive, wavelength-programmed solute release from, **276,** 169
  with recombinant fragments of platelet membrane glycoprotein Ibα, targeting to immobilized von Willebrand factor under flow conditions, **270,** 755
Lipotransfection
  degraded DNA, induction of apoptosis and inhibition of mitosis (Rat-1 cells), **270,** 406
Lipoxygenase
  isozymes, activation, induction of apoptosis in erythroleukemia and neuroblastoma cells (human), **272,** 345
  pathway of arachidonate cascade, activation, in fatty acid amide hydrolase inhibition by 2-arachidonoylglycerol and anandamide, **278,** 576
5-Lipoxygenase
  expression by colorectal carcinoma Caco-2 cells during butyrate-induced differentiation, **268,** 778

- role in cholesterol modulation of vascular reactivity to endothelin-1 (rat), **274,** 553

Liquid nitrogen freezing
- in EPR detection of DEPMPO–superoxide radicals, **275,** 895

Lithium
- induction of store-operated Ca^{2+} influx in human platelets, **267,** 546

Liver
- acute failure, inhibition of Stat3 in rats with, **273,** 129
- AQP9 localization (rat), **276,** 1118
- biliary secretion of phospholipids, role of nonvesicular transport (rat), **268,** 790
- *BMAL2* mRNA expression (human), **275,** 493
- with carbon tetrachloride-induced injury, proteins from, interaction with albumin mRNA (rat), **273,** 261
- carbon tetrachloride-induced lipid peroxidation *in vivo* and *in vitro,* inhibition by C-phycocyanin (rat), **275,** 20
- carnitine palmitoyltransferase I gene transcription, regulation by thyroid hormone (rat), **279,** 81
- comprehensive gene expression profile (human), **269,** 110
- constitutive proteasome, immunoproteasome, and PA28 distribution (rat), **277,** 348
- copper accumulation, induction of DNA strand breaks in liver cells of Long-Evans Cinnamon strain rats, **276,** 174
- CYP2B2 gene phenobarbitone responsiveness *in vivo,* role of 5′-proximal DNA region (rat), **268,** 734
- CYP2B9 and CYP2B10 activation in response to β-estradiol, comparison in male C57BL/6, DBA/2, and hybrid B6D2F1 mice, **279,** 288
- developing, transient expression of megakaryocyte-derived protein immunoreactive with antiserum to cartilage oligomeric matrix protein (rat), **271,** 440
- development, cell density-dependent regulation by gp130-independent pathway (mouse), **277,** 152
- embryonic development onset, role of *Hex* (mouse), **276,** 1155
- endogenous H_2O_2, detection in bile of selenium-deficient rat, **271,** 699
- ENT1 gene expression (mouse), **277,** 200
- epidermal growth factor receptor internalization and endosomal trafficking in response to EGF, delay in waved-2 mouse, **267,** 881
- ergot alkaloid metabolism by cytochrome P450 (bovine), **274,** 746
- expression of homologous rat SULT1C2 sulfotransferases, **272,** 242
- fibrosis induced by pig serum, prevention by $GdCl_3$-enhanced production of interstitial collagenase by Kupffer cells (rat), **267,** 290
- and heart and kidney and suprachiasmatic nucleus, differential regulation of *BMAL1* mRNA in *Clock* mutant mice, **268,** 164
- 11β-hydroxysteroid dehydrogenase, downregulation by PPARα agonists (mouse), **279,** 330
- immunization of malaria DNA vaccine into, with gene gun, protection against lethal challenge of *Plasmodium berghei* sporozoite, **271,** 107
- ischemia/reperfusion-induced injury, role of NO synthase (mouse), **276,** 851
- α-ketoisocaproate catabolism (human, rat), **276,** 1080
- lead nitrate-induced hyperplasia, gene expression of neurotrophins and receptors (rat), **275,** 472
- lethal failure, prevention by adenovirus-mediated hepatocyte growth factor gene transfer (rat), **278,** 338
- lipid synthesis, anabolic function of type II isozyme of hexokinase (mouse), **270,** 886
- lysosome acidification, effect of cholera toxin (rat), **274,** 717
- membrane fraction, detection of heterooligomer of inositol 1,4,5-trisphosphate receptor types 1 and 2 with tetrameric structure (rat), **267,** 928
- mitochondrial permeability transition pore activation, enhancement by aging (mouse), **273,** 603
- nuclear factor I binding motif, role in transcriptional regulation of regucalcin gene (rat), **269,** 270
- nuclear protein binding to TTGGC sequence in rat regucalcin gene promoter, intracellular signaling factors-enhanced, **279,** 275
- *Peroxiredoxin V* gene short transcript expression (mouse), **270,** 356
- polyamine distribution (rat), **271,** 559
- polyethylenimine uptake and intracellular fate *in vivo* (rat), **278,** 414
- proteasome activity, inhibition by alcohol, effect of ethanol-induced CYP2E1 (mouse), **279,** 23
- regenerating
  - models, gene expression in, analysis (rat), **272,** 591
  - nuclear regulation, role of regucalcin, review, **276,** 1
- regeneration
  - after partial hepatectomy and D-galactosamine-induced injury, connective tissue growth factor gene expression during, kinetics (rat), **277,** 448
  - antiapoptotic signaling during, role of rapid activation of protein kinase B/Akt (mouse), **279,** 974
  - ATA2 transport during, posttranscriptional regulation (rat), **278,** 729
  - early response phase of, genes differentially expressed in, identification and characterization (rat), **278,** 318
  - enhanced prenyltransferase activity and Rab content during (rat), **269,** 226
- regulation of genes for iNOS and urea cycle enzymes during endotoxin shock (rat), **268,** 221
- remodeling, regulation and significance of hepatocyte-derived matrix metalloproteinases in, analysis (mouse), **272,** 681
- response to PPARα activation, comparison with heart and kidney (mouse), **278,** 250
- RNA profiles during development, alterations in metallothionein-null mice, **270,** 458
- targeted knockout of *CYP1a1* gene, effect on constitutive expression of other genes in [*Ah*] battery (mouse), **267,** 184
- tumorigenesis in SV40 T/t antigen transgenic mice, association with *mac25* gene methylation and downregulation, **267,** 109
- tumors, restriction landmark genomic scanning for gene amplification: overexpression of cyclin A2 (mouse), **274,** 188
- zinc response via metallothionein induction after tumor transplantation (mouse, rat), **270,** 1140

Liver cells
- Chang, osmotic response element binding protein, purification, identification, and characterization, **270,** 52
- cytoplasmic inhibitor of elongation factor 2 ADP-ribosylation catalyzed by diphtheria toxin or endogenous transferase, detection (rat), **269,** 553
- insulin receptor substrate 3 in, characterization (rat), **272,** 953
- selective transcriptional regulations by hepatitis B viral X protein (human), **272,** 525
- stellate
  - collagen gel contraction by, enhancement by lysophosphatidic acid: association with Rho-kinase (rat), **277,** 72
  - NF-κB in, regulation during cirrhosis, role of p65 (rat), **273,** 546

Liver epithelial cells
- cyclooxygenase-2 gene expression, induction by 4-hydroxy-2-nonenal (rat), **273,** 437
- RLE, oncogene-transformed, VEGF expression in, differential regulation by ERK and p38 kinase pathways, **270,** 108

Lnk family adaptor proteins
- APS as member of, molecular cloning (mouse), **272,** 45

Locus control region
- effect of multiple copies of β-lactoglobulin promoter, **272,** 284

Long-term potentiation
- tetraethylammonium-induced, in hippocampal slices, associated changes in free fatty acids and acyl-CoAs (rat), **267,** 208

Losartan
- effect on LOX-1 expression in hypercholesterolemia (rabbit aorta), **276,** 1100
- inhibition of oxidized LDL uptake by monocyte-macrophages from hypercholesterolemic patients, **273,** 417

Macrophages (*continued*)
  LPS-stimulated TNF-α secretion and TNF-α mRNA levels and stability, augmentation by IgG-coated erythrocytes (RAW 264.7 cells), **271,** 70
  matrix metalloproteinase-12 induction and regulation by cytokines and CD40 signaling (human), **269,** 808
  MIP-1γ gene transcription, induction by endotoxin and NO (murine ANA-1 cells), **277,** 617
  monocyte-derived
    advanced glycation end product-induced gene expression *in vitro* (human), **277,** 368
    oxidized, from human carotid artery and aortic atherosclerotic lesion in apolipoprotein E-deficient mice, detection of lipid peroxides and oxysterols, **269,** 775
  peritoneal
    lectin-like oxidized LDL receptor-1 expression, increase by TGF-β_1 (mouse), **272,** 357
    L-leucyl L-leucine methyl ester specificity to, analysis (mouse), **272,** 687
    LPS-induced cytokine gene expression, effects of cholera toxin and 8-bromo-cAMP (mouse), **269,** 570
  sterol-sensitive ATP-binding cassette transporter ABCA7 identification (human), **273,** 532
  TNF-α induction by macromolecular glycolipids from *Enterococcus hirae* (mouse), **273,** 164
  uptake of elastase-modified human high-density lipoproteins (mouse), **271,** 386
maf-1 gene
  developmental mRNA expression in kidney, *in situ* hybridization histochemical study (rat), **272,** 777
MAG-283
  effects on microvascular endothelial cell growth (human), **274,** 780
MAGI-1
  interaction with β-catenin and association with cell–cell adhesion structures, **270,** 903
Magnesium
  destabilization of triple helixes formed from pyrimidine morpholino oligonucleotides, **270,** 363
  efflux induced by high potassium levels in thymocytes (rat), **268,** 673
  ions, distribution in human epidermis, visual imaging, **272,** 134
  requirement in folding of antigenomic δ ribozymes, **270,** 600
Magnetic fields
  effect on crystal quality in crystallization of proteins, **275,** 274
  extremely low frequency
    enhancement of X-ray-induced mutations in NF-κB-inhibited cells, **276,** 238
    suppression of X-ray-induced transformation in C3H10T1/2 cells, **271,** 323
  stimulation of transposition in *E. coli* via induction of DnaK/J synthesis, **270,** 745
Magnetic particles
  intracellular, from *Magnetospirillum* sp., *mpsA* gene encoding protein associated with, cloning and characterization, **268,** 932
Magnetic resonance spectroscopy, *see* Nuclear magnetic resonance
Magnetization force
  effect on crystal quality in crystallization of proteins, **275,** 274
Magnetometry
  analysis of cell mechanics in single vinculin-deficient F9 cells with magnetic tweezer, **277,** 93
Magnetospirillum sp.
  intracellular magnetic particles, *mpsA* gene encoding protein associated with, cloning and characterization, **268,** 932
MAGUK, *see* Membrane-associated guanylate kinase
MAJN
  binding to Jak3 and inhibition of apoptosis induced by IL-2 withdrawal, **270,** 267
Major histocompatibility complex
  class I antigen, interactions
    with CD23-derived peptides having inverse RGD sequence, **267,** 686
    with its antigen peptide, NMR study, **278,** 609
  class I region, mapping of RBCC-B30.2 protein: testis-abundant finger protein (human), **276,** 45
  class II genes, CIITA transactivating, and HIV-1 Tat, transcriptional activities, reciprocal modulation, **279,** 494
Major sperm protein domain
  plant VAP33 homologue with, molecular cloning and characterization, **270,** 286
Major vault protein
  gene promoter, cloning and initial analysis (human), **278,** 125
Malaria
  DNA vaccine, immunization into liver by gene gun, protection against lethal challenge of *Plasmodium berghei* sporozoite, **271,** 107
Malic enzymes
  competitive inhibition by lanthanide ions (human), **274,** 440
Malignancy
  glioma, inhibition by HGF/NK2 antagonist of scatter factor/hepatocyte growth factor, **273,** 287
Mammalian expression systems
  lysophosphatidic acid effect on PSP24s, **276,** 957
Mammalian target of rapamycin, *see* mTOR
Mammary epithelial cells
  effects of multiple copies of β-lactoglobulin promoter (mouse), **272,** 284
Mannose-binding lectins
  in analysis of accessibility of high-mannose glycans in HIV-1 gp120, **274,** 455
  gene promoter variants, binding properties (human), **275,** 617
α-D-Mannosidase
  porcine 135-kDa enzyme, mouse homologue of, expression pattern, **272,** 951
α1,3-Mannosyltransferase AceA
  phytanyl-pyrophosphate-linked substrate (*Acetobacter xylinum*), **272,** 290
MAP3
  identity with MAP4 determined by molecular characterization (rat), **268,** 306
MAP4
  identity with MAP3 determined by molecular characterization (rat), **268,** 306
MAP kinase, *see also specific MAP kinases*
  activation
    anchorage-independent, through phosphatidylinositol 3-kinase by insulin-like growth factor I in MCF-7 cells, **272,** 111
    by angiotensin II in vascular smooth muscle cells, effects of thiazolidinediones, **273,** 1144
    by insulin, dependence on phosphatidylinositol 3-kinase in adipocytes (rat), **274,** 845
    neurotensin-mediated, in pancreatic cancer cell line MIA PaCa-2, **269,** 704
  negative regulation by natriuretic peptide receptor A, role of cGMP-dependent protein kinase (rat), **271,** 374
  role in cholesterol modulation of vascular reactivity to endothelin-1 (rat), **274,** 553
  role in enhancement of TNF-α-induced apoptosis by immobilized arginine-glycine-aspartate (rat), **277,** 293
  role in TGF-β_1 modulation of urokinase production and cellular invasiveness in transformed keratinocytes, **273,** 521
MAP kinase cascade
  expression increase, association with promotion of fibroblast growth by air exposure, **270,** 961

- MAP kinase kinase
  - inhibition, anti-inflammatory response *in vivo* due to, **268,** 647
- MAP kinase phosphatase
  - as early responsive gene during induction of cerulein hyperstimulation pancreatitis (rat), **276,** 680
- MAP kinase phosphatase-1
  - activation in endothelial cells, enhancement by adhesion to fibronectin (human), **273,** 539
- MARCKS
  - retinoic acid-induced downregulation in immortalized hippocampal cells, alteration by myristoylation, **276,** 183
- Markov chain analysis
  - glutathione reductase amino acid sequence (human), **268,** 823
- Mass spectrometry
  - galactosylation and sialylation of serum IgA1 Fc O-glycosylated hinge peptides in IgA nephropathy (human), **271,** 268
  - HPLC-MS/MS, simultaneous measurement of 8-oxo-2′-deoxyguanosine and 8-oxo-2′-deoxyadenosine by, **277,** 764
- Mast cells
  - bone marrow-derived, internalization and degradation of type IIA phospholipase A_2 (mouse), **276,** 667
  - functional effects of diphenyleneiodonium (RBL-2H3 cells), **276,** 742
  - IgE-mediated activation, effects of polymorphisms in FcϵRI β chain (mouse), **273,** 765; *erratum,* **274,** 880
  - IgE receptor-triggered exocytosis, role of Hrs binding protein (RBL-2H3 cells), **277,** 752
  - leukemic, constitutive vitamin D_3 receptor expression, and selective promotion of ICAM-3 expression by 1α,25-dihydroxyvitamin D_3 (human), **273,** 1104
  - secretory functions in, α-melanocyte-stimulating hormone as selective inducer (HMC-1 cells, human skin), **278,** 14
- Mast cell tryptase
  - cleavage of proteinase-activated receptor-2 (human), **275,** 77
- Maternally inherited diabetes and deafness syndrome
  - mitochondrial DNA variations in patients with, **277,** 771
- Matrix Gla protein
  - regulation by mechanism functionally related to Ca^{2+}-sensing receptor, **277,** 736
- Matrix metalloproteinase
  - activity in endothelial cells, enhancement by HGF (human), **272,** 900
  - expression in articular cartilage, effects of ceramide (rabbit), **267,** 438
  - expression in glioma cell line, effects of bcl-2-related proteins (rat), **273,** 411
  - hepatocyte-derived, regulation and significance in liver remodeling (mouse), **272,** 681
  - membrane type-2, defect in cell-associated activation of progelatinase A (human), **267,** 796
  - sulfodiimine and thiol inhibitors of, effects on microvascular endothelial cell growth (human), **274,** 780
- Matrix metalloproteinase-2
  - activation by *Clostridium difficile* toxin B in smooth muscle cells (bovine), **277,** 43
  - activation by LPS in endothelial cells via NF-κB-dependent pathway (human), **269,** 401
  - in bone cells, stimulation by human growth hormone via IGF-I (rabbit), **268,** 875
  - content in brain, estimation and effect of focal ischemia (rat), **278,** 803
  - induction concomitant with cell invasion, enhancement by vacuolar ATPase 16-kDa subunit overexpression (10T1/2 cells), **278,** 390
  - secretion and expression by HUVECs, inhibition by silymarin, **276,** 371
- Matrix metalloproteinase-9
  - in bone cells, stimulation by human growth hormone via IGF-I (rabbit), **268,** 875
  - content in brain, estimation and effect of focal ischemia (rat), **278,** 803
  - secretion by human peripheral lymphocytes and U937 cells *in vitro,* effects of *p*-nonylphenol, **279,** 270
  - secretion in THP-1 monocytic cells, reduction by activation of PPARα or PPARγ, **267,** 345
- Matrix metalloproteinase-12
  - induction and regulation by cytokines and CD40 signaling in monocyte/macrophages (human), **269,** 808
- Matrix metalloproteinase-13
  - GdCl$_3$-enhanced production in Kupffer cells, prevention of pig serum-induced rat liver fibrosis, **267,** 290
- Matrix or scaffold attachment region
  - animal and plant, transcription modulation by, **279,** 282
- Maturation
  - bone marrow neutrophils, suppressive effects of swainsonine and *N*-butyldeoxynojirimycin (human), **269,** 219
  - dendritic cells, inhibition by vitamin D analogs (mouse), **270,** 701
  - monocyte-derived dendritic cells, analysis by microarray hybridization (human), **275,** 731
  - oocyte, associated Nek2 expression and localization (pig), **279,** 799
- M cells
  - intestinal, human model, expression of specific markers and particle transport in, **279,** 808
- Mcl-1a
  - nuclear, cloning and characterization in zebrafish embryo, **279,** 725
- MCP-1
  - expression
    - in human aortic SMCs, effects of pyrrolidine dithiocarbamate, **276,** 88
    - stimulation by TNF-α, mediation by Akt/PKB signal transduction pathway (HUVEC), **276,** 791
    - in vascular smooth muscle cells, effect of nonenzymatically glycated albumin (rat), **269,** 666
  - induction by macrophage–mesangial cell interactions via NF-κB activation (mouse), **269,** 309
  - induction and regulation of matrix metalloproteinase-12 in monocyte/macrophages (human), **269,** 808
  - keratinocyte-derived, expression, modulation by NO *in vitro* and during cutaneous wound repair *in vivo* (mouse), **274,** 689
  - upregulation of IL-1β expression in monocytes (human), **277,** 37
- MD-2
  - LPS signaling via Toll-like receptor 4–MD-2 complex, regulatory roles of CD14 and PtdIns, **268,** 172
- mDia1
  - activation and action in formation of parallel stress fibers in MDCK cells, mechanisms, **274,** 68
  - Rho-dependent binding to Src homology 3 domain-containing IRSp53/BAIAP2, **271,** 626
- MDP77
  - cloning and promotion of neurite outgrowth (chicken), **269,** 564
- MDR1, *see* P-glycoprotein
- Mechanical force
  - activation of prostacyclin synthesis in *Tetrahymena thermophila,* **279,** 635
  - regulation of vascular endothelial growth factor in intact conduit vessels (human), **272,** 490
- Mechanical loading
  - low-intensity pulsed ultrasound, anabolic response of mouse ST2 bone marrow-derived stromal cells, **268,** 216
- Mechanical properties
  - single protein, dynamic measurement, **272,** 55
- Mechanical stress
  - vinculin-deficient F9 cells, single-cell analysis with magnetic tweezer, **277,** 93

Lovastatin
  modulation of LDL-induced IL-6 expression in human mesangial cells, **267,** 536
Low-density lipoprotein
  acetylated, binding to vimentin, **267,** 49
  apoB100 Pro and Arg side-chain residues, iron-mediated oxidation, 5-hydroxy-2-aminovaleric acid as specific marker, **270,** 852
  catechin monomer and procyanidin antioxidant activity (human), **276,** 945
  copper-induced oxidation, kinetics, dependence on lipid composition and antioxidant content, **268,** 818
  effect on oxidative stress and tumor suppressor p53, in MRC5 fibroblasts (human), **276,** 718
  endosomes containing, trafficking in brain astroglial cells, digital fluorescence imaging, **269,** 25
  membrane domain GEM involved in cell adhesion and motility, effects of glycosylation of α3 and α5 integrins and CD82 (ldlD 14 cells), **279,** 744
  native and oxidized, effects on IL-6 expression in human mesangial cells and modulation by lovastatin, **267,** 536
  oxidation by oxidatively modified myoglobin, role of apoprotein-bound heme, **269,** 647
  oxidized
    binding to vimentin, **267,** 49
    induction of caspase-dependent apoptosis in THP-1 cells, **273,** 948
    toxicity, protective effects of smooth muscle cell preconditioning by cyclopentenone prostaglandins (human), **269,** 327
    uptake by monocyte-macrophages from hypercholesterolemic patients, inhibition by losartan, **273,** 417
  uptake, and oxidative stress responses, differential effects of fibrillar IAPP in insulin-producing cell lines, **267,** 619
Low-density lipoprotein receptor
  LR11, differential expression during proliferation and differentiation of cultured neuroblastoma cells, **275,** 365
Low-density lipoprotein receptor-related protein
  as component of midkine receptor, **270,** 936
  role in neuronal cell apoptosis by receptor-binding domain of ApoE4, **278,** 633
LR11
  differential expression during proliferation and differentiation of cultured neuroblastoma cells, **275,** 365
LRF-1/ATF3
  role in repression of TNF-α-induced E-selectin expression by PPAR activators (human), **275,** 406
LTA
  mode of recognition of L-fucose (*Lotus tetragonolobus*), **268,** 262; *erratum,* **270,** 329
Luciferase, *see also* Firefly luciferase
  human p27^{Kip1} promoter-driven expression in H82 cells, activation by IFN-α 2b, **269,** 31
Luminescence
  retention in firefly luciferase lacking cysteine, **267,** 394
Lung
  adrenomedullin receptor gene expression, decrease during sepsis (mouse), **271,** 197
  arteriovenous carboxyhemoglobin gradient measurement after injury to, technical artifact in, elimination by special calibration, **278,** 447
  constitutive proteasome, immunoproteasome, and PA28 distribution (rat), **277,** 348
  CYP2A expression at high levels in suncus lung and activation of 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone, **269,** 393
  CYRL expression (rat), **267,** 697
  ENT1 gene expression (mouse), **277,** 200
  epithelium, expression of functionally distinct forms of NKXX2.1 protein, **270,** 462
  extracellular superoxide dismutase in, purification and characterization (mouse), **275,** 542
  fetal, differential expression of *WNT-2B* isoforms (human), **275,** 209
  HSP72 induction by pancreatitis, role of neutrophils and xanthine oxidases (rat), **273,** 1078
  LIM-homeobox3 gene expression (human), **274,** 49
  microvascular endothelial cells, functional expression of NAD(P)H oxidase p47 (mouse), **278,** 584
  polyethylenimine uptake *in vivo* (rat), **278,** 414
  tumor metastasis, regulation by thromboxane A_2 (mouse), **267,** 245
Lung cancer
  MRP1 mRNA, detection by *in situ* RT-PCR (human), **275,** 466
Lung cancer cells
  antibiotic activity of CRAMP analogues without hemolytic effect, **275,** 904
  antisense tumor therapy by targeting Polo-like kinase 1 mRNA (A549 cells), **269,** 352
  carrier-mediated uptake of rhodamine 123 and implications for use in MDR research (MV522/Q6 cells), **279,** 124
  ceramide induction of COX-2 and PGE$_2$ in, role of NF-κB activation (A549 cells), **277,** 675
  effects of borato-1,2-diaminocyclohexane platinum(II) (A549 cells), **270,** 383
  eotaxin and *CCR3* induction by ionizing radiation (A549 cells), **269,** 546
  growth inhibition
    by peroxisome proliferator activated receptor-γ agonists via induction of apoptosis (human), **270,** 400
    selective, by peptides derived from retinoblastoma protein (human), **267,** 71
  Na$^+$-K$^+$-pump activity, regulation by CFTR-mediated anion conductance (Calu-3 cells), **274,** 230
  resistance to TNF-α-induced apoptosis, role of NF-κB activation (NCI-H157 cells), **273,** 140
  small cell and and non-small cell, LAMB3 and LAMC2 gene expression (human), **275,** 440
Lung epithelial cells
  Cdk4-overexpressing, TGF-β sensitivity, restoration by pyridopyrimidines (mink), **272,** 794
Lung-resistance-related protein
  gene promoter, cloning and initial analysis (human), **278,** 125
Lung tumor cells
  vinca alkaloid-resistant DC-3F Chinese hamster cells, decreased vincristine binding to tubulin in, association with overexpression of α and β tubulin isoforms, **269,** 21
Luteinizing hormone
  preovulatory surge, role of prolactin-releasing peptide (rat), **279,** 35
  type-I pituitary adenylate cyclase activating polypeptide receptor gene expression induced by, in granulosa cells, mediation by progesterone receptor activation (rat), **277,** 270
Lutetium
  Lu^{3+}, competitive inhibition of malic enzymes (human), **274,** 440
LXR
  regulation of ABC1 gene expression and apoA-I-mediated cholesterol efflux (RAW 264.7 cells), **274,** 794
LXXLL-like motifs
  presence in Gadd45 family genes, **272,** 193
LY171883
  effect on vascular endothelial growth factor expression in vascular smooth muscle cells (human), **271,** 571
Lymphoblasts
  from Scott syndrome patients, store-operated Ca^{2+} entry in, relationship to phosphatidylserine exposure, **279,** 354

Lymphocytes
- development and function, role of adenosine deaminase, review, **272,** 311
- glucocorticoid-induced apoptosis, review, **279,** 307
- growth, tripeptide inhibiting, isolation: *N*-acetyl-Glu-Ser-GlyNH$_2$ (canine spleen), **277,** 562
- identification of nuclear ribonucleoprotein particle containing incompletely spliced HIV-1 RNAs (H9/IIIB cells), **268,** 509
- infiltration of Langerhans islets in pancreas and salivary glands of NOD mice, attenuation by EC3 disintegrin from *Echis carinatus,* **267,** 413
- mitochondrial permeability transition pore activation, enhancement by aging (mouse), **273,** 603
- *mu* opioid receptors, upregulation by morphine (human, monkey), **279,** 621
- oxidative stress-induced apoptosis in human PBMCs, protective activity of C60 carboxyfullerene, **277,** 711
- peripheral blood
  - dominant expression of long isoform splice variant of caspase-8 (human), **272,** 877
  - secretion of 92-kDa gelatinase *in vitro,* effects of *p*-nonylphenol, **279,** 270
- polyamine distribution (bovine), **271,** 559

Lymphocytic leukemia cells
- growth and apoptosis, effects of redox-inactive thioredoxin (WEHI7.2 cells), **274,** 136

Lymphoid cells
- sialyl 6-sulfo Lewis X recognition by P- and E-selectins (Namalwa KJM-1 cells), **278,** 90

Lymphoma cells
- proliferation, effect of tripeptide *N*-acetyl-Glu-Ser-GlyNH$_2$ from canine spleen (Molt cells, Ramos cells), **277,** 562

Lyn
- phosphorylation of prion protein, **271,** 337

Lysine
- GDP-fucose-protected pyridoxal-5′-phosphate/NaBH$_4$-sensitive residue in α1→3fucosyltransferases, correspondence to Lys^{300} in FucT-IV, **273,** 870
- lactam derivatives of α-melanotropin substituted with, **272,** 23
- reductive methylation in pokeweed antiviral protein-II, X-ray crystallography after, **275,** 549

Lysine peptides
- interactions of cytochrome-*c* peroxidase with, **268,** 395

Lysophosphatidic acid
- enhancement of collagen gel contraction by hepatic stellate cells, association with Rho-kinase (rat), **277,** 72
- HOFNH30 as G-protein-coupled receptor for, identification from cDNA library (human), **273,** 805
- in mammalian expression systems, effect on PSP24s, **276,** 957

Lysosomes
- degradation, proprotein convertase PC2-7B2, by cathepsin-B fusion protein misrouting (mouse), **276,** 594
- hepatic, acidification, effect of cholera toxin (rat), **274,** 717
- localization of two homologous rat SULT1C2 sulfotransferases to, **272,** 242
- polyethylenimine accumulation *in vivo* (rat), **278,** 414
- PSAPs, role in APCs of *Leishmania major*-infected mouse, **276,** 693
- role in translocation of FGF to endothelial cell nucleus (human), **273,** 551
- secondary, LGP85/LIMP II accumulation, role of Asp(470) and Glu(471) in carboxyl cytoplasmic tail (HepG2 cells), **270,** 557

M

M83
- molecular cloning and chromosomal mapping: five-span transmembrane protein gene (human, mouse, rat), **276,** 244

mac25 gene
- methylation and downregulation, association with liver tumorigenesis in SV40 T/t antigen transgenic mice, **267,** 109
- promoter, characterization (mouse), **279,** 251

α_2-Macroglobulin receptor/LDL receptor-related protein
- trichosanthin binding to and entry into cells via, analysis (JAR cells), **270,** 453

Macromolecular activators of phagocytosis from platelets
- production by glycoprotein 1bα-bound thrombin acting as serine protease (human), **270,** 377

Macrophage chemoattractant protein-1, *see* MCP-1

Macrophage colony-stimulating factor
- M-CSF/CSF1, mRNA and protein expression during osteoblast development (mouse), **274,** 249
- plasma membrane-anchored uncleavable, biological characterization (human), **276,** 304

Macrophage foam cells
- HDL-induced cholesterol efflux from, effects of plasmin and kallikrein, **277,** 552

Macrophage inflammatory protein-1γ
- gene transcription in ANA-1 murine macrophages, induction by endotoxin and NO, **277,** 617

Macrophage inflammatory protein-2
- keratinocyte-derived, expression, modulation by NO *in vitro* and during cutaneous wound repair *in vivo* (mouse), **274,** 689
- tumor necrosis factor α-induced expression, inhibition by dexamethasone (mouse), **271,** 364
- viral, identification as ligand for GPR5/XCR1, **268,** 938

Macrophage-like cells
- activation by granulocytin (mouse), **275,** 850

Macrophages
- ABC1 gene expression and apoA-I-mediated cholesterol efflux, regulation by LXR (RAW 264.7 cells), **274,** 794
- activated, nitric oxide production, inhibition by chitinous materials (RAW 264.7 cells), **271,** 229
- alveolar, G$_s$ and G$_{i3}$ activation by VIP (rat), **272,** 922
- antitumor activity, selective activation by muramyl dipeptide delivery with polynucleotide-based carrier recognized by scavenger receptors, **268,** 772
- arachidonic acid release, role of cytosolic group IV phospholipase A$_2$ phosphorylation (P388D$_1$ cells), **267,** 145
- carbonic anhydrase II gene expression, regulation by hormonal nuclear receptors (HD11 cells), **271,** 481
- cyclooxygenase-2-dependent prostaglandin E$_2$ synthesis, inhibition by salicylate metabolites (mouse), **274,** 197
- and dendritic cells, differentiation of human mononuclear phagocytes to, differential expression of NF-κB during, **268,** 99
- differentiated, VEGF production, upregulation by prostaglandins via distinct pathways (U937 cells), **273,** 485
- FcγR-mediated phagocytosis, PKC-α role (RAW 264.7 cells), **276,** 472
- GPI-anchored HDL-binding protein on, identification (human), **272,** 864
- hepatic, prostanoid synthases, coupling of cyclooxygenase 1 and 2 (rat), **276,** 488
- inducible nitric oxide synthesis, inhibition by glucosamine (RAW 264.7 cells), **279,** 234
- inducible NOS mRNA expression, inhibition
  - by acetaminophen: NF-κB regulation by acetaminophen and salicylates (RAW 264.7 cells), **272,** 758
  - by nitric oxide (RAW 264.7 cells), **271,** 353
- infected with *Mycobacterium aurum* expressing firefly luciferase: bioluminescence assay for screening of antimycobacterial drugs, **279,** 457
- interaction with mesangial cells, induction of monocyte chemoattractant protein-1 expression via NF-κB activation (mouse), **269,** 309
- LPS-stimulated, cyclooxygenase-2 expression, upregulation by prostaglandin E$_2$ (RAW 264.7 cells), **272,** 744

- Mechanical stretch
  - cyclical, regulation of connexin 43 gene expression in neonatal rat cardiomyocytes, **267,** 551; *erratum,* **273,** 1180
- Mechanotransduction
  - effect of pulsating fluid flow on prostaglandin G/H synthase-2 mRNA expression in osteocytes and other osteogenic cells (chicken), **268,** 414
- Mecoprop
  - in generation of high-affinity scFvs from single rabbit immunized with multiple haptens, **268,** 398
- Megakaryocytes
  - protein immunoreactive with antiserum to cartilage oligomeric matrix protein, transient expression in developing liver (rat), **271,** 440
- Megalin
  - trichosanthin binding to and entry into cells via, analysis (JAR cells), **270,** 453
- MEK inhibitor
  - U0126, associated anti-inflammatory response *in vivo* (mouse ear), **268,** 647
- MEKK1
  - dominant-negative, attenuation of CHO cell apoptosis due to axin overexpression, **272,** 144
- Melanin
  - reversible binding and inhibition of thermostable DNA polymerase, **271,** 726
- Melanin-concentrating hormone
  - and orexin, differential gene regulation in agouti-related protein/melanocortin-4 system (mouse, rat), **268,** 88
  - stimulation of insulin release in RINm5F and CRI-GI cell lines, **275,** 709
- Melanin-concentrating hormone receptor
  - expression in insulin-producing cells, **275,** 709
- Melanocortin-4
  - effect on melanin-concentrating hormone and orexin gene expression after icv injection (mouse, rat), **268,** 88
- Melanocytes
  - sulfatase and sulfotransferase gene superfamilies, expression profiling (human), **277,** 236; *erratum,* **279,** 306
- α-Melanocyte-stimulating hormone, *see* α-Melanotropin
- Melanogenesis
  - agouti signal protein involved in, immunohistochemical localization in murine skin, **270,** 176
  - inhibition: phenoloxidase inhibitor from cuticle of *Manduca sexta,* **268,** 379
- Melanoma cells
  - ACT gene expression (human), **273,** 776
  - coculture with bone marrow cells, induction of osteoclast differentiation factor and formation of osteoclast-like cells (B16 cells), **267,** 632
  - cytotoxicity of recombinant bFGF–rViscumin fusion proteins (B16 cells), **277,** 499
  - expression and upregulation of alternatively spliced transcripts of melastatin (human), **279,** 53
  - metastasis, suppressive mechanism of salmosin (B16 cells), **275,** 169
  - stress-activated protein kinase p38γ activation, induction by cisplatin and UV radiation (human), **278,** 724
- α-Melanotropin
  - lactam derivatives, analogs with basic and acidic residues, **272,** 23
  - as selective inducer of secretory functions in human mast cells, **278,** 14
- Melastatin
  - alternatively spliced transcripts, expression and upregulation in human melanoma cells, **279,** 53
- Melatonin
  - oxidation by activated neutrophils, catalysis by myeloperoxidase (human), **279,** 657
  - protective effect against homocysteine-induced vasoconstriction of human umbilical artery, **277,** 470
- Melibiose carrier
  - *Escherichia coli,* interaction between helix XI and helices I, II, and V in, **268,** 409
- Meltrin β
  - gene cloning, mapping, and regulatory region analysis (mouse, rat), **270,** 522
- Membrane-associated guanylate kinase
  - MAGI-1, interaction with β-catenin and association with cell–cell adhesion structures, **270,** 903
- Membrane-associated guanylate kinase-interacting protein-1
  - association with Raf-1 (rat), **270,** 538
- Membrane association
  - presynaptic cytomatrix protein Bassoon (rat), **275,** 43
- Membrane fluidity
  - in erythrocytes in essential hypertension, effects of NO, EPR study (human), **275,** 946
  - review of transcriptional homeostatic control of membrane lipid composition, **273,** 1
- Membrane lipid composition
  - transcriptional homeostatic control, review, **273,** 1
- Membrane potential
  - mitochondrial, *see* Mitochondrial membrane potential
- Membrane proteins
  - peroxisomal, 35-kDa, *PEX2* gene encoding, genomic organization and characterization (human), **273,** 985
  - upregulated during adipocyte differentiation, identification (3T3-L1 cells), **272,** 293
- Membrane ruffles
  - *Helicobacter pylori*-induced formation in gastric adenocarcinoma AGS cells, role of rac and cdc42, **269,** 247
- Membranes
  - adipocyte, adenylyl cyclase activity modification by NAD (rat), **270,** 203
  - artificial, nanodomain organization, deletion by lipid oxidation, **270,** 448
  - brain, binding of ^{3}H-PbTx-3 and ^{3}H-saxitoxin (puffer fish), **267,** 403
  - cytoplasmic, in *Escherichia coli,* aqualysin I translocation across, role of COOH-terminal pro-sequence, **277,** 216
  - erythrocyte, fluidity in essential hypertension, effects of NO, EPR study (human), **275,** 946
  - glycosphingolipid-enriched microdomains, in T cells, CD3ζ targeting into, phenotypic effects (human), **271,** 589
  - Golgi, prenylated Rab acceptor localization (mouse), **275,** 509
  - hepatic fraction, detection of heterooligomer of inositol 1,4,5-trisphosphate receptor types 1 and 2 with tetrameric structure (rat), **267,** 928
  - intracellular calcium-independent phospholipase A_2 bound to, cDNA cloning (human), **272,** 320
  - leptin receptor isoforms bound to, expression, effect of partial leptin receptor gene deletion in transgenic mice, **269,** 496
  - lysis by cyclic tachyplesins, selectivity, effect of antiparallel two-β strand cystine knot framework, **267,** 783
  - outer mitochondrial, cytochrome b_5 from, kinetic trapping of hemin in, analysis (rat), **273,** 467
  - permeability, modifications involved in antibiotic resistance of *Klebsiella pneumoniae,* **274,** 496
  - receptor protein-tyrosine phosphatase α distal catalytic domain, role in pervanadate-induced tyrosine phosphorylation, **267,** 96
  - renal apical, *p*-aminohippuric acid transport mediated by human inorganic phosphate transporter NPT1, **270,** 254
  - skeletal muscle, binding of ^{3}H-PbTx-3 and ^{3}H-saxitoxin (puffer fish), **267,** 403
  - voltage-dependent calcium channel α_{1C} subunit expression, cooperative effect of α_2/δ and β_{2a} (human), **267,** 156
- Membrane-spanning segments
  - Pex2p, defects, role in peroxisome biogenesis disorders, **268,** 31
- Membrane topology
  - SVCT1 (human), **267,** 488

- Membrane trafficking
  - in polarized cells, osmomechanical regulation (rabbit), **271,** 429
  - putative function of plant VAP27, **270,** 286
- MEN
  - nonredundant roles in postimplantation development (mouse), **279,** 563
- Mercaptoacetic acid
  - activation of rhodopsin in *Chlamydomonas in vivo* by disulfide bond cleavage, **275,** 286
- Mercury poisoning
  - inhibition by histidine, **273,** 816
- Mesangial cells
  - interaction with macrophages, induction of monocyte chemoattractant protein-1 expression via NF-κB activation (mouse), **269,** 309
  - interleukin-6 expression, effects of native and oxidized LDL and modulation by lovastatin (human), **267,** 536
  - interleukin-18 binding protein gene expression in primary cells, mediation by IFN-γ (human), **267,** 960
  - mitosis and apoptosis, inhibition by quercetin *in vitro* and *in vivo* (rat), **279,** 629
  - P2Y$_2$ receptor desensitization, reversal by growth hormone (rat), **270,** 594
  - PDGF-induced c-*fos* gene transcription, effect of IFN-γ (rat), **273,** 1069
  - proliferation, negative regulation by natriuretic peptide receptor A, role of cGMP-dependent protein kinase (rat), **271,** 374
- Mesenchymal cells
  - chondrogenesis, induction by actin cytoskeleton disruption, role of PKC-α signaling (chick embryo), **273,** 609
  - precartilage condensation, role of focal adhesion kinase association with fibronectin and paxillin (chicken), **278,** 522
- Mesenchymal progenitor cells
  - osteoblastic differentiation induced by BMP-2, role of ERK (C3H10T1/2 cells), **268,** 757
- Messenger ribonucleoprotein
  - FMRP-associated, YB1/p50 as component of, identification (mouse), **279,** 904
- Messenger RNA
  - albumin, interaction with proteins from rat liver with CCl$_4$-induced injury, **273,** 261
  - apolipoprotein B, editing of, increase by calcium, **277,** 221
  - α-globin, 3′-UTR stability element, proteins recognized by, differentiation-dependent cytoplasmic distribution and *in vivo* RNA association in erythroleukemic cells, **279,** 40
  - *HB9,* localization during early feather development (chick), **276,** 1112
  - insulin-like growth factor-II, effect of bioglass 45S5 ionic products (human), **276,** 461
  - insulin-like growth factor binding protein-1, stability, effect of AUUUA sequences (human), **267,** 509
  - iron-responsive, non-IRE-regulated, detection, **275,** 223
  - NF-IL6, peptide segment specifically binding to 3′-untranslated region of, detection by three-hybrid strategy, **276,** 101
  - PMCA1, expression in aortic myocytes, RT–PCR study (rat), **276,** 1024
  - prion protein gene, differentially expressed, detection in prion-infected mouse brain and N2A cells but not in uninfected mice, **251,** 423; *corrigendum,* **279,** 1016
  - splicing, restoration by second-site intragenic suppressor in T4 ribonucleotide reductase self-splicing intron, **268,** 359
  - thrombopoietin, identification of five isoforms (mouse), **276,** 137
  - *Ubc* gene, 3′ sequence characterization, **274,** 537
- Messenger system
  - superoxide as messenger of endothelial function, review, **278,** 1
- Metal binding sites
  - engineered, on green fluorescent protein, **268,** 462
- Metal ions
  - requirement, for *Bacillus subtilis* phytase, **268,** 365
- Metalloproteases
  - ADAM 12-L, retention in *trans*-Golgi network (human), **275,** 261
- Metallothionein
  - induction, hepatic zinc response after tumor transplantation via, **270,** 1140
  - mice deficient in, gene expression during development, **270,** 458
- Metastasis
  - autocrine and paracrine induction of pro-metastatic genes in breast cancer, role of cancer cell-derived IL-1α, **275,** 60
  - B16 melanoma cell, suppressive mechanism of salmosin in, **275,** 169
  - KAI1 gene suppressing, promoter region organization and gene targeting by p53, **278,** 499
  - melanoma, related gene melastatin, expression and upregulation of alternatively spliced transcripts in human melanoma cells, **279,** 53
  - migration of MDA-MB-231 breast cancer cells, enhancement by phosphatidic acid, **268,** 471
  - prostate cancer cells, inhibition by Rho kinase inhibitor Y-27632 (human), **269,** 652
  - pulmonary, regulation by thromboxane A$_2$ (mouse), **267,** 245
- Metaxin
  - role in mitochondrial protein import in cultured cells (human), **276,** 1028
- Methotrexate
  - downregulation of reduced folate carrier gene expression in ZR-75-1 breast cancer cells, **279,** 891
- Methoxyestradiols
  - estrogen receptor-independent mediation of antimitogenic effects of estradiol on VSMCs, **278,** 27
- 6-Methoxy-*N*-(3-sulfopropyl)quinolinium
  - in measurement of parathyroid hormone-activated chloride fluxes in human erythrocytes, **269,** 470
- 3-Methyladenine–DNA glycosylase I
  - three-dimensional structure, computer modeling and experimental evidence (*Escherichia coli*), **268,** 724
- *N*-Methyl-D-aspartate receptor
  - activity, modulation by polyamines, **271,** 559
  - antagonists of, prevention of gp120-induced apoptosis in neocortex (rat), **274,** 664
  - modulation by H$_2$S via induction of cAMP, **267,** 129
  - regulation, role of SAP family proteins, review, **269,** 1
  - specific antagonists, prevention of osteoclast sealing zone formation required for bone resorption, **268,** 201
- Methylation
  - bacterial DNA, **276,** 1261
  - free carboxy groups of hemoglobin, improvement of PAH oxidation by Hb, **273,** 820; *erratum,* **275,** 713
  - imprinted, of *U2afbp-rs/U2af1-rs1* gene, role of oocyte-specific methylated region, **268,** 590
  - intronic CpG islands of *Igf2r de novo,* association with decreased antisense RNA expression in aged mice, **274,** 722
  - mac25/IGF binding protein-7, association with liver tumorigenesis in SV40 T/t antigen transgenic mice, **267,** 109
  - reductive, lysine residues in pokeweed antiviral protein-II, X-ray crystallography after, **275,** 549
  - role in control of human PTH-related peptide receptor promoter activity, **267,** 482
- O-Methylation
  - catechin and epicatechin in small intestine (rat), **277,** 507
- Methylene blue
  - photosensitized oxidation of cysteine sulfinic acid and other sulfinates, **270,** 782
- *cis*-9,10-Methylenehexadecanoic acid
  - inhibition of myocardial contractility and actomyosin ATPase activity (guinea pig), **274,** 533

4-Methyl-5-methylenecyclopent-3-en-1,2-diol
  inhibition of IL-6 signaling and Stat3 activation (A23-98), **276,** 447
3-Methyl-4-nitrophenol
  Ralstonia sp. SJ98 chemotaxis and biodegradation of, **275,** 129
4-(Methylnitrosamino)-1-(3-pyridyl)-1-butanone
  activation by CYP2A expressed at high levels in suncus lung, **269,** 393
1-Methyl-4-phenylpyridinium
  mitochondrial dysfunction induced by, potentiation by dopamine, **268,** 916
Methyl red
  azo reduction by neuronal nitric-oxide synthase, role of FMN, **275,** 752
Metmyoglobin
  solutions, non-steady-state O$_2$ diffusion, **276,** 773
Mevalonate/isoprenoid pathway
  inhibitor apomine, antiproliferative and preapoptotic activities, **270,** 240
Mevalonic acid
  pathway enzymes, regulation in *Saccharomyces cerevisiae,* **267,** 473
Micelles
  increased cholesterol uptake in intestinal cell line from, resulting from MDR1 overexpression, **267,** 565
  reverse, tryptophan octyl ester in, fluorescence emission properties, **277,** 13
Microarray hybridization
  analysis of monocyte-derived dendritic cell maturation (human), **275,** 731
Micrococcus flavus
  inorganic polyphosphate/ATP-NAD kinase, **276,** 57
Micrococcus luteus
  FAD-containing tyramine oxidase, purification, cloning, and 3D structure, **268,** 293
Microcystis aeruginosa
  strain M228, lectin gene, cloning, **273,** 499
Microfibril-associated glycoprotein
  36-kDa, tranilast-binding protein identification in bovine skin and aorta as, **270,** 1002
Microglia
  NADPH oxidase, activation in Alzheimer's disease brains, **273,** 5
Microgravity
  vector-averaged gravity using clinostat rotation, effect on TNF-α-dependent activation of NF-κB in human osteoblastic HOS-TE85 cells, **279,** 258
Microinjection
  in visualization of proteoliposomes colocalized with endogenous mitochondria in fertilized mouse egg, **278,** 183
Microperoxidase 8
  catalysis of formation of iron(II)–nitrosoalkane complexes, **278,** 217
Microsatellites
  in type I collagen α2 chain gene, association with systemic sclerosis (human), **272,** 36
Microscopy
  VEC-DIC, exocytosis in dissociated pancreatic acinar cells (guinea pig), **277,** 134
Microsomal epoxide hydrolase
  polymorphisms, role in Parkinson's disease (human), **269,** 676
Microsomal triglyceride transfer protein
  specific inhibitor, ApoB translocation status in presence (HepG2 cells), **276,** 1035
Microsomes
  hepatic, radical-induced lipid peroxidation, inhibition by C-phycocyanin (rat), **275,** 20
  light, adipocytes, 70-kDa protein, insulin-dependent phosphorylation (rat), **276,** 1302
Microtubule-associated proteins, *see specific MAP*
Microtubules
  associated taxol-sensitive kinase activity (CV-1 cells), **277,** 525
  association with heat shock protein 27 in HeLa cells, **271,** 164
  bundling by motor and tail domains of kinesin-like calmodulin-binding protein from *Arabidopsis,* regulation by Ca^{2+}/calmodulin, **267,** 201
  cold tolerance, conferral by expression of cold-adapted β-tubulins (human), **269,** 787
  role in translocation of FGF to endothelial cell nucleus (human), **273,** 551
Microvascular pericytes
  expression of aggrecan message regulated by BMP-2 (bovine), **269,** 172
Microvessels
  formation in *ex vivo* rat aortic ring angiogenesis assay, inhibition by endostatin, **268,** 183
MID1 gene
  Saccharomyces cerevisiae, potential homologue *yam8*$^+$ from *Schizosaccharomyces pombe,* **269,** 265
Midkine
  effect on bradykinin-stimulated Ca^{2+} signaling and NO production in endothelial cells (pig), **276,** 830
Midkine receptor
  LDL receptor-related protein as component of, **270,** 936
Milk
  bovine, kininogen fragment 1·2, promotion of proliferation of osteoblastic MC3T3-E1 cells, **269,** 628
Mineralocorticoids
  paradoxical effects on ion-gated sodium channel in embryologically diverse cells, **270,** 811
Minor histocompatibility antigen
  HA-1 gene, tandem linkage with ABCA7 (human), **278,** 782
Mitochondria
  aldehyde dehydrogenase 2 deficiency, increased risk for late-onset Alzheimer's disease in Japanese with, **273,** 192
  brain, complex I inactivation by oxidative modification, **275,** 890
  cardiac
    cytochrome *c* release, induction by arachidonic acid (rat), **277,** 128
    isolated, effects of carvedilol (rat), **276,** 82
  cytochrome *c* release
    caspase cascade mediated by, activation by 25-hydroxycholesterol (CHO-K1 cells), **278,** 557
    induction by ganglioside GD3 and mimetics (rat), **276,** 1210
  death pathway regulation by Bcl-x$_L$, association with escape from apoptosis after prolonged serum deprivation (MDCK cells), **277,** 487
  D-loop binding protein expression, regulation during early development (sea urchin), **277,** 299
  early functional impairment by poliovirus via succinate dehydrogenase inhibition, **271,** 610; *erratum,* **272,** 966
  endogenous, in fertilized mouse egg, proteoliposomes colocalized with, **278,** 183
  expression of short dystrophin-like 71-kDa product (mouse, rat), **274,** 275
  glutathione peroxidase-1, effects on induced and basal oxidative damage to mtDNA in T47D cells, **272,** 416
  GSH transport, role of voltage-dependent anion channels (yeast), **276,** 940
  import of SDH2–RPS14 precursor encoded in nucleus, proteolytic processing for, analysis (maize), **271,** 380
  inhibitors, stimulation of catecholamine secretion from pheochromocytoma cells, **273,** 17
  low-molecular-mass polypeptide, Ca^{2+}-modulated phosphorylation (rat liver), **270,** 741
  MPP$^+$-induced dysfunction, potentiation by dopamine, **268,** 916
  nitric oxide presence within, direct evidence (COS-1, PC12 cells), **272,** 129
  outer membrane cytochrome b_5, kinetic trapping of hemin in, analysis (rat), **273,** 467
  permeability transition, induction *in vitro* by short-chain carboxylic acids (rat), **272,** 431
  permeability transition pore
    activation, enhancement by aging (mouse), **273,** 603
    opening of, role in genistein-induced apoptosis in RPE-J cells, **276,** 151

role in induced apoptosis in luteinized granulosa cells (human), **269,** 542
steroid hydroxylase system, cluster model, evidence for, **276,** 210
transcription factor A, binding to four-way DNA junction (human), **271,** 492
Mitochondrial DNA
ATPase 6-coding region, sense and antisense transcripts, differential expression in fetal and adult brain (pig), **271,** 170
basal and induced oxidative damage in T47D cells, effects of mitochondrial glutathione peroxidase-1, **272,** 416
frequency of point mutations, elevation in Alzheimer's brain, **273,** 203
γ-ray-induced strand breaks in colon cancer cells, repair (human), **269,** 433
gene mutations, type 2 diabetes mellitus patient with, **278,** 808
multiple deletions: removal of light strand origin of replication (human), **279,** 595
pathogenic mutations, lipoma patients bearing, uncoupling protein-1 mRNA expression in, **278,** 800
uracil-containing, in extract from oocytes, excision repair (*Xenopus laevis*), **278,** 395
variations in patients with maternally inherited diabetes and deafness syndrome, **277,** 771
Mitochondrial leader sequence
glutathione reductase gene (human), **269,** 366
Mitochondrial membrane potential
cultured endothelial cells, effect of shear stress (pig), **270,** 616
loss of, induction in prostate epithelial cells *in vitro* by high levels of zinc ions (human), **279,** 607
pancreatic β-cells, oscillations paralleling intracellular calcium activity (mouse), **267,** 179
and protection by C60 carboxyfullerene against oxidative stress-induced apoptosis in human PBMCs, **277,** 711
Mitochondrial processing peptidase
multiple-site recognition of precursor proteins, **265,** 611; *erratum,* **268,** 663
Mitochondrial respiratory chain
combined enzymatic complex I and III deficiency associated with mutations in nuclear-encoded *NDUFS4* gene, **275,** 63
Mitochondrial tricarboxylate carrier
activity level in starved silver eel, **276,** 893
Mitogen-activated protein kinase, *see* MAP kinase
Mitogenesis
ERK-dependent, induction by monoamine oxidase B via H_2O_2 generation (HEK293 cells), **271,** 181
FGF-1- and FGF-2-induced, differential regulation related to kinetics of binding to heparan sulfate in breast cancer cells, **267,** 770
osteoblastic MC3T3-E1 cells, induction by p42/44 and p38 MAP kinase activation by extracellular calcium-sensing receptor agonists, **279,** 363
phospholipid D activity for, restriction to caveolin-enriched membrane microdomains, **273,** 77
signaling by TSH via cAMP in canine thyrocytes, role of Ras activation, **273,** 154
vascular smooth muscle cells, inhibitor effect of estradiol, estrogen receptor-independent mediation by methoxyestradiols, **278,** 27
Mitosis
checkpoint, mammalian cyclosome/APC in, negative regulation by Cdc20/Fizzy phosphorylation, **271,** 299
glomerular cells, inhibition by quercetin *in vitro* and *in vivo* (rat), **279,** 629
inhibition by degraded DNA lipotransfection (Rat-1 cells), **270,** 406
translin localization in centrosomes *(Xenopus),* **276,** 515
Mitotic recombination
spontaneous, in *Saccharomyces cerevisiae,* effects of *RAD52* epistasis group genes, **270,** 112
Mix family homeobox genes
mtx1 and *mtx2,* isolation and differential regulation (zebrafish), **271,** 603
Mizoribine
functional interaction with 14-3-3 protein, **274,** 87
MK-801
prevention of gp120-induced apoptosis in neocortex (rat), **274,** 664
prevention of osteoclast sealing zone formation required for bone resorption, **268,** 201
MKK7
mediation of stress-activated protein kinase-dependent induction of c-*fos* by Cd^{2+} (rat), **273,** 718
MKP, *see* MAP kinase phosphatase
ML-9
inhibition of PKB, effects on metabolic effects of insulin in rat adipocytes, **268,** 315
m-neugrin gene
upregulation with neuronal differentiation of neuroblastoma cells (mouse), **279,** 526
MnSOD-response element
in 3′ UTR of MnSOD RNA, enhancement of translation of heterologous RNA, **272,** 164
moat1
molecular identification (rat), **275,** 831
Modulins
P48, derived from *Mycoplasma fermentans,* induction of leukemia cell differentiation and apoptosis, **269,** 284
MODY
association with hepatocyte nuclear factor-1α loss-of-function mutations P112L and Q466X (human), **279,** 792
Molecular chaperone activity, *see* Chaperone activity
Molecular recognition templates
peptides: molecular evolution of peptide transporters, **267,** 283
Molecular structure, *see also* Conformation; Secondary structure
acetolactate synthase, role of cysteinyl residues (tobacco), **271,** 801
α-crystallin from galactosemic rat lens, and chaperone-like activity, **273,** 197
fastest myosin from green alga *Chara,* **270,** 147
lipid component of lipoprotein from *Borrelia burgdorferi,* **267,** 897
3-methyladenine–DNA glycosylase I, computer modeling and experimental evidence (*Escherichia coli*), **268,** 724
mitochondrial processing peptidase: multiple-site recognition of precursor proteins, **265,** 611; *erratum,* **268,** 663
myosin X (mouse), **271,** 526
osteopontin from bone, *N*-glycan structures (human), **268,** 814
p23 cytoplasmic domain in solution, implications for COPI vesicle formation, **271,** 401
prion protein dimer, **278,** 646
putative SH2 domain in Janus kinases, **278,** 175
quaternary, dimeric Cu,Zn superoxide dismutase: metal-dependent subunit association induced by single mutation, **272,** 81
ribonuclease MC1 complexed with 2′-UMP or 3′-UMP, crystal structure (bitter gourd), **275,** 572
tetrameric, heterooligomer of inositol 1,4,5-trisphosphate receptor types 1 and 2 expressed in hepatic membrane fraction (rat), **267,** 928
three-dimensional
FAD-containing tyramine oxidase from *Micrococcus luteus,* **268,** 293
protective scFv fused with asparaginase, **276,** 197
Monoamine oxidase B
induction of ERK-dependent mitogenesis by H_2O_2 generation (HEK293 cells), **271,** 181
Monoclonal antibodies
agglutination of red blood cells by, energy evaluation (human), **277,** 381
anti-Klotho, establishment, and detection of Klotho protein in kidney (human, mouse), **267,** 597

Monoclonal antibodies (*continued*)
  DNase γ-specific, characterization and use in detection of enzyme in nuclei of apoptotic thymocytes (rat), **275,** 343
  first-generation, for identification of human leukotriene B_4 receptor-1, **279,** 520
  N^{ϵ}-(hexanonyl)lysine, preparation and use in evaluation of effects of flavonoid supplementation on exercise-induced oxidative stress in skeletal muscle (rat), **274,** 389
  HK 12.18, cytoplasmic epitope for, location on H,K-ATPase α subunit, **273,** 942
  modulation of p53 binding to consensus sequence within supercoiled DNA, **267,** 934
  OX40 ligand characterization (rat), **270,** 1041
  protein dityrosine detection in atherosclerotic lesion of ApoE-deficient mice, **275,** 11
  TES-23, recognition of human activated CD44, **269,** 671
  three mammalian fast limb myosin heavy chains, **272,** 303
Monocyte chemoattractant protein-1, *see* MCP-1
Monocyte chemotactic protein-1, *see* MCP-1
Monocyte-macrophages
  from hypercholesterolemic patients, uptake of oxidized LDL, inhibition by losartan, **273,** 417
Monocytes
  activation, survival, and proliferation, comparative effects of CD137 and LPS (human), **273,** 117
  dendritic cells derived from, maturation, analysis by microarray hybridization (human), **275,** 731
  differentiation
    IL-6-induced rapid gene repression at onset of, analysis (mouse), **267,** 863
    in vitro, expression of retinoid receptors during, **270,** 17
  FPRL1 activation in, CCR5 phosphorylation and attenuation of selected chemokine responses by, **272,** 276
  interleukin-1β expression, upregulation by monocyte chemotactic protein 1 (human), **277,** 37
  interleukin-8 and matrix metalloproteinase 9 secretion, effects of activation of PPARα or PPARγ (THP-1 cells), **267,** 345
  lineage differentiation, role of *Hex* (mouse), **276,** 1155
  LPS-stimulated, cyclooxygenase-2 expression, modulation by cAMP, prostaglandin E_2, and NSAIDs (human), **278,** 790
  macrophages derived from, advanced glycation end product-induced gene expression *in vitro* (human), **277,** 368
  matrix metalloproteinase-12 induction and regulation by cytokines and CD40 signaling (human), **269,** 808
  raft membrane microdomains, association of aminopeptidase N/CD13 with, **269,** 143
  S100A12 expression, comparison with MRP-14 (human), **275,** 865
Monocytic leukemia cells
  cytokine induction by macromolecular glycolipids from *Enterococcus hirae* (THP-1 cells), **273,** 164
Monodehydroascorbate reductase
  mediation of phenoxyl radical reduction (cucumber), **279,** 949
Monomer
  or dimer, pH dependence of pheromone-binding protein from *Bombyx mori* on, **268,** 521
Mononuclear cells
  alternative splicing variants of CD1D gene (human), **276,** 107
  lipopolysaccharide signaling via Toll-like receptor 4–MD-2, regulatory roles of CD14 and PtdIns (human), **268,** 172
Mononuclear phagocytes
  differentiation to macrophages and dendritic cells, differential expression of NF-κB during (human), **268,** 99
Monounsaturated fatty acids
  dietary, upregulation of UCP2 expression in 3T3-L1 preadipocytes, **277,** 541
Monovalent ions
  effects on polyphosphate binding to *Escherichia coli* exopolyphosphatase, **274,** 236
Morphine
  upregulation of *mu* opioid receptors in lymphocytes (human, monkey), **279,** 621
Morphogenesis
  budding and branching, role of FGF10 (mouse), **277,** 643
  endothelial cells, induction by sphingosylphosphorylcholine (bovine, human), **272,** 603
3-Morpholinosydnonimine
  inhibition of cruzipain from *Trypanosoma cruzi,* **270,** 437
Morphology
  preantral follicles from 11-day-old mice in *in vitro* system, growth hormone effects, **268,** 36
Mortalin
  extramitochondrial localization of mortalin/mthsp70/PBP74/GRP75, **275,** 174
mot-1 protein
  deletions and single amino acid changes in, transcriptional inactivation of p53 (mouse), **279,** 602
Motility
  gastric, effect of ghrelin (rat), **276,** 905
  structure–function relationships of two surface loops of myosin heavy chain isoforms from thermally acclimated carp, **269,** 237
Motor neurons
  survival, effects of human glial cell line-derived neurotrophic factor, structure–function analysis (rat), **268,** 692
Mountain cedar pollen
  second major allergen Jun a 2, purification, identification, and cDNA cloning, **275,** 195
mouse disabled 2 gene
  genomic organization and promoter analysis, **275,** 189
mPer1
  bone marrow expression (mouse), **276,** 724
mPer2
  bone marrow expression (mouse), **276,** 724
mpsA
  cloning and characterization (*Magnetospirillum* sp.), **268,** 932
mRNA capping enzyme, *see* mRNA guanylyltransferase
mRNA (guanine-7-)-methyltransferase
  cDNA, cloning and characterization (*Xenopus laevis*), **268,** 617
mRNA guanylyltransferase
  cDNA, cloning and characterization (*Xenopus laevis*), **268,** 617
MRP1, *see* Multidrug resistance-associated protein 1
MRP-14
  comparison with S100A12 (human), **275,** 865
MscL
  cloning and expression: channel activity monitoring with small fluorescent molecules (*Salmonella typhimurium*), **279,** 208
MSF
  rat homologue SLP, alternative exon usage, **275,** 180
MSS1
  mammalian, tissue and cell distribution and formation of complex with basal transcription factors, **279,** 568
mTOR
  and PI 3-kinase, dependent pathway, retinoblastoma protein phosphorylation via, role in regulation of adipocyte differentiation, **275,** 115
mtx1
  isolation and regulation (zebrafish), **271,** 603
mtx2
  isolation and regulation (zebrafish), **271,** 603

Muc1
- downregulation by squamous differentiation of tracheal surface epithelial cells (hamster), **271,** 641

MUC2
- and encoded protein, expression in airway epithelial cells, regulation of, effects of IL-1β (human), **274,** 112

MUC3
- multiple transcripts (human), **275,** 916

Mucin
- gastric, disulfide-bound 100- and 140-kDa proteolytic fragments (pig), **270,** 722
- secretion in rat sublingual gland, triggering by activation of protease-activated receptor-2, **270,** 298

Mucor rouxii
- Δ^6-desaturase with high similarity to plant Δ^6-desaturase, cloning, and heterologous expression in *Saccharomyces cerevisiae,* **279,** 17

Mucous cells
- from gastric surface epithelium, differentiation in culture, promotion by air–liquid interface (mouse), **271,** 741

Multidrug resistance
- related human MVP/LRP gene promoter, cloning and initial analysis, **278,** 125
- rhodamine 123 use in research, implications of carrier-mediated uptake of R123, **279,** 124

Multidrug resistance-associated protein 1
- ATP-binding N- and C-terminal domains, expression and characterization, **273,** 913
- effects of prototypical inducers in human hepatocytes, **273,** 333
- leukotriene C_4 and reduced glutathione transport mediated by, verapamil analogs modulating, structure–activity studies, **275,** 795
- *MRP1* mRNA detection in tumors and tumor cell lines by *in situ* RT-PCR (human), **275,** 466
- and yeast cadmium factor 1, expressed in Sf21 cells, functional comparison, **270,** 608

Multidrug resistance-associated protein 3
- 5′-flanking region, characterization (human), **270,** 728

Multidrug resistance P-glycoprotein, *see* P-glycoprotein

Multidrug resistance protein
- MDR-1, *see* P-glycoprotein

Multidrug resistance protein 1
- MRP1, *see* Multidrug resistance-associated protein 1

Multidrug resistance protein 6
- R1268 mutation, homozygosity and characterization as neutral polymorphism (human), **274,** 297

Multidrug resistance protein type 1
- P-glycoprotein, *see* P-glycoprotein

Multidrug resistance-related protein
- MRP1, *see* Multidrug resistance-associated protein 1

Multiple endocrine neoplasia type 1
- *MEN1* transcript, 5′-end heterogeneity (human), **276,** 508

Multiple endocrine neoplasia type 2B
- development due to *RET* mutations, two-hit model, **268,** 804

Multiple intestinal neoplasia
- adenoma susceptibility in *Min* mouse, effect of diminished guanylin expression, **273,** 225

Multiple risk factor syndrome
- endothelial dysfunction, protection by *in vivo klotho* gene delivery (rat), **276,** 767

Multipotential cell lineages
- multipotency of TBR31-2 bone marrow stromal cell line established from ts-SV40 T antigen gene transgenic mice, **268,** 450

Munc18-1
- gene structure and promoter function (mouse), **276,** 817

Munc18-2
- gene structure and promoter function (mouse), **276,** 817

Munc18-3
- gene structure and promoter function (mouse), **276,** 817

Mungin
- isolation from mung bean seeds and antifungal activity, **273,** 1111

Muramyl dipeptide
- delivery with polynucleotide-based carrier recognized by scavenger receptors: selective activation of macrophage antitumor activity, **268,** 772

mu receptors
- upregulation in lymphocytes by morphine (human, monkey), **279,** 621

Muscarinic receptors
- M_1, mamba toxin MT7 blocking, recombinant expression, **271,** 435

Muscarinic toxins
- mamba MT7, selectively blocking M_1 muscarinic receptors, recombinant expression, **271,** 435

Muscle
- aldolase, effect on muscle fructose-1,6-bisphosphatase sensitivity to AMP inhibition (rabbit), **275,** 611
- cardiac, *see also* Cardiomyocytes
  - contractility, enhancement by endogenous inhibitor of Na/Ca exchange (bovine), **277,** 138
  - developing, pH sensitivity of Ca^{2+} regulation in, role of troponin I isoform switching (rabbit), **267,** 912
  - Homer 1a and 1c transcript detection (rat), **279,** 348
  - length dependence of tension activation in skinned fibers, effect of troponin I phosphorylation by PKA, **272,** 104
- MDP77 expressed in, cloning and promotion of neurite outgrowth (chicken), **269,** 564
- myoneurin highly expressed in, cloning: deduced BTB/POZ-zinc finger protein (human), **273,** 385
- myosin heavy chain MHCIα, upregulation after unweighting and clenbuterol treatment (rat), **275,** 418
- papillary, contractility and actomyosin ATPase activity, inhibition by *cis*-9,10-methylenehexadecanoic acid (guinea pig), **274,** 533
- sepsis-induced proteolysis *in vivo,* effect of proteasome inhibitor (rat), **270,** 215
- skeletal, *see* Skeletal muscle; Skeletal muscle cells
- skinned fibers from desmin-deficient mice, generation of tension by, **278,** 419
- smooth, intact contracting, calponin regulation of shortening velocity (mouse), **279,** 150

Muscle cells, *see* Cardiomyocytes; Myoblasts; Myocytes; Skeletal muscle cells; Smooth muscle cells; Vascular smooth muscle cells

Muscle contraction
- callipeltin A induction of positive inotropic effect in guinea pig atria, **279,** 219
- muscle force arising by actin filament rotation and torque in Z-filaments, **270,** 677
- regulation of shortening velocity by calponin in intact contracting smooth muscles (mouse), **279,** 150

Muskelin
- receptor isoform-specific interaction of prostaglandin EP3 receptor with, **276,** 350

Mutagenesis, *see* Site-directed mutagenesis

Mutations
- calcium sensing receptor gene, type 2 diabetes mellitus patient with, **278,** 808
- cellulase-negative mutant of *Hypocrea jecorina,* molecular characterization, **277,** 581
- Cre-mediated gene mutation in mouse brain restricted to cerebellum and hippocampus, **269,** 149

Mutations (*continued*)
  cystic fibrosis transmembrane conductance regulator, G551D mutation, effect on ATP hydrolysis, **271,** 518
  disease-associated, in *SOD1,* role of dominant positive and negative effects, **276,** 1056
  effects on cytochrome P450 2B4, EPR studies, **276,** 762
  ethyl methanesulfonate-, UV-, and trimethylpsoralen-induced, in *Caenorhabditis elegans,* **269,** 64
  familial chylomicronemia-causing, identification in APOE-CI-CIV-CII gene cluster (human), **273,** 1084
  gain-of-function, associated with hereditary pancreatitis, enhancement of cationic trypsinogen autoactivation (human), **278,** 286
  hepatocyte nuclear factor-1α P112L and Q466X causing loss of function, associated MODY (human), **279,** 792
  hMLH1 and hMSH2 genes, with deleterious and germline effects, detection in Japanese hereditary nonpolyposis colorectal cancer kindreds, **271,** 120
  hSCO1 gene, P(174)L, effect on assembly of cytochrome *c* oxidase (human), **279,** 341
  K-*ras* gene-activating, identification in primary colon adenocarcinoma (human), **278,** 653
  leukocyte elastase inhibitor hinge region: elimination of inhibitory activity (pig), **274,** 841
  mannose-binding lectin gene promoter (human), **275,** 617
  missense
    endothelin-B receptor, in Hirschsprung disease patients, functional analysis, **275,** 524
    in RING finger motif of PEX2, effects on import of proteins with peroxisome targeting signals PTS1 and PTS2, **270,** 717
    variations in Wolfram syndrome gene *WFS1* in Japanese patients: possible role in type 1 diabetes, **268,** 612
  mitochondrial DNA
    elevated point mutation frequency in Alzheimer's brain, **273,** 203
    lipoma patients with, uncoupling protein-1 mRNA expression in, **278,** 800
    multiple deletions in light strand: removal of origin of replication (human), **279,** 595
    type 2 diabetes mellitus patient with, **278,** 808
    variations in patients with maternally inherited diabetes and deafness syndrome, **277,** 771
  mot-1 protein, deletions and single amino acid changes: transcriptional inactivation of p53 (mouse), **279,** 602
  multidrug resistance protein 6 R1268 mutation, homozygosity and characterization as neutral polymorphism (human), **274,** 297
  nuclear-encoded *NDUFS4* gene, combined enzymatic complex I and III deficiency associated with, **275,** 63
  nucleophilic elbow of lux-specific thioesterase (*Vibrio harveyi*), **275,** 704
  presenilin 1 C92S mutation, effect on Aβ 42 production in H4 neuroglioma cells, **277,** 261
  protein phosphatase-1 toxin binding site in catalytic subunit: comparison with PP-2B, **270,** 543
  pyrethroid resistance, in S6 transmembrane segments of voltage-gated sodium channel, functional and evolutionary consequences, **278,** 516
  spontaneous, characterization in *Escherichia coli oxyR* strain, **279,** 427
  unknown subtle, in bacteria, genome-wide detection by combination of MutS and RDA, **268,** 535
  XLRS1 gene: 4-base pair insertion at codon 55 associated with X-linked juvenile retinoschisis, **268,** 370
  X-ray-induced, enhancement by magnetic field exposure in NF-κB-inhibited cells, **276,** 238
MutS technique
  combined with RDA, genome-wide detection of unknown subtle mutations in bacteria by, **268,** 535
Mycobacterium aurum
  bioluminescent, expressing firefly luciferase, screening of antimycobacterial drugs with, **279,** 457
Mycobacterium tuberculosis H37Rv
  inorganic polyphosphate/ATP-NAD kinase, **276,** 57
Mycoplasma fermentans
  P48 derived from, induction of leukemia cell differentiation and apoptosis, **269,** 284
Myelin P_0
  tyrosine phosphorylation, implications for signal transduction, **267,** 820
Myeloid cell lines
  α1,3-fucosyltransferase 4 gene expression and transcriptional regulation (HL-60, THP-1, U-937 cells), **273,** 370
Myeloid leukemia cells
  p73 expression, enhancement during differentiation, and expression patterns of complex isoforms (human), **277,** 62
  pRB–E2F complex formation, effect of TGFβ (human), **276,** 930
Myelomonocytic cells
  caspase-dependent apoptosis after exposure to oxidized LDL (THP-1 cells), **273,** 948
Myeloperoxidase
  catalysis of melatonin oxidation by activated neutrophils (human), **279,** 657
  catalyzed 2,2,5,7,8-pentamethyl-6-hydroxychromane phenoxyl radicals, and HL-60 cell oxidative stress, **270,** 1086
  PCR cloning and baculovirus expression (human), **271,** 831
  protein radical, EPR spin trapping, **270,** 199
Myoblasts
  cardiac H9c2, differentiation, effect of phosphatidylinositol 3-kinase (rat), **276,** 502
  gene delivery by two-step transfer system (human), **275,** 931
  increased intracellular triglyceride in C_2C_{12} cells transfected with human lipoprotein lipase, **270,** 997
  normal and DMD cells expressing telomerase gene, transplantation in SCID mice, **272,** 362
  from patient with novel variant of congenital muscular dystrophy, unusual laminin α2 processing, **277,** 639
  skeletal
    differentiation *in vitro,* role of SPARC (chicken), **271,** 630
    ectopic expression of active processed form of atrial natriuretic peptide (mouse), **270,** 637
Myocardial infarction
  cardiac function in, improvement by cyclooxygenase-2 inhibition (rat), **273,** 772
Myocardium
  acute ischemia, S100A1 as marker for, evaluation (human), **274,** 865
  contractility and actomyosin ATPase activity, inhibition by *cis*-9,10-methylenehexadecanoic acid (guinea pig), **274,** 533
Myocilin
  expression in astrocytes of optic nerve head (pig), **276,** 1129
Myocytes, *see also* Cardiomyocytes
  aortic, PMCA1 mRNA expression, RT–PCR study (rat), **276,** 1024
  smooth muscle, ion channel activity in, alterations in experimental colitis model (mouse), **275,** 637
Myoepithelial cells
  CD44 shedding specific to, mediation by putative chymotrypsin-like sheddase (human), **279,** 116
Myogenesis
  differentiation of mouse embryonic stem cells for, promotion by overexpression of insulin-like growth factor-II, **277,** 631
Myogenic cells
  differentiated to form myotubes, $[Ca^{2+}]_i$ in, effect of 2-chloro-adenosine (C2C12 cells), **277,** 546

Myoglobin
  apoprotein-bound heme, enhancement of myoglobin oxidation of lipids, **269,** 647
  control of heme reactivity in, effect of engineering of His(E7) (*Aplysia limacina*), **269,** 58
  iron methylchlorin-reconstituted, compound I, II, and III states of, preparation and characterization, **279,** 1011
Myometrium
  p21- and RhoA-activated protein kinases, upregulation in pregnancy (human), **269,** 322
Myoneurin
  deduced BTB/POZ-zinc finger protein highly expressed in human muscle, **273,** 385
Myosin
  actin-activated ATPase activity, Ca^{2+}-dependent inhibition by S100C, **267,** 77
  destruction by protease contaminant in bacitracin, **273,** 829
  fastest, from green alga *Chara,* molecular structure, **270,** 147
  heavy chain
    fast 2A, 2X, and 2B, mammalian limb, monospecific antibodies against, **272,** 303
    isoforms from thermally acclimated carp, two surface loops of, structure–function relationships, **269,** 237
    MHCIα, upregulation in muscle after unweighting and clenbuterol treatment (rat), **275,** 418
    type B, gene r-nmMHC-B encoding, promoter cloning and analysis (rat), **276,** 1203
  PDZ-containing, isolation from hematopoietic supportive bone marrow stromal cell lines, **270,** 67
  weak interaction with actin, stengthening by N-terminal acetylation of actin, **268,** 14
Myosin II
  Dictyostelium, regulation, role of tail domains, **271,** 75
Myosin V
  processive movement of individual molecules, direct observation (chicken), **272,** 586
Myosin X
  molecular architecture and tissue expression, Northern blot and *in situ* hybridization analyses (mouse), **271,** 526
Myosin-ATPase
  activation by actin-tropomyosin, role of actin residues 230 and 236, **275,** 428
Myosin light chain kinase
  inhibitor wortmannin, effects on amylase secretion from pancreatic acini (rat), **269,** 792
Myosin phosphatase
  inhibitor CP-17, phosphorylation by protein kinase N, **274,** 825
  myosin-binding subunit, binding to elongation factor-1α: EF-1α as substrate of Rho-associated kinase, **278,** 72
Myosin regulatory light chain interacting protein
  neuronal expression in rat brain and gene localization to human chromosome 6, **279,** 879
Myostatin
  gene expression in regenerating skeletal muscle and localization (rat), **270,** 510
Myotonin protein kinase
  mutant cDNA, C2C12 cells transfected with, differential signaling pathways after oxidative stress, **267,** 739
Myotubes
  C2C12, glutamate-dependent calcium response in, induction by 2-chloroadenosine, **277,** 546
Myristoyl-ACP thioesterase
  nucleophilic elbow, mutation (*Vibrio harveyi*), **275,** 704
Myristoylation
  alteration of retinoic acid-induced downregulation of MARCKS in immortalized hippocampal cells, **276,** 183
N-Myristoyltransferase inhibitor protein
  expression in colon cancer cells and relationship to c-Src levels (human), **273,** 1116
Myxoid liposarcoma
  with *FUS/CHOP* chimera, analysis (human), **279,** 838

N

N2A cells
  and prion-infected mouse brain, differentially expressed prion protein gene mRNA found in, **251,** 423; *corrigendum,* **279,** 1016
NAADP$^+$
  binding in sea urchin eggs, characterization, **276,** 112
Na$^+$/Ca^{2+} exchanger
  cardiac, effect of callipeltin A (bovine), **279,** 219
  expression, amelioration of ionomycin-induced cell death, **276,** 93
  inhibitor KB-R7943, effects on store-operated Ca^{2+} entry in cultured neurons and astrocytes (rat), **279,** 354
Nacreous layer
  formation in *Pinctada maxima,* molecular mechanisms, **269,** 213
NAD
  modification of adipocyte membrane adenylyl cyclase activity: evidence against NAD-induced endogenous ADP-ribosylation of Gsα, **270,** 203
NAD$^+$
  glyceraldehyde-3-phosphate dehydrogenase fold binding to, identification as RNA-binding domain, **275,** 253
  role in deacetylase activity of SIR2-like proteins, **278,** 685
NADH
  recycling with immobilized heterologous cytochrome P450 105D1, **279,** 708
NADH-ferric reductase
  dihydropteridine reductase-associated activity (pig), **271,** 788
NADH pyrophosphatase
  cloning and characterization from *Caenorhabditis elegans* and *Saccharomyces cerevisiae,* **273,** 753
NADH:ubiquinone oxidoreductase
  combined enzymatic complex I and III deficiency associated with mutations in nuclear-encoded *NDUFS4* gene, **275,** 63
NAD kinase
  inorganic polyphosphate- and ATP-dependent, isolation (*Micrococcus flavus, Mycobacterium tuberculosis* H37Rv), **276,** 57
NADP$^+$-binding site
  NADP$^+$-dependent malic enzyme from pigeon, role of lysine residues 162 and 340, **270,** 821
NADP$^+$-dependent malic enzyme
  catalysis and coenzyme binding, role of lysine residues 162 and 340 (pigeon), **270,** 821
NADPH-cytochrome P450 reductase
  electron transfer from, role of residue 285 in CYP2B4 lacking NH$_2$-terminal hydrophobic sequence, **270,** 777
NADPH oxidase
  activation in Alzheimer's disease brains, **273,** 5
  complementation in p67^{phox}-deficient chronic granulomatous disease via protein delivery by *Pseudomonas* type III secretion system (human), **275,** 854
  neutrophil
    onset of superoxide generation by, targeting by fungal gliotoxin (human), **268,** 716
    role of FcαR-triggered Ca^{2+} signals (human), **276,** 749
NAD(P)H oxidase
  induction by endothelin-1 in endothelial cells (human), **269,** 713
  p47, functional expression in lung microvascular endothelial cells (mouse), **278,** 584

Na/H exchanger-3
- inhibition by endothelin-1 in ET_B receptor-overexpressing OKP cells, **271,** 807

Na^+/K^+-ATPase
- activity in Calu-3 human airway cells, regulation by CFTR-mediated anion conductance, **274,** 230
- γ subunit, genomic organization of human FXYD2 gene encoding, **279,** 196
- role in O_2 production from H_2O_2, **274,** 750

Na-K-Cl cotransporter
- identification and biochemical localization in placental cell line BeWo, **274,** 43

Naked DNA gene therapy
- implications of improved VEGF expression in mouse skeletal muscles, **272,** 230; *erratum,* **276,** 390

Nanocapsules
- EWS Fli-1 antisense nanocapsules, inhibition of Ewing sarcoma-related tumors (mouse), **279,** 401

Nanocrystals
- zinc sulfide, zinc–histidine complexes as nucleation centers for growth of, **272,** 29

Nanoparticles
- gold, oligonucleotide-capped, in assay for selective determination of polynucleotides using AFM imaging, **279,** 265

Natively unfolded proteins
- prothymosin α, Zn^{2+}-mediated structure formation and compaction (human), **267,** 663

Natriuretic peptide receptor A
- negative regulation of MAP kinase and mesangial cell proliferation, role of cGMP-dependent protein kinase (rat), **271,** 374

Natriuretic peptides
- upregulation in ventricle of Csx/Nkx2-5 transgenic mice, **270,** 1074

Natural antibody
- light chain, dominant role in protein antigen binding, **268,** 390

Natural suppressor cells
- $CD57^+HLA\text{-}DR^{bright}$, apoptosis-inducing nucleosides from, activation of caspase-3 in Molt4 cells (human), **268,** 514

NDUFS4 gene
- nuclear-encoded, mutations in, combined enzymatic complex I and III deficiency associated with, **275,** 63

Near-IR emission assay
- peridinin quenching of singlet oxygen (*Gonyaulax polyedra*), **268,** 496

Near-IR magnetic CD spectroscopy
- freeze-quench, oxidized cytochrome cd_1 conformer with His/Met *c*-heme coordination, **279,** 674

Necrosis
- role in dominant suppression of glioblastoma growth by $p16^{INK4A}$ expression *in situ* (RT-2 cells), **269,** 718

Nedd8
- modification of cullin, enhancement of SCF^{skp2} activity toward $p27^{kip1}$, **270,** 1093

Nef protein
- HIV, promotion of bystander cell depletion and prolonged survival of HIV-infected cells, **267,** 677
- HIV-1, interaction with G_o proteins in transfected COS-7 cells, **270,** 570

Nek2
- expression and localization in oocyte during maturation (pig), **279,** 799

Nematocyst
- *Carbydea rastoni* toxin-A localization to, **275,** 582

Neocortex
- gp120-induced apoptosis in, role of cyclooxygenase-2 and prevention by NMDA receptor antagonists and U-74389G (rat), **274,** 664
- reciprocal expression of infant- and adult-preferring transcripts of CDCrel-1 septin gene (rat), **273,** 723

Neoglycoenzymes
- synthesis with homogeneous N-linked oligosaccharides using immobilized endo-β-*N*-acetylglucosaminidase A, **267,** 134

Neointima
- balloon injury-induced formation, inhibition by YC-1 (rat), **279,** 646

Neomycin
- activation of p42/44 and p38 MAP kinase: induction of mitogenic responses in osteoblastic MC3T3-E1 cells, **279,** 363

Neopterin
- formation by oxidation of 7,8-dihydroneopterin by hypochlorous acid, **275,** 307

Neovascularization
- with blood–brain barrier breakdown in delayed neuronal death (gerbil), **273,** 637

Nephropathy
- IgA, sialylation and galactosylation of serum IgA1 Fc O-glycosylated hinge peptides in, mass spectrometric study (human), **271,** 268

Neprilysin II
- splice variants and isoform expression in CNS and testis (rat), **271,** 565; *erratum,* **275,** 247

Nerve
- sciatic, conditioning lesion to, promotion of *in vivo* nerve regeneration in contralateral nerve (rat), **267,** 715

Nerve growth factor
- enhancement of cellular prion protein gene expression in immortalized murine neuronal precursor cell lines, **268,** 763
- gene expression in lead nitrate-induced hepatic hyperplasia (rat), **275,** 472
- synthesis in cultured astrocytes
  - stimulation by desmethylselegiline and selegiline (mouse), **279,** 751
  - upregulation by apomorphine (mouse), **272,** 18
- withdrawal of, induction of apoptosis in CESS B cell line via p38 MAPK activation and Bcl-2 phosphorylation, **278,** 753

Nerve regeneration
- promotion in sciatic nerve *in vivo* by contralateral conditioning lesion (rat), **267,** 715

Nervous system, *see also* Central nervous system
- ascidian larvae, voltage-gated sodium channel diversity in, **275,** 558
- cytochrome P450 4G15 expressed in, isolation and sequence (*Drosophila melanogaster*), **273,** 1132
- G-protein-coupled receptor from, cloning (sea anemone), **271,** 761

Nestin
- cells expressing, detection in pancreatic islets of Langerhans (mouse), **271,** 116

NET1
- *ARHGEF3* with homology to, isolation in 3p13–21 (human), **273,** 364

Netrin-1
- C-terminus, glycosaminoglycan-binding properties and secondary structure, **271,** 287

neugrin gene
- upregulation with neuronal differentiation of neuroblastoma cells (human), **279,** 526

Neural inducer
- noggin, functionally related sites in, characterization (*Xenopus laevis*), **270,** 293

Neural progenitor cells
- cryopreserved, derived from embryonic stem cells, neuronal differentiation (mouse), **271,** 418
- identification in adult mammalian eye, **270,** 517

Neuregulin
- induction of focal adhesion kinase association with erbB2–erbB3 receptor complex in Schwann cells, **271,** 414

Neurites
- outgrowth, promotion by MDP77 expressed in muscle (chicken), **269,** 564
- process formation in PC12 cells, induction by Rnd1, **278,** 604

Neuroblastoma cells
  β-amyloid-42 toxicity (SH-SY5Y cells), **273,** 1003
  apoptosis, induction by activation of lipoxygenase isozymes (CHP100 cells), **272,** 345
  differentiation, role of protein kinase C-θ (human), **279,** 589
  differentiation and death induction by bFGF (human ONB cell line JFEN), **279,** 172
  epolactaene from, selective inhibition of mammalian DNA polymerases and human DNA topoisomerase II, **273,** 784
  growth *in vivo* and apoptosis *in vitro,* effects of arsenic trioxide (human), **277,** 179
  HASH-1 and E2-2 expression and formation of functional complex (human), **274,** 22
  leptin receptor expression, differential regulation by insulin and leptin (human), **271,** 703
  neuronal differentiation, upregulation of *neugrin* gene and *m-neugrin* gene with, **279,** 526
  peptidylglycine α-amidating monooxygenase induction ($N_{18}TG_2$ cells), **267,** 521
  polyglutamine-mediated protein aggregation and cell death (SK-N-BE cells), **272,** 816
  proliferation and apoptosis, effects of 8-Cl-cAMP (SH-SY5Y cells), **273,** 404
  proliferation and differentiation, LR11 expression during, analysis (IMR32, PC12 cells), **275,** 365
  suppression of DEVD-caspase activity, role of intracellular labile zinc (human BE(2)-C cells), **268,** 148
Neurocan
  identification as heparin-binding proteoglycan, **272,** 449
Neuroendocrine-specific protein C
  reduction in brain of patients with Down syndrome and Alzheimer's disease, **276,** 329
Neurofibromin
  mRNA 3′-untranslated region, protein-binding segments in, binding of HuR, **267,** 726
Neurogenesis
  effects of GATA-1a and GATA-1b, molecular basis (*Xenopus laevis*), **273,** 614
Neurohormone receptor
  Drosophila melanogaster, structurally related to mammalian galanin receptor, cloning and genomic organization, **269,** 91
Neurokinin-1 receptor
  role in substance P regulation of PTH secretion, **270,** 230
Neuromedin U
  central effects in regulation of energy homeostasis (rat), **277,** 191
  purification and identification (human), **276,** 435
Neuronal differentiation
  cryopreserved neural progenitor cells derived from embryonic stem cells (mouse), **271,** 418
  marker neuroendocrine-specific protein C, reduction in brain of patients with Down syndrome and Alzheimer's disease, **276,** 329
  neuroblastoma cells, upregulation of *neugrin* and *m-neugrin* genes with, **279,** 526
  PC12 cells
   APC protein requirement for, **279,** 685
   role of protein kinase C-θ distribution and molecular properties, **275,** 149
  and peptidylglycine α-amidating monooxygenase expression in $N_{18}TG_2$ cells, **267,** 521
Neuronal precursor cells
  cellular prion protein expression in immortalized cell lines, enhancement by insulin or nerve growth factor (mouse), **268,** 763
Neurons
  acutely injured, processing of cdk5 activator p35 to truncated form by calpain (rat), **274,** 16; *erratum,* **276,** 390
  adhesion-dependent tyrosine phosphorylation of Enabled in *Drosophila* BG2-c6 cells, **270,** 482
  apoptosis by receptor-binding domain peptide of ApoE4 (F11, SH-SY5Y cells), **278,** 633
  ascidian larval, voltage-gated sodium channels diversity in, **275,** 558
  brain, activation of neuroendocrine L-type channels in, role of src-subtype tyrosine kinase, **270,** 806
  Cre-mediated recombination in Emx1–Cre knock-in mouse, specificity and efficiency, **273,** 661
  delayed death, neovascularization with blood–brain barrier breakdown in, analysis (gerbil), **273,** 637
  dopaminergic embryonic, survival and morphological differentiation, promotion by human GDNF (rat), **273,** 902
  dorsal raphe, effects of neuropeptides FF and SF (rat), **275,** 821
  dorsal root ganglion, voltage-dependent calcium currents, inhibitory effect of NO (rat), **271,** 509
  functions of SAP family proteins, review, **269,** 1
  hipppocampal, HIV gp120 immediate and toxic effects, role of CXCR4 receptor (rat), **274,** 212
  with induced V642I amyloid precursor expression, for studies of Alzheimer's disease, **274,** 445
  motor, survival, effects of human glial cell line-derived neurotrophic factor, structure–function analysis (rat), **268,** 692
  myosin regulatory light chain interacting protein expression in brain (rat), **279,** 879
  peripheral sensory, expression of tetrodotoxin-resistant voltage-gated sodium channel α subunit NaT/Scn11a (mouse), **267,** 271
  βPix isoforms expressed in, molecular cloning (mouse), **272,** 721
  response to hypoxia, role of ARNT2, **273,** 231
  store-operated Ca^{2+} entry *in vitro,* inhibition by KB-R7943 (rat), **279,** 354
  Swedish-mutated β-amyloid precursor protein metabolism, effects of estradiol, **271,** 82
Neuropeptides
  NPFF and NPSF, neurotransmitter properties (rat), **275,** 821
Neuropeptide Y
  effect on orexin-A binding, **272,** 959
Neuropeptide Y receptor
  Y5, orally active L-152,804 as selective antagonist of, **272,** 169
  y6 gene, cloning and evolutionary history (guinea pig), **277,** 264
Neurotensin
  mediation of activation of MAPK pathways and AP-1 binding in pancreatic cancer cell line MIA PaCa-2, **269,** 704
Neurotoxicity
  role of amino acid region 115–119 of ammodytoxins *(Vipera ammodytes ammodytes),* **276,** 1229
α-Neurotoxin
  homologue specific to coral snake, cloning and characterization, **267,** 887
Neurotransmitter release
  membrane association of presynaptic cytomatrix protein Bassoon, **275,** 43
Neurotrophin-3
  gene expression in lead nitrate-induced hepatic hyperplasia (rat), **275,** 472
Neurotrophin receptor
  p75NTR, gene expression in lead nitrate-induced hepatic hyperplasia (rat), **275,** 472
Neutral/alkaline ceramidase
  activity, active release by endothelial cells (mouse), **275,** 746
Neutralizing antibody
  against FasL, effect on EAE progression after intrathecal administration (mouse), **275,** 164
Neutrophil elastase
  inactivation by (α-aminoalkyl) diphenylphosphonates (human), **276,** 1235
Neutrophil NADPH oxidase
  $p47^{phox}$, interaction with actin (human), **276,** 1186

Neutrophils
  activated, myeloperoxidase-catalyzed oxidation of melatonin (human), **279,** 657
  adhesion to endothelial cells, inhibition by dexamethasone (mouse), **271,** 364
  bone marrow, maturation, suppressive effects of swainsonine and *N*-butyldeoxynojirimycin (human), **269,** 219
  Ca^{2+} uptake sites, nonuniform distribution (human), **279,** 337
  chemoattraction by T-20 inhibitor of HIV-1 cell entry via specific activation of *N*-formylpeptide receptor, **272,** 699
  dipeptidyl peptidase III identification (human), **273,** 393
  FcγR- and CR3-mediated phagocytosis, enhancement by cerebrosides (human), **278,** 79
  N-formylpeptide receptor FPR2, identification as receptor for serum amyloid A (mouse), **270,** 331
  GM-CSF-stimulated, cDNA representational difference analysis (human), **277,** 401
  β2-integrin upregulation, blocking by p38 MAP kinase inhibitor, **270,** 858
  NADPH oxidase
    onset of generation of superoxide, targeting by fungal gliotoxin (human), **268,** 716
    role of FcαR-triggered Ca^{2+} signals (human), **276,** 749
  peritoneal, LPS-induced TNF-α and IL-6 production, differential modulation by prostaglandin E$_2$ receptors EP2 and EP4 (mouse), **278,** 224
  phospholipase D
    downregulation by protein kinase A, analysis in cell-free system (human), **267,** 305
    in vitro activity, direct inhibition by 4-(2-aminoethyl)-benzenesulfonyl fluoride, **273,** 302; *erratum,* **274,** 880
  polyisoprenyl phosphate signaling, topography (human), **275,** 739
  recruitment in murine inflammation model *in vivo,* reduction by peptide mimicking sialyl-Lewis^a, **268,** 106
  release of TNF-α, IL-1β, and IL-8, effects of HDL, apo AI, and serum amyloid A (human), **268,** 405
  resting, surface expression of lactoferrin (human), **275,** 241
  role in HSP72 induction in lung by pancreatitis (rat), **273,** 1078
  S100A12 expression, comparison with MRP-14 (human), **275,** 865
  stimulated, aggregation, regulation by NO (human), **274,** 482
  superoxide generation, priming effect of cystathionine metabolites (human), **269,** 297
NFAT site
  P5, in human IL-4 promoter, characterization, **270,** 1016
NFATz
  with Rel similarity domain, isolation and characterization (mouse), **272,** 765
NF-IL6
  mRNA, peptide segment specifically binding to 3′-untranslated region of, detection by three-hybrid strategy, **276,** 101
NF-κB
  activation
    apoptosis-related, inhibition by 17β-estradiol in rat cardiac myocytes, **268,** 192
    and breast cancer metastasis, potential effect of IL-1α inhibition, **275,** 60
    in bronchial epithelial cells, suppression by erythromycin (human), **267,** 124
    in HEK293 cells, regulation by nucleoredoxin, glutaredoxin, and thioredoxin, **274,** 177; *erratum,* **275,** 247
    for HIV-1 gene expression in MT-4 cells, suppression by dialyzable leukocyte extract, **273,** 1099
    mediation of monocyte chemoattractant protein-1 induction by macrophage–mesangial cell interactions (mouse), **269,** 309
    OX40 signaling-induced, negative regulation by N- and C-terminal domains of TRAF3, **272,** 856
    in psoriasis, role in induction of interleukin-6 expression by IGF-II (human), **278,** 312
    role in ceramide induction of COX-2 and PGE$_2$ in pulmonary A549 cells, **277,** 675
    role in resistance of lung cancer cells to TNF-α-induced apoptosis, **273,** 140
    TNF-α-dependent
      in human aortic SMCs, inhibition by pyrrolidine dithiocarbamate by increasing intracellular copper level, **276,** 88
      in human osteoblastic HOS-TE85 cells, effect of vector-averaged gravity using clinostat rotation, **279,** 258
    TNF-α-induced, in MCF-7 breast cancer cells, inhibition by 17β-estradiol by increasing NF-κB p105 level, **279,** 47
  and AP-1, concurrent activation by CMV IE1, role in IE1 upregulation of IL-8 gene expression, **279,** 298
  differential expression during human mononuclear phagocyte differentiatio to macrophages and dendritic cells, **268,** 99
  differential regulation by acetaminophen and salicylates (RAW 264.7 cells), **272,** 758
  DNA binding
    and glucocorticoid resistance in thymocytes from mice expressing T cell receptor transgene, **276,** 189
    in HT-29 colon cancer cells, activation by inhibition of phosphatidylinositol 3-kinase, **273,** 853
    in transcription of ICAM-1 gene, glucocorticoid effects (U937 cells), **273,** 1008
  effect of GGT-dependent GSH catabolism (V79 Cl cells), **276,** 1062
  inhibited cells, X-ray-induced mutations in, enhancement by magnetic field exposure (human glioma cells), **276,** 238
  nuclear translocation mediated by TNF, suppression in L929 fibroblasts by TGF-β-induced matrix proteins, **267,** 194
  regulation in hepatic stellate cells during cirrhosis, role of p65 (rat), **273,** 546
  role in differential expression of apoptosis factors in alveolar epithelium (rat), **271,** 257
  role in lipopolysaccharide activation of matrix metalloproteinase-2 in endothelial cells (human), **269,** 401
  role in transactivation of fibronectin promoter by HTLV-I Tax, **276,** 579
  signaling
    antianoikic function of trefoil factor 3 on intestinal epithelial IEC-18 cells, **274,** 576
    events, in suppression of TNF-induced apoptosis, regulation by PI3-K/AKT (MCF-7 cells), **271,** 342
    role in expression of inducible nitric-oxide synthase gene in C6 glioma cells, **275,** 268
    TNF-α-induced pathway, block by E-73, **277,** 330
  suppression by 5-fluorouracil: induction of apoptosis in salivary gland cancer cells (human), **273,** 1168
NF-κB p105
  increased level in MCF-7 breast cancer cells, role in 17β-estradiol inhibitio of TNF-α-induced NF-κB activation, **279,** 47
NF-κB RelA
  and p53, p300/CBP-dependent and -independent transcriptional interference between, **272,** 375
Nicotine
  binding to synthetic peptides comprising residues 188–207 of nicotinic acetylcholine receptor α subunits, **268,** 480
Nicotinic acid adenine dinucleotide phosphate
  binding in sea urchin eggs, characterization, **276,** 112
NifH
  interaction with NifM, yeast two-hybrid system study, **270,** 863
NifM
  interaction with NifH, yeast two-hybrid system study, **270,** 863

- Ninein gene
  - genomic organization and molecular characterization (human), **279,** 989
- Nitration
  - tyrosine
    - alteration by nitrite inhalation (rat), **275,** 335
    - in p53, by nitric oxide in MCF-7 cells, **267,** 609
- Nitric oxide
  - biphasic effects in primary osteoblasts, cGMP dependence (rat), **274,** 477
  - B-NOD donating, pharmacology, **275,** 350
  - drugs donating, inhibition of platelet aggregation independently of cGMP (human), **279,** 412
  - effects on erythrocyte membrane fluidity in essential hypertension, EPR study (human), **275,** 946
  - and endotoxin, induction of MIP-1γ gene transcription in ANA-1 murine macrophages, **277,** 617
  - functional inhibition of insulin-secreting cells, partial protection by γ-tocopherol, **277,** 334
  - heme oxidation mediated by, in normal and sickle erythrocytes (human), **275,** 962
  - hepatocytes producing, GTP cyclohydrolase I coinduction (rat), **276,** 633
  - hypoxia-inducible-factor-1 induction by, mediation via phosphatidylinositol 3-kinase pathway (LLC-PK$_1$ cells), **278,** 263
  - inducible synthesis, inhibition by glucosamine (RAW 264.7 murine macrophages, rat), **279,** 234
  - induction of cyclooxygenase-2 expression in rheumatoid synovial cells (human), **268,** 928
  - inhibition of
    - cruzipain (*Trypanosoma cruzi*), **270,** 437
    - cytochrome *c* oxidase and degradation, mechanisms, **274,** 183
    - falcipain (*Plasmodium falciparum*), **267,** 190
    - inducible NOS mRNA expression in RAW 264.7 macrophages, **271,** 353
    - voltage-dependent calcium currents in dorsal root ganglion cells (rat), **271,** 509
  - mediation of 17β-estradiol-stimulated human and rodent osteoblast proliferation and differentiation, **277,** 604
  - modulation of expression of keratinocyte-derived chemotactic cytokines *in vitro* (mouse), **274,** 689
  - nitration of tyrosine residues in p53 in MCF-7 cells, **267,** 609
  - pial arteriolar dilation in female rat dependent on, effects of chronic estrogen depletion and repletion, **269,** 165
  - presence within mitochondria, direct evidence, **272,** 129
  - production
    - in activated RAW 264.7 macrophages, inhibition by chitinous materials, **271,** 229
    - in endothelial cells, effect of midkine (pig), **276,** 830
    - hypotonic stress-induced, in endothelium, dependence on endogenous ATP (bovine), **274,** 736
    - and NOS expression, in rat smooth muscle cells, effect of hypoxia, **268,** 329
    - by NOS-I and NOS-II isoforms, modulation by copper in glial cells (rat), **275,** 776
    - regulation by arginine metabolic enzymes, **275,** 715
    - role in apoptosis in dorsal lateral geniculate nucleus after monocular deprivation (rat), **278,** 360
    - stimulation by insulin via ERK in osteoblast UMR-106 cells, **278,** 712
  - regulation of aggregation of stimulated neutrophils (human), **274,** 482
  - release in bone marrow-derived preosteoclast-like cells, stimulation by fluid shear stress (rat), **270,** 643
  - release from NO–aspirin and glyceryl trinitrate, common pathway for, **274,** 255
  - role in endothelium-dependent arterial relaxation in rat by human leptin, **273,** 745
  - scavenging by superoxide: review of $\cdot O_2^-$ as messenger of endothelial function, **278,** 1
  - stimulation of tyrosine phosphorylation of p125^{FAK} and paxillin in pancreatic acini (rat), **274,** 635
  - vascular, spin trapping using colloid Fe(II)-diethyldithiocarbamate, **275,** 672
  - xanthine oxidase-catalyzed reduction of organic nitrites to, **270,** 880
- Nitric-oxide synthase
  - attenuated activity and expression in intestinal ischemia/reperfusion injury (rat), **269,** 160
  - endothelial
    - expression, alteration by nitrite inhalation (rat), **275,** 335
    - gene, and *NOS1* and *NOS2* genes, variants in asthmatics, **267,** 761
    - gene knockout mice, analysis of NO role in 17β-estradiol-stimulated osteoblast proliferation and differentiation, **277,** 604
    - mediated pial arteriolar dilation in female rat, effects of chronic estrogen depletion and repletion, **269,** 165
  - expression, and NO production, in rat smooth muscle cells, effect of hypoxia, **268,** 329
  - inducible
    - gene, and *NOS1* and *NOS3* genes, variants in asthmatics, **267,** 761
    - gene regulation in rat liver in endotoxin shock, **268,** 221
    - induction, stimulation by insulin via ERK in osteoblast UMR-106 cells, **278,** 712
    - inhibition
      - by acetaminophen in RAW 264.7 cells: NF-κB regulation by acetaminophen and salicylates, **272,** 758
      - by ONO-1714, **270,** 663
    - mRNA expression, inhibition by NO in RAW 264.7 macrophages, **271,** 353
  - inducible, expression
    - in C6 glioma cells, role of NF-κB signaling, **275,** 268
    - inhibition of hypoxia-inducible factor-1 activity (C6 glioma cells), **279,** 30
    - inhibition by PACAP in βTC cells, prevention of cytokine-induced cytotoxicity via, **278,** 211
    - in rat VSMC, inhibition by retinoic acid through retinoic acid receptor α, **270,** 846
  - modulation by copper in glial cells (rat), **275,** 776
  - neuronal, azo reduction of methyl red, role of FMN, **275,** 752
  - neuronal, *NOS1* gene
    - and *NOS2* and *NOS3* genes, variants in asthmatics, **267,** 761
    - polymorphism associated with asthma (human), **272,** 391
  - role in ischemia/reperfusion-induced liver injury (mouse), **276,** 851
- Nitrite ion
  - protection of Cu,Zn-superoxide dismutase during peroxidative activity with H_2O_2, **274,** 57
- Nitrites
  - inhalation, effects on tissue NOS III expression and tyrosine nitration and phosphorylation (rat), **275,** 335
  - organic, xanthine oxidase-catalyzed reduction to nitric oxide, **270,** 880
- Nitroalkanes
  - reduction, in microperoxidase 8-catalyzed formation of iron(II)–nitrosoalkane complexes, **278,** 217
- Nitroaromatic compounds
  - *Ralstonia* sp. SJ98 chemotaxis toward and degradation of, **269,** 117
- *o*-Nitrobenzoate
  - degradation via anthranilic acid by *Arthrobacter protophormiae,* **267,** 236
- *o*-Nitrobenzoic acid
  - *Ralstonia* sp. SJ98 chemotaxis toward and degradation of, **269,** 117
- *p*-Nitrobenzoic acid
  - *Ralstonia* sp. SJ98 chemotaxis toward and degradation of, **269,** 117

- 6-Nitro-3′-bromoflavone
  - identification as high-affinity ligand of brain benzodiazepine binding site with agonistic properties (rat), **273,** 694
- 4-Nitrocatechol
  - plasmid-encoded degradation by *Arthrobacter protophormiae,* **270,** 733
  - *Ralstonia* sp. SJ98 chemotaxis toward and degradation of, **269,** 117
- Nitrogen
  - liquid nitrogen freezing, in EPR detection of DEPMPO–superoxide radicals, **275,** 895
- *p*-Nitrophenol
  - biodegradation by bacteria, kinetics, **274,** 626
  - plasmid-encoded degradation by *Arthrobacter protophormiae,* **270,** 733
  - *Ralstonia* sp. SJ98 chemotaxis toward and degradation of, **269,** 117
- Nitrosation
  - β-globin, mediated by NO, in normal and sickle erythrocytes (human), **275,** 962
- (*S*)-Nitroso-acetyl-penicillamine
  - inhibition of cruzipain from *Trypanosoma cruzi,* **270,** 437
- *S*-Nitrosoalbumin
  - circulating, increase in lipopolysaccharide-treated rats, **273,** 22
- Nitrosoalkane–iron(II) complexes
  - formation: catalysis by microperoxidase 8, **278,** 217
- *S*-Nitrosoglutathione
  - inhibition of cruzipain from *Trypanosoma cruzi,* **270,** 437
  - inhibition of platelet aggregation independently of cGMP (human), **279,** 412
  - MCF-7 cells treated with, increase in nitrotyrosine in p53 protein, **267,** 609
- *S*-Nitrosohemoglobin
  - circulating, increase in lipopolysaccharide-treated rats, **273,** 22
- *S*-Nitrosothiols
  - formation in blood of lipopolysaccharide-treated rats, **273,** 22
  - low-molecular-weight, inhibition of protein-tyrosine-phosphatases, **268,** 310
- S-Nitrosylation
  - α_1-protease inhibitor functions after, analysis: inhibition of cysteine protease and antibacterial activity (human), **267,** 918
  - enhancement in glycosylated hemoglobin (human), **271,** 217
- Nitrotyrosine
  - p53 protein, increase after *S*-nitrosoglutathione treatment of MCF-7 cells, **267,** 609
- Nitrovasodilators
  - metabolism, role of xanthine oxidase-catalyzed reduction of organic nitrites to nitric oxide, **270,** 880
- Nkx2.2
  - homeodomain, cooperatively acting nuclear localization signals (mouse), **270,** 695
- NKXX2.1 protein
  - functionally distinct forms, expression in pulmonary epithelium, **270,** 462
- NMDA receptor, *see N*-Methyl-D-aspartate receptor
- *N-myc* oncogene
  - downregulation of activin A, **274,** 405
- Nociceptin
  - highly potent analog containing Arg-Lys triple repeat, **278,** 493
- *nodF*
  - adjacent, characterization of px_2 gene in *Rhizobium leguminosarum* to enhance inducible expression of, **275,** 91
- Noggin
  - functionally related sites in, characterization (*Xenopus laevis*), **270,** 293
- Noninsecticidal parasporal proteins
  - *Bacillus thuringiensis* serovar *shandongiensis* isolate, preferential cytotoxicity to leukemic T cells, **272,** 218
- Non-small cell lung carcinoma cells
  - oncogenic potential and normal growth, effects of endogenous AP-1 (A549, H1299 cells), **278,** 97
- Nonsteroidal anti-inflammatory drugs
  - improvement of circulating levels of superoxide dismutase in rheumatoi arthritis, **270,** 714
  - modulation of cyclooxygenase-2 expression in lipopolysaccharide-stimulated monocytes (human), **278,** 790
- Nonvesicular transport
  - role in biliary secretion of phospholipids (rat), **268,** 790
- Nonylphenol
  - inhibition of testis endoplasmic reticulum Ca^{2+} pumps (rat), **277,** 568
- *p*-Nonylphenol
  - effects on 92-kDa gelatinase secretion by human peripheral lymphocytes and U937 cells *in vitro,* **279,** 270
  - sulfation by human cytosolic sulfotransferases, **267,** 80
- Norcantharidin
  - cytotoxicity mechanism and role of p53: effects in glioblastoma cell lines, **276,** 278
- Norepinephrine
  - phospholipase C-β isozyme expression in neonatal rat cardiomyocytes stimulated by, **275,** 1
- Notch
  - *Hey* genes as targets of, identification (human, mouse), **275,** 652
  - Notch1 and Notch3, physical interaction of Delta1, Jagged1, and Jagged2 with, **276,** 385
- NPT1
  - *p*-aminohippuric acid transport at renal apical membrane mediated by, **270,** 254
- Nrf2
  - binding of, inhibitory effects of ERK and p38 MAP kinase inhibition, **278,** 484
- NS3 protease
  - hepatitis C virus
    - cofactor NS4A, lack of activity in I25A/I29A mutant, restoration by N-biotinylation, **267,** 278
    - RNA aptamer-binding site, identification, **279,** 557
- NS4B
  - hepatitis C virus, transformation of NIH3T3 cells in cooperation with Ha-*ras* oncogene, **267,** 581
- *Nthl1* gene
  - and *Tsc2* gene, bidirectional promoter between, identification of functional elements in, **273,** 1063
- Nuclear envelope
  - *N*-ethylmaleimide-sensitive factor association with, analysis (PC12 cells) **274,** 559
- Nuclear export
  - signal identification in UL37 protein of HSV-2, **276,** 1248
- Nuclear factor I binding motif
  - hepatic, role in transcriptional regulation of regucalcin gene, **269,** 270
- Nuclear factor for interleukin-6
  - mRNA, peptide segment specifically binding to 3′-untranslated region of detection by three-hybrid strategy, **276,** 101
- Nuclear factor-κB, *see* NF-κB
- Nuclear factors
  - sequence-specific, interacting with senescence marker protein-30 gene promoter, identification (mouse), **272,** 436
- Nuclear hormone receptors
  - Gadd45 family proteins as coactivators of, **272,** 193
- Nuclear localization
  - Jumonji (COS-7, NIH-3T3 cells), **274,** 332
  - Mcl-1a in zebrafish embryo, **279,** 725
  - $p27^{Kip1}$, minimal requirements for, **274,** 37
  - p29 (HeLa cells), **279,** 732
  - perinuclear localization of p125, protein regions required for, **279,** 144
  - rat TIMELESS-like protein in transfected COS-1 cells, **279,** 131

Nuclear localization signals
  in BRCA2 protein, **270,** 171
  cooperatively acting, in homeodomain of Nkx2.2, **270,** 695
  prothymosin α, interaction with yeast importin α, role in nuclear uptake of cargos, **274,** 548
Nuclear magnetic resonance
  carboxypropyldeoxoartemisinin and deoxoartemisinin, **274,** 359
  cation-dependent conformational switches in d-TGGCGGC with two triplet repeats of Fragile X Syndrome, **278,** 833
  C-tetrad observation in structure of SV40 repeat sequence GGGCGG, **270,** 967
  ^{19}F, study of conformational changes of human estrogen receptor, **270,** 988
  ^{1}H
    conformation of antiherpetic C5-substituted 2′-deoxyuridines, **272,** 64
    overlapping signals in carp seminal plasma, assignment by proton-detected 2D C,H correlation spectroscopy, **269,** 76
  low-barrier hydrogen bond in transition-state analog complex of chymotrypsin, deuterium isotope effect, **273,** 789
  MHC class I protein interaction with its antigen peptide, **278,** 609
  ^{31}P, *in vivo* metabolic imaging of cardiac bioenergetics in transgenic mouse, **271,** 222
  real-time, unfolding kinetics of tryptophan side chains in dimerization and hinge regions of HIV-1 protease tethered dimer, **269,** 387
  two-dimensional COSY spectra, effects of molecular alignment of proteins in bicellar solutions, quantitation, **272,** 694
Nuclear matrix proteins
  hNMP 265, homology with eukaryotic initiation factor 4A (human), **267,** 339
  NXP-1 identification (human), **267,** 418
Nuclear proteins
  binding to antioxidant/electrophile response element, activation in vascular smooth muscle cells by benzo[*a*]pyrene (mouse), **267,** 12
  hepatic, intracellular signaling factors-enhanced binding to TTGGC sequence in rat regucalcin gene promoter, **279,** 275
Nuclear receptor coactivators
  SRC-1, role in estrogen-dependent growth of MCF-7 cells, **267,** 311
Nuclear scaffold protein
  P130, transcription modulation by, analysis (rat), **279,** 282
Nuclear translocation
  CAR, in response to phenobarbital: induction of cytochrome P450 genes, **277,** 1
  fibroblast growth factor in endothelial cells by microtubule- and lysosome-independent pathway (human), **273,** 551
  HIF-1β, inhibition by zinc resulting in HIF-1 inactivation, **268,** 652
  NF-κB, mediated by TNF, suppression in L929 fibroblasts by TGF-β-induced matrix proteins, **267,** 194
  p95Vav translocation to cytoplasm, promotion by IFN-α signaling, **267,** 692
  Smad8, effects of Smad8 phosphorylation downstream of ALK-2, ALK-3, and ALK-6 (mouse), **271,** 682
  TSC-22, concomitant with apoptosis, transcriptional regulatory activity after, **278,** 659
Nuclear transport receptors
  RanBP17 and close homologue RanBP16, identification (human, mouse), **278,** 241
Nuclease-hypersensitive element
  in c-*myc* promoter, propensity to adopt *i*-tetraplex structures (human), **278,** 158; *erratum,* **279,** 306
Nucleic acids
  inhibition of dNTPase (pig, yeast), **276,** 823
Nucleolin
  binding to double-stranded telomeric DNA *in vitro,* **268,** 909
Nucleolus
  adjustments associated with seasonal adaptation, modulation of protein kinase CK2 β subunit gene expression (carp), **271,** 735
  parathyroid hormone-related peptide targeting into, due to inefficiency of signal sequence, **273,** 621
Nucleoredoxin
  regulation of NF-κB, AP-1, and CREB activation in HEK293 cells, **274,** 177; *erratum,* **275,** 247
Nucleoside analogs
  phosphorylation, subcellular location of, and synergistic effects of hydroxyurea, **276,** 179
Nucleosides
  apoptosis-inducing, from CD57^{+}HLA-DR^{bright} natural suppressor cell line, activation of caspase-3 in Molt4 cells, **268,** 514
Nucleoside transporter 1
  equilibrative, nitrobenzylthioinosine-sensitive, genomic organization and expression (mouse), **277,** 200
Nucleotide periodicity
  in genes and genomes, Fourier signals characterizing, vectors of Shannon information from, **268,** 289
Nucleotides
  binding and sulfation catalyzed by phenol sulfotransferase, **271,** 818
Nucleotide sequence, *see* Sequence studies
Nucleotide sugars
  precursors for exopolysaccharide synthesis in *Burkholderia cepacia,* enzymes leading to, **276,** 71
Nucleus, *see also* Nuclear localization; Nuclear translocation
  apoptotic thymocyte, DNase γ detection *in situ* (rat), **275,** 343
  binding of HIV-1 VPR to nucleoplasmic components, role of cytosolic factors, **270,** 1055
  cargo uptake, role of interaction of yeast importin α with NLS of prothymosin α, **274,** 548
  function in regenerating liver, regulation, role of regucalcin, review, **276,** 1
  hormonal receptors, regulation of carbonic anhydrase II gene expression in HD11 monocytic cells, **271,** 481
  increased activity and intranuclear expression of phospholipase D2 in human renal cancer, **278,** 140
  independent Ku70 and Ku80 nuclear translocation (HeLa-S3 cells), **276,** 1105
  SDH2–RPS14 precursor encoded in, proteolytic processing to generate mitochondrial RPS14 (maize), **271,** 380
  skeletal muscle, Ca^{2+}/calmodulin-dependent protein kinase II enrichment in, analysis (chicken), **270,** 488
  viscoelastic properties (pig), **269,** 781
Nurr1 response element
  activating tyrosine hydroxylase gene promoter, identification in cultured cells, **274,** 590
NXP-1
  identification as nuclear matrix component (human), **267,** 418

O

Obesity
  development in estrogen receptor-α-deficient male mice, **278,** 640
  leptin-deficient *ob/ob* mouse model, constitutive and inducible expression of CYP2E1, **268,** 337
  leptin resistance of adipocytes in, role of suppressors of cytokine signaling (rat), **277,** 20
  phenotypes uncovered by partial leptin receptor gene deletion in transgenic mice, **269,** 502
  visceral, tissues of rat model with, differential expression of lipoprotein lipase gene, **277,** 423
Obstructive nephropathy
  upregulation of rat RAMPs for adrenomedullin/CGRP receptor, **270,** 89

Occipital pole
  cAMP-specific phosphodiesterase PDE7B expression (human), **271,** 575
Octapeptide repeat region
  prion protein, binding of Cu(II) in redox-inactive state, **267,** 398
Octreotide
  effect on proliferation and VEGF secretion from murine HECa10 endothelial cell culture, **268,** 567
Octylphenol
  inhibition of testis endoplasmic reticulum Ca^{2+} pumps (rat), **277,** 568
4-Octylphenol
  sulfation by human cytosolic sulfotransferases, **267,** 80
ODF/RANKL, *see* Osteoclast differentiation factor
Oleamide
  biosynthesis, model for studying: peptidylglycine α-amidating monooxygenase induction in N$_{18}$TG$_2$ cells, **267,** 521
Oleate
  in transcriptional homeostatic control of membrane lipid composition, **273,** 1
Oleuropein aglycone
  olive oil rich in, effect on isoprostane excretion (human), **278,** 797
Olfactory bulb
  voltage-gated sodium channel α subunit gene *SCN12A* identification (human), **267,** 262
Olfactory neuroblastoma cells
  differentiation and death induction by bFGF (human ONB cell line JFEN), **279,** 172
Oligodeoxynucleotides
  antisense, selective inhibition of cyclooxygenase-2, effect on induction of adjuvant-induced arthritis (rat), **269,** 415
  with mismatch basepairs, inhibition kinetic study: *BanI* restriction endonuclease binding in DNA major groove, **269,** 35
Oligomerization
  β-amyloid-42 implicated in Alzheimer's disease, **273,** 1003
  hsp25 N-terminal 33-amino-acid deletion variant, **270,** 183
  ninein, regulation by glycogen synthase 3β phosphorylation (human), **279,** 989
  sarcoplasmic reticulum Ca^{2+}-ATPase, effect of halothane (rabbit), **271,** 770
Oligomers
  chain length, effect on procyanidin antioxidant activity (cocoa), **276,** 945
Oligonucleotides
  antisense
    inhibitory effects in experimentally infected mouse model of influenza A virus, **279,** 158
    knockdown of caveolin-1, effect on angiogenesis *in vitro* and *in vivo,* **276,** 756; *erratum,* **279,** 305
  circular dumbbell RNA/DNA chimeric, inhibition of HIV-1 replication, **270,** 953
  gold nanoparticles capped by, in assay for selective determination of polynucleotides using AFM imaging, **279,** 265
  pyrimidine morpholino, formation of stable triple helix in absence of Mg^{2+}, **270,** 363
  real-time monitoring in biological samples by hybridization assay, **268,** 92
Oligopeptidase
  endooligopeptidase A identification as predominant cytosolic oligopeptidase in rabbit brain, **269,** 7; *erratum,* **272,** 309
Oligosaccharides
  N-linked, homogeneous, in synthesis of neoglycoenzymes using immobilized endo-β-*N*-acetylglucosaminidase A, **267,** 134
  N-linked glycans, inner perivitelline-derived, induction of acrosomal exocytosis in chicken spermatozoa, **278,** 84
  trimming, role in endoplasmic reticulum-associated degradation of tyrosinase, **271,** 22
O-linked GlcNAc transferase
  structure and mediation of glycan-dependent signaling, **271,** 275
Olive oil
  hydroxytyrosol in, induction of cytochrome *c*-dependent apoptosis (HL-60 cells), **278,** 733
  rich in catecholic phenols, effect on isoprostane excretion (human), **278,** 797
Oncogenes
  qin, targeting of Qik serine–threonine kinase, **276,** 564
Oncogenic potential
  and normal growth, of human tumor cell lines, effect of inhibition of endogenous AP-1, **278,** 97
Oncoproteins
  HPV-16, cell lines positive for, expression of angiogenesis modulators, **277,** 55
ONO-1714
  inhibition of inducible nitric-oxide synthase, **270,** 663
Oocytes
  Ca^{2+}-activated Cl$^-$ channel expressed in, modulation by 14-3-3ε (*Xenopus laevis*), **270,** 581
  epitope-tagged glutamate receptor GluR1 subunit expressed in, topology (*Xenopus laevis*), **276,** 157
  germinal vesicle breakdown, role of RhoA (mouse), **273,** 997
  maturation, associated Nek2 expression and localization (pig), **279,** 799
  rat sodium-dependent multivitamin transporter expressed in, electrogenic nature of activity (*Xenopus laevis*), **270,** 836
  transport, regulation by SepOvotropin *(Sepia officinalis),* **276,** 1013
  uracil-containing DNA in mitochondrial extract, excision repair (*Xenopus laevis*), **278,** 395
  viability, loss by histidine substitution of leucine 325 in glutamate transporter EAAT1 (*Xenopus laevis*), **275,** 382
Open reading frame
  major, of SOCS-1, translational repression by upstream ORF, **268,** 255
Operon structure
  thermophilic desulfurizing enzyme genes *tdsA, tdsB,* and *tdsC* (*Paenibacillus* sp. A11-2), **270,** 81
OPG/OCIF
  mRNA and protein expression during osteoblast development (mouse), **274,** 249
Opioid receptors
  Arg-Lys triple repeat-containing nociceptin analog with high affinity for, **278,** 493
  binding activities of stereoisomeric analogues of endomorphin-2, **276,** 7
  mu subtype, upregulation in lymphocytes by morphine (human, monkey), **279,** 621
Optical biosensors
  analysis of ternary complex formation in cytochrome P4502B4 system, **273,** 750
Optic nerve head
  astrocyte, myocilin expression (pig), **276,** 1129
Orexin
  antibodies, inhibition of food intake after central injection in fasted rats, **267,** 527
  and melanin-concentrating hormone, differential gene regulation in agouti-related protein/melanocortin-4 system (mouse, rat), **268,** 88
  role in stress reaction in rat, **270,** 318
  suppression of catecholamine synthesis and secretion in cultured PC12 cells, **274,** 310
Orexin-A
  binding of, sensitivity to phospholipase C inhibitors, neuropeptide Y, and secretin, **272,** 959
Orexin receptors
  gene expression in rat hypothalamus, effect of leptin treatment, **269,** 41
Organ of Corti
  characterization of novel and identified genes (guinea pig), **273,** 84

Organic anion transporter
  moat1, molecular identification (rat), **275,** 831
  OATP-B, -D, and -E, molecular identification and characterization (human), **273,** 251
Organic anion transporter-1
  gene, *in vivo* expression and genomic structure (human), **275,** 623
  liver-specific
    full-length cDNA cloning and genomic organization (mouse), **272,** 563
    and splice variant, cloning and partial gene characterization (rat), **274,** 79
Organic nitrites
  xanthine oxidase-catalyzed reduction to nitric oxide, **270,** 880
Organogenesis
  FGF10 as major ligand for FGF receptor 2 IIIb in mouse multi-organ development, **277,** 643
Organophosphorus hydrolase
  mutagenesis: enhancement of VX hydrolysis, **279,** 516
Organosulfur compounds
  antithrombotic, structure–activity relationships, **273,** 421
ORL1
  Arg-Lys triple repeat-containing nociceptin analog with high affinity for, **278,** 493
Ornithine decarboxylase
  degradation by 26S proteasome, **267,** 1
  metabolic turnover in trypanosomatid protozoa, **279,** 663
Ornithine transcarbamylase
  gene regulation in rat liver in endotoxin shock, **268,** 221
Orosomucoid
  –α_1-acid glycoprotein, gene encoding, rearrangement (human), **276,** 779
  cleavage by chromium(V) species, relevance to Cr biotoxicity (human), **279,** 980
Orphan nuclear receptors
  estrogen receptor-related receptor γ alternative splicing and expression (mouse), **267,** 532
Osmomechanical stress
  regulation of membrane trafficking in polarized epithelial cells (rabbit), **271,** 429
Osmotic response element binding protein
  purification, identification, and characterization (Chang liver cells), **270,** 52
Osmotic stress
  apoptosis induced in cardiac fibroblasts by, regulation by insulin-like growth factor 1 (rat), **273,** 322
  effect on expression of glyceraldehyde-3-phosphate dehydrogenase gene (*Pleurotus sajor-caju*), **278,** 192
  induced apoptosis in cardiac myocytes, regulation by insulin-like growth factor-1, **270,** 1029
OsPR1b gene
  phytohormonal regulation in close interaction with light signals (rice), **278,** 290
Ossification
  spinal ligaments in female patients, role of leptin, **267,** 752
Osteoblast-like cells
  aromatase activity and proliferation, effect of IL-1β (human), **268,** 60
Osteoblasts
  anabolic effect of elcatonin (rat), **269,** 317
  biphasic effects of NO, cGMP dependence (rat), **274,** 477
  17β-estradiol-stimulated proliferation and differentiation, mediation by nitric oxide (human, mouse, rat), **277,** 604
  failure of *Cbfa1*-deficient calvarial cells to differentiate into, *in vitro* study (mouse), **273,** 630
  maturation, suppression of osteoclastogenesis in coculture with bone marrow cells (mouse), **274,** 249
  membrane-bound and soluble RANKL expression and function (mouse), **275,** 768
  mesenchymal progenitor cell line C3H10T1/2 differentiation into, induced by BMP-2, role of ERK, **268,** 757
  mitogenic responses, induction by p42/44 and p38 MAP kinase activation by extracellular calcium-sensing receptor agonists (MC3T3-E1 cells), **279,** 363
  nitric oxide production, stimulation by insulin via ERK (UMR-106 cells), **278,** 712
  $p57^{Kip2}$ gene regulation by 1,25-dihydroxyvitamin D_3 in primary culture (rat), **269,** 422
  proliferation
    effect of bioglass 45S5 ionic products (human), **276,** 461
    promotion by bovine milk kininogen fragment 1·2 (MC3T3-E1 cells), **269,** 628
  prostaglandin G/H synthase-2 mRNA expression, effect of pulsating fluid flow, comparison with osteocytes and periosteal fibroblasts (chicken), **268,** 414
  stromal/osteoblastic cell lines, IL-6 expression, differential stimulation by PGE_2 and calcemic hormones (mouse), **270,** 1080
  TNF-α-dependent activation of NF-κB, effect of vector-averaged gravity using clinostat rotation (HOS-TE85 cells), **279,** 258
  vitamin D-dependent promoter activity, increase by zinc (rat), **271,** 1
  vitamin D receptor/retinoid X receptor coactivator expressed in, detection and interactions in multimeric receptor complex, **267,** 813
Osteocalcin
  upregulation by low-intensity pulsed ultrasound in mouse ST2 bone marrow-derived stromal cells, **268,** 216
Osteoclast differentiation factor
  downregulation, association with inhibition of osteoclast formation by VIP and pituitary adenylate cyclase-activating polypeptide, **271,** 158
  induced osteoclastogenesis, effect of IFN-γ, **276,** 868
  induction by interactions between cancer and bone marrow cells, **267,** 632
  membrane-bound and soluble, protein expression and functional difference (mouse), **275,** 768
  mRNA and protein expression during osteoblast development (mouse), **274,** 249
  –osteoprotegerin ligand, calcium effect (MC3T3-E1 cells), **276,** 524
  secreted form inducing osteoclast formation, mRNA expression by cancer cells causing humoral hypercalcemia, **269,** 532
  synergism with activin A for osteoclast induction, **268,** 2
Osteoclast-like cells
  formation *in vitro,* induction by interactions between murine cancer and bone marrow cells, **267,** 632
Osteoclastogenesis
  high-efficiency, from granulocyte–macrophage progenitor-derived cells (human, mouse), **267,** 943
  in human bone marrow cultures, stimulation by breast cancer cell line MDA-231, **270,** 1097
  inhibition by VIP and pituitary adenylate cyclase-activating polypeptide, association with osteoprotegerin upregulation and RANKL and RANK downregulation, **271,** 158
  secreted form of ODF/TRANCE inducing, mRNA expression by cancer cells causing humoral hypercalcemia, **269,** 532
  suppression by osteoblast maturation in coculture with bone marrow cells (mouse), **274,** 249
  TRANCE-induced, effect of IFN-γ, **276,** 868
Osteoclastogenesis inhibitory factor, *see* Osteoprotegerin
Osteoclasts
  adherence to bone surface in calvaria, regulation by osteoprotegerin ligand (mouse), **274,** 281
  ADP-ribosyl cyclase of CD38 family, molecular cloning, expression, and functional characterization (rabbit), **273,** 884
  apoptosis, stimulation by high extracellular calcium levels (rabbit), **268,** 899
  induction, activin A as essential cofactor (mouse), **268,** 2

- Osteoclasts (*continued*)
  - microisolated, expression of VIP-1 and PACAP receptors (mouse), **274,** 400
  - osteoclastogenesis and bone resorption, stimulation by breast cancer cell line MDA-231 (human), **270,** 1097
  - resorption of dentine wafer *in vitro,* stimulation by CD36-binding peptide from thrombospondin-1 (human), **270,** 1124
  - sealing zone formation required for bone resorption, prevention by specific antagonists of NMDA receptors (rabbit), **268,** 201
  - survival, role of cell adhesion (rabbit), **270,** 550
  - synthesis and secretion of collagenolytic cysteine proteases, role of $pp60^{c\text{-}src}$ activity (mouse), **272,** 116
- Osteocytes
  - prostaglandin G/H synthase-2 mRNA expression, effect of pulsating fluid flow, comparison with other osteogenic cells (chicken), **268,** 414
- Osteoinduction
  - by bone morphogenetic protein-2 via adenoviral vector under transient immunosuppression (rat), **267,** 382
  - by recombinant human bone morphogenetic protein-2, effect of elcatonin (rat), **269,** 317
- Osteopontin
  - bone, *N*-glycan structures (human), **268,** 814
  - regulated interaction with integrin $\alpha5\beta1$ (K562 cells), **267,** 764
- Osteoprotegerin
  - expression by bone marrow cells cultured in 3D collagen sponges, age-related decline (human), **268,** 669
  - modulation of effects of osteoprotegerin ligand in leukemic cell line FLG29.1, **279,** 391
  - secretion in cocultures of mouse cancer and bone marrow cells, **267,** 632
  - upregulation, association with inhibition of osteoclast formation by VIP and pituitary adenylate cyclase-activating polypeptide, **271,** 158
- Osteoprotegerin ligand
  - effects in leukemic cell line FLG29.1, modulation by osteoprotegerin and calcitonin, **279,** 391
  - –osteoclast differentiation factor, calcium effect (MC3T3-E1 cells), **276,** 524
  - regulation of osteoclast adherence to bone surface in calvaria (mouse), **274,** 281
- Osteosarcoma cells
  - bone morphogenetic protein-2 induction by compactin and simvastatin (human), **271,** 688
  - estradiol-17β sulfotransferase activity (D17 cells), **273,** 505
  - hepatitis B virus preS surface protein-specific receptors, detection (SaOS-2 cells), **277,** 246
  - oncogenic potential and normal growth, effects of endogenous AP-1 (Saos-2, U2-OS cells), **278,** 97
  - p53-deficient, growth suppression induced by overexpression of DAN (SAOS-2 cells), **278,** 20
  - PMCA1 gene transcriptional downregulation by 1,25-dihydroxyitamin D_3, mediation by gene promoter region (ROS 17/2.8 cells), **277,** 722
  - sphingomyelin turnover, activation by 1,25-dihydroxyvitamin D_3 without sphingolipid-induced changes in cytosolic Ca^{2+} (ROS17/2.8 cells), **273,** 95
- Osteotropic factors
  - modulation of membrane-bound and soluble RANKL expression (mouse), **275,** 768
- OTX2
  - interaction with LIM1 and HNF-3β, **267,** 64
- Ovalbumin
  - sensitized mice, antigen-induced eosinophil recruitment into airways of, effect of JAK2 blockade by tyrphostin AG-490, **270,** 209
- Ovarian cancer
  - associated antigenicity, role of O-acetylated Sialyl-Tn, **271,** 281
  - cell lines, amplification and overexpression of TGIF2: TALE-superclass homeobox gene, **276,** 264
- Ovarian follicles
  - preantral follicles from 11-day-old mice, morphology in *in vitro* culture, growth hormone effects, **268,** 36
- Ovary
  - *N*-acetylglucosamine-6-*O*-sulfotransferase GlcNAc6ST-4 expression (human), **274,** 291
  - *DMRT1* and *DMO* gene isolation and characterization (tilapia), **272,** 662; *erratum,* **277,** 781
  - *frizzled-10B* gene expression (*Xenopus laevis*), **278,** 377
  - granulosa cell aromatase activity, inhibition by troglitazone (human), **271,** 710
  - 17β-hydroxysteroid dehydrogenase-I, cDNA cloning (Japanese eel), **279,** 451
  - intracisternal A-particle-like element expression (rat), **278,** 48
  - *in vitro* translation extracts, preparation from *Drosophila,* **270,** 473
  - tetrodotoxin-resistant voltage-gated sodium channel α subunit NaT/Scn11a expression (mouse), **267,** 271
- Oviduct
  - genes expressed during preimplantation period, identification by suppression subtractive hybridization (mouse), **277,** 680
  - waterborne pheromonal peptide modifying, release from cuttlefish eggs: ILME, **275,** 217
- OX40 ligand
  - characterization by monoclonal antibody (rat), **270,** 1041
- OX40 signaling
  - NF-κ activation induced by, negative regulation by N- and C-terminal domains of TRAF3, **272,** 856
- Oxidative damage
  - basal and induced, to mtDNA in T47D cells, effects of mitochondrial glutathione peroxidase-1, **272,** 416
- Oxidatively stable alkaline protease
  - from alkaliphilic *Bacillus* spp., enzymatic properties, sequence studies, and evolution, **279,** 313
- Oxidative phosphorylation system
  - combined enzymatic complex I and III deficiency associated with mutations in nuclear-encoded *NDUFS4* gene, **275,** 63
- Oxidative refolding
  - mini-trypsin inhibitor derived from oil rape proteinase inhibitor type III, **275,** 817
- Oxidative stress
  - activation of LEDGF gene (Cos 7 cells, LECs), **276,** 1320
  - apoptosis in human PBMCs induced by, protective activity of C60 carboxyfullerene, **277,** 711
  - differential signaling pathways after, in mutant myotonin protein kinase cDNA-transfected C2C12 cells, **267,** 739
  - DNA damage due to, aberrant processing in systemic lupus erythematosus (human), **273,** 894
  - effect of myeloperoxidase-catalyzed phenoxyl radicals of vitamin E homologue 2,2,5,7,8-pentamethyl-6-hydroxychromane (HL-60 cells), **270,** 1086
  - exercise-induced, in skeletal muscle, protective effects of flavonoid supplementation (rat), **274,** 389
  - induction of increased amyloid β-protein production and βI and βII PKC activation in NT2 cells, **268,** 642; *erratum,* **272,** 309
  - induction in leukocytes by *Enterobacter cloacae* toxin forming oligomers and binding to proteins, **274,** 649
  - mitochondrial DNA damage induced by, reduction by glutathione peroxidase-1 (T47D cells), **272,** 416
  - in MRC5 fibroblasts, effect of oxidized LDL (human), **276,** 718
  - paraquat-induced, stimulation of yeast 3-phosphoglycerate kinase gene promoter, **270,** 1036
  - prion protein role in cellular resistance: role in SOD activity *in vivo,* **273,** 136

  protein dityrosine detection in atherosclerotic lesion of ApoE-deficient mice using novel monoclonal antibody, **275,** 11
  regulation of p16 interaction with Cdk4, **275,** 764
  responses, and LDL uptake, differential effects of fibrillar IAPP in insulin-producing cell lines, **267,** 619
  yeast resistance to, restoration to *yap1* null strain by introduction of *Chlamydomonas reinhardtii* cDNA for 60S ribosomal protein L10a, **267,** 953
Oxindoles
  endogenous, antiproliferative and proapoptotic effects: 5-hydroxyoxindole and isatin, **276,** 379
8-Oxo-2′-deoxyadenosine
  and 8-oxo-2′-deoxyguanosine, simultaneous measurement by HPLC-MS/MS, **277,** 764
8-Oxo-2′-deoxyguanosine
  formed by oxidative DNA damage, repair, modulation by vitamin C (human), **273,** 894
  and 8-oxo-2′-deoxyadenosine, simultaneous measurement by HPLC-MS/MS, **277,** 764
Oxometalloporphinates
  ligated, oxygen exchange with bulk water, **272,** 551
Oxygen
  exchange between ligated oxometalloporphinates and bulk water, **272,** 551
  molecular, production from H_2O_2, role of Na^+/K^+-ATPase, **274,** 750
  non-steady-state diffusion, in metmyoglobin solutions, **276,** 773
  singlet, *see* Singlet oxygen
Oxygenation
  (3*Z*)-alkenals to 4-hydroxy-(2*E*)-alkenals in plant extracts, nonenzymatic mechanism, **277,** 112
Oxygen free radicals
  defensive enzymes and proteins, analysis in cell lines from ALS patients, **273,** 359
Oxygen-regulated protein
  150-kDa, expression in pancreatic beta cells, correlation with insulin secretion (mouse), **267,** 831
Oxyhemoglobin
  autoxidation, heme degradation during, **273,** 839
  coagulation after modification by Hg(II), inhibition by histidine, **273,** 816
oxyR gene
  role in defense against spontaneous mutagenesis in *Escherichia coli,* **279,** 427
Oxysterols
  detection in oxidized macrophages from human carotid artery and aortic atherosclerotic lesion in apolipoprotein E-deficient mice, **269,** 775

P

P2Y$_1$ receptor
  adenosine-derived, non-phosphate antagonists of, synthesis and effects on inositol phosphate synthesis, **272,** 327
P2Y$_2$ receptor
  desensitization in mesangial cells, reversal by growth hormone (rat), **270,** 594
P5
  NFAT/AP-1 site in human IL-4 promoter, **270,** 1016
P8 elements
  in conserved core of group I intron ribozymes, characterization (*Tetrahymena*), **267,** 85
p16
  interaction with Cdk4, regulation by oxidative stress, **275,** 764
p16^{INK4A}
  decreased expression, role in retinoic acid extension of *in vitro* life span of human oral keratinocytes, **268,** 268
  expression, induction of dominant suppression of glioblastoma growth *in situ* via necrosis and cell cycle arrest (RT-2 cells), **269,** 718
p21
  cooperative action with cyclin D1 in activation of Cdk4, **267,** 388
p21^{WAF1}
  binding domain for, mapping on protein kinase CK2 β-subunit, **268,** 882
p21$^{WAF1/CIP1}$
  expression/activity modulation in breast cancer cells by COUP-TFII, role in regulation of G2/M progression, **270,** 1144
  inhibition of initiator caspase cleavage by TRAIL death receptor DR4, **269,** 179
p21$^{Waf1/Cip1/Sdi1}$
  formation of complex with hepatitis C virus core protein, **273,** 479
  gene, transcriptional repression by c-jun via Sp1 site, **270,** 303
p21-activated kinase
  phosphorylation of desmin at sites different from Rho-associated kinase, **272,** 712
  upregulation in human pregnant myometrium, **269,** 322
p23
  cytoplasmic domain, structure in solution, implications for COPI vesicle formation, **271,** 401
p27
  N-terminal domain, block of cdk2/cyclin E phosphorylation by CDK-activating kinase, **271,** 469
p27^{Kip1}
  accumulation in cyclin D1-overexpressing fibroblasts, role in induction of G1 arrest by herbimycin A, **267,** 54
  nuclear localization, minimal requirements for, **274,** 37
  promoter, activation by IFN-α 2b (human), **269,** 31
  SCF^{skp2} activity toward, enhancement by cullin-1 modification by ubiquitin-like protein Nedd8, **270,** 1093
p29
  localization in nucleus (HeLa cells), **279,** 732
p35
  baculoviral, effect on caspase-9, in cell-free system of apoptosis, **276,** 855
  processing to truncated form by calpain in acutely injured neuronal cells (rat), **274,** 16; *erratum,* **276,** 390
p36
  in HepG2 cells, effects of insulin, cAMP, dexamethasone, and $[Ca^{2+}]_i$ changes, **272,** 41
p38 MAP kinase
  activation
    by extracellular calcium-sensing receptor agonists: induction of mitogenic responses in osteoblastic MC3T3-E1 cells, **279,** 363
    by phosphatidylinositol 3-kinase (rat), **276,** 502
    role in induction of apoptosis in CESS B cell line by NGF withdrawal, **278,** 753
  and c-Jun N-terminal kinase, differential role in c-Myc and s-Myc-mediated apoptosis, **267,** 221
  induction by tensin, **272,** 717
  inhibition, effect on binding of Nrf2 and induction of GCS genes, **278,** 484
  p38γ isoform, activation in melanoma cells, induction by cisplatin and UV radiation (human), **278,** 724
  p62 function as regulator of, **269,** 521
  pathway, and ERK pathway, differential regulation of vascular endothelial growth factor expression in oncogene-transformed cell lines, **270,** 108
  role in CH31 B cell rescue from antigen receptor-induced apoptosis (mouse), **276,** 417
  signaling, in pancreatic β-cell proliferation (murine MIN6 cells), **268,** 541; *erratum,* **271,** 558
p38 MAP kinase inhibitor
  blocking of neutrophil β2-integrin upregulation, **270,** 858
p40/GPR69A
  characterization as peripheral membrane protein related to lantibiotic synthetase component C, **275,** 69

- p41
  - generation by caspase cleavage of p42/SETβ in irradiated MOLT-4 cells, **278,** 627
- p42/44 MAP kinase
  - activation
    - by extracellular calcium-sensing receptor agonists: induction of mitogenic responses in osteoblastic MC3T3-E1 cells, **279,** 363
    - independent of cAMP inhibition of agonist-induced heparin-binding EGF-like growth factor gene expression, **277,** 558
    - inhibition by TGF-β-induced matrix proteins (L929 fibroblasts), **267,** 194
  - signaling, in pancreatic β-cell proliferation (murine MIN6 cells), **268,** 541; *erratum,* **271,** 558
- p42/SETβ
  - cleavage by caspase in irradiated MOLT-4 cells, generation of p41 marker for cell death, **278,** 627
- p46
  - in HepG2 cells, effects of insulin, cAMP, dexamethasone, and $[Ca^{2+}]_i$ changes, **272,** 41
- p46 polypeptide
  - chicken, distinct regions required for *in vitro* interaction with histones H2B and H4 and histone acetyltransferase-1, **279,** 95
- p47
  - functional expression in lung microvascular endothelial cells (mouse), **278,** 584
- $p47^{phox}$
  - neutrophil NADPH oxidase, interaction with actin (human), **276,** 1186
  - translocation to plasma membrane in Alzheimer's disease brains, **273,** 5
- P48
  - derived from *Mycoplasma fermentans,* induction of leukemia cell differentiation and apoptosis, **269,** 284
- p50
  - identification as component of FMRP-associated mRNP particle (mouse), **279,** 904
- p53
  - apoptosis mediated by
    - apoptosis of A-172 cells resistant to, induction by transduction of Apaf-1 or caspase-9, **272,** 667
    - thioredoxin peroxidase inhibiting, mouse peroxiredoxin V identification as, **268,** 921
  - binding to consensus sequence within supercoiled DNA, modulation by monoclonal antibodies (human), **267,** 934
  - defective, immortalized skin keratinocytes with, UVB-induced cell cycle arrest in G2/M phase, mechanism, **277,** 107
  - gene encoding, mediation of KAI1 gene activation by etoposide (human), **274,** 370
  - hepatocellular carcinomas overexpressing, downregulation of proapoptotic proteins Bax and $Bcl\text{-}X_s$ in, **273,** 54
  - homologs p63 and p73, temperature-sensitive mutants of, **279,** 1001
  - in MRC5 fibroblasts, effect of oxidized LDL (human), **276,** 718
  - mutant $p53^{His273}$, formation of complex with Sp1 on HIV-LTR DNA, **279,** 383
  - and NF-κB RelA, p300/CBP-dependent and -independent transcriptional interference between, **272,** 375
  - role in norcantharidin-induced antitumor cytotoxicity in glioblastoma cell lines, **276,** 278
  - SAOS-2 cells deficient in, growth suppression induced by overexpression of DAN, **278,** 20
  - targeting of KAI1 metastasis suppressor gene, **278,** 499
  - transcriptional inactivation by deletions and single amino acid changes in murine mot-1 protein, **279,** 602
  - tyrosine residues, nitration by nitric oxide in MCF-7 cells, **267,** 609
- $p55^{CDC}$, *see* Cyclin-dependent kinase, Cdc20
- $p56/59^{hck}$
  - activation by by soluble urokinase receptor, role of tyrosine-92, **278,** 440
- $p57^{Kip2}$ gene
  - role in bone metabolism (rat), **269,** 422
- p62
  - function as p38 MAP kinase regulator, **269,** 521
- p63
  - expression and effect in differentiating keratinocytes *in vitro* (human), **273,** 342
  - temperature-sensitive mutants, **279,** 1001
- P64k
  - peptides conjugated to, immunization with, elicitation of anti-PorA antibodies, **277,** 51
- p65
  - recombinant, role in convulxin-induced platelet activation, **270,** 932
  - role in regulation of NF-κB in hepatic stellate cells during cirrhosis (rat), **273,** 546
- $p67^{phox}$
  - chronic granulomatous disease characterized by deficiency of, *ex vivo* complementation (human), **275,** 854
  - translocation to plasma membrane in Alzheimer's disease brains, **273,** 5
- p73
  - enhanced expression during differentiation and complex isoforms in myeloid leukemia (human), **277,** 62
  - expression and effect in differentiating keratinocytes *in vitro* (human), **273,** 342
  - temperature-sensitive mutants, **279,** 1001
- p85
  - gene regulating cytokinesis initiation in *Tetrahymena,* molecular cloning, **264,** 112; *erratum,* **267,** 478
- p85-PI3K
  - identification as component of CIN85 complexes, **278,** 167
- p95Vav
  - nucleus-to-cytoplasm redistribution and formation of complex involving Ku80 and Tyk2, promotion by IFN-α signaling, **267,** 692
- p125
  - regions responsible for Sec23p binding, **279,** 144
- $p125^{FAK}$
  - tyrosine phosphorylation in pancreatic acini, stimulation by NO (rat), **274,** 635
- p130
  - transcription modulation by, analysis: nuclear scaffold protein (rat), **279,** 282
- $p130^{Cas}$
  - identification as component of CIN85 complexes, **278,** 167
- p135
  - O-glycosylation in pancreatic islets, stimulation by glucose and streptozotocin (rat), **267,** 26
- p300/CBP
  - coactivation of cone–rod homeobox transcription factor, **269,** 410
  - role in transcriptional interference between NF-κB RelA and p53, **272,** 375
- PA28
  - tissue distribution (rat), **277,** 348
- PA700
  - expression in rat tissues, **277,** 348
- PACAP, *see* Pituitary adenylate cyclase activating polypeptide
- PAI-1, *see* Plasminogen activator inhibitor-1
- PAL31
  - expression in developing brain (rat), **274,** 427
- Palmitoylation
  - $G_{s\alpha}$ *in vitro,* Cys 160 as site of, **270,** 131
  - inositol on GPI anchors, activities causing, analysis with water-soluble analogue of glucosaminylphosphatidylinositol, **267,** 296
- Palmitoyl-CoA-specific Δ9 fatty acid desaturase
  - from *Caenorhabditis elegans,* **272,** 263

Pancreas
  C1orf9 gene mRNA expression (human), **267,** 855
  cAMP-specific phosphodiesterase PDE7B expression (human), **271,** 575
  exocrine, rab4 expression, subcellular localization, and function, **268,** 847
  expression profiling during acute phase of pancreatitis using cDNA microarrays (mouse), **277,** 660
  KCNJ9 gene expression (human), **274,** 302
  Wnt16 isoform expression (human), **278,** 814
Pancreatic acinar cells
  dissociated, exocytosis in, VEC-DIC microscopy (guinea pig), **277,** 134
  stress-induced activation of TNF-α gene expression (mouse), **268,** 485
  thapsigargin- and agonist-mobilized Ca^{2+} stores, refilling, role of H$^+$-ATPase (mouse), **271,** 311
Pancreatic acini
  amylase secretion, effects of myosin light chain kinase inhibitor wortmannin (rat), **269,** 792
  tyrosine phosphorylation of paxillin and p125^{FAK}, stimulation by NO (rat), **274,** 635
Pancreatic beta cells
  ADP-ribosylation of Gα_{olf} and Gα_s subunits, decrease by high glucose, **271,** 86
  carboxyl methylation of nuclear lamin B (HIT-T15 cells, INS-1 cells, rat islets), **268,** 249
  cytokine-induced cytotoxicity, prevention by PACAP via inhibition of iNOS expression (βTC cells), **278,** 211
  effects of overexpressed Reg I in transgenic mice, **278,** 368
  expression of cAMP-regulated guanine nucleotide exchange factors (rat), **278,** 44
  glucose-dependent activity of IDX-1 transactivating domain, increase by glucagon-like peptide 1 (INS-1 cells), **274,** 616
  insulin secretion, promotion by wortmannin via cAMP-dependent pathway (rat), **270,** 798
  insulin secretion and [Ca^{2+}]$_i$, effect of glutathione depletion (MIN6 cells), **278,** 236
  oxygen-regulated protein ORP150 expression, correlation with insulin secretion (mouse), **267,** 831
  parallel oscillations of intracellular calcium activity and mitochondrial membrane potential (mouse), **267,** 179
  proliferation, signaling through p38 and p42/44 MAP kinases, **268,** 541; *erratum,* **271,** 558
  restraining effect of cAMP–protein kinase A pathway on phospholipase A$_2$ in isolated rat islets, **269,** 242
Pancreatic cancer
  enhanced expression of silencer of death domains in, analysis (human), **271,** 409
Pancreatic cancer cells
  growth, stimulation by epiregulin (human), **273,** 1019
  neurotensin-mediated activation of MAPK kinase pathways and AP-1 binding (MIA PaCa-2 cells), **269,** 704
Pancreatic islets
  Ca^{2+}/calmodulin-dependent protein kinase II activity, reduction by depolarizing stimuli, **270,** 1119
  carboxyl methylation of nuclear lamin B (rat), **268,** 249
  expression of cAMP-regulated guanine nucleotide exchange factors (rat), **278,** 44
  infiltration by lymphocytes in NOD mice, attenuation by EC3 disintegrin from *Echis carinatus,* **267,** 413
  isolated, glucokinase expression regulation in, role of glucose and glucose metabolism (human), **268,** 491
  nestin-expressing cells, detection (mouse), **271,** 116
  Nkx2.2 protein from, homeodomain, identification of cooperatively acting nuclear localization signals (mouse), **270,** 695
  p135 O-glycosylation, stimulation by glucose and streptozotocin (rat), **267,** 26
  phospholipase A$_2$ activation
    potentiation in insulin-resistant mouse, **272,** 539
    restraining effect of cAMP–protein kinase A pathway (rat), **269,** 242
Pancreatitis
  acute phase, expression profiling in pancreas using cDNA microarrays during (mouse), **277,** 660
  cerulein hyperstimulation, MKPs as early responsive genes during induction (rat), **276,** 680
  cerulein-induced, effect on TNF-α gene expression in murine pancreatic acinar cells, **268,** 485
  chronic, role of epiregulin (human), **273,** 1019
  hereditary, gain-of-function mutations associated with, enhancement of cationic trypsinogen autoactivation (human), **278,** 286
  induction of HSP72 in lung, role of neutrophils and xanthine oxidases (rat), **273,** 1078
Pandinus imperator toxin Pi1
  blockage of human T lymphocyte Kv1.3 channels, **278,** 34
Pantothenate
  and biotin, uptake via rat sodium-dependent multivitamin transporter, electrogenic nature, **270,** 836
Paracoccus pantotrophus
  oxidized cytochrome *cd*$_1$ conformer with His/Met *c*-heme coordination, freeze-quench NIR-MCD spectroscopic study, **279,** 674
Paramecium
  thermo-sensory function, role of prostaglandin I$_2$, **273,** 516
Paraoxonase
  activity, reduction by pro-atherosclerotic diet (rabbit), **269,** 232; *erratum,* **270,** 676
  levels in self-reporting Gulf War Syndrome veterans, **276,** 729
Paraquat
  stimulation of yeast 3-phosphoglycerate kinase gene promoter, **270,** 1036
Parasporal proteins
  noninsecticidal, *Bacillus thuringiensis* serovar *shandongiensis* isolate, preferential cytotoxicity to leukemic T cells, **272,** 218
Parathyroid cells
  cytoplasmic Ca^{2+} levels, C2-ceramide-induced increase (human parathyroid adenoma), **268,** 636
  PTH secretion, regulation by substance P through neurokinin-1 receptor (pig), **270,** 230
Parathyroid hormone
  chloride fluxes activated by, measurement in erythrocytes (human), **269,** 470
  fragments human PTH(1–34) and hPTH(1–39) and bovine PTH(1–37), solution structures, **267,** 213
  and PGE$_2$ and 1,25-(OH)$_2$D$_3$, differential stimulation of IL-6 in stromal/osteoblastic cells, **270,** 1080
  secretion, regulation by substance P through neurokinin-1 receptor, **270,** 230
Parathyroid hormone/PTH-related peptide receptor
  promoter activity, role of methylation (human), **267,** 482
Parathyroid hormone-related peptide
  secretion in Leydig cell model of humoral hypercalcemia of malignancy, role of extracellular calcium-sensing receptor, **269,** 427
  signal sequence, inefficiency for targeting into secretory pathway, **273,** 621
Parkinson's disease
  role of GSTM1 and mEPHX polymorphisms (human), **269,** 676
Parotid gland
  ADP-ribosyl cyclase activity (rat), **270,** 469
Parthenolide
  inhibition of activation of STATs induced by cytokines of IL-6 family, **267,** 329

Paxillin
  association with focal adhesion kinase, role in precartilage condensation of chick mesenchymal cells, **278,** 522
  tyrosine phosphorylation in pancreatic acini, stimulation by NO (rat), **274,** 635
PBP74
  extramitochondrial localization of mortalin/mthsp70/PBP74/GRP75, **275,** 174
PbTx-3
  ^{3}H-labeled, binding to brain and skeletal muscle membranes (puffer fish), **267,** 403
PC2
  role in normal pro-CCK processing, analysis in PC2 and 7B2 null mice, **273,** 188
PC12 cells, *see* Pheochromocytoma PC12 cells
PCCX1
  characterization and regulation by proteolysis, **271,** 305
Pc-J5/5a
  dual roles in group IC1 intron RNA, **274,** 259
pCMB
  in analysis of functional role of cysteinyl residues in protein kinase CK2 regulatory subunit, **267,** 427
PCNA, *see* Proliferating cell nuclear antigen
PDE2 gene
  identification as gene conferring cisplatin resistance in *Saccharomyces cerevisiae,* **269,** 767
PDE5A gene
  expression of three isoforms in human penile cavernosum, **268,** 628
  identification of three alternative first exons and intronic promoter (human), **268,** 596
PDGF, *see* Platelet-derived growth factor
PDZ domain
  Enigma homologue protein, association with cytoskeletal proteins (rat), **272,** 505
  myosin containing, isolation from hematopoietic supportive bone marrow stromal cell lines, **270,** 67
  PICK1, interaction with class I ADP-ribosylation factors (human), **267,** 149
Peanut agglutinin
  carbohydrates binding to, role in α-galactosidase stimulation of acetylcholine receptor aggregation in skeletal muscle cells, **270,** 899
Pectate lyase
  pel gene characterization and rapid identification of gene product (*Erwinia chrysanthemi* PY35), **268,** 420
pel gene
  characterization and rapid identification of gene product (*Erwinia chrysanthemi* PY35), **268,** 420
Penicillin
  ring expansion by recombinant deacetoxycephalosporin C synthase, effects of cysteine mutations, **267,** 445
Penicillin acylase
  precursor, active site for autocatalytic processing in *E. coli* ATCC11105, identification, **272,** 199
Penicillium notatum
  major allergen Pen n 13, characterization, **269,** 14
Penile cavernosum
  expression of three isoforms of cGMP-binding cGMP-specific phosphodiesterase (human), **268,** 628
Pen n 13
  characterization (*Penicillium notatum*), **269,** 14
Penta-*N*-acetylchitopentaose
  inhibition of NO production by activated RAW 264.7 macrophages, **271,** 229
Pentachlorophenol
  metabolites, in presence of H_2O_2, production of hydroxyl radicals, **270,** 942
2,2,5,7,8-Pentamethyl-6-hydroxychromane
  myeloperoxidase-catalyzed phenoxyl radicals of, and HL-60 cell oxidative stress, **270,** 1086
Pentanoic acid
  induction of mitochondrial permeability transition *in vitro* (rat), **272,** 431
Pentenoic acid
  induction of mitochondrial permeability transition *in vitro* (rat), **272,** 431
Pepsinogens
  neonate/infant-specific, molecular cloning from gastric mucosa and expressional change during development (rat), **267,** 806
Pepstatin A-sensitive aspartic proteases
  in lysosome, role in APCs of *Leishmania major*-infected mouse, **276,** 693
PepT1
  functional roles of histidine and tyrosine residues, **272,** 726
Peptides
  7B2 carboxy-terminal peptide, structure–function analysis, **267,** 940
  β-Ala moiety, collateral existence of *folded* and *extended* conformations, **273,** 492
  amidation for production of recombinant salmon calcitonin, **267,** 362
  antigen binding to MCH class I protein, NMR study, **278,** 609
  antimicrobial, *see* Antimicrobial peptides
  calmodulin agonist, cellular uptake and *in situ* binding (Jurkat cells), **277,** 462
  and carbohydrates, ligands of concanavalin A, functional mimicry between, structural basis, **272,** 843
  cathepsin K proregion, for cysteine proteinase inhibition (human), **276,** 924
  CD23-derived, with inverse RGD sequence, interaction with MHC class II molecule, **267,** 686
  chimeric synthetic, as antigen for immunodiagnosis of HIV-1 infection, **272,** 259
  collagen-related, competition with convulxin for binding to platelet collagen receptor GPVI, **273,** 246
  enzyme sensors displaying, antibody-mediated modulation, molecular mechanisms, **275,** 360
  erythropoietin signal peptide, efficiency for HIV_{MN}-1 gp120 expression (COS-7 cells), **273,** 557
  HARP N- and C-terminal, induction of endothelial cell proliferation (bovine, human, rat), **274,** 242
  hypothalamic, inhibiting gonadotropin release, isolation, characterization, and localization (quail), **275,** 661
  ligands for binding soluble protein targets to TentaGel beads, linker properties for optimal display of, definition by combinatorial chemistry, **269,** 591
  lymphocyte growth-inhibiting tripeptide *N*-acetyl-Glu-Ser-GlyNH_2, isolation (canine spleen), **277,** 562
  lysine, interactions of cytochrome-*c* peroxidase with, **268,** 395
  mimicking sialyl-Lewis^a, with anti-inflammatory activity, **268,** 106
  molecular recognition templates: molecular evolution of peptide transporters, **267,** 283
  P64k-conjugated, immunization with, elicitation of anti-PorA antibodies, **277,** 51
  protein kinase C pseudosubstrate, conditionally expressed, effect on endothelial cell proliferation, migration, and differentiation (rat), **271,** 499
  retinoblastoma protein-derived, selective inhibition of lung cancer cell growth (human), **267,** 71
  small
    effect on nonpancreatic secretory phospholipase A_2 (human), **274,** 831
    targeted against tumor-specific receptor, design, **275,** 631
  specifically binding to 3′-untranslated region of NF-IL6 mRNA, detection by three-hybrid strategy, **276,** 101

- synthetic
    - comprising residues 188–207 of nicotinic acetylcholine receptor α subunits, nicotine binding to, **268,** 480
    - helix, C–H· · ·O hydrogen bond-mediated reversal of polypeptide chain direction in, **273,** 933
    - restoration of NS4A cofactor activity by N-biotinylation of mutated NS4A, **267,** 278
- transcytosis of phage display vectors in MDCK cells mediated by, **276,** 251
- transport by *Vibrio fischeri, sap* genes required for, identification and analysis, **269,** 743
- waterborne pheromonal, released by eggs of *Sepia officinalis:* ILME, **275,** 217

Peptide transporters
- molecular evolution: molecular recognition templates of peptides, **267,** 283
- PEPT2, gene cloning and characterization (mouse), **276,** 734

Peptidylglycine α-amidating monooxygenase
- induction in N$_{18}$TG$_2$ cells, **267,** 521

Peptidylglycine α-hydroxylating monooxygenase
- genomic organization and splicing variants (sea anemone), **277,** 7

Perfusion
- biochemical, model, effects of shear stress on eicosanoid gene expression and metabolite production in vascular endothelium, **269,** 257

Pericytes
- microvascular, expression of aggrecan message regulated by BMP-2 (bovine), **269,** 172

Peridinin
- quenching of singlet oxygen (*Gonyaulax polyedra*), **268,** 496

Perilipin
- phosphorylation, relationship to substrate-dependent lipolysis induced by isoproterenol, **274,** 631

Peripheral blood mononuclear cells
- CXCR4-dependent HIV-1 infection, inhibition by extracellular HIV-1 Tat (human), **270,** 992
- oxidative stress-induced apoptosis, protective activity of C60 carboxyfullerene (human), **277,** 711

Peripheral membrane protein
- related to lantibiotic synthetase component C, p40/GPR69A characterization as, **275,** 69

Periplasmic space
- *Escherichia coli,* targeting of active cytochrome P450 1A1 to, **279,** 803

Perlucin
- purification and characterization from *Haliotis laevigata,* **267,** 17

Perlustrin
- purification and characterization from *Haliotis laevigata,* **267,** 17

Permeability
- capillary, growth factor-like protein increasing, purification from *Vipera lebetina* venom, **268,** 69

Permeability transition
- mitochondrial, induction *in vitro* by short-chain carboxylic acids (rat), **272,** 431

Permeability transition pore
- mitochondrial
    - activation, enhancement by aging (mouse), **273,** 603
    - opening of, role in genistein-induced apoptosis in RPE-J cells, **276,** 151

Permethrin resistance
- related mutations in S6 transmembrane segments of voltage-gated sodium channel, functional and evolutionary consequences, **278,** 516

Peroxidase
- Cu,Zn-superoxide dismutase activity with H$_2$O$_2$, protection by anions, **274,** 57

Peroxins
- *PEX2*-defective patient, fibroblasts from, molecular mechanism of detectable catalase-containing peroxisomes, **268,** 31

Peroxiredoxin V
- gene, molecular cloning and characterization (mouse), **270,** 356
- identification as thioredoxin peroxidase inhibiting p53-induced apoptosis (mouse), **268,** 921

Peroxisomal assembly proteins
- *PEX3* gene-encoded, genomic organization, positional mapping, and mutation analysis in candidate phenotypes (human), **268,** 704

Peroxisome proliferator-activated receptor
- activators of, repression of TNF-α-induced E-selectin expression, role of LRF-1/ATF3 (human), **275,** 406
- subtypes, activation by pioglitazone (human), **278,** 704

Peroxisome proliferator-activated receptor α
- activation
    - effects on secretion of matrix metalloproteinase 9 and IL-8 in THP-1 monocytic cells, **267,** 345
    - response in heart, kidney, and liver (mouse), **278,** 250
- agonists, downregulation of 11β-hydroxysteroid dehydrogenase type 1 in liver (mouse), **279,** 330
- alteration of GRP94 expression in mouse hepatocytes dependent on, **277,** 699
- interactions with peroxisome proliferator response element present at positions −681/−669 in hepatic 3-ketoacyl-CoA thiolase B gene (rat), **269,** 347
- and PPARγ, ligands of, synergistic activation of UCP-3 expression in cultured fetal brown adipocytes (rat), **273,** 560

Peroxisome proliferator-activated receptor γ
- activation, effects on secretion of matrix metalloproteinase 9 and IL-8 in THP-1 monocytic cells, **267,** 345
- agonists
    - effect on vascular endothelial growth factor expression in vascular smooth muscle cells (human), **271,** 571
    - inhibition of lung cancer cell growth via induction of apoptosis (human), **270,** 400
- effects on vascular endothelial growth factor production in differentiated U937 cells, **273,** 485
- and PPARα, ligands of, synergistic activation of UCP-3 expression in cultured fetal brown adipocytes (rat), **273,** 560
- selective upregulation in Caco-2 cells by butyrate, **272,** 380

Peroxisome proliferator-activated receptor γ2
- Pro12Ala polymorphism, conferral of resistance to type 2 diabetes (human), **271,** 212
- Pro^{12} → Ala mutation, inhibitory effect on thiazolidinedione-induced adipogenesis, **268,** 178

Peroxisome proliferator-activated receptor γ coactivator-1
- cDNA cloning and mRNA analysis in epitrochlearis muscle in swimming-exercised rat, **274,** 350

Peroxisome proliferator response element
- at positions −681/−669 in hepatic 3-ketoacyl-CoA thiolase B gene, interactions with PPARα and HNF-4 (rat), **269,** 347

Peroxisomes
- 35-kDa membrane protein, *PEX2* gene encoding, genomic organization and characterization (human), **273,** 985
- ABC transporters related to adrenoleukodystrophy protein, interaction with PEX19p (human), **271,** 144
- catalase-containing detectable, molecular mechanism in fibroblasts from *PEX2*-defective patient, **268,** 31
- long-chain acyl-CoA thioesterase: PTE2 (human), **275,** 233

Peroxisome targeting signals
- PTS1 and PTS2, import of proteins with, effects of missense mutation in RING finger motif of PEX2 protein, **270,** 717

Peroxyl radicals
- scavenging by C-phycocyanin *in vivo* and *in vitro* (rat), **275,** 20

- Peroxynitrite
  - scavenging by dietary phenolics, effect of bicarbonate, **279,** 692
  - as superoxide-derived effector: review of $\cdot O_2^-$ as messenger of endothelial function, **278,** 1
- Pervanadate
  - induction of tyrosine phosphorylation of receptor protein-tyrosine phosphatase α, role of membrane distal catalytic domain, **267,** 96
- PEX2
  - RING finger motif, missense mutation in, effects on import of proteins with peroxisome targeting signals PTS1 and PTS2, **270,** 717
- *PEX2*
  - fibroblasts from patient defective in, molecular mechanism of detectable catalase-containing peroxisomes, **268,** 31
  - genomic organization and characterization (human), **273,** 985
- *PEX3*
  - genomic organization, positional mapping, and mutation analysis in candidate phenotypes (human), **268,** 704
- PEX19p
  - interaction with adrenoleukodystrophy protein and related peroxisomal ABC transporters (human), **271,** 144
- PGAa
  - solution structure, **276,** 1278
- *Pgk-2* promoter
  - spermatocyte-specific, targeted expression of Cre recombinase using (mouse), **272,** 125
- P-glycoprotein
  - ATPase-negative mutants, transition state formation (human), **276,** 1314
  - daunorubicin binding site, cholesterol interaction (NIH-G185 cells), **276,** 909
  - effects of prototypical inducers in human hepatocytes, **273,** 333
  - expression, relationship to staurosporine-induced cell death, **276,** 231
  - expression in arsenite-resistant *Leishmania donovani,* downregulation by verapamil, **271,** 615
  - overexpression in intestinal cell line resulting in increased cholesterol uptake from micelles, **267,** 565
  - role in cholesterol esterification, **279,** 369
  - and use of rhodamine 123 in MDR research, implications of carrier-mediated uptake of R123, **279,** 124
- pH
  - dependence of monomer or dimer state of pheromone-binding protein from *Bombyx mori* on, **268,** 521
  - developing cardiac muscle sensitivity to, in Ca^{2+} regulation of contraction, role of troponin I isoform switching (rabbit), **267,** 912
  - effects on murine insulinoma βTC3 cells, **273,** 937
- Phage display vectors
  - peptide-mediated transcytosis in MDCK cells, **276,** 251
- Phagocytosis
  - FcγR- and CR3-mediated, in neutrophils, enhancement by cerebrosides, **278,** 79
  - FcγR-mediated, in macrophages, PKC-α role (RAW 264.7), **276,** 472
- *Phanerochaete chrysosporium*
  - homologous expression of recombinant cellobiose dehydrogenase in, **270,** 141
- Pharyngeal carcinoma cells
  - antisense tumor therapy by targeting Polo-like kinase 1 mRNA (Detroit 562 cells), **269,** 352
- Pharyngeal epithelium
  - CYP1A mRNA detection *in situ* in chemically untreated fish by RT-PCR, **271,** 130
- PHD finger domain
  - PCCX1 with, regulation by proteolysis, **271,** 305
- Phenobarbital
  - effects on induction of cytochromes P450 1A1, 1A2, 3A4, 2C9, and 2C19 and MDR-1 and MRP-1 in human hepatocytes, **273,** 333
  - and β-estradiol, effects on activation of cytochromes P450 2B9 and 2B10 in liver in C57BL/6 and DBA/2 male mice, **279,** 288
  - nuclear receptor CAR activation elicited by, in induction of cytochrome P450 genes, **277,** 1
  - responsiveness of cytochrome P450 2B2 gene to, role of 5′-proximal DNA region, demonstration in liver *in vivo* (rat), **268,** 734
- Phenoloxidase inhibitor
  - from cuticle of *Manduca sexta,* characterization, **268,** 379
- Phenols
  - dietary, scavenging of peroxynitrite, effect of bicarbonate, **279,** 692
- Phenol sulfotransferase
  - nucleotide binding and catalysis of nucleotide sulfation, **271,** 818
- Phenotype
  - T cells, effects of CD3ζ targeting into glycosphingolipid-enriched membrane microdomains (human), **271,** 589
  - vascular smooth muscle cells, control by integrin signaling through focal adhesion kinase (pig), **272,** 298
- Phenoxyl radicals
  - monodehydroascorbate reductase-mediated reduction, **279,** 949
  - myeloperoxidase-catalyzed, of 2,2,5,7,8-pentamethyl-6-hydroxychromane, and HL-60 cell oxidative stress, **270,** 1086
- Phenylarsine oxide
  - effects on bioreduction of disulfides in glucose 6-phosphate dehydrogenase-deficient cells, **273,** 846
- Phenylethylperoxy radicals
  - interaction with DMPO: quantification of spin-trapping kinetics, **270,** 125
- 2-Phenyloxazolone
  - scFv specific for, baculoviral display, **275,** 84
- Pheochromocytoma PC12 cells
  - antiapoptotic and proapoptotic mechanisms, effects of anisomycin, **278,** 550
  - apoptosis, effect of tributyltin, **272,** 557
  - ARNT2–HIF-1 complex formation in response to hypoxia, **273,** 231
  - Ca^{2+}-induced neurotransmitter release, effect of erythropoietin, **279,** 293
  - catecholamine-containing vesicles in, heterogeneity, **270,** 625
  - catecholamine secretion, effects of mitochondrial inhibitors and uncouplers, **273,** 17
  - catecholamine synthesis and secretion, suppression by orexins, **274,** 310
  - ionomycin-induced cell death, amelioration by expression of Na^+/Ca^+ exchanger, **276,** 93
  - neuritic process formation, induction by Rnd1, **278,** 604
  - neuronal differentiation
    - APC protein requirement for, **279,** 685
    - role of protein kinase C-θ distribution and molecular properties, **275,** 149
  - nitric oxide presence within, direct evidence, **272,** 129
  - Nurr1 response element activating tyrosine hydroxylase gene promoter, identification, **274,** 590
  - proliferation and differentiation, LR11 expression during, **275,** 365
  - transactivation function of zinc finger protein TIS11, negative regulation by phorbol ester, **274,** 526
- Pheomelanin
  - agouti signal protein regulating, immunohistochemical localization in murine skin, **270,** 176
- Pheromone-binding protein
  - from *Bombyx mori,* pH-dependence of monomer or dimer state, **268,** 521
- Pheromone perception
  - strong expression of vomeroglandin/CRP-ductin in glands associated with mouse vomeronasal organ, **268,** 275
- Pheromones
  - waterborne peptide released by eggs of *Sepia officinalis:* ILME, **275,** 217

- Phlorobenzylketone
  - enzymatic formation by chalcone synthase, **279,** 190
- Phorbol ester
  - inhibition of gap junctional intercellular communication, reversal by resveratrol (rat), **275,** 804
  - negative regulation of transactivation function of zinc finger protein TIS11 (PC12 cells), **274,** 526
- Phosducin
  - carboxy terminal domain, function as transcriptional activator, **270,** 504
- Phosphatidic acid
  - enhancement of migration of metastatic human breast cancer cells, **268,** 471
- Phosphatidylglycerol
  - defective remodeling in Barth syndrome (human), **279,** 378
- Phosphatidylinositol
  - and CD14, regulatory roles in signaling via Toll-like receptor 4–MD-2, **268,** 172
- Phosphatidylinositol 4,5-bisphosphate-3-kinase
  - activation in C5a-stimulated eosinophils (human), **269,** 816
- Phosphatidylinositol 3-kinase
  - activation
    - by 12(*S*)-hydroxyeicosatetraenoic acid, **275,** 690
    - role in suppression of apoptosis by UVB irradiation (NIH3T3 cells), **279,** 872
  - activation of p38 MAP kinase (rat), **276,** 502
  - association with Gab1 and Gab2, **277,** 195
  - constitutive cellular expression, comparison with transient expression (mouse), **272,** 822
  - inhibition, activation of NF-κB binding in HT-29 colon cancer cells, **273,** 853
  - inhibitor wortmannin, promotion of insulin secretion from pancreatic β cells via cAMP-dependent pathway, **270,** 798
  - interaction with insulin receptor substrate 3 in liver-derived cells (rat), **272,** 953
  - and mTOR, dependent pathway, retinoblastoma protein phosphorylation via, role in regulation of adipocyte differentiation, **275,** 115
  - p85-PI3K identification as component of CIN85 complexes, **278,** 167
  - pathway, role in mediation of hypoxia-inducible-factor-1 induction by nitric oxide (LLC-PK$_1$ cells), **278,** 263
  - regulation of NF-κB signaling events in suppression of TNF-induced apoptosis (MCF-7 cells), **271,** 342
  - roles
    - activation of MAP kinase and Akt by insulin in adipocytes (rat), **274,** 845
    - anchorage-independent activation of MAP kinase by insulin-like growth factor I in MCF-7 cells, **272,** 111
    - IGF-I regulation of cardiac fibroblast apoptosis induced by osmotic stress (rat), **273,** 322
  - signaling to Akt, mediation of survival in isolated islets of Langerhans (dog), **277,** 455
- Phosphatidylinositol 3′-kinase
  - IFN-α-dependent activation, pathways regulating, **270,** 158
- Phosphatidylinositol-4-phosphate 5-kinase
  - activation, cooperation of extracellular matrix components in, **279,** 931
- Phosphatidylinositol 3,4,5-trisphosphate
  - formation in C5a-stimulated eosinophils (human), **269,** 816
- Phosphatidylserine
  - exposure to, relationship to store-operated Ca^{2+} entry in stimulated Scott cells, **279,** 639
- Phosphinate esters
  - asymmetric preference of serine proteases (human), **276,** 1235
- 3′-Phosphoadenosine 5′-phosphosulfate synthetase
  - PAPSS1 and PAPSS2, gene cloning, characterization, and chromosomal localization (human), **268,** 437
- Phosphodiesterase 3A
  - cardiac type, gene structure, comparison to adipocyte type PDE3B (human), **268,** 827
- Phosphodiesterase 3B
  - adipocyte type, gene structure, comparison to cardiac type PDE3A (human), **268,** 827
- Phosphodiesterase 4D
  - mRNA accumulation in response to TNF-α (HUVEC cells), **274,** 415
- Phosphodiesterase 7A
  - mRNA accumulation in response to TNF-α (HUVEC cells), **274,** 415
- Phosphodiesterase 7A1
  - cloning, characterization, and tissue distribution (mouse), **276,** 1271
- Phosphodiesterase 7B
  - cAMP-specific, identification (human), **271,** 575
- Phosphoenolpyruvate carboxykinase
  - expression in serum-free long-term cultures of human hepatocytes, **269,** 46
- 6-Phosphofructo-2-kinase/fructose-2,6-bisphosphatase
  - placental, gene promoter region, identification (human), **267,** 703
- Phosphofructokinase C
  - isozyme from ascites tumor cells, cloning, expression, and properties (mouse), **271,** 635
- Phosphoglucose isomerase
  - identification as myofibril-bound serine proteinase inhibitor purified from white croaker skeletal muscle, **272,** 485
- 2-Phosphoglycerate hydrolase
  - H159A mutant activity (yeast), **276,** 1199
- 3-Phosphoglycerate kinase
  - gene promoter, stimulation by paraquat (yeast), **270,** 1036
- Phosphohexose isomerase
  - expression in Cos7 cells, **273,** 213
- Phospholamban
  - characterization, quantitation, and phosphorylation state analysis with antibodies, **267,** 40
- Phospholipase A_2
  - Ca^{2+}-independent
    - intracellular membrane-bound iPLA$_2$-2, cDNA cloning (human), **272,** 320
    - in U$_m$ cells, activation by H_2O_2 (rat), **276,** 613
  - cytosolic
    - activation by p55 TNF receptor, role of FAN (mouse), **274,** 506
    - group IV PLA$_2$, phosphorylation, role in arachidonic acid release by P388D$_1$ macrophages, **267,** 145
    - role in calcium-induced platelet-activating factor biosynthesis (mouse), **271,** 812
    - role in Rac activation of JNK, **268,** 231
  - group IIA, internalization and degradation in mast cells (mouse), **276,** 667
  - group IIF secreted, cloning and recombinant expression (human), **279,** 223
  - islet, activation
    - potentiation in insulin-resistant mouse, **272,** 539
    - restraining effect of cAMP–protein kinase A pathway (rat), **269,** 242
  - mediation of bFGF-stimulated fetal skin fibroblast migration via arachidonic acid and role of pertussis toxin-sensitive G protein (human), **272,** 648
  - nonpancreatic secretory, effects of small peptides (human), **274,** 831
- Phospholipase C
  - G$_i$-linked pathway, role in sphingosine 1-phosphate stimulation of tyrosine phosphorylation of p125^{FAK} and chemotaxis of endothelial cells, **268,** 47
  - inhibitors of, effect on orexin-A binding, **272,** 959
- Phospholipase C-β
  - isozymes, differential regulation in cardiomyocyte hypertrophy (rat), **275,** 1
- Phospholipase C-γ1
  - binding of protein-tyrosine kinase Tnk1 to, **273,** 294
  - gene 5′-flanking region, cloning and characterization (mouse), **273,** 352

- Phospholipase C-δ1
  - levels in brain, increase by treatment with aluminum (rat), **271,** 620
- Phospholipase D
  - downregulation by protein kinase A in cell-free system of human neutrophils, **267,** 305
  - Fas-mediated activation, role of Ras (A20 cells), **271,** 328
  - *in vitro* activity, direct inhibition by 4-(2-aminoethyl)-benzenesulfonyl fluoride, **273,** 302; *erratum,* **274,** 880
  - mitogenic activity, restriction to caveolin-enriched membrane microdomains, **273,** 77
- Phospholipase D2
  - increased activity and intranuclear expression in human renal cancer, **278,** 140
- Phospholipids
  - biliary secretion, role of nonvesicular transport (rat), **268,** 790
  - Ca^{2+}-dependent binding, activity in Doc2γ (mouse), **276,** 626
- Phosphonate esters
  - asymmetric preference of serine proteases (human), **276,** 1235
- Phosphoprotein phosphatases
  - regulation of steroidogenesis by influence on StAR gene transcription, **273,** 35
- Phosphorothioate
  - oligonucleotides, real-time monitoring in biological samples by hybridization assay, **268,** 92
- Phosphorylation, *see also* Tyrosine phosphorylation
  - 105-kDa heat shock proteins HSP105α and HSP105β by casein kinase II, **270,** 927
  - Akt
    - effects of anisomycin (PC12 cells), **278,** 550
    - heat shock-induced caspase-3-independent breakdown (COS-7 cells), **276,** 702
    - role in suppression of apoptosis by UVB irradiation (NIH3T3 cells), **279,** 872
  - anchoring protein by calmodulin protein kinase of rabbit fast-twitch muscle sarcoplasmic reticulum, **279,** 181
  - aquaporin-1, protein kinase A-dependent, role in AQP-1 water channel activity, **273,** 328
  - AZT-resistant HIV-1 reverse transcriptase by casein kinase II *in vitro:* effects on inhibitor sensitivity, **275,** 26
  - Bcl-2, role in induction of apoptosis in CESS B cell line by NGF withdrawal, **278,** 753
  - Ca^{2+}-modulated, of low-molecular-mass polypeptide in rat liver mitochondria, **270,** 741
  - CCR5 by FPRL1 activation in monocytes, associated attenuation of selected chemokine responses, **272,** 276
  - Cdc20/Fizzy, negative regulation of mammalian cyclosome/APC in mitotic checkpoint, **271,** 299
  - cdk2/cyclin E by CDK-activating kinase, block by N-terminal domains of cyclin-dependent kinase inhibitory proteins, **271,** 469
  - cofilin, by *Drosophila* homolog of LIM-kinase, **276,** 1178
  - CPI-17 by protein kinase N, **274,** 825
  - CRF$_1$ receptor, agonist-induced rapid, potential mechanism for homologous desensitization (human), **268,** 572
  - cytosolic group IV phospholipase A$_2$, role in arachidonic acid release by P388D$_1$ macrophages, **267,** 145
  - delayed, STAT3, induced by angiotensin II, role of autocrine/paracrine secretion of IL-6 family cytokines (mouse, rat), **269,** 798
  - desmin by p21-activated kinase at sites different from Rho-associated kinase, **272,** 712
  - DNA-PK, independent Ku70 nuclear tranlocation (HeLa-S3 cells), **276,** 1105
  - ERK and Akt, coordination by PDGF: prevention of v-Ha-Ras-dependent apoptosis (human), **267,** 33
  - heat shock protein 27 hyperphosphorylation, induction by cyclosporin A (BSC-1, F9, HeLa cells), **269,** 464
  - high, ErbB2 in cells coexpressing ErbB2 with EGF receptor or ErbB3, enhanced drug resistance due to, **277,** 757
  - insulin-dependent, 70-kDa protein, in adipocyte light microsomes (rat), **276,** 1302
  - insulin-like growth factor I receptor cytoplasmic domain autophosphorylation, **279,** 955
  - JAM, by PKC, on platelet activation (rabbit), **276,** 873
  - nucleoside analogs, subcellular location of, and synergistic effects of hydroxyurea, **276,** 179
  - p55^{CDC} by cyclin A–Cdk2 complex, **268,** 530
  - perilipin and hormone-sensitive lipase, relationship to substrate-dependent lipolysis induced by isoproterenol, **274,** 631
  - phospholamban, analysis with antibodies, **267,** 40
  - pRB at multiple serine/threonine sites, effect of TGFβ (human), **276,** 930
  - prion protein, **271,** 337
  - protein, role in intracellular signaling factors-enhanced hepatic nuclear protein binding to TTGGC sequence in rat regucalcin gene promoter, **279,** 275
  - retinoblastoma protein
    - cyclin-dependent kinase-mediated, role in block of breast cancer MDA MB 231 cell proliferation by BMP-2, **272,** 705
    - via PI 3-kinase and mTOR pathway, regulation of adipocyte differentiation, **275,** 115
  - retinoid X receptor α serine 27 residue by PKA, role in cAMP-mediated downregulation of RXRα (human), **279,** 853
  - RTP in cytoplasm (HUVEC cells), **272,** 641
  - serum response factor at multiple sites by skeletal muscle Ca^{2+}/calmodulin-dependent protein kinase II (chicken), **270,** 488
  - Smad2 in T cells, resulting from ligation of T cell receptor complex, **268,** 124
  - Smad8 downstream of ALK-2, ALK-3, and ALK-6, induction of Smad4–Smad8 association and transcriptional activity (mouse), **271,** 682
  - tau protein by glycogen synthase kinase-3β, effects of PKNα and protein kinase C, **273,** 209
  - Tctex2-related outer arm dynein light chain at activation of sperm motility, **256,** 177; *erratum,* **268,** 952
  - troponin I by protein kinase A, effect on length dependence of tension activation in skinned cardiac muscle fibers, **272,** 104
- Photoaffinity labeling
  - Kir6.2 by [γ-^{32}P]ATP-[γ]4-azidoanilide, **272,** 316
  - proteasome *in situ* with photoactive Adriamycin analogue, **273,** 928
- *Photobacterium leiognathi*
  - dimeric Cu,Zn superoxide dismutase from, metal-dependent subunit association induced by single mutation, **272,** 81
- Photochemical activation
  - postcolumn online, HPLC analysis of tamoxifen–DNA adducts using, **273,** 40
- Photodynamic action
  - modulation of adrenergic receptors in isolated rat hepatocytes, **277,** 705
- Photodynamic therapy
  - role of free radicals, physicochemical modeling: quantification of spin-trapping kinetics, **270,** 125
- Photoisomerization
  - wavelength-programmed solute release from photosensitive liposomes, **276,** 169
- Photolysis
  - in production of recombinant salmon calcitonin, **267,** 362

Photorhabdus luminescens
  endochitinase in extract contaminated with exochitinase, assay methods, **268,** 302
Photosensitive liposomes
  wavelength-programmed solute release from, **276,** 169
Photosensitization
  by methylene blue, oxidation of cysteine sulfinic acid and other sulfinates by, **270,** 782
Photosystem I
  interactions with ferredoxin on electron transfer complex, role of region with aspartates 57 and 60 (*Synechocystis* sp. PCC 6803), **271,** 647
C-Phycocyanin
  radical scavenging properties *in vivo* and *in vitro* (rat), **275,** 20
Phylogenetics
  C-terminus kinesin-like protein KLP-17 (*Caenorhabditis elegans*), **267,** 643
  cytochrome P450 oxidoreductase (*Cunninghamella elegans*), **268,** 345
  Δ^6-desaturase, including *Mucor rouxii* enzyme, **279,** 17
  OATP family (human), **273,** 251
  Sir2-like proteins of prokaryotes and eukaryotes, **273,** 793
Phylogenetic tree
  glycoprotein hormone receptor family, transmembrane domain: newt testis FSHR, **275,** 121
  PDE family: cloning of human and mouse PDE7B, **272,** 186
  phytocyanin-related proteins: morning glory *Pn14,* **268,** 466
  prepro-GnRHs in vertebrates: medaka-type GnRH, **276,** 298
  thioesterases: human peroxisomal long-chain acyl-CoA thioesterase PTE2, **275,** 233
  α-tubulin isoforms: human and mouse tuba8, **270,** 1111
Physical map
  protein arginine methyltransferase 1 gene (human), **278,** 349
  thermophilic desulfurizing enzyme genes *tdsA, tdsB,* and *tdsC* (*Paenibacillus* sp. A11-2), **270,** 81
Phytanyl-pyrophosphate
  linked cellobiose, as substrate for bacterial α-mannosyltransferase, **272,** 290
Phytase
  Aspergillus fumigatus
    biochemical characterization, **275,** 279
    enzyme activity, **275,** 759
    gene expression in *Pichia pastoris* and characterization of recombinant enzyme, **268,** 373
  Bacillus subtilis, metal dependence, **268,** 365
Phytocyanin-related protein
  gene encoding, characterization (*Pharbitis nil*), **268,** 466
Phytoene dehydrogenase
  homology with kelp diabolin (*Erwinia uredovora*), **272,** 691
Phytohemagglutinin–leukoagglutinin
  major reactive glycoprotein in colon carcinoma cell lines and tumors, CEA identification as, **273,** 147
Phytohormones
  acidic *PR1* gene responsive to, cloning (rice), **274,** 157
Phytomonas 274
  sensitivity to α-difluoromethylornithine and metabolic turnover of ornithine decarboxylase, **279,** 663
Pi1
  blockage of human T cell Kv1.3 channels: novel class of scorpion toxin, **278,** 34
Pial arterioles
  NO-dependent dilation in female rat, effects of chronic estrogen depletion and repletion, **269,** 165
Pichia pastoris
  Aspergillus fumigatus phytase gene expression and characterization, **268,** 373
  expression of functional soluble forms of β-1,4-galactosyltransferase I, α-2,6-sialyltransferase I, and α-1,3-fucosyltransferase VI, **267,** 169
PICK1
  PDZ domain, interaction with class I ADP-ribosylation factors (human), **267,** 149
Picrotoxinin
  stimulation of 2-arachidonoylglycerol generation in brain (rat), **271,** 654
Pigmentation
  agouti signal protein regulating, immunohistochemical localization in murine skin, **270,** 176
Pioglitazone
  activation of peroxisome proliferator-activated receptor subtypes (human), **278,** 704
  effect on vascular endothelial growth factor expression in vascular smooth muscle cells (human), **271,** 571
  effects on vascular smooth muscle cell activation by angiotensin II (rat), **273,** 1144
  repression of TNF-α-induced E-selectin expression, role of LRF-1/ATF3 (human), **275,** 406
L-Pipecolate oxidase
  molecular cloning and expression (human), **270,** 1101
PISSLRE
  characterization of human CDK10 gene isoforms, **276,** 271; *erratum,* **279,** 738
Pituitary
  anterior lobe
    cannabinoid CB$_1$ receptor mRNA and endocannabinoid levels, influence of sex steroids (rat), **270,** 260
    inositol 1,4,5-trisphosphate content and PKC activity, AngII-induced changes, effects of E$_2$ and progesterone (rat), **275,** 7
  LIM-homeobox3 gene expression (human), **274,** 49
  somatotrophinomas, elevated response to GHRH *in vitro,* association with polymorphism in GHRH receptor gene (human), **275,** 33
Pituitary adenoma cells
  insulin-like growth factor I gene expression, reduction by glucose starvation (GH3 cells), **269,** 336
Pituitary adenylate cyclase activating polypeptide
  catecholamine synthesis and secretion induced by, suppression by orexins in cultured PC12 cells, **274,** 310
  cytoprotective effect in cytokine-exposed βTC cells: inhibition of iNOS expression, **278,** 211
  inhibition of osteoclast formation, association with osteoprotegerin upregulation and RANKL and RANK downregulation, **271,** 158
Pituitary adenylate cyclase activating polypeptide receptor
  expression in microisolated osteoclasts (mouse), **274,** 400
  type-I, LH-induced gene expression in granulosa cells, mediation by progesterone receptor activation (rat), **277,** 270
Pituitary tumor cells
  GH$_3$, prolactin-secreting clonal strain, D-aspartate identification (rat), **276,** 1143; *erratum,* **279,** 305
βPix
  neuronally expressed isoforms, molecular cloning (mouse), **272,** 721
pK_a
  role in estrone sulfatase inhibition by sulfamate-containing compounds, **272,** 583
PKB/Akt
  inhibition, effects on metabolic effects of insulin in rat adipocytes, **268,** 315
PKH26
  in visualization of proteoliposomes colocalized with endogenous mitochondria in fertilized mouse egg, **278,** 183
PKNα
  and protein kinase C, effects on phosphorylation of tau protein by glycogen synthase kinase-3β, **273,** 209

pknA
  cloning and characterization (*Streptomyces coelicolor* A3(2)), **279,** 942
Placenta
  amino acid transporter A subtype ATA1, cloning and functional expression (human), **273,** 1175
  cathepsin Q detection (rat), **267,** 791
  cysteinyl leukotriene CysLT$_2$ receptor expression (human), **274,** 316
  HOFNH30 expression (human), **273,** 805
  prion protein mRNA analysis by *in situ* hybridization (sheep), **273,** 890
  tetrodotoxin-resistant voltage-gated sodium channel α subunit NaT/Scn11a expression (mouse), **267,** 271
  transcription factor GCMa/GCM1 gene specific to, genomic organization, chromosomal localization, and complete 22-kb DNA sequence (human), **278,** 134
  villi, heme oxygenase expression and localization (human), **276,** 1136
  voltage-gated sodium channel α subunit gene *SCN12A* identification (human), **267,** 262
  Wnt16 isoform expression (human), **278,** 814
Placental cells
  Na-K-Cl cotransporter in, identification and biochemical localization (BeWo cells), **274,** 43
Plant cells
  Cop I coat proteins, characterization (*Oryza sativa*), **273,** 176
Plasma
  Alzheimer's, oxidized protein levels (human), **275,** 678
  amyloid β peptide assay, implications of Aβ interactions with plasma proteins and erythrocytes (human), **268,** 750
  cardiotrophin-1, secretion by heart (human), **279,** 320
  homocysteine, interrelations with intracellular *S*-adenosylhomocysteine (rat), **271,** 47
  mechanisms of formation of protein-bound homocysteine (human), **277,** 668
  S-nitrosothiols, quantitation in response to LPS challenge (rat), **273,** 22
Plasma membrane
  breast cancer/mitoxantrone resistance protein expression, **271,** 42
  caveolin-enriched microdomains, restriction of mitogenic phospholipid D activity to, **273,** 77
  electrochemical balance, disordering by electric fields, **272,** 634
  GLUT1 targeting to, in 3T3-L1 adipocytes, effects of glucose deprivation, **273,** 859
  glutamate receptor δ2 subunit localization to, juxtamembrane segment required for, identification (MDCK cells), **275,** 565
  inner surface, calpain activator protein localization, **272,** 472
  presynaptic, membrane association of cytomatrix protein Bassoon (rat), **275,** 43
  protein kinase C translocation to, role in 4-hydroxynonenal-induced MEL cell differentiation, **272,** 75
  rab4 localization, **268,** 847
  receptors for 5α-pregnane-3,20-dione and 3α-hydroxy-4-pregnen-20-one, detection and characterization in MCF-7 breast cancer cells, **272,** 731
  resting neutrophils, expression of lactoferrin (human), **275,** 241
Plasma membrane Ca^{2+}-ATPase
  isoform 1, gene promoter region, mediation of transcriptional downregulation by 1,25-dihydroxyitamin D$_3$, **277,** 722
  mRNA, expression in aortic myocytes, RT–PCR study (rat), **276,** 1024
Plasmid–chromosome recombination
  spontaneous mitotic, in *Saccharomyces cerevisiae,* effects of *RAD52* epistasis group genes, **270,** 112
Plasmid recombination
  spontaneous mitotic, in *Saccharomyces cerevisiae,* effects of *RAD52* epistasis group genes, **270,** 112
Plasmids
  compact vectors for DNA immunization in humans, **279,** 548
  encoding of genes for degradation of *p*-nitrophenol and 4-nitrocatechol by *Arthrobacter protophormiae,* **270,** 733
  encoding of pathway of *o*-nitrobenzoate degradation by anthranilic acid in *Arthrobacter protophormiae,* **267,** 236
  large, encoding resistance to toxic heavy metals, characterization in *Salmonella abortus equi,* **272,** 6
  rolling-circle, cloning from *Psychrobacter sp.* TA144 and sequencing, **274,** 488
Plasmin
  effect on HDL-induced cholesterol efflux from foam cells, **277,** 552
Plasminogen
  conversion to Kringle 1–5-containing fragments, proteinase causing, expression by glioma BT325 cells, **278,** 821
Plasminogen activator inhibitor-1
  gene expression and secretion by vascular endothelial and smooth muscle cells, effect of homocysteine, **272,** 182
  release by preadipocytes and adipocytes independent of insulin and IGF-1 (human), **279,** 984
Plasmodium
  heme metabolism, as target of antimalarial drugs, **268,** 665
Plasmodium berghei
  sporozoite, lethal challenge with, protective effect of immunization of malaria DNA vaccine into liver by gene gun, **271,** 107
Plasmodium falciparum
  DNA cleavage induced by 9-anilinoacridine inhibitors of topoisomerase II, analysis, **269,** 406
  falcipain inhibition by nitric oxide, **267,** 190
  and human, chimeric hypoxanthine–guanine phosphoribosyltransferase with segments from, substrate specificity, **272,** 596
  hypoxanthine–guanine–xanthine phosphoribosyltransferase, multiple active states of, **279,** 433
Platelet-activating factor
  calcium-induced biosynthesis, role of cytosolic phospholipase A$_2$ and PAF receptor (mouse), **271,** 812
Platelet-activating factor receptor
  role in calcium-induced PAF biosynthesis (mouse), **271,** 812
Platelet aggregation
  halysetin-induced: disintegrin-like/Cys-rich protein from *Agkistrodon halys* venom, **278,** 112
  inhibition by NO donor drugs independently of cGMP (human), **279,** 412
  prevention by B-NOD (rabbit), **275,** 350
  sulfur-rich compounds inhibiting, structure–activity relationships (human), **273,** 421
Platelet-derived growth factor
  c-*fos* gene transcription induced by, effect of IFN-γ in glomerular mesangial cells (rat), **273,** 1069
  coordination of ERK and Akt phosphorylation: prevention of v-Ha-Ras-dependent apoptosis (human), **267,** 33
  and insulin, signaling mediated by, differential regulation by low-molecular-weight protein-tyrosine phosphatase (NIH-IR cells), **270,** 564
Platelet-derived growth factor α receptor
  and PDGF β receptor, differential interaction of CrkII adaptor protein with, role of internal tyrosine phosphorylation, **270,** 28
  regulation of apoptosis, role of Shf, **278,** 537
Platelet-derived growth factor β receptor
  and PDGF α receptor, differential interaction of CrkII adaptor protein with, role of internal tyrosine phosphorylation, **270,** 28
Platelets
  activation
    convulxin-induced, role of recombinant non-integrin collagen receptor P65 (human), **270,** 932
    and JAM phosphorylation by PKC (rabbit), **276,** 873
    measured by P-selectin expression, flow cytometric parameters for, **269,** 85

  activation status, assay by analysis of P-selectin expression (human), **273,** 565
  collagen receptor GPVI, convulxin binding to, competition with collagen-related peptides (human), **273,** 246
  exocytosis, molecular mechanisms (human), **267,** 875
  glycoprotein VI, molecular cloning, genomic structure, chromosomal localization, and alternative splice forms (human), **277,** 27
  lithium-induced store-operated Ca^{2+} influx (human), **267,** 546
  normal processing of β-amyloid precursor protein in, role of calpain (human), **273,** 170
  serotonin stimulation, phosphoinositide-mediated calcium response to, inhibition by sodium azide (human), **274,** 472
Pleckstrin homology domain
  adaptor protein STAP-1 with, molecular cloning, **268,** 697
Plectin
  identification of hamster intermediate filament-associated protein as ortholog of, **273,** 183
Pleurotus ostreatus
  ubiquitin-like protein, isolation, **276,** 587
Pleurotus sajor-caju
  glyceraldehyde-3-phosphate dehydrogenase gene isolation and characterization, **278,** 192
Plicatamide
  characterization and use in analysis of biosynthetic origins of tunichromes (*Styela plicata*), **270,** 421
PMCA1
  gene, promoter region, mediation of transcriptional downregulation by 1,25-dihydroxyitamin D$_3$, **277,** 722
  mRNA, expression in aortic myocytes, RT–PCR study (rat), **276,** 1024
Pokeweed antiviral protein-II
  X-ray crystallographic analysis after reductive methylation of lysine residues, **275,** 549
Pokeweed mitogen
  T cells stimulated with, dipeptidyl peptidase IV mRNA expression, suppression by DP IV inhibition (human), **274,** 410
Polarography
  Na$^+$/K$^+$-ATPase role in O$_2$ production from H$_2$O$_2$, **274,** 750
Poliovirus
  induction of early impairment of mitochondrial function by inhibition of succinate dehydrogenase, **271,** 610; *erratum,* **272,** 966
Pollen allergen
  Jun a 2, purification, identification, and cDNA cloning (mountain cedar pollen), **275,** 195
Pollutants
  degradation, application of heterologous cytochrome P450 engineering in *Acinetobacter,* **276,** 797
Polo-like kinase 1
  mRNA, target for antisense tumor therapy (human), **269,** 352
Poly-*N*-acetyllactosaminyl saccharides
  sialylated chains on surface of apoptotic Jurkat cells, role in binding of anti-band 3 antibody, **275,** 412
Polyadenylation
  and splicing, competition: 3′-end generation in class V alcohol dehydrogenase gene (human), **278,** 544
Poly(ADP-ribose) polymerase
  activation, role in apoptosis in dorsal lateral geniculate nucleus after monocular deprivation (rat), **278,** 360
  inhibition, in GPI 6150 prevention of hydrogen peroxide cytotoxicity (P388D1 cells), **278,** 590
  localization to centrosomes and chromosomes, **278,** 385
Polyamines
  modulation of cell function, **271,** 559
Poly(A) polymerases
  nuclear and chloroplast, in plants, sharing of biochemical property by, **272,** 174
Polycyclic aromatic hydrocarbons
  biocatalytic oxidation by hemoglobin, improvement by Hb chemical modification, **273,** 820; *erratum,* **275,** 713
Poly(ethylene)glycol
  modification of hemoglobin, improvement of PAH oxidation by Hb, **273,** 820; *erratum,* **275,** 713
Polyethylenimine
  uptake and intracellular fate *in vivo* (rat), **278,** 414
Polyglutamine
  protein aggregation and cell death mediated by, analysis in SK-N-BE neuroblastoma cells, **272,** 816
Polyglutamine aggregates
  mouse L929 cells induced by, localization of active form of caspase-8, **270,** 972
Polyglutamine repeat
  intronless C14orf4 gene with, detection in ARVD1 critical region and characterization (human), **278,** 766
Polyglutamine tract
  expanded, N-terminal huntingtin fragment containing, aggregates of, dissolution by formic acid, **277,** 386
Polyisobutylcyanoacrylate
  EWS Fli-1 antisense nanocapsules, inhibition of Ewing sarcoma-related tumors (mouse), **279,** 401
Polyisoprenyl phosphate
  signaling, topography in neutrophils (human), **275,** 739
Polyketide synthase
  enzymatic formation of unnatural aromatic polyketides by chalcone synthase (*Scutellaria baicalensis*), **279,** 190
Polymerase
  hepatitis B virus
    interactions with N- and C-terminal fragments of Hsp90β, **274,** 203
    localization of HSP90 binding sites in, **269,** 191
Polymerase chain reaction
  amplification of circularized first strand cDNAs: non-IRE-regulated iron-responsive mRNAs, **275,** 223
  amplification using whole human genome, in characterization of human porin isoform 1, **270,** 787
  lactoperoxidase and myeloperoxidase cloning (human), **271,** 831
  real-time, assay of full-length and exon 11 spliced *BRCA1* transcripts in breast cancer cells, **274,** 73
  RT-PCR
    aquaporin-7 localization in kidney (mouse, rat), **277,** 164
    assay of xeroderma pigmentosum F gene expression in nonmelanoma skin cancer (human), **273,** 454
    competitive, in assay of constitutive and inducible CYP mRNA expression in HepG2 cells, **267,** 756
    CYP1A mRNA detection *in situ* in pharyngeal epithelium and chondroid cells from chemically untreated fish, **271,** 130
    inhibition by melanin, **271,** 726
    MRP1 mRNA detection *in situ* in human tumors and tumor cell lines, **275,** 466
    real-time, PMCA1 mRNA expression in rat aortic myocytes, **276,** 1024
Polymerization
  lethal yeast actin mutants, **271,** 464
Polymorphisms
  and activity of allelic variants of Pi class human glutathione *S*-transferase toward chlorambucil, **278,** 258
  ATP-binding-cassette transporter gene 1 5′ end, **271,** 451
  CYP2D6, and anti-KLM-1, in patients with chronic hepatitis C, **270,** 922
  FcϵRI β chain, effects on IgE-mediated mast cell activation (mouse), **273,** 765; *erratum,* **274,** 880

Polymorphisms (*continued*)
  in GHRH receptor gene, and elevated response to GHRH by human pituitary somatotrophinomas *in vitro,* **275,** 33
  neuronal nitric-oxide synthase *NOS1* gene, association with asthma (human), **272,** 391
  peroxisome proliferator-activated receptor γ2, Pro12Ala, conferral of resistance to type 2 diabetes (human), **271,** 212
Polynucleotide carrier
  recognized by scavenger receptors, delivery of muramyl dipeptide: selective activation of macrophage antitumor activity, **268,** 772
Polynucleotide phosphorylase
  chloroplast, associated RNAs, utilizability by plant nuclear and chloroplast poly(A) polymerases, **272,** 174
Polynucleotides
  selective determination using AFM imaging and oligonucleotide-capped gold nanoparticles, **279,** 265
Polyomavirus enhancer A binding protein-3
  and AP-1, role in constitutive IL-8 gene expression in hepatoma cells, **279,** 166
Poly(P)/ATP-NAD kinase
  isolation (*Mycobacterium tuberculosis* H37Rv), **276,** 57
Polypeptide F4
  as fusion partner reinforcing formation of inclusion bodies, high-level expression of antimicrobial peptide in *E. coli* by, **277,** 575
Polypeptides
  binding to GroEL, attenuation by hydrophilic residues at GroEL apical domain, **267,** 842
  chain direction reversal mediated by C–H· · ·O hydrogen bond in synthetic peptide helix, **273,** 933
  low-molecular-mass, in rat liver mitochondria, Ca^{2+}-modulated phosphorylation, **270,** 741
Polyphenols
  green tea, inhibition of squalene epoxidase, **268,** 767
  rapid H_2O_2 generation upon addition to cell culture media, **273,** 50
Polyphosphate
  binding to *Escherichia coli* exopolyphosphatase, effects of monovalent ions, **274,** 236
Polyribosomes
  distinct FMRP polysomal population at advanced stage of mammalian erythropoiesis, **275,** 608
Polysaccharides
  exopolysaccharide produced by clinical isolate of *Burkholderia cepacia,* structural study, **273,** 1088
Polyunsaturated fatty acids
  dietary, upregulation of UCP2 expression in 3T3-L1 preadipocytes, **277,** 541
PorA
  anti-PorA antibodies, elicitation by immunization with peptides conjugated to P64k, **277,** 51
Porin
  isoform 1, characterization by amplification on whole human genome, **270,** 787
Porphyrin
  biosynthesis intermediates, effect on δ-aminolevulinic acid transport in *Saccharomyces cerevisiae,* **272,** 946
Porphyromonas gingivalis
  lipopolysaccharide, induction of Toll-like receptor 4-mediated signal pathway in gingival fibroblasts (human), **273,** 1161
Postprandial hyperlipidemia
  tissues of rat model with, differential expression of lipoprotein lipase gene, **277,** 423
Posttranscriptional regulation
  ATA2 transport during liver regeneration (rat), **278,** 729
  α-catenin expression, role in Wnt signaling in L cells, **277,** 691
  insulin-like growth factor binding protein-1 expression: effect of AUUUA sequences on IGFBP-1 mRNA stability (human), **267,** 509
Potassium
  induction of magnesium efflux in thymocytes (rat), **268,** 673
  ions, distribution in human epidermis, visual imaging, **272,** 134
Potassium channels
  ATP-sensitive
    mRNA expression in kidney after ischemic injury (rat), **269,** 618
    pore-forming subunit, functional expression in *Saccharomyces cerevisiae,* **272,** 403
  intermediate-conductance, calcium-activated, from fibroblasts, prominence in prostate cancer cell electrophysiology, **269,** 457
  KCRF regulating, expression cloning (rat), **274,** 852
  KV1.1, identification in breast carcinoma cells and role in cell proliferation (MCF-7 cells), **278,** 272
  Kv1.3, of human T lymphocytes, blockage by Pi1: novel class of scorpion toxin, **278,** 34
  plant, temperature-dependent functional expression in mammalian cells, **274,** 130; *erratum,* **275,** 247
  RACTK1, tracing origin of, **277,** 147
  Shaker, S2 and S4 transmembrane segments, amino acid substitution within, modulation of channel gating, **275,** 720
Potassium currents
  outward, alterations on removal of external Ca^{2+} in human atrial myocytes, **273,** 10
pp60$^{c\text{-}src}$
  activation of neuroendocrine L-type Ca^{2+} channels in retinal pigment epithelial cells and brain neurons, **270,** 806
  role in regulation of collagenolytic protease secretion in osteoclasts, **272,** 116
ppGpp
  dependent *leuO* expression in bacteria under stress, **276,** 64
PQBP-1/Npw38
  interaction with U5-15kD/dim1p via C-terminal domain, **273,** 592
PR1 protein
  acidic, encoding gene responsive to cut, phytohormones, and protein phosphatase inhibitors, cloning (rice), **274,** 157
PR65/A
  competition between HSF2 and catalytic subunit of protein phosphatase 2A for binding to, molecular basis, **272,** 84
Pravastatin
  effect on bone morphogenetic protein-2 promoter activity in osteosarcoma cells (human), **271,** 688
pRB–E2F complexes
  formation in myeloid leukemia cells, effect of TGFβ (human), **276,** 930
pRB kinase
  cyclin A-associated activity, inhibition by β3-endonexin, **267,** 947
Preadipocytes
  adipocyte differentiation
    differential expression of adipocyte amino acid transporter during, transactivation by SP1 and SP3 (3T3-L1 cells), **271,** 100
    regulation by retinoblastoma protein phosphorylation via PI 3-kinase and mTOR pathway (3T3-L1 cells), **275,** 115
  plasminogen activator inhibitor-1 release independent of insulin and IGF-1 (human), **279,** 984
  STAT6 activation, effect of IL-4 (3T3-L1 cells), **267,** 516
  thiazolidinedione-induced adipogenesis, inhibitory effect of Pro^{12} → Ala mutation of PPARγ2 (3T3-L1 cells), **268,** 178
  UCP2 expression, upregulation by dietary fatty acids (3T3-L1 cells), **277,** 541
Preantral follicles
  from 11-day-old mice, morphology in *in vitro* culture, growth hormone effects, **268,** 36

- Precartilage condensation
  - in mesenchymal cells, role of focal adhesion kinase association with fibronectin and paxillin (chicken), **278,** 522
- Preconditioning
  - effects on hypoxia/hypoglycemia-induced amino acid release from rat brain cortical slices, **276,** 134
- Pregnancy
  - associated upregulation of p21- and RhoA-activated protein kinases (human), **269,** 322
- 5α-Pregnane-3,20-dione
  - plasma membrane receptors for, detection and characterization in MCF-7 breast cancer cells, **272,** 731
- Pregnane X receptor
  - expression in primary hepatocytes, negative regulation by IL-6 (human), **274,** 707
- Pre-mRNA processing kinase 4
  - activation, characterization and role in signaling (human), **271,** 456
- Prenylated Rab acceptor
  - localization to Golgi membrane and role in Golgi structure and function (mouse), **275,** 509
- Prenyltransferase
  - enhanced activity in rat liver regeneration, **269,** 226
- Preosteoclast-like cells
  - bone marrow-derived, release of prostaglandins and nitric oxide, stimulation by fluid shear stress (rat), **270,** 643
- Preovulatory surge
  - LH and prolactin, role of prolactin-releasing peptide (rat), **279,** 35
- Prepronociceptin
  - gene encoding, transcriptional regulation (human), **276,** 710
- Prepro-orexin
  - mRNA levels in rat hypothalamus, effect of leptin treatment, **269,** 41
- Presenilin 1
  - C92S mutation, effect on $A\beta$ 42 production in H4 neuroglioma cells, **277,** 261
- PreS protein
  - hepatitis B virus, cellular receptors specific for, detection on cell lines of extrahepatic origin, **277,** 246
- Pressure
  - effects on fluorescence of tryptophan and derivatives, **269,** 681
  - hydrostatic, facilitation of *ex vivo* adenovirus gene transfer into aorta (rabbit), **274,** 422
  - intraluminal, regulation of vascular endothelial growth factor in intact conduit vessels (human), **272,** 490
- Priming effect
  - enhancement by intermittent treatment with interferon, **278,** 599
- Prion protein
  - antioxidant function, loss in prion disease, **275,** 249
  - cellular, gene expression, enhancement by insulin or nerve growth factor in immortalized murine neuronal precursor cell lines, **268,** 763
  - differential contribution to superoxide dismutase activity *in vivo,* **273,** 136
  - dimer modeling: predictions for fibril formation, **278,** 646
  - gene, differentially expressed mRNA found in prion-infected mouse brain and N2A cells but not in uninfected mice, **251,** 423; *corrigendum,* **279,** 1016
  - mRNA, analysis by *in situ* hybridization in brain and placenta (sheep), **273,** 890
  - N-terminal tandem repeat region, copper reduction by, role of tryptophan residues (human), **269,** 491
  - octapeptide repeat region, binding of Cu(II) in redox-inactive state, **267,** 398
  - with polymorphism at position 129, effect of copper, **269,** 726; *erratum,* **271,** 842
  - refolding, role of copper ions (mouse), **276,** 1217
  - susceptibility to enzymatic phosphorylation, **271,** 337
- Procholecystokinin
  - normal processing, PC2 role, analysis in PC2 and 7B2 null mice, **273,** 188
- Prochymosin
  - molecular cloning from gastric mucosa and expressional change during development (rat), **267,** 806
- Procollagen COOH-terminal proteinase enhancer
  - regulatory expression in proliferation of VSMCs, **270,** 1049
- Procyanidins
  - antioxidant activity *in vitro* (cocoa), **276,** 945
  - cocoa, decomposition in gastric milieu, **272,** 236
- Proflavine
  - Tröger base derived from, enantiospecific recognition of DNA sequences, **273,** 681
- Progelatinase A
  - activation by *E. coli*-derived serine proteinase (human), **268,** 128
  - cell-associated activation, membrane type-2 matrix metalloproteinase as defective in, **267,** 796
- Progesterone
  - control of immunoglobulin binding factor mRNA expression in uterine cervix (human), **279,** 898
  - effect on angiotensin II-induced changes in IP_3 content and PKC activity in anterior pituitary, **275,** 7
- Progesterone receptor
  - activation, mediation of LH-induced type-I pituitary adenylate cyclase activating polypeptide receptor gene expression in granulosa cells (rat), **277,** 270
- Progestins
  - effects on long-term growth, death, and Bcl-xL in breast cancer cells, **277,** 650
  - induction of lipogenesis, associated increased expression of Spot 14 in T47-D breast cancer cells, **269,** 209
- Prolactin
  - clonal strain of GH_3 cells secreting, D-aspartate identification (rat), **276,** 1143; *erratum,* **279,** 305
  - preovulatory surge, role of prolactin-releasing peptide (rat), **279,** 35
- Prolactin-releasing peptide
  - role in preovulatory luteinizing hormone and prolactin surges in rat, **279,** 35
- Prolactin-releasing peptide receptor
  - encoding gene, $5'$-flanking region, cloning and characterization (human), **276,** 411
- Proliferating cell nuclear antigen
  - interaction with DNA polymerase δ *(Thermococcus fumicolans),* **276,** 600
- Proline
  - HTLV-1, effect of substitution, **276,** 1085
  - iron-mediated side-chain oxidation in LDL apoB-100, 5-hydroxy-2-aminovaleric acid as specific marker, **270,** 852
  - suppression of salt stress-induced enhancement of ribulose-1,5-bisphosphate oxygenase activity (*Sesbania sesban*), **279,** 512
- Proline-rich tyrosine kinase 2/cell adhesion kinase β
  - redox-sensitive kinase in vascular smooth muscle cells, **270,** 761
- Promatrix metalloproteinase 2
  - activation by *E. coli*-derived serine proteinase (human), **268,** 128
  - cell-associated activation, membrane type-2 matrix metalloproteinase as defective in, **267,** 796
- Promonocytic U937 cells, *see* U937 cells
- Propionic acid
  - induction of mitochondrial permeability transition *in vitro* (rat), **272,** 431
- Proprotein convertase
  - PC2-7B2 complex, misrouting by cathepsin-B fusion proteins (mouse), **276,** 594
- 10β-Prop-2-ynylestr-4-ene-3,17-dione
  - for aromatase inhibition, synthesis and evaluation, **267,** 356

- Prorenin
  - rate of activation by acid or trypsin, role of prosegment, **267,** 577
- Prostacyclin
  - synthesis, activation by mechanical stimulation in *Tetrahymena thermophila,* **279,** 635
- Prostacyclin synthase
  - expression in vascular endothelium, effects of shear stress, in biomechanical perfusion model, **269,** 257
- Prostaglandin D_2
  - moat1 transporting, molecular identification (rat), **275,** 831
- Prostaglandin E_2
  - and calcemic hormones, differential stimulation of IL-6 in stromal/osteoblastic cells, **270,** 1080
  - cyclooxygenase-2-dependent synthesis, in macrophages, inhibition by salicylate metabolites (mouse), **274,** 197
  - induction by ceramide in pulmonary A549 cells, role of NF-κB activation, **277,** 675
  - modulation of cyclooxygenase-2 expression in lipopolysaccharide-stimulated monocytes (human), **278,** 790
  - production, stimulation by cholesterol (rat), **274,** 553
  - stimulus-specific inhibition of IL-5, **273,** 811; *erratum,* **275,** 713
  - upregulation of cyclooxygenase-2 expression in lipopolysaccharide-stimulated RAW 264.7 macrophages, **272,** 744
- Prostaglandin E_2 receptors
  - EP2 and EP4, differential modulation of LPS-induced TNF-α and IL-6 production in mouse peritoneal neutrophils, **278,** 224
  - EP3, receptor isoform-specific interaction with muskelin, **276,** 350
- Prostaglandin $F_{2\alpha}$
  - induction of cyclin D1 expression and DNA synthesis via early signaling mechanisms in Swiss 3T3 cells, **270,** 11
  - production, stimulation by cholesterol (rat), **274,** 553
- Prostaglandin $F_{2\alpha}$ receptor
  - gene encoding, 5′-flanking region structure and transcriptional control functions in hepatocytes (rat), **278,** 278
- Prostaglandin G/H synthase-2
  - stimulation in osteocytes and other osteogenic cells by pulsating fluid flow (chicken), **268,** 414
- Prostaglandin I_2
  - expression in vascular endothelium, effects of shear stress, in biomechanical perfusion model, **269,** 257
  - mediation of thermo-sensory function in *Paramecium,* **273,** 516
- Prostaglandins
  - release in bone marrow-derived preosteoclast-like cells, stimulation by fluid shear stress (rat), **270,** 643
  - upregulation of vascular endothelial growth factor production via distinct pathways in differentiated U937 cells, **273,** 485
- Prostanoid synthases
  - in hepatic macrophages, coupling of cylooxygenase 1 and 2 (rat), **276,** 488
- Prostate
  - benign and cancerous tissues, IGF-II promoter usage in, analysis (human), **268,** 886
  - epithelial cells, mitochondrial potential loss and Bcl-2 protein degradation *in vitro,* induction by high levels of zinc ions (human), **279,** 607
  - kallikrein-like protease isoform TLSP/hippostasin expressed in (human), **272,** 205
- Prostate cancer cells
  - androgen receptor signaling in, regulation by protein inhibitor of activated STAT3 (LNCaP cells), **278,** 9
  - cell–cell contacts, coordinate recruitment of E-cadherin and ALCAM to, role of α-catenin (human), **267,** 870
  - effects of borato-1,2-diaminocyclohexane platinum(II) (DU-145 cells), **270,** 383
  - electrophysiological prominence of fibroblast IK channels (AT2.1, MatLyLu cells), **269,** 457
  - endogenous androgen receptor levels, effect of proteasome inhibition (LNCaP cells), **276,** 144
  - epithelial, anti-angiogenic potential of silymarin (DU145 cells), **276,** 371
  - expression of isoforms of FGF8, effects of retinoic acid (LNCaP cells), **272,** 98
  - induction of NAD^+-linked 15-hydroxyprostaglandin dehydrogenase expression by androgens (LNCaP cells, PC3 cells), **276,** 77
  - migration and *in vivo* dissemination, effect of Rho kinase inhibitor Y-27632 (human), **269,** 652
- Prostate stem cell antigen
  - gene expression, reduction in bladder, esophageal, and gastric tumors (human), **275,** 783
- Protease
  - aspartic, HIV-1, computational design of cyclic urea inhibitors for improved binding of, **268,** 384
  - in bone cells, stimulation by human growth hormone via IGF-I (rabbit), **268,** 875
  - contaminant in bacitracin, enzyme destruction by, **273,** 829
  - converting human plasminogen to Kringle 1–5-containing fragments, expression by glioma BT325 cells, **278,** 821
  - HIV-1
    - stimulation, casein kinase as protein kinase responsible for, **275,** 434
    - tryptophan side chains in dimerization and hinge regions, unfolding kinetics by real-time NMR, **269,** 387
    - variant, sense codon-dependent introduction of unnatural amino acids into, **270,** 1136
- Protease-activated receptor-2
  - activation, triggering of mucin secretion in rat sublingual gland, **270,** 298
- Protease inhibitor
  - computational design of cyclic urea inhibitors for improved binding of HIV-1 aspartic protease, **268,** 384
  - Kunitz family, identification in skin secretions of tomato frog, **279,** 961
- α_1-Protease inhibitor
  - functions after S-nitrosylation: inhibition of cysteine protease and antibacterial activity (human), **267,** 918
- Protease inhibitor type III
  - mini-trypsin inhibitor derived from, expression, purification, and oxidative refolding (oil rape), **275,** 817
- Proteasome
  - 26S
    - associated ubiquitin carboxyl-terminal hydrolase, identification in fission yeast, **272,** 270
    - degradation of ornithine decarboxylase, **267,** 1
    - inhibition of, induction of γ-glutamylcysteine synthetase catalytic subunit GLCLC, **270,** 311
  - activity, inhibition by alcohol, effect of ethanol-induced CYP2E1 (mouse), **279,** 23
  - constitutive, tissue distribution (rat), **277,** 348
  - cytosolic chaperonin CCT degradation dependence on, analysis in mammalian cells, **279,** 712
  - inhibition in human HepG2 and LNCaP cells, effects on endogenous androgen receptor levels, **276,** 144
  - inhibitory effects of cyclosporin A, role in activation of HSF1 and HSF2 and expression of HSP27 (BSC-1, F9, HeLa cells), **269,** 464
  - mammalian MSS1 ATPase, tissue and cell distribution and formation of complex with basal transcription factors, **279,** 568
  - photoaffinity labeling *in situ* with photoactive Adriamycin analogue, **273,** 928
  - –ubiquitin proteolytic pathway, in heart and skeletal muscle, effect of acute diabetes (rat), **276,** 1255

Proteasome inhibitor
  effect on sepsis-induced muscle proteolysis *in vivo* (rat), **270,** 215
Proteasome regulatory complex
  yeast, isolation and characterization, **273,** 509
Protein A
  minidomain, with elastin β-turn, effect of sodium sulphate, **276,** 899
Protein arginine methyltransferase 1 gene
  genomic organization, physical mapping, and expression analysis (human), **278,** 349
Proteinase, *see* Protease
Proteinase-activated receptor-2
  cleavage by extrapancreatic trypsin-2, **275,** 77
Proteinase binding loop
  Cucurbita maxima trypsin inhibitor, synthesis of trypsin chromogenic substrates based on, **269,** 81
Proteinase inhibitor, *see* Protease inhibitor
Protein-bound homocysteine
  formation in human plasma, mechanisms, **277,** 668
Protein degradation
  endoplasmic reticulum proteins, initiated by loss of ER Ca^{2+}, monitoring with apoaequorin, **268,** 711
  by peroxide, catalyzed by chromium(III), role of coordinated ligand, **270,** 749
Protein disulfide isomerase
  destruction by protease contaminant in bacitracin, **273,** 829
Protein dityrosine
  immunochemical detection using novel monoclonal antibody in atherosclerotic lesion of ApoE-deficient mice, **275,** 11
Protein folding, *see also* Protein unfolding
  dynamic measurement of mechanical properties of single protein, **272,** 55
  kallikrein-like protease from snake venom, engineering of autocatalytic site in fusion protein for, **275,** 924
  oxidative refolding of mini-trypsin inhibitor derived from oil rape proteinase inhibitor type III, **275,** 817
  prion protein, role of copper ions (mouse), **276,** 1217
Protein inhibitor of activated STAT3
  regulation of androgen receptor signaling in prostate carcinoma cells, **278,** 9
  upregulation, association with STAT3 inhibition in acute hepatic failure (rat), **273,** 129
Protein kinase
  substrates, identification by *in vitro* expression cloning screening, **268,** 562
Protein kinase A
  activation of CREB protein, inhibition by Tip60, **269,** 758
  aquaporin-1 phosphorylation dependent on, role in AQP-1 water channel activity, **273,** 328
  cyclic AMP–PKA pathway, restraining effect on islet phospholipase A_2 activation (rat), **269,** 242
  downregulation of phospholipase D in cell-free system of human neutrophils, **267,** 305
  extracellular, biochemical characterization as tumor marker, **278,** 679
  retinoid X receptor α serine 27 residue phosphorylation by, role in cAMP-mediated downregulation of RXRα (human), **279,** 853
  troponin I phosphorylation by, effect on length dependence of tension activation in skinned cardiac muscle fibers, **272,** 104
Protein kinase B, *see* Akt
Protein kinase C
  activation
    inhibitory effect on connective tissue growth factor expression (rat), **275,** 312
    role in prostaglandin $F_{2\alpha}$ induction of cyclin D1 expression and DNA synthesis in Swiss 3T3 cells, **270,** 11
  activity translocation, role in 4-hydroxynonenal-induced MEL cell differentiation, **272,** 75
  anterior pituitary, angiotensin II-induced changes, effects of 17β-estradiol and progesterone (rat), **275,** 7
  as antiapoptotic signal of IGF-1 in cultured cardiomyocytes (rat), **273,** 736
  atypical and conventional, role in dehydroepiandrosterone-induced glucose uptake and dexamethasone-induced insulin resistance (rat), **277,** 361
  isoforms in HL60 cells, differential redistribution by cAMP, **274,** 596
  JAM phosphorylation by, on platelet activation (rabbit), **276,** 873
  and PKNα, effects on phosphorylation of tau protein by glycogen synthase kinase-3β, **273,** 209
  prion protein phosphorylation by, **271,** 337
  pseudosubstrate peptides, conditionally expressed, effect on endothelial cell proliferation, migration, and differentiation (rat), **271,** 499
Protein kinase C-α
  role in FcγR-mediated phagocytosis in macrophages (RAW 264.7), **276,** 472
  role in induction of mesenchymal cell chondrogenesis by disruption of actin cytoskeleton (chick embryo), **273,** 609
Protein kinase C-β
  βI and βII isoforms, and Aβ production, increase by oxidative stress in NT2 cells, **268,** 642; *erratum,* **272,** 309
Protein kinase C-δ
  alternatively spliced variant PKC δIII, cDNA cloning (rat), **269,** 557
  tyrosine phosphorylation induced by H_2O_2 independently of protein-tyrosine phosphatase inhibition (CHO, COS-7 cells), **273,** 960
Protein kinase C-η
  overexpression, attenuation of caspase activation and TNF-α-induced cell death (MCF-7 cells), **279,** 103
Protein kinase C-θ
  distribution and molecular properties, role in neuronal differentiation of PC12 cells, **275,** 149
  requirement for neuroblastoma cell differentiation (human), **279,** 589
Protein kinase CK2
  β subunit
    binding domain for p21^{WAF1} on, mapping, **268,** 882
    gene expression, modulation by seasonal adaptation (carp), **271,** 735
  regulatory subunit, functional role of cysteinyl residues, analysis with pCMB, **267,** 427
Protein kinase N
  phosphorylation of CPI-17, **274,** 825
Protein kinase Nα
  and PKC, effects on phosphorylation of tau protein by glycogen synthase kinase-3β, **273,** 209
Protein methyltransferase
  yeast Hsl7p identification as, **274,** 105
Protein phosphatase
  dual-specificity, molecular cloning: FYVE-DSP1 (human), **270,** 222
  inhibitors of, acidic *PR1* gene responsive to, cloning (rice), **274,** 157
Protein phosphatase-1
  catalytic subunit, toxin binding site in, mutational analysis: comparison with PP-2B, **270,** 543
  glycogen targeting subunit G_M, overexpression, **275,** 859
Protein phosphatase-2A
  competition between HSF2 and catalytic subunit for binding to PR65/A subunit of, molecular basis, **272,** 84
Protein phosphatase-2B
  toxin resistance, analysis by mutation of toxin binding site of protein phosphatase-1 catalytic subunit, **270,** 543
Protein phosphatase-2C
  related phosphatase, dephosphorylation of casein kinase II-phosphorylated *Physarum* fragmin, **279,** 438

- Protein–protein interactions
  - in hemoglobin assembly: synergistic effect of surface and interface β-chain residues, **270,** 683
  - L-type Ca^{2+} channel α_{1C} subunit with vacuolar H^+-ATPase G2 subunit, **277,** 611
  - NifH and NifM, demonstrated by yeast two-hybrid system, **270,** 863
  - in yeast two-hybrid system, combined transformation and genetic technique verification of, **277,** 589
- Protein radical
  - myeloperoxidase, EPR spin trapping, **270,** 199
- Proteins
  - 43-kDa, hypoxia-induced expression in normal and malignant cells: PROXY-1, **276,** 321
  - 70-kDa, in adipocyte light microsomes, insulin-dependent phosphorylation (rat), **276,** 1302
  - bcl-2-related, effect on matrix metalloproteinase expression in glioma cell line (rat), **273,** 411
  - *Carbydea alata* toxins, isolation and characterization, **275,** 589
  - *Carbydea rastoni* toxins, isolation, sequence, localization, and identity of toxin causing cutaneous inflammation, **275,** 582
  - β-catenin-interacting, with molecular masses of 150 and 180 kDa, identification (bovine brain), **273,** 712
  - complexes with DNA for cell-targeted DNA delivery, molecular organization, **278,** 455
  - components of aggregates, quantitation, **277,** 386
  - crystallization, improvement of crystal quality with magnets, **275,** 274
  - cyclin-related, associated with cdk3 *in vivo,* molecular cloning (mouse), **273,** 442; *erratum,* **274,** 880
  - cytoskeletal
    - association with Enigma homologue protein via PDZ domain (rat), **272,** 505
    - intermediate filament-associated protein IFAP300 identification as hamster plectin homolog, **273,** 183
  - cytosolic soluble factor triggering calcium oscillations in mouse eggs, detection in chicken and *Xenopus* sperm, **268,** 947
  - delivery by *Pseudomonas* type III secretion system: complementation of $p67^{phox}$-deficient chronic granulomatous disease (human), **275,** 854
  - dithiothreitol-destabilized, effect on bovine lens α-crystallin, **276,** 619
  - endoplasmic reticulum, degradation initiated by loss of ER Ca^{2+}, monitoring with apoaequorin, **268,** 711
  - extracellular matrix, TGF-β-induced, role in modulation of cellular response to cytotoxic effect of TNF in L929 fibroblasts, **267,** 194
  - *Giardia lamblia,* amino acid usage in, **279,** 996
  - GPI-anchored, binding HDL, identification on macrophages (human), **272,** 864
  - hepatic, from liver with CCl_4-induced injury, interaction with albumin mRNA (rat), **273,** 261
  - hepatic cytoplasmic, 50-kDa, binding on 3′ untranslated region of urokinase-type plasminogen activator mRNA, induction by TCDD, **272,** 441
  - hepatitis C virus core protein, formation of complex with p21Waf1/Cip1/Sdi1, **273,** 479
  - hippocampal, expression changes in senescence-accelerated mouse, identification by expression array analysis, **272,** 657
  - intracellular magnetic particle-associated, from *Magnetospirillum* sp., *mpsA* gene encoding, cloning and characterization, **268,** 932
  - membrane and secreted, upregulated during adipocyte differentiation, identification (3T3-L1 cells), **272,** 293
  - mitochondrial, import in cultured cells, role of metaxin (human), **276,** 1028
  - mitochondrial precursor, multiple-site recognition by mitochondrial processing peptidase, **265,** 611; *erratum,* **268,** 663
  - molecular alignment in bicellar solutions: quantitative evaluation of effects induced in 2D COSY spectra, **272,** 694
  - natively unfolded, prothymosin α, Zn^{2+}-mediated structure formation and compaction (human), **267,** 663
  - nuclear, binding to antioxidant/electrophile response element, activation in vascular smooth muscle cells by benzo[*a*]pyrene (mouse), **267,** 12
  - nuclear matrix, hNMP 265, homology with eukaryotic initiation factor 4A (human), **267,** 339
  - oxidation
    - effects of vitamin C supplementation (human), **273,** 729
    - *in vitro,* inhibition by kinetin, **276,** 1265
  - oxidized, levels in Alzheimer's plasma (human), **275,** 678
  - peroxisomal membrane, 35-kDa, *PEX2* gene encoding, genomic organization and characterization (human), **273,** 985
  - with peroxisome targeting signals PTS1 and PTS2, peroxisomal import, effects of missense mutation in RING finger motif of PEX2, **270,** 717
  - plasma, interactions with amyloid β peptides, implications for Aβ quantitation in plasma (human), **268,** 750
  - polyglutamine-mediated aggregation, analysis in SK-N-BE neuroblastoma cells, **272,** 816
  - recombinant, dual-tagged, purification, **273,** 1058
  - secondary structural units, relationship to synonymous codon usage, **269,** 692
  - single, mechanical properties, dynamic measurement, **272,** 55
  - soluble chimera containing N-terminal domain of Duffy antigen, expression and binding properties, **273,** 705
  - soluble target binding to TentaGel beads, linker properties for optimal display of peptide ligands in, definition by combinatorial chemistry, **269,** 591
  - subcellular locations, prediction by incorporating quasi-sequence-order effect, **278,** 477
  - surface, in mouse small intestine, binding of Cry1Ac protoxin from *Bacillus thuringiensis* sp. *kurstaki* HD73, **271,** 54
  - translocation in chloroplasts of *Euglena* and higher plants, **277,** 436
  - unfolded protein response
    - gene regulation during, in human cells, **278,** 530
    - induction by Kar2p/BiP dissociation from Ire1p in yeast, **279,** 445
- Protein synthesis
  - cap- and IRES-dependent, increase by overproduction of eIF4G in mouse mammary carcinoma cells, **277,** 117
  - IGF-II, effect of bioglass 45S5 ionic products (human), **276,** 461
  - modulation by polyamines, **271,** 559
- Protein-tyrosine kinase, *see also specific protein-tyrosine kinase*
  - activation, role in prostaglandin $F_{2\alpha}$ induction of cyclin D1 expression and DNA synthesis in Swiss 3T3 cells, **270,** 11
  - redox-sensitive, in vascular smooth muscle cells, proline-rich tyrosine kinase 2 as, **270,** 761
  - role in enhancement of TNF-α-induced apoptosis by immobilized arginine-glycine-aspartate (rat), **277,** 293
  - src-type, activation of neuroendocrine L-type Ca^{2+} channels in retinal pigment epithelial cells and brain neurons, **270,** 806
- Protein-tyrosine-phosphatase
  - bacterial and mammalian, inhibition by low-molecular-weight S-nitrosothiols and S-nitrosylated human serum albumin, **268,** 310
  - CD45, stablity, effect of stable interdomain interaction within cytoplasmic domain, **271,** 292
  - HD-PTP, isolation and characterization (human), **278,** 671
  - inhibition, role in H_2O_2-induced tyrosine phosphorylation of protein kinase Cδ (CHO, COS-7 cells), **273,** 960
  - low-molecular-weight, differential regulation of PDGF- and insulin-mediated signaling (NIH-IR cells), **270,** 564
  - receptor-like, RPTPα, pervanadate-induced tyrosine phosphorylation of, role of membrane distal catalytic domain, **267,** 96

- Protein-tyrosine-phosphatase 1B
  - expression and activity in skeletal muscle, elevation in insulin-resistant type II diabetes (rat), **274,** 583
- Protein-tyrosine-phosphatase-BK
  - isolation and characterization (mouse), **276,** 974
- Protein unfolding
  - bovine serum albumin, urea-induced, analysis with domain-specific ligands, **277,** 83
  - significance of unfolded state, **276,** 393
  - tryptophan side chains in dimerization and hinge regions of HIV-1 protease tethered dimer, kinetics, real-time NMR study, **269,** 387
  - unfolded protein response
    - in human cells, gene regulation during, **278,** 530
    - in yeast, induction by Kar2p/BiP dissociation from Ire1p, **279,** 445
  - Zn^{2+}-mediated structure formation and compaction of natively unfolded human prothymosin α, **267,** 663
- Proteoglycans
  - cell-associated heparan sulfate, in FGF-2 cell attachment mediation (CHO-K1 cells), **276,** 399
  - degradation in articular cartilage, effects of ceramide (rabbit), **267,** 438
  - heparin-binding, neurocan identification as, **272,** 449
  - synthesis in articular cartilage, age-related effects of TGF-β (horse), **274,** 467
- Proteoliposomes
  - colocalization with endogenous mitochondria in fertilized mouse egg, **278,** 183
- Proteolysis
  - by aggregated amyloid β 1–42 fragment, pathological implication, **267,** 733
  - gastric mucin: disulfide-bound 100- and 140-kDa proteins, **270,** 722
  - histidine decarboxylase by m-calpain *in vitro* (rat), **271,** 777
  - laminin-5 α3 chain, fragment produced by, isolation and activity, **278,** 614
  - muscle, sepsis-induced *in vivo,* effect of proteasome inhibitor (rat), **270,** 215
  - protective mechanism of asparaginase fused with protective scFV, **276,** 197
  - proteinase-activated receptor-2 by extrapancreatic trypsin-2, trypsin, and tryptases, **275,** 77
  - regulation of PCCX1, **271,** 305
  - SDH2–RPS14 precursor encoded in nucleus: generation of mitochondrial RPS14 (maize), **271,** 380
- Prothymosin α
  - natively unfolded, Zn^{2+}-mediated structure formation and compaction (human), **267,** 663
  - nuclear localization signal, interaction with yeast importin α, role in nuclear uptake of cargos, **274,** 548
- Proton-detected 2D C,H correlation spectroscopy
  - assignment of overlapping ^{1}H NMR signals in carp seminal plasma, **269,** 76
- Protonophoretic mechanism
  - role in effects of carvedilol on isolated heart mitochondria, **276,** 82
- Proton transport
  - by PepT1, role of histidine and tyrosine residues, **272,** 726
- Protozoa
  - trypanosomatid, sensitivity to α-difluoromethylornithine and metabolic turnover of ornithine decarboxylase, **279,** 663
- PROXY-1
  - 43-kDa, hypoxia-induced expression in normal and malignant cells, **276,** 321
- PSAPs, *see* Pepstatin A-sensitive aspartic proteases
- *Pseudomonas aeruginosa*
  - antibiotic activity of CRAMP analogues without hemolytic effect, **275,** 904
  - ECF sigma factor protein, characterization, **273,** 578
  - genome-wide detection of unknown subtle mutations by combination of MutS and RDA, **268,** 535
  - type III secretion system, delivery of proteins: complementation of p67^{phox}-deficient chronic granulomatous disease (human), **275,** 854
- *Pseudomonas fluorescens*
  - high-affinity GABA binding protein, isolation and characterization, **268,** 65
- Pseudosubstrate peptides
  - protein kinase C, conditionally expressed, effect on endothelial cell proliferation, migration, and differentiation (rat), **271,** 499
- Pseudoxanthoma elasticum
  - related *MRP6* gene, R1268Q variant, homozygosity (human), **274,** 297
- Psoriasis
  - interleukin-6 expression in, induction by IGF-II via NF-κB activation (human), **278,** 312
- PSP24
  - G-protein-coupled receptor with homology, brain-specific expression *(Xenopus),* **276,** 952
  - mammalian, effect of lysophosphatidic acid in expression systems, **276,** 957
- *Psychrobacter sp.* TA144
  - rolling-circle plasmid cloning and sequencing, **274,** 488
- PTE2
  - peroxisomal long-chain acyl-CoA thioesterase (human), **275,** 233
- Pulsating fluid flow
  - effect on prostaglandin G/H synthase-2 mRNA expression in osteocytes and other osteogenic cells (chicken), **268,** 414
- Pur α
  - association with neural BC1 RNA (rat), **277,** 341
- Putamen
  - cAMP-specific phosphodiesterase PDE7B, expression and identification (human), **271,** 575
- Putrescine
  - modulation of cell function, **271,** 559
- PvdS protein
  - function as sigma factor in *Pseudomonas aeruginosa,* **273,** 578
- *px$_2$*
  - characterization to enhance inducible expression of adjacent *nodF* (*Rhizobium leguminosarum*), **275,** 91
- Pyrethroid resistance
  - related mutations in S6 transmembrane segments of voltage-gated sodium channel, functional and evolutionary consequences, **278,** 516
- *pyrF* gene
  - cloning and characterization (*Thermoplasma acidophilum*), **275,** 936
- Pyridine nucleotide transhydrogenase
  - proton-translocating, transmembrane helix orientation and spatial relationships, role of crosslinking of α and β subunits (*Escherichia coli*), **273,** 955; *erratum,* **277,** 782
- Pyridopyrimidines
  - restoration of TGF-β sensitivity in Cdk4-overexpressing mink lung epithelial cells, **272,** 794
- Pyridoxal-5′-phosphate
  - enzymes dependent on, evolution, **270,** 576
  - and NaBH$_4$, GDP-fucose-protected lysine sensitive to, in α1→3fucosyltransferases, correspondence to Lys^{300} in FucT-IV, **273,** 870
- Pyridoxal propionate
  - derivatives, structure-based development as inhibitors of cathepsin K, **267,** 850
- Pyridoxine
  - effects of peroral or intraperitoneal vitamin B$_6$ on intracellular cathepsin activities and immune responses (mouse), **272,** 151
- Pyrimidine morpholino oligonucleotides
  - formation of stable triple helix in absence of magnesium ions, **270,** 363
- Pyroglutamate
  - amyloid β protein, in Alzheimer's disease brain (human), **276,** 422
- Pyrrolidine dithiocarbamate
  - effects on TNF-α-dependent activation of NF-κB and MCP-1 expression in human aortic SMCs, **276,** 88
  - induction of apoptosis by cytochrome *c*-dependent mechanism (HL-60 cells), **268,** 942

Pyruvate
- cycling, implications for gluconeogenesis in *Manduca sexta,* **274,** 787

Pyruvate dehydrogenase
- PDH-E$_1\alpha$ recombinant histidine mutants, expression in human fibroblasts lacking PDH complex, **270,** 1068

Pyruvate dehydrogenase kinase
- effects of histidine-modifying agents, **267,** 500

Pyruvate formate-lyase-activating enzyme
- anaerobic isolation of active enzyme with [3Fe–4S]$^+$ cluster (*Escherichia coli*), **269,** 451

Q

Quantitative trait loci
- for syndrome X, detection in rat, **269,** 660

Quartz crystal microbalance
- analysis of colloidal gold-enhanced DNA sensing, **274,** 817

Quasi-sequence-order effect
- incorporation for prediction of protein subcellular locations, **278,** 477

Quaternary structure
- dimeric Cu,Zn superoxide dismutase: metal-dependent subunit association induced by single mutation, **272,** 81

Quercetin
- dietary, scavenging of peroxynitrite, effect of bicarbonate, **279,** 692
- inhibition of mitosis and apoptosis of glomerular cells *in vitro* and *in vivo* (rat), **279,** 629
- rapid H_2O_2 generation upon addition to cell culture media, **273,** 50

Quiescin Q6
- quiescence-induced expression, regulation (human), **269,** 604

Quinqueginsin
- isolation from American ginseng roots: anti-HIV, antifungal, ribonuclease, and cell-free translation-inhibitory activities, **269,** 203

R

R2 gene
- human ribonucleotide reductase, promoter characterization, **267,** 651

RAB3D gene
- genomic organization, chromosomal localization, and expression (mouse), **273,** 877

rab4
- in exocrine pancreas, expression, subcellular localization, and function, **268,** 847

Rab11
- overexpressed, or constitutively active, effects on sAPPα and Aβ secretion by wild-type and Swedish mutated βAPP-expressing HEK293 cells, **275,** 910

Rab 11a
- genomic structure (mouse), **269,** 611

Rab 25
- genomic structure (mouse), **269,** 611

Rab proteins
- content in liver, enhancement during regeneration (rat), **269,** 226

Rac
- activation of JNK, role of cytosolic phospholipase A$_2$, **268,** 231
- plant proteins, induction of superoxide production in mammalian cells, **272,** 783
- role in *Helicobacter pylori*-induced formation of stress fibers and membrane ruffles in AGS gastric adenocarcinoma cells, **269,** 247

Rac-1
- gene structure, localization, and expression (human), **277,** 741
- regulation of urokinase receptor transcription, **270,** 892

RACTK1
- tracing origin of, **277,** 147

Rad21/Scc1/Mcd1
- related protein NXP-1, identification as nuclear matrix component, **267,** 418

RAD51
- and *LIM15/DMC1,* interactions of C- and N-teminal domains (*Coprinus cinereus*), **275,** 97

RAD52 epistasis group
- genes of, effects on spontaneous mitotic recombination in *Saccharomyces cerevisiae,* **270,** 112

Radioimmunoassay
- circulating cardiotrophin-1 (human), **279,** 320

Raf-1
- association with membrane-associated guanylate kinase-interacting protein-1 (rat), **270,** 538
- conserved region 2, role in regulation of Ras-dependent Raf-1 activation, **271,** 596

Rafts
- in monocytes, association of aminopeptidase N/CD13 with, **269,** 143

RAGE
- mRNA, induction on anterior lens epithelial cells from cataracts (human), **275,** 53

Ralstonia sp. SJ98
- biodegradation of *p*-nitrophenol, kinetics, **274,** 626
- chemotaxis and biodegradation of 3-methyl-4-nitrophenol, **275,** 129
- chemotaxis toward nitroaromatic compounds and degradation of compounds, **269,** 117

Raman spectroscopy
- Na$^+$/K$^+$-ATPase role in O_2 production from H_2O_2, **274,** 750

RAMP domains
- multiple, requirement for generation of amylin receptor phenotype from caltinonin receptor gene products, **267,** 368

RAMPs
- for adrenomedullin/CGRP receptor, cloning and upregulation in obstructive nephropathy (rat), **270,** 89
- RAMP1 mRNA expression in human VSMCs, dexamethasone-induced increase, **270,** 1063

RanBP7
- mRNA, elevated levels in colorectal carcinoma, association with increased proliferation and similarity to c-*myc* transcription pattern (human), **271,** 537

RanBP16
- identification (human, mouse), **278,** 241

RanBP17
- identification (human, mouse), **278,** 241

RANK
- downregulation, association with inhibition of osteoclast formation by VIP and pituitary adenylate cyclase-activating polypeptide, **271,** 158

RANKL, *see* Osteoclast differentiation factor

Rap1
- activation in thyroid cells by cAMP-dependent and -independent pathways (dog), **267,** 7

Ras
- activation, lack of role as signal in mitogenesis by TSH via cAMP in canine thyrocytes, **273,** 154
- in COX-2 transcription regulation (NIH 3T3 cells), **276,** 406
- in Fas-mediated activation of phospholipase D (A20 cells), **271,** 328
- Raf1 activation dependent on, regulation, role of Raf-1 conserved region 2, **271,** 596
- regulation of urokinase receptor transcription, **270,** 892
- signals dependent on, preventing capase-3 activation and apoptosis induced by cytokine deprivation in hematopoietic cells, analysis, **267,** 449
- Src signaling pathways dependent on, activation of human carbonic anhydrase II gene promoter, **272,** 808
- in TGF-β_1 modulation of urokinase production and cellular invasiveness in transformed keratinocytes, **273,** 521

RBP95
  binding to retinoblastoma protein: leucine zipper protein (human), **275,** 141
Reactive oxygen species
  in live mouse skin exposed to UVA, chemiluminescence detection and imaging, **269,** 131
  in RBL-2H3 mast cells, effect of diphenyleneiodonium (rat), **276,** 742
  relationship to proline-rich tyrosine kinase 2/cell adhesion kinase β in vascular smooth muscle cells, **270,** 761
  role in IL-8 production induced by hyperosmotic stress in bronchial epithelial cells (human), **276,** 571
Real-time monitoring
  oligonucleotide hybridization in biological samples, **268,** 92
Receptor activator of NF-κB ligand, *see* Osteoclast differentiation factor
Receptor activity-modifying proteins, *see* RAMPs
Receptor-associated protein
  inhibition of trichosanthin entry into cells (JAR cells), **270,** 453
Receptor-mediated gene delivery
  in demonstration of role of 5′-proximal DNA region in phenobarbitone responsiveness of CYP2B2 gene in liver *in vivo,* **268,** 734
Receptor-mediated transcytosis
  using peptide ligands, phage display vectors in MDCK cells, **276,** 251
Receptor protein-tyrosine-phosphatase α
  tyrosine phosphorylation induced by pervanadate, role of membrane distal catalytic domain, **267,** 96
Recombinant adeno-associated virus
  self-amplification system for production, **276,** 559
Recombination
  Cre-mediated, in Emx1–Cre knock-in mouse, specificity and efficiency, **273,** 661
  between *RHCE* and *RHD* genes, analysis (human), **274,** 670
  spontaneous mitotic, in *Saccharomyces cerevisiae,* effects of *RAD52* epistasis group genes, **270,** 112
Redox control
  caspase-3 activity, by thioredoxin and other reduced proteins, **268,** 78
  differential expression of apoptosis factors in alveolar epithelium (rat), **271,** 257
Redox factor-1
  induction, effect on AP-1 activation in intracellular oxidative environment of IL-2-stimulated BA/F3β cells, **278,** 462
Redox state
  thioredoxin, role in reactive oxygen scavenging properties, **277,** 443
Reduced folate carrier
  gene expression, downregulation after methotrexate exposure in ZR-75-1 breast cancer cells, **279,** 891
Reduction
  nitroalkanes, in microperoxidase 8-catalyzed formation of iron(II)–nitrosoalkane complexes, **278,** 217
Reduction potential
  Fe^{3+}/Fe^{2+}, in heme, effect of water, **268,** 683
Regenerating gene I
  transgenic mice expressing, diabetes and tumor formation in, **278,** 368
Regeneration
  liver
    enhanced prenyltransferase activity and Rab content during (rat), **269,** 226
    gene expression in models of, analysis (rat), **272,** 591
    nuclear regulation during, role of regucalcin, review, **276,** 1
  skeletal muscle, in *Fgf/6* −/− mutant mice, **272,** 138
Regucalcin
  gene promoter, TTGGC sequence in, intracellular signaling factors-enhanced hepatic nuclear protein binding (rat), **279,** 275
  role in nuclear regulation of regenerating liver, review, **276,** 1
  transcriptional regulation, role of hepatic nuclear factor I binding motif, **269,** 270
REIC gene
  downregulation in human immortalized cells and human tumor-derived cell lines, **268,** 20
Rel similarity domain
  NFATz with, isolation and characterization (mouse), **272,** 765
Renal cancer
  increased activity and intranuclear expression of phospholipase D2 (human), **278,** 140
Renal cell carcinoma
  in *Tsc2* gene mutant rat model, *Erc* gene preferentially expressed in, mapping and cDNA sequence, **275,** 134
Reoviruses
  grass carp reovirus, genome segments 1, 2, and 3, sequence, **274,** 762; *erratum,* **276,** 391
Repetitive DNA
  highly repetitive rat DNA component *Xmn*I fragment, transcription modulation by, **279,** 282
  SV40 repeat sequence GGGCGG, NMR observation of C-tetrad in structure of, **270,** 967
Replication
  autonomous, aldolase B gene, regulation by overlapping set of elements in origin/promoter (rat), **278,** 760
  HIV-1, inhibition by circular dumbbell RNA/DNA chimeric oligonucleotides, **270,** 953
  TT virus DNA in bone marrow cells (human), **270,** 657
Replication origin
  mitochondrial DNA light strand, removal by multiple deletions (human), **279,** 595
Rep protein
  rolling-circle plasmid coding for, analysis (*Psychrobacter sp.* TA144), **274,** 488
Representational difference analysis
  combined with MutS method, genome-wide detection of unknown subtle mutations in bacteria by, **268,** 535
  genes differentially expressed in early response phase during liver regeneration (rat), **278,** 318
  neutrophils stimulated by GM-CSF (human), **277,** 401
Repressor
  thyroid transcription factor 2 as promoter-specific DNA-binding-independent transcriptional repressor, **275,** 203
Repressor–operator combination systems
  lactose–tetracycline, induced gene expression, role of cell growth (Kit 225 cells), **276,** 546
Restriction endonuclease
  BanI, binding in major groove of DNA, **269,** 35
Restriction enzymes
  Class II, vectors with hidden cloning sites for, **271,** 534
Restriction landmark genomic scanning
  liver tumors for gene amplification: overexpression of cyclin A2 (mouse), **274,** 188
Restriction landmark genomic scanning for methylation
  analysis of *mac25* gene methylation and downregulation associated with liver tumorigenesis in SV40 T/t antigen in transgenic mice, **267,** 109
Restriction–modification enzyme
  *Eco*KI, localization in bacterial cell, **270,** 46
Resveratrol
  absorption in small intestine as resveratrol glucuronide (rat), **272,** 212
  inhibition of AGEs-induced proliferation and collagen synthesis in vascular smooth muscle cells from stroke-prone spontaneously hypertensive rat, **274,** 61
  reversal of tumor promoter-induced inhibition of gap junctional intercellular communication (rat), **275,** 804

Resveratrol glucuronide
  resveratrol absorption in rat small intestine as, **272,** 212
Retina
  early developmental stage, selective expression of gene retinovin (chicken embryo), **276,** 12
  rod outer segments, ATP synthesis by reversal of disk Ca^{2+} pump (bovine), **268,** 625
Retinal pigment epithelial cells
  genistein-induced apoptosis via opening of mitochondrial permeability transition pore (RPE-J cells), **276,** 151
  neuroendocrine L-type Ca^{2+} channels, activation by pp60$^{c\text{-}src}$ (rat), **270,** 806
Retinal progenitors
  transplanted into subretinal space, survival and differentiation *in vitro* (rat), **268,** 842
Retinoblastoma protein
  binding of leucine zipper protein RBP95 (human), **275,** 141
  peptides derived from, selective inhibition of lung cancer cell growth (human), **267,** 71
  phosphorylation mediated by cyclin-dependent kinase, role in block of breast cancer MDA MB 231 cell proliferation by BMP-2, **272,** 705
  phosphorylation via PI 3-kinase and mTOR pathway, regulation of adipocyte differentiation, **275,** 115
  role in TGF-β1 inhibition of BRCA1 expression, **276,** 686
Retinoic acid
  downregulation of MARCKS in immortalized hippocampal cells, alteration by myristoylation, **276,** 183
  effect on expression of isoforms of FGF8 in LNCaP cells, **272,** 98
  inhibition of nitric-oxide synthase 2 expression in rat VSMC through retinoic acid receptor α, **270,** 846
  regulation of CYP4F2 leukotriene B$_4$ ω-hydroxylase in HepG2 cells, **279,** 864
  stimulated F9 cells, differentiation, regulating pattern of *mouse disabled 2* gene expression during, **275,** 189
  suppression of CYP2B1/2 expression (rat), **277,** 66
all-*trans*-Retinoic acid
  extension of *in vitro* life span of human oral keratinocytes, molecular mechanisms, **268,** 268
  induction of apoptosis in rat stromal–vascular cultures, **270,** 76
Retinoic acid receptor
  dominant negative form, transgenic mice expressing, accelerated growth of hepatocytes in association with cyclin E upregulation, **278,** 229
Retinoic acid receptor α
  expression during human monocyte differentiation *in vitro,* **270,** 17
  role in retinoic acid inhibition of nitric-oxide synthase 2 expression in rat VSMC, **270,** 846
Retinoic acid receptor β
  expression during human monocyte differentiation *in vitro,* **270,** 17
Retinoic acid receptor γ
  expression during human monocyte differentiation *in vitro,* **270,** 17
Retinoic acid response element
  identification
    in carbonic anhydrase II promoter in HD11 monocytic cells, **271,** 481
    in HNF1α and HNF4α genes (Hep3B cells), **276,** 837
    in lamin A/C promoter, **269,** 197
Retinoid X receptor
  expression in human keratinocytes, effect of apigenin, **268,** 237
  expression during human monocyte differentiation *in vitro,* **270,** 17
Retinoid X receptor α
  gene cloning and characterization (human), **269,** 54
  serine 27 residue, phosphorylation by PKA, role in cAMP-mediated down-regulation of RXRα (human), **279,** 853
Retinol
  reduced esterification in MCF-7 cells, **279,** 920
Retinoschisis
  X-linked juvenile, associated with 4-base pair insertion at codon 55 of XLRS1 gene, **268,** 370
Retinovin
  selective expression in early stage of chick retinal development, **276,** 12
RET protooncogene
  multiple endocrine neoplasia type 2B development due to mutations in, two-hit model, **268,** 804
Retrograde motor
  KLP-17 cDNA cloning and expression (*Caenorhabditis elegans*), **267,** 643
Retrotransposons
  Ty1 and Ty3, life cycles, effects of mutations in yeast *DBR1* gene, **268,** 112
Retrovirus
  vector for targeted gene transfer into cells expressing HIV envelope glycoprotein, **271,** 672
Reverse genetics
  characterization of mutations induced by ethyl methanesulfonate, UV, and trimethylpsoralen in *Caenorhabditis elegans,* **269,** 64
Reverse micelles
  tryptophan octyl ester in, fluorescence emission properties, **277,** 13
Reverse transcriptase
  HIV-1, AZT-resistant, phosphorylation by casein kinase II *in vitro:* effects on inhibitor sensitivity, **275,** 26
Reverse transcription
  efficient accumulation of reverse transcripts of yeast retrotransposons Ty1 and Ty3, role of host Dbr1p, **268,** 112
RGS5
  Xenopus homologue, molecular cloning and characterization, **270,** 34
RGS proteins
  gene identification: molecular cloning of *Xenopus* homologue of RGS5, **270,** 34
RHCE gene
  and *RHD* gene, nucleotide substitutions, gaps, and recombinant events between, analysis (human), **274,** 670
RHD gene
  and *RHCE* gene, nucleotide substitutions, gaps, and recombinant events between, analysis (human), **274,** 670
Rheb
  role in ultraviolet susceptibility of genes (human), **274,** 859
Rheumatoid arthritis
  circulating levels of superoxide dismutase, improvement by NSAID therapy, **270,** 714
Rheumatoid synovial cells
  cyclooxygenase-2 expression, induction by nitric oxide, **268,** 928
  growth regulation by ceramide, **269,** 70
Rhizobium leguminosarum
  px_2 gene, characterization to enhance inducible expression of adjacent *nodF,* **275,** 91
Rho
  in COX-2 transcription regulation (NIH 3T3 cells), **276,** 406
  inhibition, role in cerivastatin suppression of LPS-induced ICAM-1 expression in bovine aortic endothelial cells, **269,** 97
  role in mDia binding to Src homology 3 domain-containing IRSp53/BAIAP2, **271,** 626
  signal transduction pathway of, suppression, inhibitory effects on angiogenesis (human), **269,** 633
RhoA
  activation by association of Gα_{13} with Dbl (NIH 3T3 cells), **277,** 718
  glutamine 63, deamidation by *E. coli* CNF1 toxin, role of short sequence of GTPase switch 2 domain, **267,** 588
  regulation of urokinase receptor transcription, **270,** 892
  role in germinal vesicle breakdown of oocytes (mouse), **273,** 997

RhoA-activated protein kinase
  upregulation in human pregnant myometrium, **269,** 322
Rho-associated kinase
  elongation factor-1α identified as substrate of, **278,** 72
  phosphorylation of desmin at sites different from p21-activated kinase, **272,** 712
RhoB
  role in alkylation-induced apototic cell death, **268,** 784
Rhodamine 123
  carrier-mediated uptake, implications for use in MDR research, **279,** 124
  in visualization of proteoliposomes colocalized with endogenous mitochondria in fertilized mouse egg, **278,** 183
Rhodanese
  hydrogen peroxide-inactivated, reactivation, facilitation by α-crystallin, **274,** 461
Rhodopsin
  activation in *Chlamydomonas in vivo* by reducing agents and light via disulfide bond cleavage, **275,** 286
RhoGEFs
  ARHGEF3 and *ARHGEF4,* isolation in 3p13–21 and 2q22 (human), **273,** 364
Rho-kinase
  association with lysophosphatidic acid enhancement of collagen gel contraction by hepatic stellate cells (rat), **277,** 72
  calponin identification as substrate of, **273,** 110
  inhibitor Y-27632, effect on migration and *in vivo* dissemination of prostate cancer cells (human), **269,** 652
rhp23$^+$ gene
  identification, characterization, and role in DNA repair *in vivo* (*Schizosaccharomyces pombe*), **268,** 210
Ribonuclease
  quinqueginsin, isolation from American ginseng roots, **269,** 203
  related activity in mushroom ubiquitin-like protein, **276,** 587
Ribonuclease MC1
  complexed with 2′-UMP or 3′-UMP, crystal structure: structural basis for uridine specificity (bitter gourd), **275,** 572
Ribonuclease P
  catalysis
    with precursor tRNA$^{\mathrm{Phe}}$ bearing single mismatch in acceptor stem, effects of C5 protein (*Escherichia coli*), **268,** 136
    promotion of, effects of terminal deletions in C5 protein, **268,** 118
Ribonucleoprotein particle
  nuclear, containing incompletely spliced HIV-1 RNAs, identification (H9/IIIB cells), **268,** 509
Ribonucleotide reductase
  R2 gene promoter, characterization (human), **267,** 651
  T4, self-splicing intron, restoration of mRNA splicing by second-site intragenic suppressor in, **268,** 359
Ribosomal proteins
  L10a, *Chlamydomonas reinhardtii* cDNA for, introduction into *yap1* null yeast strain: restoration of resistance to oxidative stress, **267,** 953
  S29
    identification as apoptotic inducer in rat thymocytes, **277,** 476
    quiescence-induced expression, regulation (human), **269,** 604
  SDH2–RPS14 precursor encoded in nucleus, proteolytic processing to generate mitochondrial RPS14 (maize), **271,** 380
  Uba80 ubiquitin fusion gene, and pseudogene, structure (human), **270,** 1106
Ribosomal RNA
  16S, base-pairing with ε, analysis in *Escherichia coli* and *Agrobacterium tumefaciens,* **269,** 508
  23S, self-splicing precursor, kinetically efficient form in *Chlamydomonas,* **273,** 967
Ribosomal RNA methyltransferase
  Um$_{2552}$ 23S, RrmJ/FTSJ, *Escherichia coli* mutants deficient in, translational defects in, **271,** 714
Ribosome-inactivating proteins
  type 1, IRIP, cysteine 242 microenvironment in, analysis (iris), **275,** 481
Ribozymes
  antigenomic δ ribozymes, folding, kinetics and Mg^{2+} requirements, **270,** 600
  against deoxycytidine kinase, potential to confer drug resistance to cytosine nucleoside analogs, **278,** 569
  group I intron ribozymes, P8 and J8/7 elements in conserved core of, characterization (*Tetrahymena*), **267,** 85
  to TGF-β1 mRNA, inhibition of vascular smooth muscle cell proliferation (human), **278,** 401
  transfection, attenuated γ-glutamylcysteine synthetase expression by, enhancement of insulin secretion by MIN6 pancreatic β cells, **278,** 236
Ribulose-1,5-bisphosphate oxygenase
  salt stress-induced activity enhancement, suppression by proline (*Sesbania sesban*), **279,** 512
Rifampicin
  effects on induction of cytochromes P450 1A1, 1A2, 3A4, 2C9, and 2C19 and MDR-1 and MRP-1 in human hepatocytes, **273,** 333
RIG200
  inhibition of platelet aggregation independently of cGMP (human), **279,** 412
RING-B box-coiled coil-B30.2 protein
  on human MHC class I region, molecular cloning in human and mouse: testis-abundant finger protein, **276,** 45
RING finger-B box-coiled-coil protein
  GERP, structure, expression, and chromosomal mapping (human), **279,** 482
RING finger domain
  intronless C14orf4 gene with, detection in ARVD1 critical region and characterization (human), **278,** 766
RING finger motif
  Pex2p, role in peroxisome biogenesis disorders, **268,** 31
  PEX2 protein, missense mutation in, effects on import of proteins with peroxisome targeting signals PTS1 and PTS2, **270,** 717
Ring finger protein 23
  with RBCC-B30.2 domain, on human MHC class I region, molecular cloning in human and mouse: testis-abundant finger protein, **276,** 45
RING-H2 finger motif
  gene with, induced after chronic antidepressant treatment, identification in rat brain, **278,** 150
RNA
  aptamers, hepatitis C virus NS3 protease binding site for, identification, **279,** 557
  binding by glyceraldehyde-3-phosphate dehydrogenase NAD$^+$-binding fold, **275,** 253
  chloroplast enzyme-associated, utilizability by plant nuclear and chloroplast poly(A) polymerases, **272,** 174
  differentiation-dependent *in vivo* association with proteins recognized by 3′-UTR stability element of α-globin mRNA in erythroleukemic cells, **279,** 40
  functional modulation by polyamines, **271,** 559
  grass carp reovirus genome segments 1, 2, and 3, sequence, **274,** 762; *erratum,* **276,** 391
  group 1 intron RNA self-splicing, inhibition by spectinomycin, **269,** 574
  group IC1 intron, dual roles of Pc-J5/5a, **274,** 259
  HIV-1, incompletely spliced, identification of nuclear ribonucleoprotein particle containing, **268,** 509
  interacting with Fragile X syndrome RNA binding protein FMRP, analysis, **275,** 973
  interference with *Xlim-1* gene in *Xenopus* embryos, **274,** 434
  mitochondrial D-loop, identification (human), **276,** 439

- RNA (*continued*)
  - MnSOD, region in 3′ UTR, enhancement of translation of heterologous RNA, **272,** 164
  - small cytoplasmic, hybridization of 3′ UTR of MnSOD mRNA to, inhibition of gene expression (human), **274,** 641
  - synthesis *de novo* catalyzed by hepatitis C virus RNA-dependent RNA polymerase, **268,** 798
- RNA binding proteins
  - interacting with albumin mRNA, from rat liver with CCl$_4$-induced injury, **273,** 261
- RNA-dependent RNA polymerase
  - hepatitis C virus, catalysis of RNA synthesis *de novo,* **268,** 798
- RNA/DNA chimeras
  - circular dumbbell oligonucleotides, inhibition of HIV-1 replication, **270,** 953
- RNA lariat debranching enzyme Dbr1p
  - role in efficient accumulation of reverse transcripts by yeast retrotransposons Ty1 and Ty3, **268,** 112
- RNase HI
  - domain organization, functional analysis in *Trypanosoma brucei,* **270,** 336
- RNase P, *see* Ribonuclease P
- Rnd1
  - induction of formation of neuritic processes in PC12 cells, **278,** 604
- Rod outer segments
  - bovine retina, ATP synthesis by reversal of disk Ca^{2+} pump, **268,** 625
- Rolipram
  - stimulus-specific inhibition of IL-5, **273,** 811; *erratum,* **275,** 713
- RON
  - C-terminal tyrosine residues 1330 and 1337, role in epithelial cell scattering and migration, **267,** 669
- Roots
  - American ginseng, quinqueginsin isolation: anti-HIV, antifungal, ribonuclease, and cell-free translation-inhibitory activities, **269,** 203
- Rosiglitazone
  - activation of PPARγ, effects on secretion of matrix metalloproteinase 9 and IL-8 in THP-1 monocytic cells, **267,** 345
  - effects on serum triglycerides and body weight, comparison to fenofibrate (mouse, rat), **271,** 445
  - effects on vascular smooth muscle cell activation by angiotensin II (rat), **273,** 1144
  - and Wy14643, synergistic activation of UCP-3 expression in cultured fetal brown adipocytes (rat), **273,** 560
- Rotenone
  - effect on stimulation of catecholamine secretion from pheochromocytoma cells, **273,** 17
- Royal Jelly proteins
  - related *Drosophila yellow-B* gene, cDNA analysis, **270,** 773
- RTP
  - phosphorylation in cytoplasm (HUVEC cells), **272,** 641
- Runx1/Pebp2αB/Cbfa2/AML1 gene
  - 3′ exon clone 521–41, identification and expression (mouse), **274,** 171
- Ryanodine receptor
  - properties in unloaded muscle (rat), **270,** 442

S

- S100A1
  - as marker for acute myocardial ischemia (human), **274,** 865
- S100A9
  - comparison with S100A12 (human), **275,** 865
- S100A12
  - comparison with MRP-14 (human), **275,** 865
- S100C
  - Ca^{2+}-dependent inhibition of actin-activated myosin ATPase activity, **267,** 77
- *Saccharomyces cerevisiae*
  - δ-aminolevulinic acid transport, effects of porphyrin biosynthesis intermediates, **272,** 946
  - ATP-sensitive potassium channel pore-forming subunit expression, **272,** 403
  - cisplatin resistance genes, genome-wide screening, **269,** 767
  - filamentous growth, regulation by *GPR1* through *FLO11,* **267,** 164
  - Gal3p galactokinase signature sequence disruption in, effect on signal transduction, **273,** 824
  - galactose-1-phosphate uridyltransferase-deficient, rescue by UDP-glucose pyrophosphorylase overexpression, **271,** 392
  - heterologous expression of *Mucor rouxii* Δ^6-desaturase with high similarity to plant Δ^6-desaturase, **279,** 17
  - homeoprotein-encoding *YHP1* transcription, positive regulation by Sln1, **278,** 344
  - importin α interaction with NLS of prothymosin α, role in nuclear uptake of cargos, **274,** 548
  - lethal actin mutants, purification and polymerization, **271,** 464
  - mevalnonic acid pathway enzymes, regulation, **267,** 473
  - NADH pyrophosphatase cloning and characterization, **273,** 753
  - paraquat stimulation of 3-phosphoglycerate kinase gene promoter, **270,** 1036
  - proteasome regulatory complex, isolation and characterization, **273,** 509
  - resistance to oxidative stress, restoration to *yap1* null strain by introduction of *Chlamydomonas reinhardtii* cDNA for 60S ribosomal protein L10a, **267,** 953
  - spontaneous mitotic recombination in, effects of *RAD52* epistasis group genes, **270,** 112
  - Ty1 and Ty3 retrotransposons in, life cycles, effects of mutations in yeast *DBR1* gene, **268,** 112
  - unfolded protein response, induction by Kar2p/BiP dissociation from Ire1p, **279,** 445
- Salicylates
  - regulation of NF-κB in RAW 264.7 macrophages, comparison with acetaminophen, **272,** 758
- Salicylic acid
  - and light signals, regulation of *OsPR1b* gene (rice), **278,** 290
  - metabolites, inhibition of cyclooxygenase-2-dependent prostaglandin E$_2$ synthesis in macrophages (mouse), **274,** 197
- Salivary gland
  - ADP-ribosyl cyclase activity (rat), **270,** 469
  - infiltration by lymphocytes in NOD mice, attenuation by EC3 disintegrin from *Echis carinatus,* **267,** 413
- Salivary gland cancer cells
  - apoptosis, induction by 5-fluorouracil via suppression of NF-κB (human), **273,** 1168
- *Salmonella abortus equi*
  - large plasmids encoding resistance to toxic heavy metals, characterization, **272,** 6
- *Salmonella typhimurium*
  - antibiotic activity of CRAMP analogues without hemolytic effect, **275,** 904
  - growth, inhibition by S-nitrosylated human α_1-protease inhibitor, **267,** 918
  - MscL, cloning and expression, **279,** 208
  - ppGpp-dependent *leuO* expression under stress, **276,** 64
- Salmosin
  - suppressive mechanism in B16 melanoma cell metastasis, **275,** 169
- Salt
  - regulation of genes, **278,** 269
- Salt bridge
  - between N-terminal coiled coil of gp41 and antiviral agent targeted to gp41 core, role in anti-HIV-1 activity, **270,** 153

- Salt stress
  - enhancement of ribulose-1,5-bisphosphate oxygenase activity, suppression by proline (*Sesbania sesban*), **279,** 512
- SAP family proteins
  - review: structural characters and functions in neurons and epithelial cells, **269,** 1
- *sap* genes
  - required for peptide transport and antimicrobial peptide resistance in *Vibrio fischeri,* identification and analysis, **269,** 743
- Sarcoma
  - oyster mushroom lectin with activity against, isolation and sequence studies (mouse), **275,** 810
- Sarcomere
  - HSP27 translocation to, induction by ischemic preconditioning in isolated rat hearts, **269,** 137
- Sarcoplasmic reticulum
  - Ca^{2+}-ATPase, oligomerization, effect of halothane (rabbit), **271,** 770
  - Ca^{2+} release/re-uptake of sarcoplasmic reticulum, control by luminal Ca^{2+} transient (rabbit), **279,** 858
  - fast-twitch muscle, associated calmodulin protein kinase, phosphorylation of anchoring protein (rabbit), **279,** 181
- Saturated fatty acids
  - dietary, effects on UCP2 expression in 3T3-L1 preadipocytes, **277,** 541
- *Sau3A* restriction endonuclease
  - cleavage of ribosomal DNA, site mapping (human), **274,** 11
- Saxitoxin
  - ^{3}H-labeled, binding to brain and skeletal muscle membranes (puffer fish), **267,** 403
- SB203580
  - p38 MAP kinase inhibition by, blocking of neutrophil β2-integrin upregulation, **270,** 858
- Scatter factor, *see* Hepatocyte growth factor
- Scavenger receptors
  - advanced glycation end product-induced gene expression in cultured monocyte-derived macrophages (human), **277,** 368
  - polynucleotide-based carrier recognized by, delivery of muramyl dipeptide: selective activation of macrophage antitumor activity, **268,** 772
- SCF^{skp2}
  - activity toward p27^{kip1}, enhancement by cullin-1 modification by ubiquitin-like protein Nedd8, **270,** 1093
- *Schizosaccharomyces pombe*
  - artificial antisense RNA regulation in, comparison with human cells, **268,** 8
  - identification of 26S proteasome-associated ubiquitin carboxyl-terminal hydrolase, **272,** 270
  - *rhp23$^+$* gene identification, characterization, and role in DNA repair *in vivo,* **268,** 210
  - *yam8$^+$* gene: potential homologue of *Saccharomyces cerevisiae MID1* gene, **269,** 265
- Schlemm's canal
  - antithrombin III detection (human), **272,** 1
- Schwann cells
  - focal adhesion kinase association with erbB2–erbB3 receptor complex, induction by neuregulin, **271,** 414
- Sciatic nerve
  - conditioning lesion, promotion of *in vivo* nerve regeneration in contralateral nerve (rat), **267,** 715
- Scleroderma
  - association with microsatellites in human type I collagen α2 chain gene, **272,** 36
- *SCN12A* gene
  - identification in central nervous system and nonneural tissues (human), **267,** 262
- Scorpion toxin
  - Pi1, in novel class, blockage of human T cell Kv1.3 channels (*Pandinus imperator*), **278,** 34
- sds22
  - homolog associated with testis-specific serine/threonine protein phosphatase 1γ2, cloning and expression (rat), **273,** 972
- Sealing zone
  - formation by osteoclasts, prevention by specific antagonists of NMDA receptors, **268,** 201
- Seasonal adaptation
  - modulation of protein kinase CK2 β subunit gene expression (carp), **271,** 735
- Sec1
  - homolog Munc18-2, gene structure and promoter function (mouse), **276,** 817
- Sec23p
  - p125 regions responsible for binding to, **279,** 144
- Secondary structure
  - *Ban*I endonuclease, predicted organization, **279,** 11
  - *Carbydea alata* and *Carbydea rastoni* toxins, **275,** 589
  - *ctgf* 3′-UTR element mRNA (mouse), **278,** 119
  - FAD-containing tyramine oxidase from *Micrococcus luteus,* **268,** 293
  - Janus kinase putative SH2 domains, **278,** 175
  - lactoperoxidase and recombinant lactoperoxidase (bovine), **274,** 756
  - netrin-1 C-terminus, **271,** 287
  - relationship to synonymous codon usage, **269,** 692
  - SOCS-1 mRNA, **268,** 255
- β-Secretase
  - cleavage site, of amyloid precursor protein, inhibitors of β-amyloid formation based on, **268,** 133
- Secretin
  - effect on orexin-A binding, **272,** 959
- Secretory granules
  - formation in ventricle, role of Csx/Nkx2-5, **270,** 1074
- Sedative effects
  - 6,3′-dibromoflavone and 6-nitro-3′-bromoflavone (rat), **273,** 694
- Seeds
  - chitinase-like antifungal protein dolichin, isolation (*Dolichos lablab*), **269,** 155
  - ginkbilobin with sequence similarity to embryo-abundant protein, isolation (*Ginkgo biloba*), **279,** 407
  - mungin isolation and antifungal activity (mung bean), **273,** 1111
- E-Selectin
  - expression in murine model of chronic colitis, **268,** 547
  - ligand sialyl-Lewis^a, peptide mimicking, reduction of neutrophil recruitment *in vivo* (mouse), **268,** 106
  - recognition of sialyl 6-sulfo Lewis X (human lymphoid cell line), **278,** 90
  - TNF-α-induced expression, repression by PPAR activators, role of LRF-1/ATF3 (human), **275,** 406
- L-Selectin
  - ligation with sulfatide, effect on FcγR- and CR3-mediated neutrophil phagocytosis, **278,** 79
- P-Selectin
  - expression, analysis for assay of platelet activation status (human), **273,** 565
  - expression, platelet activation measured by, flow cytometric parameters for, **269,** 85
  - recognition of sialyl 6-sulfo Lewis X (human lymphoid cell line), **278,** 90
- Selegiline
  - stimulation of synthesis of NGF, BDNF, and GDNF in cultured astrocytes (mouse), **279,** 751
- Selenite
  - cataracts induced by, lens epithelial cells in rats with, apoptosis, **275,** 300
- Selenium
  - bile from rat deficient in, hepatic endogenous H$_2$O$_2$ in, detection, **271,** 699

Selenomethionyl β-ketoacyl–acyl carrier protein synthase III
  Escherichia coli, expression, purification, and crystallization, **270,** 100
Selenoproteins
  arterial wall and brain, purification (rat), **270,** 688
Self-splicing intron
  T4 ribonucleotide reductase, second-site intragenic suppressor in, restoration of mRNA splicing, **268,** 359
Seminal plasma
  overlapping ^{1}H NMR signals, assignment by proton-detected 2D C,H correlation spectroscopy, **269,** 76
Seminal vesicles
  testosterone binding, low-molecular-weight cytosolic inhibitor (bovine), **276,** 483
Senescence
  replicative, mammalian Sin3A and Sin3B expression during, analysis in WI-38 fibroblasts, **275,** 455
Senescence marker protein-30
  gene promoter, sequence-specific nuclear factors interacting with, identification (mouse), **272,** 436
Sentrin
  interaction with Fas-binding protein Daxx, **279,** 6
SepOvotropin
  regulation of oocyte transport *(Sepia officinalis),* **276,** 1013
Sepsis
  effect on adrenomedullin receptor gene expression in lung (mouse), **271,** 197
  muscle proteolysis induced by, effect of proteasome inhibitor *in vivo* (rat), **270,** 215
  ubiquitin ligase E3α gene upregulation in skeletal muscle during, and role of glucocorticoids (rat), **267,** 504
Septin-like protein
  rat homologue of human MSF, alternative exon usage, **275,** 180
Septins
  alternative exon usage (rat), **275,** 180
Sequence studies
  4G2 protein (*Xenopus laevis*), **267,** 558
  36-kDa microfibril-associated glycoprotein, tranilast-binding (bovine), **270,** 1002
  N-acetylglucosamine-6-*O*-sulfotransferase GlcNAc6ST-4 cDNAs (human, mouse), **274,** 291
  N-acetylneuraminic acid 9-phosphate synthase (mouse), **273,** 642
  acidic *PR1* gene responsive to cut, phytohormones, and protein phosphatase inhibitors (rice), **274,** 157
  Ad4BP/SF-1 gene: alignment of exons (human, mouse, rat), **278,** 63
  ADP-ribosyl cyclase CD38 family clone from rabbit, **273,** 884
  ADRG34: gene with RING-H2 finger motif induced after chronic antidepressant treatment (rat brain), **278,** 150
  AE2 anion exchanger gene (mouse), **276,** 117
  agglutinin: complete amino acid sequence (Japanese chestnut), **276,** 23
  AILIM/ICOS: CD28/CTLA4 family-related T cell costimulatory molecule (rat), **276,** 335
  alcohol dehydrogenase gene *ADH5* (human), **278,** 544
  allatostatin preprohormone (*Drosophila melanogaster*), **273,** 1126
  allatostatin receptor DAR-2 (*Drosophila melanogaster*), **273,** 571
  amino acid transporter A subtype ATA1 cloned from placenta (human), **273,** 1175
  ammodytoxin A *(Vipera ammodytes ammodytes),* **276,** 1229
  angiopoietin-2 (chicken), **275,** 643
  antithrombin III, N-terminal sequence (porcine aqueous humor), **272,** 1
  APS: Lnk family adaptor protein (mouse), **272,** 45
  aryl hydrocarbon receptor cDNA (hamster), **273,** 272
  ATP-binding-cassette transporter gene 1 5′ end, **271,** 451
  Bax-σ (human), **270,** 868
  Bcl-2 (hamster), **275,** 899
  BMAL2 cDNA (human), **275,** 493
  brain link protein-1 cDNA (human brain), **276,** 982
  C1orf9 gene encoding putative transmembrane protein (human), **267,** 855
  calcium transport protein CaT1 (human), **278,** 326
  cAMP-specific phosphodiesterase PDE7B, identification (human), **271,** 575
  Carbydea alata toxin-A cDNA, **275,** 589
  Carbydea rastoni proteinaceous toxins, **275,** 582
  caspase-14 isoforms (human), **277,** 655
  cathepsin L-like protease N terminal (*Fasciola hepatica*), **277,** 79
  cathepsin Q expressed in placenta (rat), **267,** 791
  CCAAT-enhancer binding protein δ gene (sheep), **271,** 346
  CCK-B receptor (mouse), **272,** 837
  cdaA1 p85 gene regulating cytokinesis initiation in *Tetrahymena,* **264,** 112; *erratum,* **267,** 478
  CDC2-related kinases with high molecular mass and PITAI/VRE motifs (sea urchin), **279,** 832
  CDCrel-1 septin (rat), **273,** 723
  cel5Z gene deduced amino acids (*Erwinia chrysanthemi* PY35), **268,** 420
  chitinase-like antifungal protein (*Allium tuberosum*), **279,** 74
  CIN85 ORF (human), **268,** 321
  Colorado tick fever virus genome, **273,** 1121
  conserved Dbf4 motifs, **275,** 228
  copper chaperone for Cu/Zn superoxide dismutase (rat), **275,** 394
  copper chaperone for SOD1 (human), **276,** 999
  CRLM-2: type I cytokine receptor (mouse), **272,** 224
  CRP2BP (human), **274,** 655
  cyclin-like protein associated with cdk3 *in vivo* (mouse), **273,** 442; *erratum,* **274,** 880
  CYRL from rat brain, **267,** 697
  cysteinyl leukotriene CysLT$_2$ receptor (human), **274,** 316
  cytochrome P450 4G15 expressed in nervous system (*Drosophila melanogaster*), **273,** 1132
  cytochrome P450 genes of CYP4 and CYP48 families (*Apis mellifera, Trichogramma cacoeciae*), **268,** 677
  cytochrome P450 oxidoreductase (*Cunninghamella elegans, C. echinulata*), **268,** 345
  DD4: Ca^{2+}-binding protein (*Penaeus japonicus*), **276,** 286
  deafness dystonia peptide 1 cDNA (mouse), **273,** 759
  dendritic cell-derived protein kinase DPK (human), **274,** 872
  dengue type 2 virus from French West Indies, genomic sequence, **277,** 89
  Δ^6-desaturase (*Mucor rouxii*), **279,** 17
  diabolin (kelp), **272,** 691
  Doc2γ DNA (mouse), **276,** 626
  dolichin: chitinase-like antifungal protein (*Dolichos lablab* seeds), **269,** 155
  DPYD gene promoter (human), **271,** 28
  Drosophila homolog of LIM-kinase, **276,** 1178
  Drosophila receptor structurally related to mammalian galanin receptor, **269,** 91
  dscr2: Down syndrome critical region gene 2 (mouse), **272,** 156
  dUTPases from eukaryotic, bacterial, and viral sources, **279,** 534
  Edg1 gene deduced amino acid sequence (zebrafish), **279,** 139
  endooligopeptidase A cDNAs and deduced amino acid sequences (rabbit brain), **269,** 7; *erratum,* **272,** 309
  equistatin: analysis of structural and functional domains (sea anemone), **269,** 732
  Erc cDNA and predicted sequence: expressed in renal carcinoma (rat), **275,** 134
  Escherichia coli genome, distinct sequence types, **272,** 571
  estrogen receptor β promoter (human), **275,** 682
  estrogen receptor-related receptor γ alternative splice isoforms (mouse), **267,** 532

eukaryotic nuclear poly(A) polymerases: shared feature of plant nuclear and chloroplast enzymes, **272,** 174
FAD-containing tyramine oxidase (*Micrococcus luteus*), **268,** 293
Δ9 fatty acid desaturase, palmitoyl-CoA-specific (*Caenorhabditis elegans*), **272,** 263
FE65-like protein C-terminus, apoptosis inhibitory domain (mouse), **276,** 843
FEM1B gene (human), **267,** 317
FGF-20 (human), **274,** 337
fibroblast growth factor 23 (human, mouse), **277,** 494
fibroblast growth factor receptor 4 promoters (human, mouse), **276,** 493
fibroblast growth factor receptor 4 soluble-form splice variant (human), **267,** 658
flavoredoxin gene cloned from *Desulfovibrio gigas,* **272,** 653
follicle-stimulating hormone receptor (newt testis), **275,** 121
Frizzled-3 gene on chromosome 8p21 (human), **271,** 8
frizzled-10A and *frizzled-10B* genes (*Xenopus laevis*), **278,** 377
FtsQ (*Streptomyces collinus*), **268,** 282
FtsW, C-terminal part (*Streptomyces collinus*), **268,** 282
ftsZ gene (*Thermoplasma acidophilum*), **275,** 936
α1,3-fucosyltransferase pL and pS promoters (human), **273,** 370
FUS/CHOP chimera in myxoid liposarcoma (human), **279,** 838
FYVE-DSP1: dual-specificity protein phosphatase (human), **270,** 222
FZD3 protein (human), **273,** 27
GCMa/GCM1 gene, 5′-untranslated regions (human), **278,** 134
gene with ankyrin repeat and double BTB/POZ domain (human), **273,** 991
α_{2u}-globulin species expressed in various tissues (rat), **272,** 337
glucagon receptor gene 5′-flanking region, comparison in mouse and rat, **272,** 912
glutathione reductase, frequency and Markov chain analysis (human), **268,** 823
glutathione reductase gene: cDNA and mitochondrial leader sequences (human), **269,** 366
glyceraldehyde-3-phosphate dehydrogenase cDNA (*Pleurotus sajor-caju*), **278,** 192
glycoprotein VI from platelets (human), **277,** 27
gonadotropin-releasing hormone, medaka-type (*Oryzias latipes*), **276,** 298
G-protein coupled receptor family SREB expressed in central nervous system, **272,** 576
G-protein-coupled receptor from sea anemone nervous system, **271,** 761
G protein γ2 subunit (human), **272,** 610
G protein-linked acetylcholine receptor isoforms (*Caenorhabditis elegans*), **268,** 354
grass carp reovirus genome segments 1, 2, and 3, **274,** 762; *erratum,* **276,** 391
GTPBP2: identification as member of GP-1 family of GTPases (human, mouse), **272,** 456
guanylate cyclase β_2 subunit, soluble (human), **271,** 64
guanylate cyclase regulatory protein regulating membrane-bound GC-A (rat brain), **278,** 106
halysetin (*Agkistrodon halys* venom), **278,** 112
hemicholinium-3-sensitive choline transporter gene (human), **276,** 862
hemorrhagin edematogenic fragments (*Bothrops atrox* venom), **276,** 29
histamine receptor *HH4R* (human), **279,** 615
HOFNH30 G-protein-coupled receptor for lysophosphatidic acid (human), **273,** 805
Hpa2 (human), **276,** 1170
HrFGFR (*Halocynthia roretzi*), **275,** 503
human gene identification by computational and experimental analyses, **272,** 801
D-2-hydroxy-acid dehydrogenase (human), **268,** 298
3α-hydroxysteroid dehydrogenase/carbonyl reductase (*Comamonas testosteroni*), **272,** 622
17β-hydroxysteroid dehydrogenase-I cDNA from Japanese eel ovary, **279,** 451
IAP-like element (rat), **278,** 48
ICPP: capillary permeability-increasing growth factor-like protein (*Vipera lebetina*), **268,** 69
insulin/IGF-like peptide from *Caenorhabditis elegans,* **273,** 431
αP integrin from sea urchin embryos, **272,** 929
interleukin-4 promoter P elements, including P5 (human), **270,** 1016
intracellular membrane-bound calcium-independent phospholipase A$_2$, cDNA cloning (human), **272,** 320
Janus kinase putative SH2 domains, **278,** 175
Jun a 2 (mountain cedar pollen), **275,** 195
junctophilin subtype genes (human), **273,** 920
kassinatuerin-1 (*Kassina senegalensis* skin), **268,** 433
KCRF (rat), **274,** 852
KE04 gene differentially expressed by activated dendritic cells (human), **279,** 487
KIAP (human), **279,** 820
Klp1 cDNA (K562 cells), **273,** 596
KLP-17 (*Caenorhabditis elegans*), **267,** 643
LanC-like protein 1: renamed p40/GPR69A, **275,** 69
lebocin cloned from *Trichoplusia ni,* **269,** 803
lectin from oyster mushroom with antihepatoma and antisarcoma activities (mouse), **275,** 810
lens epithelium-derived growth factor (human), **267,** 373
leukotriene B$_4$ receptor cDNA (human), **274,** 377
lipidosin (mouse), **279,** 62
liver-specific organic anion transporter-1
  mouse, **272,** 563
  and splice variant, rat, **274,** 79
M83: five-span transmembrane protein (human, mouse), **276,** 244
mac25 gene (mouse), **279,** 251
MAP3 and MAP4: identity at amino acid sequence level (rat), **268,** 306
Mcl-1a from nucleus of zebrafish embryo, **279,** 725
mDab2 gene 5′-flanking genomic sequences and putative *cis*-regulatory elements (mouse), **275,** 189
MDP77 expressed in chick muscles, **269,** 564
meltrin β gene (mouse, rat), **270,** 522
Microcystis aeruginosa M228 lectin, **273,** 499
mitchondrial D-loop RNA (human), **276,** 439
MLSN1 polypeptides, alignment (human, mouse), **279,** 53
m-neugrin gene (mouse), **279,** 526
moat 1 (rat), **275,** 831
mpsA gene (*Magnetospirillum* sp.), **268,** 932
mRNA capping enzyme (*Xenopus laevis*), **268,** 617
mRNA (guanine-7-)-methyltransferase (*Xenopus laevis*), **268,** 617
MRP3 5′-flanking region (human), **270,** 728
MscL amino acid sequence, alignments (*Salmonella typhimurium*), **279,** 208
mtx1 and *mtx2* genes (zebrafish), **271,** 603
MUC3A and *MUC3B* genes (human), **275,** 916
Munc18-2 (mouse), **276,** 817
MurG (*Streptomyces collinus*), **268,** 282
MVP gene 5′-genomic regulatory region, **278,** 125
myoneurin, and BTB/POZ and ZF domains (human), **273,** 385
myosin from green alga *Chara,* **270,** 147
N14 shell matrix protein (*Pinctada maxima*), **269,** 213
N66 shell matrix protein (*Pinctada maxima*), **269,** 213
NADH pyrophosphatase from *Caenorhabditis elegans* and *Saccharomyces cerevisiae,* **273,** 753
neonate/infant-specific pepsinogens from gastric mucosa (rat), **267,** 806
neprilysin II (rat), **271,** 565; *erratum,* **275,** 247
neugrin gene (human), **279,** 526
neuropeptide Y receptor y6 gene (guinea pig), **277,** 264

Sequence studies (*continued*)
  α-neurotoxin-type protein specific for coral snake, **267,** 887
  NFATz with Rel similarity domain (mouse), **272,** 765
  ninein gene (human), **279,** 989
  noncanonical ubiquitin-conjugating enzyme family structurally related to yeast UBC6, **269,** 474
  nonmuscle MHC-B gene promoter (rat), **276,** 1203
  nuclear matrix protein hNMP 265, homology with eukaryotic initiation factor 4A (human), **267,** 339
  nuclear receptor similar to embryonic benzoate X receptor (*Xenopus laevis*), **277,** 209
  OATP-A, -B, C-, -D, -E, and PGT, alignment (human), **273,** 251
  ODF/TRANCE secreted form expressed in cancer cells causing humoral hypercalcemia, **269,** 532
  osmotic response element binding protein: OREBP (Chang liver cells), **270,** 52
  oxidatively stable alkaline proteases from alkaliphilic *Bacillus* spp., **279,** 313
  p46 polypeptide (chicken), **279,** 95
  PAL31 expressed in developing brain (rat), **274,** 427
  PCNAs *(Thermococcus fumicolans),* **276,** 600
  PDE5A cDNAs, isoform-specific regions (human), **268,** 628
  PDE5A gene: three alternative first exons and intronic promoter (human), **268,** 596
  PDE7A1 (mouse), **276,** 1271
  PDE7B: cAMP-specific cyclic-nucleotide phosphodiesterase (human, mouse), **272,** 186
  PDZ-containing myosin from hematopoietic supportive bone marrow stromal cell lines, **270,** 67
  *pel*L1 gene deduced amino acids (*Erwinia chrysanthemi* PY35), **268,** 420
  Pen n 13 (*Penicillium notatum*), **269,** 14
  PEPT2 gene (mouse), **276,** 734
  perlucin and perlustrin purified from *Haliotis laevigata,* **267,** 17
  Peroxiredoxin V gene (mouse), **270,** 356
  peroxisome proliferator-activated receptor γ coactivator-1 cDNA from epitrochlearis muscle of swimming-exercised rat, **274,** 350
  PEX2 gene encoding 35-kDa peroxisomal membrane protein (human), **273,** 985
  3′-phosphoadenosine 5′-phosphosulfate synthetases 1 and 2 (human), **268,** 437
  6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase gene promoter region (human placenta), **267,** 703
  phospholipase C-γ1 gene 5′-flanking region (mouse), **273,** 352
  phytase (*Aspergillus fumigatus*), **275,** 279
  Pi1 scorpion toxin, alignment with Pi2, Pi3, and ChTx (*Pandinus imperator*), **278,** 34
  L-pipecolate oxidase (human), **270,** 1101
  βPix isoforms expressed in neurons (mouse), **272,** 721
  pknA gene (*Streptomyces coelicolor* A3(2)), **279,** 942
  plectin, hamster, smallest fragment aligned with human and rat plectin, **273,** 183
  Pn14 (*Pharbitis nil*), **268,** 466
  porin isoform 1 gene promoter region (human), **270,** 787
  prepronociceptin gene (human), **276,** 710
  prolactin-releasing peptide receptor gene 5′-flanking region (human), **276,** 411
  prostaglandin $F_{2\alpha}$ receptor gene 5′-flanking region (rat), **278,** 278
  protein kinase C δ alternatively spliced variant PKC δIII (rat), **269,** 557
  protein-tyrosine phosphatase HD-PTP (human), **278,** 671
  PSP24 (human), **276,** 952
  PTE2: human peroxisomal long-chain acyl-CoA thioesterase, **275,** 233
  PTP-BK (mouse), **276,** 974
  pyrF gene (*Thermoplasma acidophilum*), **275,** 936
  pyridoxal-5′-phosphate-dependent enzymes, evolutionary studies, **270,** 576
  Qik serine–threonine kinase, **276,** 564
  quasi-sequence-order effect incorporation for prediction of protein subcellular locations, **278,** 477
  quinqueginsin (American ginseng roots), **269,** 203
  Rab11 family members (mouse), **269,** 611
  Rac1 gene (human), **277,** 741
  RAMP family (rat), **270,** 89
  RanBP16 (human, mouse), **278,** 241
  RanBP17 (human, mouse), **278,** 241
  RBP95 cDNA and protein (human), **275,** 141
  REIC gene (human), **268,** 20
  retinoid X receptor α gene (human), **269,** 54
  retinovin (chicken embryo), **276,** 12
  RGS5 in *Xenopus,* **270,** 34
  RHCE and *RHD* genes: analysis of nucleotide substitutions, gaps, and recombinant events (human), **274,** 670
  RhoGEFs *ARHGEF3* and *ARHGEF4* (human), **273,** 364
  Rhp23 DNA repair protein (*Schizosaccharomyces pombe*), **268,** 210
  ribonucleotide reductase R2 gene promoter region (human), **267,** 651
  RING finger-B box-coiled-coil protein GERP (human), **279,** 482
  rolling-circle plasmid cloned from *Psychrobacter sp.* TA144, **274,** 488
  Runx1/Pebp2αB/Cbfa2/AML1 gene 3′ exon clone 521–41 (mouse), **274,** 171
  Rv1695: poly(P)/ATP-NAD kinase (*Mycobacterium tuberculosis* H37Rv), **276,** 57
  sap genes required for peptide transport and antimicrobial peptide resistance in *Vibrio fischeri,* **269,** 743
  sds22 homolog associated with testis-specific serine/threonine protein phosphatase 1γ2 (rat), **273,** 972
  secreted phospholipase A_2: human group IIF sPLA, **279,** 223
  *Ser*L paralogs (*Tetrahymena thermophila*), **278,** 621
  Shf adapter protein (human), **278,** 537
  SIP1 gene (*Xenopus laevis*), **271,** 151
  SLP: rat homologue of human septin MSF, **275,** 180
  SOCS-1 exon 1 and 5′ flanking region, **268,** 255
  SR-25 (human, mouse), **269,** 444
  Ssf-1 (human), **275,** 37
  STAP-1 (mouse), **268,** 697
  sterol-sensitive ATP-binding cassette transporter ABCA7 identified in macrophages (human), **273,** 532
  strictosidine synthase 1 family, **271,** 191
  SULT1C2 sulfotransferase and SULT1C2a sulfotransferase (rat), **272,** 242
  SVCT1 (human), **267,** 488
  tenascin-X gene 5′-flanking region (mouse), **267,** 626
  testicular zinc finger protein cDNA (mouse), **273,** 398
  tetrodotoxin-resistant voltage-gated sodium channel α subunit NaT/Scn11a (mouse), **267,** 271
  tfp: testis-abundant finger protein (human, mouse), **276,** 45
  TGIF2 and TGIF protein sequence alignment (human), **276,** 264
  thermophilic desulfurizing enzyme genes *tdsA, tdsB,* and *tdsC* (*Paenibacillus* sp. A11-2), **270,** 81
  thermostable endoglucanase from hyperthermophilic *Aquifex aeolicus* VF5, **279,** 420
  thyrotropin receptors (amago salmon), **276,** 258
  TIMELESS-like protein (rat), **279,** 131
  TLSP/hippostasin, brain- and prostate-type, structure of 5′ end, **272,** 205
  TRAIL gene 5′-upstream region (human), **276,** 466
  transcription factor-like gene (T84 cells), **276,** 660
  βTRCP2 gene (human), **269,** 103
  TT virus
    complete sequences of highly divergent European isolates, **271,** 837
    from infected individual, **279,** 700

- tuba8: α-tubulin isoform (human, mouse), **270,** 1111
- tubulointerstitial nephritis antigen (human), **268,** 225
- tubulointerstitial nephritis antigen-related protein gene (human), **271,** 474
- two-pore channel 1 related to voltage-gated sodium and calcium channels (rat), **270,** 370
- ubiquitin fusion gene Uba80 and pseudogene (human), **270,** 1106
- Uch2p: 26S proteasome-associated ubiquitin carboxyl-terminal hydrolase (*Schizosaccharomyces pombe*), **272,** 270
- UDP-sugar hydrolase gene (*Enterobacter aerogenes*), **269,** 526
- VAP27 (*Nicotiana plumbaginifolia*), **270,** 286
- vascular apoptosis-inducing protein 1 (*Crotalus atrox* venom), **278,** 197
- vitamin D receptor a and b (flounder *Paralichthys olivaceus*), **270,** 40
- voltage-dependent calcium channel β_{2a} subunit cloned from heart (human), **267,** 156
- voltage-gated sodium channel α subunit
  - *SCN12A* gene (human), **267,** 262
  - from skeletal muscle (puffer fish), **267,** 403
- vomeroglandin (mouse), **268,** 275
- von Hippel-Lindau tumor suppressor complex of *Drosophila,* **276,** 355
- VPATPD gene encoding vacuolar proton ATPase subunit D (human), **279,** 543
- VPS29 and VPS35: human homologues of yeast vacuolar protein sorting 29 and 35, **277,** 622
- WDR6 gene (human), **274,** 117
- WNT-2B1 and WNT-2B2 (human), **275,** 209
- Wnt-16 (human), **278,** 814
- WW domain-containing cDNA (human), **276,** 990
- yam8 (*Schizosaccharomyces pombe*), **269,** 265
- *yellow-B* cDNA and predicted sequence (*Drosophila melanogaster*), **270,** 773
- ZAK protein containing leucine zipper and sterile-alpha motif (human), **274,** 811

Serial analysis of gene expression
- estrogen-responsive human breast cancer cells: WISP-2 as E2-responsive gene, **275,** 108
- human liver, **269,** 110

Serine
- effect of substitution of HTLV-1 proline, **276,** 1085
- replacement of cysteine in firefly luciferase, effect on luminescence activity, **267,** 394
- residues involved in catalysis by fatty acid amide hydrolase, identification, **264,** 316; *erratum,* **267,** 676

Serine amidohydrolases
- inhibition by complexes of vanadate with hydroxamic acids, **274,** 732

Serine proteinase
- asymmetric preference toward phosphonate and phosphinate esters (human), **276,** 1235
- *E. coli*-derived, activation of human progelatinase A/proMMP-2, **268,** 128
- glycoprotein 1bα-bound thrombin as, in production of macromolecular activators of phagocytosis from platelets (human), **270,** 377
- kallikrein-like, TLSP/hippostasin, expressed in human brain and prostate, **272,** 205
- subtilisin-like, oxidatively stable, from alkaliphilic *Bacillus* spp., enzymatic properties, sequences, and evolution, **279,** 313

Serine proteinase inhibitor
- myofibril-bound, purification from skeletal muscle and identification (white croaker), **272,** 485

Serine/threonine kinase
- HIPK2, interactions with TRADD, CD95, and TNF-R1 in 293T cells, **277,** 513
- Mn^{2+}-dependent, *pknA* gene encoding, cloning and characterization (*Streptomyces coelicolor* A3(2)), **279,** 942
- Qik, as *qin* oncogene target, **276,** 564

Serine/threonine protein phosphatase 1γ2
- testis-specific, associated sds22 homolog, cloning and expression (rat), **273,** 972

*Ser*L genes
- paralogs in *Tetrahymena thermophila,* molecular characterization, **278,** 621

Serotonin
- overall metabolism, effect of volitional ethanol consumption (Syrian golden hamster), **271,** 823
- stimulation of platelets, phosphoinositide-mediated calcium response to, inhibition by sodium azide (human), **274,** 472

Sertoli cells
- cell death induction by estrogenic alkylphenols, role of inhibition of testis endoplasmic reticulum Ca^{2+} pump (rat), **277,** 568
- myosin X expression (mouse), **271,** 526

Sertraline
- gene with RING-H2 finger motif induced after chronic treatment with, identification in rat brain gene, **278,** 150

Serum
- amine oxidase, modulation by H_2O_2 (bovine), **267,** 174
- IgA1 Fc O-glycosylated hinge peptides, sialylation and galactosylation in IgA nephropathy, mass spectrometric study (human), **271,** 268
- inhibition of hypoxia-induced transcriptional activation of vascular endothelial growth factor, **267,** 334
- porcine, induction of rat liver fibrosis, prevention by $GdCl_3$-enhanced production of interstitial collagenase by Kupffer cells, **267,** 290
- prolonged deprivation of, escape from apoptosis after, association with Bcl-x_L regulation of mitochondrial death pathway (MDCK cells), **277,** 487
- role in regulation of CYP1A1 gene expression, **267,** 572
- triglycerides, lowering by fenofibrate and rosiglitazone (mouse, rat), **271,** 445
- TT virus genotype 1a in, transmission to chimpanzees (human), **278,** 470
- TT virus particles recovered from infected humans, visualization, **279,** 718

Serum amyloid A
- identification as chemotactic agonist at FPR2 on neutrophils (mouse), **270,** 331
- potent stimulation of release of TNF-α, IL-1β, and IL-8 by human neutrophils, **268,** 405

Serum deprivation
- hydrogen peroxide-induced apoptosis under, inhibition by antisense c-*jun* (F-MEL cells), **271,** 747

Serum response factor
- phosphorylation at multiple sites by skeletal muscle Ca^{2+}/calmodulin-dependent protein kinase II (chicken), **270,** 488

Sesame seed
- dietary, tocopherol-enhancing effect, implication of sesamin inhibition of CYP3A-dependent metabolism of tocopherols, **277,** 531

Sesamin
- inhibition of cytochrome P450 3A-dependent metabolism of tocopherols, **277,** 531

7B2
- carboxy-terminal peptide, structure–function analysis, **267,** 940
- null mice, analysis of PC2 role in normal pro-CCK processing using, **273,** 188

Sex steroids
- influence on cannabinoid CB_1 receptor mRNA and endocannabinoid levels in anterior pituitary (rat), **270,** 260

Sexual dimorphism
- *DMRT1* and *DMO* gene expression (tilapia), **272,** 662; *erratum,* **277,** 781

SH2D1A
- mutations, in X-linked lymphoproliferative disease, structural basis, **269,** 124

SH2 domain
  adaptor protein STAP-1 with, molecular cloning, **268,** 697
  putative, in Janus kinases, computational and functional analysis, **278,** 175
SH3 domain
  IRSp53/BAIAP2 with, Rho-dependent binding of mDia to, **271,** 626
  phospholipase C-γ1, specific association with proline-rich region of tyrosine kinase Tnk1, **273,** 294
Shannon information
  vectors of, from Fourier signals characterizing base periodicity in genes and genomes, **268,** 289
Shc
  role in IL-4-induced germline ϵ transcription in human B cell line, **268,** 54
Shear stress
  agglutinated red blood cell separation by, energy evaluation (human), **277,** 381
  effects
    on eicosanoid gene expression and metabolite production in vascular endothelium in biomechanical perfusion model, **269,** 257
    on expression of apoptosis-regulating genes in human umbilical vein endothelial cells, **278,** 740
    on mitochondrial membrane potential and albumin uptake in cultured endothelial cells (pig), **270,** 616
  enhancement of glutathione peroxidase expression in endothelial cells, **273,** 66
  fluid, stimulation of prostaglandin and nitric oxide release in bone marrow-derived preosteoclast-like cells (rat), **270,** 643
  laminar fluid, regulation of vascular endothelial growth factor in intact conduit vessels (human), **272,** 490
  regulation of endothelial cell-derived lipase expression in endothelial cells, **272,** 90
Sheddase
  putative chymotrypsin-like, mediation of myoepithelial-specific CD44 shedding, **279,** 116
Shell matrix proteins
  molluscan, N66 and N14, cDNA cloning (*Pinctada maxima*), **269,** 213
Shf
  role in PDGF-α-receptor regulation of apoptosis, **278,** 537
SHP-2
  binding to CTLA-4, absence of direct YVKM/YFIP motif recognition, **269,** 279
Shp-2
  association with Gab1 and Gab2, **277,** 195
SHU9119
  effect on melanin-concentrating hormone and orexin gene expression (mouse, rat), **268,** 88
Sialylation
  serum IgA1 Fc O-glycosylated hinge peptides, decrease in IgA nephropathy, mass spectrometric study (human), **271,** 268
Sialyl-Lewis^a
  peptide mimicking, with anti-inflammatory activity, **268,** 106
Sialyl 6-sulfo Lewis X
  recognition by P- and E-selectins (human lymphoid cell line), **278,** 90
Sialyl-Tn
  O-acetylated, role in ovarian cancer-associated antigenicity, **271,** 281
Sialyl-Tn synthase
  second candidate: redefined substrate specificity of ST6GalNAc II (mouse), **272,** 94
Sialyltransferase
  ST6GalNAc II substrate specificity redefined: second candidate sialyl-Tn synthase (mouse), **272,** 94
α-2,6-Sialyltransferase I
  functional soluble forms, expression in *Pichia pastoris,* **267,** 169
Siglec8
  gene mapping and characterization of variant with cytoplasmic tyrosine-based motifs (human), **278,** 775
Sigma factor protein
  ECF family, from *Pseudomonas aeruginosa,* characterization, **273,** 578
Signaling
  androgen receptor, in prostate carcinoma cells, regulation by protein inhibitor of activated STAT3, **278,** 9
  dual, histamine H2 receptor, mapping with β2 adrenergic chimeric receptors (human), **276,** 539
  insulin, in differentiating human adipocytes, regulation of proteins involved in, **276,** 162
  intracellular, pathways in TNF-induced β2-integrin upregulation on neutrophils, **270,** 858
  mitogenesis by TSH and cAMP in canine thyrocytes, role of Ras activation, **273,** 154
  in transcriptional regulation of membrane lipid biosynthesis, **273,** 1
  Wnt, in L cells, role of posttranscriptional regulation of α-catenin expression, **277,** 691
Signal sequence trap
  identification of membrane and secreted proteins upregulated during adipocyte differentiation, **272,** 293
Signal transducer and activator of transcription, *see* STAT
Signal transduction
  Akt/PKB, role in TNF-α stimulation of MCP-1 expression (HUVEC), **276,** 791
  antiapoptotic signal of IGF-1 in cultured cardiomyocytes, role of ERK and PKC (rat), **273,** 736
  to c-fos, in fibroblasts from patient with insulin resistance: postreceptor signaling defect impairing c-fos expression, **268,** 577
  effect of disruption of Gal3p galactokinase signature sequence in *Saccharomyces cerevisiae,* **273,** 824
  glycan-dependent, mediation by O-linked GlcNAc transferase, **271,** 275
  implications of tyrosine phosphorylation of myelin P_0, **267,** 820
  insulin- and PDGF-mediated, differential regulation by low-molecular-weight protein-tyrosine phosphatase (NIH-IR cells), **270,** 564
  NF-κB-related events in suppression of TNF-induced apoptosis, regulation by PI3-K/AKT (MCF-7 cells), **271,** 342
  polyisoprenyl phosphate signaling, topography in neutrophils (human), **275,** 739
  Rho pathway, suppression, inhibitory effects on angiogenesis (human), **269,** 633
  role of hPRP4 kinase activation, **271,** 456
Silencer of death domains
  enhanced expression in pancreatic cancer (human), **271,** 409
Silymarin
  anti-angiogenic potential, **276,** 371
Simazine
  derivative, in generation of high-affinity scFvs from single rabbit immunized with multiple haptens, **268,** 398
Simian/human immunodeficiency virus
  monkey inoculated with, apoptotic cells in peripheral blood from, direct detection, **268,** 868
Simian virus 40
  repeat sequence GGGCGG structure, NMR observation of C-tetrad, **270,** 967
Simian virus 40 T antigen
  ts-SV40 Tag gene transgenic mice, multipotency of bone marrow stromal cell line TBR31-2 established from, **268,** 450
Simian virus 40 T/t antigen
  induction of hepatocarcinogenesis in transgenic mice, association with *mac25* gene methylation and downregulation, **267,** 109

- Simvastatin
  - induction of bone morphogenetic protein-2 in osteosarcoma cells (human), **271,** 688
- Sin3A
  - mammalian, expression during aging and replicative senescence, **275,** 455
- Sin3B
  - mammalian, expression during aging and replicative senescence, **275,** 455
- Singlet oxygen
  - cerebral stroke induced by, murine model, expression of apolipoprotein D and apolipoprotein E in, **268,** 835
  - in live mouse skin exposed to UVA, chemiluminescence detection and imaging, **269,** 131
  - peridinin quenching constant (*Gonyaulax polyedra*), **268,** 496
  - quenching by thioredoxin, **277,** 443
  - role in methylene blue-photosensitized oxidation of cysteine sulfinic acid and other sulfinates, **270,** 782
- *SIP1* gene
  - overexpression in animal cap, induction of anterior neural markers (*Xenopus laevis*), **271,** 151
- SIR2-like proteins
  - deacetylase activity as, role of NAD$^+$, **278,** 685
  - eukaryotic and prokaryotic, phylogenetic classification, **273,** 793
- Sirolimus
  - binding by ubiquitin, **277,** 325
- Site-directed mutagenesis
  - adenosine kinase (Chinese hamster), **275,** 386
  - dipeptidyl peptidase III (rat), **276,** 553
  - estrogen sulfotransferase substrate-binding cleft (human), **276,** 224
  - fatty acid amide hydrolase: serine residues involved in catalysis, **264,** 316; *erratum,* **267,** 676
  - glutamate transporter EAAT1: His substitution of Leu-325 and cell viability (*Xenopus laevis*), **275,** 382
  - mosquito larvicidal binary toxin *(Bacillus sphaericus),* **276,** 1048
  - organophosphorus hydrolase: enhancement of VX hydrolysis, **279,** 516
  - studies of iron binding ligands of clavaminic acid synthase, **279,** 240
- Skeletal growth
  - in adult GHR−/− mice, **267,** 603
- Skeletal muscle
  - 5′AMP-activated protein kinase activity, isoform-specific increase induced by exercise (human), **273,** 1150
  - Ca^{2+}/calmodulin-dependent protein kinase II, enrichment in nuclei and phosphorylation of serum response factor at multiple sites (chicken), **270,** 488
  - cAMP-specific phosphodiesterase PDE7B expression (human), **271,** 575
  - DNA fragmentation during tumor growth, relationship to cancer cachexia (mouse, rat), **270,** 533
  - epitrochlearis, in swimming-exercised rat, peroxisome proliferator-activated receptor γ coactivator-1 cDNA cloning and mRNA analysis, **274,** 350
  - exercise-induced oxidative stress, protective effects of flavonoid supplementation (rat), **274,** 389
  - expression of insulin-like growth factor binding protein mRNAs, effect of denervation (rat), **273,** 282
  - fast-twitch, sarcoplasmic reticulum-associated calmodulin protein kinase, phosphorylation of anchoring protein (rabbit), **279,** 181
  - force in, by actin filament rotation and torque in Z-filaments, **270,** 677
  - *frizzled-10A* gene expression (*Xenopus laevis*), **278,** 377
  - Homer 1a and 1c transcript detection (rat), **279,** 348
  - intact, from desmin-deficient mice, generation of tension by, **278,** 419
  - junctophilin subtype gene expression (human), **273,** 920
  - *KCNJ9* gene expression (human), **274,** 302
  - membranes, binding of ^{3}H-PbTx-3 and ^{3}H-saxitoxin (puffer fish), **267,** 403
  - myofibril-bound serine proteinase inhibitor purification and identification (white croaker), **272,** 485
  - protein-tyrosine phosphatase 1B expression and activity, elevation in insulin-resistant type II diabetes (rat), **274,** 583
  - regenerating, myostatin gene expression and localization (rat), **270,** 510
  - regeneration, in *Fgf/6* −/− mutant mice, **272,** 138
  - α-tubulin isoform tuba8 preferentially expressed in, cloning and sequencing (human, mouse), **270,** 1111
  - ubiquitin ligase E3α gene expression, upregulation during sepsis and role of glucocorticoids (rat), **267,** 504
  - ubiquitin–proteasome proteolytic pathway, effect of acute diabetes (rat), **276,** 1255
  - uncoupling protein 3 mRNA levels, increase after systemic EGF administration (rat), **279,** 914
  - unloaded, ryanodine receptor properties (rat), **270,** 442
  - vascular endothelial growth factor expression, improvement by naked DNA vector (mouse), **272,** 230; *erratum,* **276,** 390
  - voltage-gated sodium channel α subunit primary structure (puffer fish), **267,** 403
  - X,K-ATPase β subunit isoform in, immunochemical demonstration (human), **277,** 430
- Skeletal muscle cells
  - acetylcholine receptor aggregation, stimulation by α-galactosidase via PNA-binding carbohydrates (C2C12 cells), **270,** 899
  - expression of insulin-like growth factor binding proteins (mouse C2C12 cells, rat gastrocnemius), **273,** 282
- Skeleton
  - craniofacial, development, role of CYP1A in vertebrates, **271,** 130
- Skin
  - agouti signal protein in, immunohistochemical localization (mouse), **270,** 176
  - *frizzled-10A* gene expression (*Xenopus laevis*), **278,** 377
  - Hyperoliid frog *Kassina senegalensis,* isolation of broad-spectrum antimicrobial peptide kassinatuerin-1, **268,** 433
  - inflammation upon stinging by box jellyfish, proteinaceous toxin causing, identification, **275,** 582
  - ion distribution in epidermis, visual imaging, **272,** 134
  - Kunitz family protease inhibitor identification (tomato frog), **279,** 961
  - tranilast-binding protein identification as 36-kDa microfibril-associated glycoprotein and localization (bovine, human), **270,** 1002
  - UVA-exposed live mouse, chemiluminescence detection and imaging of reactive oxygen species, **269,** 131
  - wound repair, associated modulation of expression of keratinocyte-derived chemotactic cytokines *in vivo* (mouse), **274,** 689
- Skin cancer
  - nonmelanoma, expression of xeroderma pigmentosum F gene, assay (human), **273,** 454
- Sln1
  - positive regulation of transcription of homeoprotein-encoding *YHP1* in *Saccharomyces cerevisiae,* **278,** 344
- Smad2
  - phosphorylation in T cells resulting from ligation of T cell receptor complex, **268,** 124
- Smad4
  - association with Smad8, induction by Smad8 phosphorylation downstream of ALK-2, ALK-3, and ALK-6 (mouse), **271,** 682
- Smad8
  - phosphorylation downstream of ALK-2, ALK-3, and ALK-6, induction of association with Smad4 and transcriptional activity (mouse), **271,** 682
- Small cell lung carcinoma cells
  - human p27^{Kip1} promoter-driven expression of luciferase, activation by IFN-α 2b (H82 cells), **269,** 31
  - protein-tyrosine phosphatase HD-PTP gene mutation in, analysis (human), **278,** 671

Small intestine
  aminopeptidase N gene transcription in crypt–villus axis, negative regulation by AT motif binding factor 1-A (mouse), **267,** 91
  catechin and epicatechin in, O-methylation and glucuronidation (rat), **277,** 507
  resveratrol absorption as resveratrol glucuronide (rat), **272,** 212
  surface proteins, binding of Cry1Ac protoxin from *Bacillus thuringiensis* sp. *kurstaki* HD73 (mouse), **271,** 54
  tetrodotoxin-resistant voltage-gated sodium channel α subunit NaT/Scn11a expression (mouse), **267,** 271
  UDP-glucuronosyltransferase isoforms in, immunochemical identification (human), **273,** 1053
  voltage-gated sodium channel α subunit gene *SCN12A* identification (human), **267,** 262
Small unilamellar vesicles
  lipid peroxidation induced by water-soluble free radical sources, **273,** 72
Smooth muscle cells
  colonic myocytes, ion channel activity in, alterations in experimental colitis model (mouse), **275,** 637
  intestinal, IGFBP-5 mRNA abundance in, regulation (rat), **275,** 422
  matrix metalloproteinase-2 activation by *Clostridium difficile* toxin B (bovine), **277,** 43
  preconditioning by cyclopentenone prostaglandins, protection against toxicity of oxidized low-density lipoprotein (human), **269,** 327
  vascular, *see* Vascular smooth muscle cells
Smooth muscles
  intact contracting, shortening velocity in, regulation by calponin (mouse), **279,** 150
s-Myc
  apoptosis mediated by, differential role of c-Jun N-terminal kinase and p38 MAP kinase pathway, **267,** 221
Snake venom
  capillary permeability-increasing growth factor-like protein from, purification (*Vipera lebetina*), **268,** 69
  halysetin purification, characterization, and cDNA sequence: disintegrin-like/Cys-rich protein (*Agkistrodon halys*), **278,** 112
  hemorrhagin, disintegrin-like/cysteine-rich domains from, induction of edema (*Bothrops atrox*), **276,** 29
  kallikrein-like protease from, expression: engineering of autocatalytic site in fusion protein for protein refolding, **275,** 924
  mamba toxin MT7 selectively blocking M_1 muscarinic receptors, recombinant expression, **271,** 435
  α-neurotoxin-type protein specific to coral snake, cloning and characterization, **267,** 887
  vascular apoptosis-inducing protein 1 from, cDNA cloning and characterization (*Crotalus atrox*), **278,** 197
SNARE proteins
  levels in 3T3-L1 adipocytes, quantitation, **270,** 841
SOCS-1, *see* Suppressor of cytokine signaling
SOD1
  disease-associated mutations, role of dominant positive and negative effects, **276,** 1056
Sodium
  ions, distribution in human epidermis, visual imaging, **272,** 134
  Na/Ca exchange, endogenous inhibitor of, enhancement of cardiac muscle contractility (bovine), **277,** 138
Sodium azide
  inhibition of phosphoinositide-mediated calcium response to serotonin stimulation in platelets (human), **274,** 472
Sodium borohydride
  and pyridoxal-5′-phosphate, GDP-fucose-protected lysine sensitive to, in α1→3fucosyltransferases, correspondence to Lys^{300} in FucT-IV, **273,** 870
Sodium butyrate
  apoptosis-inducing effects in human colon adenoma cells, reduction by bile acids, **273,** 45
  combined with low temperature, upregulation of cystic fibrosis transmembrane conductance regulator mutant ΔF508, **271,** 659
  inhibition of IL-1-dependent induction of haptoglobin, role of CCAAT/enhancer-binding protein isoforms (IEC-6 cells), **276,** 673
Sodium channels
  epithelial, enhanced expression, effect on CFTR-mediated Cl^- secretion in mouse endometrium, **276,** 40
  functional properties, role of cytoskeletal integrity, **275,** 839; **276,** 204
  ion-gated, in embryologically diverse cells, paradoxical effects of mineralocorticoids, **270,** 811
  regulation by calmodulin kinase II in cerebellar granule cells (rat), **274,** 394
  voltage-gated
    diversity in ascidian larval nervous system, **275,** 558
    S6 transmembrane segments, pyrethroid resistance mutations in, functional and evolutionary consequences, **278,** 516
    two-pore channel 1 related to, molecular cloning, **270,** 370
  voltage-gated, α subunit
    NaT/Scn11a, of tetrodotoxin-resistant channel, cloning and expression (mouse), **267,** 271
    SCN12A gene encoding, identification (human), **267,** 262
    from skeletal muscle, primary structure (puffer fish), **267,** 403
Sodium chloride
  enhancement of ribulose-1,5-bisphosphate oxygenase activity, suppression by proline (*Sesbania sesban*), **279,** 512
  hyperosmotic, and urea, synergistic regulation of UT-A2 urea transporter expression in mIMCD3 cells and rat, **271,** 368
Sodium-dependent multivitamin transporter
  transport process mediated by, electrogenic nature (rat), **270,** 836
Sodium-independent anion exchanger
  AE2 gene
    molecular cloning and genomic organization (mouse), **276,** 117
    tissue-specific N-terminal isoforms from overlapping alternate promoters (human), **267,** 228
Sodium nitroprusside
  inhibition of cruzipain from *Trypanosoma cruzi,* **270,** 437
  inhibition of platelet aggregation independently of cGMP (human), **279,** 412
Sodium sulfate
  effect on protein A minidomain with short elastin β-turn, **276,** 899
Soft tissue tumor-derived cells
  expression levels of *DAN, BMP-2, BMP-4,* and *BMPR*s (human), **278,** 20
Solubilization
  chemokine receptor CXCR4, **274,** 153
Solute release
  wavelength-programmed, from photosensitive liposomes, **276,** 169
Solution conformation
  synthesized stereoisomeric analogues of endomorphin-2, **276,** 7
Solution structure
  BmP01 (scorpion), **276,** 1148
  parathyroid hormone fragments human PTH(1–34) and hPTH(1–39) and bovine PTH(1–37), **267,** 213
  PGAa, **276,** 1278
Somatostatin
  antral synthesis and secretion and effect of achlorhydria in carboxypeptidase E-deficient mice, **267,** 638
  effect on proliferation and VEGF secretion from murine HECa10 endothelial cell culture, **268,** 567
Somatotrophinomas
  elevated response to GHRH *in vitro,* association with polymorphism in GHRH receptor gene (human), **275,** 33

- Sorting nexins
  - human homologues of yeast vacuolar protein sorting 29 and 35, **277,** 622
- Sos1
  - identification as component of CIN85 complexes, **278,** 167
- SP1
  - transactivation of adipocyte amino acid transporter during 3T3-L1 preadipocyte differentiation, **271,** 100
- Sp1
  - activation of mouse tenascin-X gene expression, **267,** 626
  - activity for HIV-1 gene expression in MT-4 cells, suppression by dialyzable leukocyte extract, **273,** 1099
  - artificial recruitment to promoter: analysis of IE1 role in synergistic transactivation by IE1 and IE2, **269,** 302
  - binding by RA-responsive element in lamin A/C promoter, **269,** 197
  - bound to HIV-LTR DNA, formation of complex with mutant p53^{His273}, **279,** 383
  - site, p21 promoter, role in transcriptional repression of p21$^{(Waf1/Cip1/Sdi1)}$ gene by c-jun, **270,** 303
- SP1-like *cis*-element
  - identification as major DNA motif for differential expression regulation of adipocyte amino acid transporter, **271,** 91
- SP3
  - transactivation of adipocyte amino acid transporter during 3T3-L1 preadipocyte differentiation, **271,** 100
- Sp3
  - binding by RA-responsive element in lamin A/C promoter, **269,** 197
- SPARC
  - role in skeletal myoblast differentiation *in vitro* (chicken), **271,** 630
- Species specificity
  - *Ad4BP/SF-1* gene first exons usage (human, mouse, rat), **278,** 63
- Spectinomycin
  - inhibition of self-splicing of group 1 intron RNA of phage T4 thymidylate synthase, **269,** 574
- Spectrin
  - changes in erythrocytes of patients with Fanconi's anemia and their parents, **273,** 899
- Spectrophotometry
  - arteriovenous carboxyhemoglobin gradient measurement, technical artifact in, elimination by special calibration, **278,** 447
- Spectroscopy
  - α-crystallin aggregates of high molecular weight, **275,** 354
- Spemann organizer
  - *Xlim-1* gene specific to, expression in *Xenopus* embryos, RNA interference with, **274,** 434
- Spermatocytes
  - specific gene excision, by targeted expression of Cre recombinase (mouse), **272,** 125
- Spermatogenesis
  - cloning and expression of follicle-stimulating hormone receptor from newt testis, **275,** 121
  - zinc finger protein transcript expression at specific stages of, analysis (mouse), **273,** 398
- Spermatozoa
  - acrosomal exocytosis induction by inner perivitelline-derived N-linked glycans (chicken), **278,** 84
  - boar, as model system for study of mechanism of spermicidal activity of vanadocenes, **270,** 826
  - cytosolic soluble protein factor triggering calcium oscillations in mouse eggs, detection (chicken, *Xenopus laevis*), **268,** 947
  - motility, activation of, associated Tctex2-related outer arm dynein light chain phosphorylation (rainbow trout, salmon, sea urchin), **256,** 177; *erratum,* **268,** 952
  - telomere domain, chromatin structure (human), **279,** 213
- Spermidine
  - modulation of cell function, **271,** 559
- Spermine
  - activation of p42/44 and p38 MAP kinase: induction of mitogenic responses in osteoblastic MC3T3-E1 cells, **279,** 363
  - modulation of cell function, **271,** 559
- Sphingolipid
  - induced changes in cytosolic Ca^{2+}, relationship to 1,25-dihydroxyvitamin D$_3$ activation of sphingomyelin turnover in osteosarcoma cells, **273,** 95
- Δ^8-Sphingolipid desaturase
  - chimera with Δ^6-fatty acid desaturase: substrate binding site analysis, **279,** 779
- Sphingomyelin
  - potentiation of chemotherapy of human cancer xenografts, **268,** 603
  - turnover, activation by 1,25-dihydroxyvitamin D$_3$ in osteosarcoma cells without sphingolipid-induced changes in cytosolic Ca^{2+}, **273,** 95
- Sphingomyelinase
  - and ceramide, effects in human pulmonary A549 cells: role of NF-κB activation, **277,** 675
- Sphingosine 1-phosphate
  - stimulation of tyrosine phosphorylation of p125^{FAK} and chemotaxis of endothelial cells via G$_i$ protein-linked PLC pathway, **268,** 47
- Sphingosine 1-phosphate receptor
  - expressed in embryonic brain, characterization (zebrafish), **279,** 139
  - putative, coupling to Ca^{2+} signaling pathway, Edg-6 as, **268,** 583
- Sphingosylphosphorylcholine
  - induction of endothelial cell migration and morphogenesis (bovine, human), **272,** 603
- Spinal cord
  - LIM-homeobox3 gene expression (human), **274,** 49
  - tetrodotoxin-resistant voltage-gated sodium channel α subunit NaT/Scn11a expression (mouse), **267,** 271
  - voltage-gated sodium channel α subunit gene *SCN12A* identification (human), **267,** 262
- Spinal ligaments
  - ossification in female patients, role of leptin, **267,** 752
- Spin trapping
  - kinetics, quantification: free radicals in photodynamic therapy, **270,** 125
  - myeloperoxidase protein radical, **270,** 199
  - vascular nitric oxide, using colloid Fe(II)-diethyldithiocarbamate, **275,** 672
- *Spirulina platensis*
  - C-phycocyanin from, selective inhibition of cyclooxygenase-2, **277,** 599
- Spleen
  - *N*-acetylglucosamine-6-*O*-sulfotransferase GlcNAc6ST-4 expression (human), **274,** 291
  - AQP9 localization (rat), **276,** 1118
  - CYRL expression (rat), **267,** 697
  - cysteinyl leukotriene CysLT$_2$ receptor expression (human), **274,** 316
  - distribution of constitutive proteasome, immunoproteasome, and PA28 (rat), **277,** 348
  - ENT1 gene expression (mouse), **277,** 200
  - polyethylenimine uptake *in vivo* (rat), **278,** 414
  - voltage-gated sodium channel α subunit gene *SCN12A* identification (human), **267,** 262
  - Wnt16 isoform expression (human), **278,** 814
- Splenocytes
  - L-leucyl L-leucine methyl ester specificity to, analysis (mouse), **272,** 687
- Splicing, *see also* Alternative splicing
  - consensus sequences for, acquisition during anthropoid evolution, in evolution of cyptic exon in intron 2 of dystrophin gene (human), **267,** 321
  - group 1 intron RNA self-splicing, inhibition by spectinomycin, **269,** 574
  - liver-specific organic anion transporter-1 (rat), **274,** 79

Splicing (*continued*)
  mRNA, restoration by second-site intragenic suppressor in T4 ribonucleotide reductase self-splicing intron, **268,** 359
  peptidylglycine α-hydroxylating monooxygenase (sea anemone), **277,** 7
  rRNA precursor self-splicing, kinetics in *Chlamydomonas,* **273,** 967
  TT virus mRNA in bone marrow cells from infected individual, **279,** 700
Spo0E phosphatase
  lack of, suppression of deficiency of initiation events of sporulation in *Bacillus subtilis clpP* mutant, **279,** 229
Spontaneous mitotic recombination
  in *Saccharomyces cerevisiae,* effects of *RAD52* epistasis group genes, **270,** 112
Sporulation
  early events, effect of *clpP* mutation (*Bacillus subtilis*), **279,** 229
Spot 14
  expression increase by progestins and androgens in T47-D breast cancer cells, **269,** 209
Squalene epoxidase
  inhibition by green tea polyphenols, **268,** 767
  inhibition by synthetic galloyl esters (rat), **270,** 137
Squalene synthase
  regulation in *Saccharomyces cerevisiae,* **267,** 473
Squamous cell carcinoma cells
  ACT gene expression (human), **273,** 776
  humoral hypercalcemia-inducing, expression of mRNA encoding secreted form of ODF/TRANCE inducing osteoclast formation, **269,** 532
SR-25
  molecular cloning and expression analysis (human, mouse), **269,** 444
SR-45023A
  antiproliferative and preapoptotic activities, **270,** 240
Src
  cytoplasmic, deregulation in absence of truncating mutation at codon 531 in bladder carcinoma (human), **273,** 425
  translocation into or out of glycolipid-enriched microdomain, effect of glycosylation, **273,** 159
SRC-1
  role in estrogen-dependent growth of MCF-7 cells, **267,** 311
SREBP
  in transcriptional homeostatic control of membrane lipid composition, **273,** 1
Ssf-1 gene
  cloning, genomic organization, and tissue distribution (human), **275,** 37
ST6GalNAc I
  acceptor substrate specificity (mouse), **272,** 94
ST6GalNAc II
  redefined substrate specificity: second candidate sialyl-Tn synthase (mouse), **272,** 94
STAP-1
  molecular cloning (mouse), **268,** 697
Staphylococcus aureus
  antibacterial effects of tryptophan analogs of indolicidin, **274,** 714
  antibiotic activity of CRAMP analogues without hemolytic effect, **275,** 904
  FtsA–FtsZ interaction, role of conserved Phe376 residue at extreme C-terminus of FtsZ (*Staphylococcus aureus*), **270,** 387
  vancomycin-resistant strains Mu3 and Mu50, up- and down-regulated genes in, identification, **269,** 485
StAR protein, *see* Steroidogenic acute regulatory protein
Starvation
  silver eel, associated increase in mitochondrial tricarboxylate carrier activity, **276,** 893
Starvation response
  Dictyostelium discoideum cells, role of glucose-regulated protein 94, **274,** 323
STAT
  activation induced by cytokines of IL-6 family, inhibition by parthenolide, **267,** 329
  pathway, role in IFN-dependent activation of phosphatidylinositol 3′-kinase, **270,** 158
STAT1α
  activation in glomerular mesangial cells, effect of CBP (rat), **273,** 1069
STAT3
  delayed activation induced by angiotensin II, role of autocrine/paracrine secretion of IL-6 family cytokines (mouse, rat), **269,** 798
  expression in B and T cells, augmentation in stimulated cells (human), **277,** 317
  inhibition by cyclopentenone derivatives (A23-98), **276,** 447
  inhibition in rats with acute hepatic failure, **273,** 129
STAT5
  association with Crk, induction by thrombopoietin and interleukin-2, **278,** 299
STAT6
  activation in 3T3-L1 cells at various stages of differentiation, **267,** 516
  expression in B and T cells, augmentation in stimulated cells (human), **277,** 317
Staurosporine
  induction of cell death in P-glycoprotein-expressing and -nonexpressing cells, **276,** 231
Stellate cells
  hepatic, collagen gel contraction by, enhancement by lysophosphatidic acid: association with Rho-kinase (rat), **277,** 72
Stem cells
  adaptor protein STAP-1 specific to, molecular cloning (mouse), **268,** 697
  embryonic, *see* Embryonic stem cells
Sterile-alpha motif
  ZAK protein containing, cloning and expression (human), **274,** 811
Steroid hydroxylase system
  mitochondrial, cluster model, evidence for, **276,** 210
Steroidogenesis
  regulation by phosphoprotein phosphatases, role of influence on StAR gene transcription, **273,** 35
Steroidogenic acute regulatory protein
  gene transcription, role in phosphoprotein phosphatase regulation of steroidogenesis, **273,** 35
Steroidogenic tissues
  acyl-CoA synthetase 4 expression, regulation by adrenocorticotropic hormone and arachidonate (mouse), **274,** 741
Steroids
  effects on induction of NAD$^+$-linked 15-hydroxyprostaglandin dehydrogenase expression in human prostate cancer cells, **276,** 77
Sterol 14-demethylase
  molecular evolution studies, **273,** 799
Sterols
  transcriptional regulation of membrane lipid biosynthesis, **273,** 1
Stilbene synthase
  catalytic machinery, analysis, **275,** 725
Stomach
  expression of homologous rat SULT1C2 sulfotransferases, **272,** 242
  frizzled-10A gene expression (*Xenopus laevis*), **278,** 377
  gastric acid secretion and motility, effect of ghrelin (rat), **276,** 905
  impaired feedback of functions in carboxypeptidase E-deficient mice, **267,** 638
  mucosal inflammatory responses to *Helicobacter pylori* lipopolysaccharide, associated upregulation of endothelin-converting enzyme-1 (mouse), **267,** 801
  mucosal injury, associated induction of endothelin-converting enzyme-1 by indomethacin (rat), **269,** 377

  mucous cells from surface epithelium, differentiation in culture, promotion by air–liquid interface (mouse), **271,** 741
  neonate/infant-specific pepsinogens from mucosa of, molecular cloning and expressional change during development (rat), **267,** 806
Strain differences
  CYP2B9 and CYP2B10 activation in liver in response to β-estradiol in male C57BL/6, DBA/2, and hybrid B6D2F1 mice, **279,** 288
Streptococcus pyogenes
  antibiotic activity of CRAMP analogues without hemolytic effect, **275,** 904
  surface of, expression of cytosolic glyceraldehyde-3-phosphate dehydrogenase, **278,** 826
Streptomyces coelicolor A3(2)
  pknA gene cloning and characterization, **279,** 942
Streptomyces collinus
  dcw cluster producing kirromycin, isolation and characterization, **268,** 282
Streptozotocin
  insulin-dependent diabetes in mice treated with low dose of, prevention by COX-2 inhibition, **273,** 699
  stimulation of p135 O-glycosylation in pancreatic islets (rat), **267,** 26
Stress
  heat shock protein gene expression under, induction in brain by sucrose diet feeding (rat), **274,** 355
  pancreatic acinar cells submitted to, activation of TNF-α gene expression (mouse), **268,** 485
  ppGpp-dependent *leuO* expression in bacteria under, **276,** 64
  Zn-starvation, effect on *ZRC1* expression (yeast), **276,** 879
Stress-activated protein kinase
  Cd^{2+} induction of c-*fos* dependent on, mediation by MKK7 (rat), **273,** 718
Stress fibers
  Helicobacter pylori-induced formation in gastric adenocarcinoma AGS cells, role of rac and cdc42, **269,** 247
  parallel, formation in MCDK cells, mDia1 action in, mechanisms, **274,** 68
Stress reaction
  role of orexin (rat), **270,** 318
Stress resistance
  stable transformed eukaryotic cells, enhancement by overexpression of hsp25 or N-terminal 33-amino-acid deletion variant, **270,** 183
Stretch-activated Ca^{2+}-permeable channel
  Saccharomyces cerevisiae MID1 gene encoding, potential homologue *yam8*$^+$ from *Schizosaccharomyces pombe,* **269,** 265
Stretch force
  effect on glutathione peroxidase expression in endothelial cells, **273,** 66
Stretching force
  during unfolding of single protein, measurement, **272,** 55
Strictosidine synthase
  gene family with similarity to, animal and plant members, **271,** 191
Stroke
  cerebral, singlet oxygen-induced, murine model, expression of apolipoprotein D and apolipoprotein E in, **268,** 835
Stromal cells
  membrane-bound and soluble RANKL expression and function (mouse), **275,** 768
  U_m, H_2O_2 activation of Ca^{2+}-independent phospholipase A_2 (rat), **276,** 613
Stromal–vascular cells
  apoptosis induction by all-*trans*-retinoic acid and C2-ceramide treatment (rat), **270,** 76
Structural features
  juvenile hormone-hydrolyzing esterase JHER, **272,** 12; *erratum,* **273,** 1180
Structure–activity relationship
  nature of, analysis: role of C5-substituent in creation of cytotoxic activity in C(5) 2′-deoxyuridines, **272,** 64
  synthesized stereoisomeric analogues of endomorphin-2 and receptor binding, **276,** 7
Sublingual gland
  ADP-ribosyl cyclase activity (rat), **270,** 469
  mucin secretion, triggering by activation of protease-activated receptor-2 (rat), **270,** 298
Submandibular gland
  ADP-ribosyl cyclase activity (rat), **270,** 469
Subretinal space
  retinal progenitors transplanted into, survival and differentiation *in vitro* (rat), **268,** 842
Substance P
  regulation of parathyroid hormone secretion through neurokinin-1 receptor, **270,** 230
Substantia nigra pars compacta
  preferential expression of FGF-20 (rat), **277,** 355
Substrate–heme complex approach
  synthesis and biochemical evaluation of range of azole compounds against cholesterol side chain cleavage enzyme, **275,** 75
Substrate mutation
  catalysis of *E. coli* RNase P with precursor $tRNA^{Phe}$ bearing single mismatch in acceptor stem, effects of C5 protein, **268,** 136
Subtilisin-like proprotein convertase
  PACE4, highly regulated expression during dentinogenesis (rat), **272,** 410
Subtilisin-like protease
  contaminating bacitracin, enzyme destruction by, **273,** 829
Subtilisin-like serine proteases
  oxidatively stable, from alkaliphilic *Bacillus* spp., enzymatic properties, sequences, and evolution, **279,** 313
Subunit assembly
  hemoglobin: synergistic effect of surface and interface β-chain residues, **270,** 683
Subunit interaction
  Ca^{2+} channel α_1–β subunit, reversibility, **277,** 729
Succinate dehydrogenase
  inhibition, role in poliovirus induction of early impairment of mitochondrial function, **271,** 610; *erratum,* **272,** 966
  SDH2–RPS14 precursor encoded in nucleus, proteolytic processing to generate mitochondrial RPS14 (maize), **271,** 380
Sucrose
  diet of, induction of heat shock protein gene expression in brain under stress (rat), **274,** 355
Sucrose gradient centrifugation
  in identification of nuclear ribonucleoprotein particle containing incompletely spliced HIV-1 RNAs, **268,** 509
Sulfamate
  compounds containing, inhibition of estrone sulfatase, role of pK_a, **272,** 583
Sulfatase
  gene superfamilies, expression profiling in epithelial tissues and cultured cells (human), **277,** 236; *erratum,* **279,** 306
Sulfatide
  ligation of L-selectin, effect on FcγR- and CR3-mediated neutrophil phagocytosis, **278,** 79
Sulfation
  environmental estrogen-like chemicals by human cytosolic sulfotransferases, **267,** 80
  nucleotide, catalysis by phenol sulfotransferase, **271,** 818
Sulfinates
  methylene blue-photosensitized oxidation, **270,** 782
Sulfolipid
  binding of annexin to outer surface of chloroplast (spinach), **272,** 519
Sulfolobus acidocaldarius
  HSNP-C′, biochemical characterization and helix stabilizing properties, **267,** 614

- Sulfonylureas
  - insulintoropic actions, drug-induced desensitization, **271,** 234
- Sulfotransferase
  - cytosolic, sulfation of environmental estrogen-like chemicals (human), **267,** 80
  - gene superfamilies, expression profiling in epithelial tissues and cultured cells (human), **277,** 236; *erratum,* **279,** 306
  - two homologous rat SULT1C2 enzymes, enzymatic properties, tissue-specific expression, and lysosomal location, **272,** 242
- 3-*O*-Sulfotransferase isoform 1
  - modification of heparan sulfate on biochip, effect on HS interaction with antithrombin III, **276,** 292
- Superoxide anion
  - adducts with DEPMPO, EPR detection using liquid nitrogen freezing, **275,** 895
  - effects of thioredoxin, **277,** 443
  - generation
    - by human neutrophil NADPH oxidase, onset of, targeting by fungal gliotoxin, **268,** 716
    - in mammalian cells, induction by plant Rac proteins, **272,** 783
    - in neutrophils, priming effect of cystathionine metabolites (human), **269,** 297
  - as messenger of endothelial function, review, **278,** 1
  - NADPH oxidase forming, activation in Alzheimer's disease brains, **273,** 5
  - scavenging by aqueous extract of *Ilex paraguariensis,* **269,** 357
  - in UVA-exposed live mouse skin, chemiluminescence detection and imaging, **269,** 131
- Superoxide dismutase
  - activity in prion protein with polymorphism at position 129, effect of copper, **269,** 726; *erratum,* **271,** 842
  - circulating levels in rheumatoid arthritis, improvement by NSAID therapy, **270,** 714
  - Cu,ZnSOD
    - anion protection during peroxidative activity with H_2O_2, **274,** 57
    - copper chaperone for, molecular cloning and characterization (rat), **275,** 394
    - dimeric, metal-dependent subunit association in, induction by single mutation (*Photobacterium leiognathi*), **272,** 81
    - gene, multiple transcripts (human), **276,** 52
  - extracellular, in lung, purification and characterization (mouse), **275,** 542
  - MnSOD
    - *cis* element in RNA 3′ UTR, enhancement of translation of heterologous RNA, **272,** 164
    - elevated levels in proportion of amyotrophic lateral sclerosis patient cell lines, **273,** 359
    - mRNA 3′ UTR, hybridization to small cytoplasmic RNA and inhibition of gene expression (human), **274,** 641
  - total activity *in vivo,* differential contribution by prion protein, **273,** 136
- Supplementation
  - ascorbate and iron, effects on DNA damage (human), **277,** 535
- Suppression subtractive hybridization
  - identification of genes expressed in oviduct during preimplantation period (mouse), **277,** 680
- Suppressor
  - second-site intragenic, in T4 ribonucleotide reductase self-splicing intron, restoration of mRNA splicing, **268,** 359
- Suppressor of cytokine signaling
  - SOCS-1, major open reading frame, translational repression by upstream ORF, **268,** 255
  - SOCS-1 and SOCS-3, role in leptin resistance of adipocytes in obesity (rat), **277,** 20
  - SOCS-3, interaction with insulin-like growth factor-1 receptor (human), **278,** 38
  - upregulation, association with Stat3 inhibition in acute hepatic failure (rat), **273,** 129
- Suprachiasmatic nucleus
  - and peripheral tissues, differential regulation of *BMAL1* mRNA in *Clock* mutant mice, **268,** 164
- Supranuclear region
  - endosome-related structures, rab4 localization, **268,** 847
- Surface plasmon resonance
  - antithrombin III interaction with biochip containing heparan sulfate and enzymatically modified HS, **276,** 292
  - direct interaction of emerin and lamin A, BIAcore study, **267,** 709
  - lipoprotein lipase C-terminal heparin- and lipoprotein-binding properties, **271,** 15
- Surfactant protein A
  - inhibition of eosinophil IL-8 production, **270,** 831
- SVCT1
  - molecular cloning (human), **267,** 488
- Swainsonine
  - suppressive effects on human bone marrow neutrophil maturation, **269,** 219
- Switch 2 domain
  - RhoA, portion of, role in deamidation of RhoA Glu63 by *E. coli* CNF1 toxin, **267,** 588
- Synapse
  - membrane association of presynaptic cytomatrix protein Bassoon (rat), **275,** 43
- Synapse-associated proteins, *see* SAP family proteins
- Synaptotagmin II protein
  - genomic structures: comparison of exon–intron organization of *Synaptotagmin* gene family, **270,** 528
- Syndecan-1 gene
  - far-upstream FGF-inducible response element of, proximal promoter-independent activation, **278,** 432
- Syndrome X
  - genetic dissection (rat), **269,** 660
- *Synechocystis* sp. PCC 6803
  - photosystem I, interactions with ferredoxin on electron transfer complex, role of region with aspartates 57 and 60, **271,** 647
- γ-Synergin
  - γ-adaptin and GGA proteins interacting with, adaptor γ ear homology domain conservation in, **271,** 719
- Synonymous codon usage
  - relationship to protein secondary structural units, **269,** 692
- Synovial cells
  - rheumatoid
    - cyclooxygenase-2 expression, induction by nitric oxide, **268,** 928
    - growth regulation by ceramide, **269,** 70
- Synoviocytes
  - activation, role of HTLV-1 Tax targeting of CREB-binding protein (human), **269,** 584
- Syntaxin-3
  - expression in granule membranes of basophilic leukemia cells (rat), **271,** 36
- Syntaxin 13
  - interaction with Vesl-1L/Homer 1c, **272,** 466
- System A
  - related clone ATA2, transport activity during liver regeneration, posttranscriptional regulation (rat), **278,** 729
- Systemic lupus erythematosus
  - oxidative DNA damage in, aberrant processing (human), **273,** 894
  - regulation of TWEAK mRNA in, analysis (mouse), **279,** 162
- Systemic sclerosis
  - association with microsatellites in human type I collagen α2 chain gene, **272,** 36

T

T-20
  chemoattraction of neutrophils by specific activation of *N*-formylpeptide receptor, **272,** 699
Tachykinin
  septide-sensitive binding sites for, demonstration in tissues with only NK$_1$ tachykinin receptors, **270,** 668
Tachykinin receptors
  NK$_1$, tissues possessing, detection of septide-sensitive tachykinin binding sites, **270,** 668
Tacrolimus
  binding by ubiquitin, **277,** 325
TagA protein
  three-dimensional structure, computer modeling and experimental evidence (*Escherichia coli*), **268,** 724
Tamoxifen–DNA adducts
  HPLC analysis using postcolumn online photochemical activation, **273,** 40
Tandem mass spectrometry
  –HPLC, simultaneous measurement of 8-oxo-2′-deoxyguanosine and 8-oxo-2′-deoxyadenosine by, **277,** 764
T antigen
  ts-SV40 T antigen gene transgenic mice, multipotency of bone marrow stromal cell line TBR31-2 established from, **268,** 450
Tat
  extracellular, inhibition of CXCR4-dependent HIV-1 infection of PBMCs, **270,** 992
  mediation of apoptosis in central nervous system *in vivo* (rat), **267,** 252
  and MHC class II transactivator CIITA, transcriptional activities, reciprocal modulation, **279,** 494
  response of Kaposi's sarcoma cells of different origin to, through Flk-1/KDR, **273,** 267
Tau protein
  phosphorylation by glycogen synthase kinase-3β, effects of PKNα and protein kinase C, **273,** 209
Taurocholate
  moat1 transporting, molecular identification (rat), **275,** 831
Tax
  HTLV-I
    fibronectin promoter transactivation via NF-κB pathway, **276,** 579
    targeting of CREB-binding protein in synoviocyte activation, **269,** 584
tax gene
  HTLV-1, induction of IL-8 secretion by autocrine mechanism and effect on IL-16 in transfected Jurkat cells, **273,** 865
Taxol-sensitive kinase
  cytoskeleton-associated, identification (CV-1 cells), **277,** 525
TBP
  artificial recruitment to promoter: analysis of IE1 role in synergistic transactivation by IE1 and IE2, **269,** 302
TCDD, *see* 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin
T cell costimulatory molecule
  CD28/CTLA4 family-related AILIM/ICOS, identification and characterization (rat), **276,** 335
T-cell leukemia cells
  caspase-3 activation by apoptosis-inducing nucleosides from CD57$^+$HLA-DR$^{\mathrm{bright}}$ natural suppressor cell line (Molt4 cells), **268,** 514
  irradiated, caspase cleavage of p42/SETβ in, generation of p41 marker for cell death (MOLT-4 cells), **278,** 627
  Jurkat, *see* Jurkat cells
  preferential cytotoxicity of noninsecticidal parasporal proteins of *Bacillus thuringiensis* serovar *shandongiensis* isolate (MOLT-4 cells), **272,** 218
  proliferation, inhibition by tripeptide *N*-acetyl-Glu-Ser-GlyNH$_2$ from canine spleen (Molt cells), **277,** 562
  staurosporine-induced cell death in relation to P-glycoprotein expression (CEM-CCRF cells and derived sublines), **276,** 231
T cell receptor
  transgene, glucocorticoid resistance in thymocytes from mice expressing, **276,** 189
T cell receptor complex
  ligation, phosphorylation of Smad2 in T cells due to, **268,** 124
T cells
  activated, glycogen synthase kinase-3β expression and activity, effect of alanyl aminopeptidase inhibitors (human), **273,** 62
  CD4$^+$
    HIV-1-infected, upregulation of apoptosis-associated protein Grb3-3 in, **276,** 362
    murine model of chronic colitis using, E-selectin expression in, **268,** 547
  cytotoxicity, effect of CD95/CD95 ligand-mediated counterattack (mouse), **272,** 395
  glycosphingolipid-enriched membrane microdomains, CD3ζ targeting into, phenotypic effects (human), **271,** 589
  HIV-1 gene expression, activity of essential transcription factors for, suppression by dialyzable leukocyte extract (MT-4 cells), **273,** 1099
  HIV-infected, prolonged survival of, promotion by NEF and Vpr proteins, **267,** 677
  Kv1.3 channels, blockage by scorpion toxin Pi1 (human), **278,** 34
  pokeweed mitogen-stimulated, dipeptidyl peptidase IV mRNA expression, suppression by DP IV inhibition (human), **274,** 410
  Smad2 phosphorylation resulting from ligation of T cell receptor complex (human, mouse), **268,** 124
  STAT3 and STAT6 expression, augmentation in stimulated cells (human), **277,** 317
  staurosporine-induced cell death in relation to P-glycoprotein expression (12D7, 12D7-MDR1 cells), **276,** 231
  susceptibility to noninsecticidal parasporal proteins of *Bacillus thuringiensis* serovar *shandongiensis* isolate, **272,** 218
Tctex2
  related outer arm dynein light chain, phosphorylation at activation of sperm motility, **256,** 177; *erratum,* **268,** 952
tdsA
  operon structure and desulfurization activity (*Paenibacillus* sp. A11-2), **270,** 81
tdsB
  operon structure and desulfurization activity (*Paenibacillus* sp. A11-2), **270,** 81
tdsC
  operon structure and desulfurization activity (*Paenibacillus* sp. A11-2), **270,** 81
Teeth
  molar, dentinogenesis, associated expression of subtilisin-like proprotein convertase PACE4 (rat), **272,** 410
TehAB determinant
  tellurite resistance mediated by, role of cysteine residues, **277,** 394
Tellurite
  resistance mediated by TehAB determinant, role of cysteine residues, **277,** 394
Telomerase
  gene, normal and DMD myoblasts expressing, transplantation in SCID mice, **272,** 362
  maintenance, role in retinoic acid extension of *in vitro* life span of human oral keratinocytes, **268,** 268
  recognition of 2′-deoxy-L-ribonucleoside 5′-triphosphates (human), **279,** 475
  RNA, from rabbit, functional compatibility of human telomerase reverse transcriptase with, **278,** 503

Telomerase (*continued*)
  suppression by hammerhead ribozyme, 5′-end of hTERT mRNA as target for, **273,** 316
  transient expression, effect on life span of normal fibroblasts (human), **273,** 1095
Telomerase reverse transcriptase
  5′-end mRNA, as target for suppression of telomerase activity by hammerhead ribozyme (human), **273,** 316
  functional compatibility with rabbit telomerase RNA (human), **278,** 503
Telomeres
  double-stranded DNA binding of nucleolin *in vitro,* **268,** 909
  sperm, chromatin structure (human), **279,** 213
Temazepam
  identification in *Artemisia dracunculus* and *Solanum tuberosum:* endogenous formation of benzodiazepines in plants, **269,** 290
Temocapril
  effects on calcineurin pathway and hypertrophic process in heart (rat), **273,** 347
Temperature
  effect on α-crystallin aggregate size and chaperone-like activity (bovine), **268,** 426
  effect on kinesin molecule force, velocity, and processivity, **272,** 895
  low, combined with sodium butyrate, upregulation of cystic fibrosis transmembrane conductance regulator mutant ΔF508, **271,** 659
Temperature acclimation
  carp with, two surface loops of myosin heavy chain isoforms from, structure–function relationships, **269,** 237
Tenascin-X gene
  expression, activation by Sp1 (mouse), **267,** 626
Tensin
  induction of JNK and p38 activation, **272,** 717
Tension
  activation in skinned cardiac muscle fibers, length dependence, effect of troponin I phosphorylation by PKA, **272,** 104
  isometric, generation by skinned fibers and intact skeletal muscles from desmin-deficient mice, **278,** 419
Tentacles
  Carbydea rastoni toxin-B localization to, **275,** 582
TentaGel beads
  binding of soluble protein targets, linker properties for optimal display of peptide ligands in, definition by combinatorial chemistry, **269,** 591
Teratocarcinoma
  ES cell-derived, angiogenesis, role of ARNT2, **273,** 231
Teratocarcinoma cells
  differentiated NT2, oxidative stress-induced increase in Aβ production and βI and βII PKC activation in, **268,** 642; *erratum,* **272,** 309
Testis
  AQP9 localization (rat), **276,** 1118
  C1orf9 gene mRNA expression (human), **267,** 855
  CYRL expression (rat), **267,** 697
  DMRT1 and *DMO* gene isolation and characterization (tilapia), **272,** 662; *erratum,* **277,** 781
  endoplasmic reticulum Ca^{2+} pump inhibition, role in cell death induction by estrogenic alkylphenols (rat), **277,** 568
  ENT1 gene expression (mouse), **277,** 200
  follicle-stimulating hormone receptor, cloning, characterization, and expression (newt), **275,** 121
  myosin X expression (mouse), **271,** 526
  neprilysin II isoform expression (rat), **271,** 565; *erratum,* **275,** 247
  Peroxiredoxin V gene long transcript expression (mouse), **270,** 356
  serine/threonine protein phosphatase 1γ2 specific to, associated sds22 homolog, cloning and expression (rat), **273,** 972
  spermatogenic cells, expression of zinc finger protein transcript (mouse), **273,** 398
  tetrodotoxin-resistant voltage-gated sodium channel α subunit NaT/Scn11a expression (mouse), **267,** 271
  α-tubulin isoform tuba8 preferentially expressed in, cloning and sequencing (human, mouse), **270,** 1111
  WNT-2B isoforms, differential expression (human), **275,** 209
Testis-abundant finger protein
  RBCC-B30.2 protein on human MHC class I region, molecular cloning in human and mouse, **276,** 45
Testosterone
  binding in seminal vesicle cytosol, inhibition by low-molecular-weight substance (bovine), **276,** 483
  induction of NAD^+-linked 15-hydroxyprostaglandin dehydrogenase expression in human prostate cancer cells, **276,** 77
2,3,7,8-Tetrachlorodibenzo-*p*-dioxin
  basis of resistance in hamster: restructured transactivation domain in aryl hydrocarbon receptor, **273,** 272
  induction of binding of 50-kDa protein on 3′ untranslated region of urokinase-type plasminogen activator mRNA, **272,** 441
Tetrachlorohydroquinone
  in presence of H_2O_2, production of hydroxyl radicals, **270,** 942
Tetracycline
  –lactose repressor–operator combination system, gene expression, role of cell growth (Kit 225 cells), **276,** 546
Tetraethylammonium
  long-term potentiation induced by, in hippocampal slices, associated changes in free fatty acids and acyl-CoAs (rat), **267,** 208
Tetrahymena thermophila
  cytokinesis initiation, molecular cloning of p85 gene regulating, **264,** 112; *erratum,* **267,** 478
  J8/7 elements in conserved core of group I intron ribozymes, characterization, **267,** 85
  mechanical stimulation, activation of prostacyclin synthesis, **279,** 635
  *Ser*L paralogs, molecular characterization, **278,** 621
Tetrodotoxin
  voltage-gated sodium channel α subunit NaT/Scn11a resistant to, cloning and expression (mouse), **267,** 271
TGIF2
  amplification and overexpression in ovarian cancer cell lines: TALE-superclass homeobox gene, **276,** 264
Thapsigargin
  Ca^{2+} stores mobilized by, refilling, role of vacuolar H^+-ATPase (mouse), **271,** 311
Theca cells
  on mechanically isolated preantral follicles, morphology, growth hormone effects, **268,** 36
Thermoacidophilic archaea
  Sulfolobus acidocaldarius, HSNP-C′ from, biochemical characterization and helix stabilizing properties, **267,** 614
Thermophilic desulfurizing enzymes
  Paenibacillus sp. A11-2, genes encoding, operon structure and functional analysis, **270,** 81
Thermoplasma acidophilum
  citrate synthase, valine substitution for glycine in dimer interface, effect on stability and activity, **275,** 460
  ftsZ gene and *pyrF* gene, cloning and characterization, **275,** 936
Thermoregulation
  roles of brain mitochondrial carrier protein-1 and uncoupling protein-2 (rat), **278,** 691
Thermosensory function
  role of prostaglandin I_2 in *Paramecium,* **273,** 516

Thiazolidinediones
  effects on vascular smooth muscle cell activation by angiotensin II (rat), **273,** 1144
  induced adipogenesis, inhibitory effect of $\mathrm{Pro}^{12} \rightarrow \mathrm{Ala}$ mutation of peroxisome proliferator-activated receptor γ 2, **268,** 178
10-(*R*)-Thiiranyl androstenedione
  for aromatase inhibition, synthesis and evaluation, **267,** 356
Thiol antioxidants
  activation of ERK signaling pathway in articular chondrocytes (bovine, human), **275,** 789
Thioredoxin
  expression in cultured hepatocytes, enhancement by geranylgeranylacetone (rat), **275,** 825
  interaction with VDUP1 in HeLa cells, detection in yeast two-hybrid system, **271,** 796
  quenching of singlet oxygen and scavenging of hydroxyl radicals, **277,** 443
  recombinant, activation of caspase-3 (human), **268,** 78
  redox-inactive, reduction of growth and enhancement of apoptosis in WEHI7.2 cells, **274,** 136
  regulation of NF-κB, AP-1, and CREB activation in HEK293 cells, **274,** 177; *erratum,* **275,** 247
Thioredoxin peroxidase
  inhibiting p53-induced apoptosis, mouse peroxiredoxin V identification as, **268,** 921
Thrombin
  glycoprotein 1bα-bound, as serine protease producing macromolecular activators of phagocytosis from platelets (human), **270,** 377
  platelets treated by, evaluation of flow cytometric parameters for platelet activation measured by P-selectin expression, **269,** 85
Thrombopoietin
  induction of Crk association with STAT5, **278,** 299
  mRNA, identification of five isoforms (mouse), **276,** 137
Thrombospondin-1
  CD36-binding peptide from, stimulation of resorption by osteoclasts *in vitro* (human), **270,** 1124
  detection in vitreous and aqueous humor and modulation by hyperglycemia (bovine, human, rat), **267,** 257
  as endothelial mechanosensitive death mediator (human), **271,** 584
  expression in cell lines positive for HPV-16 oncoproteins, **277,** 55
Thrombospondin-2
  expression in cell lines positive for HPV-16 oncoproteins, **277,** 55
Thromboxane A_2
  expression in vascular endothelium, effects of shear stress, in biomechanical perfusion model, **269,** 257
  regulation of endothelial cell migration, angiogenesis, and tumor metastasis, **267,** 245
Thromboxane synthase
  expression in vascular endothelium, effects of shear stress, in biomechanical perfusion model, **269,** 257
Thymidylate synthase
  phage T4, group 1 intron RNA self-splicing, inhibition by spectinomycin, **269,** 574
Thymocytes
  apoptosis
    process of, fluorescein fluorescence hyperpolarization as early kinetic measure (mouse), **268,** 155
    ribosomal protein S29 as inducer of, identification (rat), **277,** 476
  apoptotic, DNase γ in nuclei of, *in situ* detection (rat), **275,** 343
  DNA fragmentation factor 45-deficient, lack of 50-kb DNA fragments upon activation of apoptosis (mouse), **274,** 225
  magnesium efflux, induction by high potassium levels (rat), **268,** 673
  from mice expressing T cell receptor transgene, glucocorticoid resistance in, **276,** 189
Thymulin
  with bound Zn^{2+}, immunomodulatory potential in alveolar epithelium (human), **274,** 500
Thymus- and activation-regulated chemokine
  expression in human corneal fibroblasts, synergistic effect of TNF-α and IL-4, **279,** 1
Thyrocytes
  mitogenesis signaling by TSH and cAMP, role of Ras activation (dog), **273,** 154
Thyroglobulin
  amino-terminal domain, binding of rat asialoglycoprotein receptor, **268,** 42
Thyroid
  expression of cloned thyrotropin receptors (amago salmon), **276,** 258
Thyroid cells
  asialoglycoprotein receptor binding to thyroglobulin amino-terminal domain (rat PC C13 cells), **268,** 42
  insulin costimulation of growth in, insulin receptors mediating, induction by TSH (human), **279,** 202
  Rap1 activation by cAMP-dependent and -independent pathways (dog), **267,** 7
  thyroid oxidase gene expression (FRTL-5 cells), **277,** 287
  transcription of thyroid-specific genes in, suppression by class II transactivator (FRTL-5 cells), **278,** 58
Thyroid oxidase
  gene expression in thyroid cell line FRTL-5, **277,** 287
Thyroid-specific genes
  transcription, suppression by class II transactivator, **278,** 58
Thyroid transcription factor 2
  characterization as promoter-specific DNA-binding-independent transcriptional repressor, **275,** 203
Thyrotropin
  induction of insulin receptors mediating insulin costimulation of growth in human thyroid cells, **279,** 202
  mitogenesis signaling via cAMP in canine thyrocytes, role of Ras activation, **273,** 154
Thyrotropin receptors
  cloning, functional characterization, and expression in thyroid of amago salmon, **276,** 258
Thyroxine
  binding by two transthyretin variants with protective effects on familial amyloidotic polyneuropathy, **270,** 1024
Tie2
  expression by human endometrial endothelial cells, effects of hypoxia and inflammation (human), **275,** 159
Time-lapse analysis
  caveolin-1 during cell division: concentration in cleavage furrow, **268,** 82
timeless-like gene product
  molecular characterization and nuclear localization (rat), **279,** 131
Tip60
  inhibition of CREB protein activation by protein kinase A, **269,** 758
TIS11
  transactivation by, negative regulation by phorbol ester (PC12 cells), **274,** 526
Tissue factor
  cellular, deencryption, role of cytoplasmic domain (BHK cells), **272,** 332
Tissue factor pathway inhibitor-2
  biological activities, prokaryotic expression, purification, and reconstitution (HT-1080 cells), **276,** 1286
Tissue inhibitor of metalloproteinase 3
  inhibition of ADAM 12-S, **278,** 511

- Tissues
  - aryl hydrocarbon receptor gene expression (hamster), **273,** 272
  - Bax-σ expression (human), **270,** 868
  - deoxyribonuclease I concentrations, as basis for DNase I classification into pancreas, parotid, and pancreas–parotid types in mammals, **269,** 481
  - expression of cloned thyrotropin receptors (amago salmon), **276,** 258
  - FEM1B gene expression (human), **267,** 317
  - frizzled-3 expression (human), **273,** 27
  - OATP family members expression (human), **273,** 251
  - peripheral, and suprachiasmatic nucleus, differential regulation of *BMAL1* mRNA in *Clock* mutant mice, **268,** 164
  - phosphodiesterase 7A1 distribution (mouse), **276,** 1271
  - PTH/PTHrP receptor promoter activity, role of methylation (human), **267,** 482
  - *REIC* gene expression (human), **268,** 20
  - Ssf-1 mRNA distribution (human), **275,** 37
  - TIMELESS-like protein mRNA distribution (rat), **279,** 131
- Tissue specificity
  - *Ad4BP/SF-1* gene first exons usage (human, mouse, rat), **278,** 63
- Tissue-type plasminogen activator
  - gene expression and secretion by vascular endothelial and smooth muscle cells, effect of homocysteine, **272,** 182
- T-lymphoid cells
  - Jurkat, *see* Jurkat cells
- TNF-related apoptosis-inducing ligand, *see* TRAIL
- Tnk1
  - characterization and binding with phospholipase C-γ1, **273,** 294
- α-Tocopherol
  - selective inhibition of vascular cell adhesion molecule-1 expression in vascular endothelial cells (human), **274,** 609
- γ-Tocopherol
  - 5′-carboxychroman metabolite, secretion by HepG2 cells and excretion in human urine, **269,** 580
  - partial protection of insulin-secreting cells against functional inhibition by nitric oxide, **277,** 334
- Tocopherols
  - cytochrome P450 3A-dependent metabolism and inhibition by sesamin, **277,** 531
- Tolbutamide
  - insulintoropic actions, drug-induced desensitization, **271,** 234
- Toll-like receptor
  - mediation of cellular activation by active glycolipids from *Enterococcus hirae,* **273,** 164
- Toll-like receptor 4
  - signal pathway mediated by, induction by *Porphyromonas gingivalis* LPS in gingival fibroblasts (human), **273,** 1161
- Toll-like receptor 4–MD-2 complex
  - lipopolysaccharide signaling via, regulatory roles of CD14 and phosphatidylinositol, **268,** 172
- Tom complex
  - relationship to metaxin role in mitochondrial protein import in cultured cells (human), **276,** 1028
- TonEBP
  - function, **278,** 269
- Torque
  - in Z-filaments: mechanical model of actin filament rotation, **270,** 677
- Toxicity
  - Zn, on *ZRC1* expression (yeast), **276,** 879
- Toxin B
  - *Clostridium difficile,* activation of MMP-2 in bovine smooth muscle cells, **277,** 43
- tPA, *see* Tissue-type plasminogen activator
- Trabecular meshwork
  - antithrombin III detection (human), **272,** 1
- Trachea
  - surface epithelial cells, squamous differentiation, downregulation of Muc1 mucin (hamster), **271,** 641
- TRADD
  - interaction with HIPK2 in 293T cells, **277,** 513
- TRAIL
  - gene 5′-upstream region, isolation and characterization (human), **276,** 466
  - genomic organization and transcriptional regulation (human), **278,** 747
  - JB6 cell sensitization to, induction by caspase-8 reconstitution, **277,** 311
- TRAIL receptor
  - DR4, initiator caspase cleavage by, inhibition by p21$^{\mathrm{WAF1/CIP1}}$, **269,** 179
- TRANCE, *see* Osteoclast differentiation factor
- Tranilast-binding protein
  - identification as 36-kDa microfibril-associated glycoprotein in bovine skin and aorta and localization in human skin, **270,** 1002
- Transactivation
  - adipocyte amino acid transporter by SP1 and SP3 during 3T3-L1 preadipocyte differentiation, **271,** 100
  - cone–rod homeobox function in, p300/CBP as coactivator of, **269,** 410
  - fibronectin promoter, by HTLV-I Tax, via NF-κB pathway, **276,** 579
  - HIV-1 TAT and CIITA activities for, reciprocal modulation, **279,** 494
  - hypoxia-induced, vascular endothelial growth factor, inhibition by serum, **267,** 334
  - by IDX-1, glucose-dependent activity, increase by glucagon-like peptide 1 in pancreatic β INS-1 cells, **274,** 616
  - by nuclear receptor similar to embryonic benzoate X receptor (*Xenopus laevis*), **277,** 209
  - peroxisome proliferator-activated receptor subtypes by pioglitazone (human), **278,** 704
  - by phosducin carboxy terminal domain, **270,** 504
  - synergistic, by IE1 and IE2, role of IE1 in, analysis by artificial recruitment of Sp1 or TBP, **269,** 302
  - by zinc finger protein TIS11, negative regulation by phorbol ester (PC12 cells), **274,** 526
- Transactivation domain
  - restructured, in hamster aryl hydrocarbon receptor, **273,** 272
- Transacylation
  - with carboxypeptidase Y, in production of recombinant salmon calcitonin, **267,** 362
- Transcription
  - alcohol dehydrogenase gene *ADH5:* generation of C-terminal multiplicity (human), **278,** 544
  - aldolase B gene, regulation by overlapping set of elements in origin/promoter (rat), **278,** 760
  - aminopeptidase N gene in crypt–villus axis of small intestine, negative regulation by AT motif binding factor 1-A, **267,** 91
  - Apo2/TRAIL gene, regulation (human), **278,** 747
  - calcitonin receptor gene, regulation by multiple promoters (human), **272,** 738; *erratum,* **273,** 1180
  - cardiac homeobox gene *CSX1,* regulation (human), **272,** 749
  - caspase-14 in keratinocyte differentiation (human), **277,** 655
  - c-*fos* gene, induced by PDGF in glomerular mesangial cells, effect of IFN-γ (rat), **273,** 1069
  - c-*myc,* patterns in colorectal carcinoma, correlation with elevated RanBP7 mRNA levels (human), **271,** 537
  - COX-2, regulation by GTPases (NIH 3T3 cells), **276,** 406
  - CREB-binding protein, activation, inhibition by viral interferon regulatory factor 1 of Kaposi's sarcoma-associated herpesvirus, **270,** 23
  - dipeptidyl-peptidase IV, regulation during differentiation of Caco-2 cells, role of hepatocyte nuclear factor 1α and 1β, **270,** 235
  - by distal CD40 ligand promoter, **279,** 245
  - DNA repair coupling to, role in gene-specific repair of γ-ray-induced DNA strand breaks in colon cancer cells (human), **269,** 433

  - EBAG9 gene, regulation (human), **273,** 654
  - effects of Smad8 phosphorylation downstream of ALK-2, ALK-3, and ALK-6 (mouse), **271,** 682
  - α1,3-fucosyltransferase 4 gene, regulation in myeloid and colon adenocarcinoma cell lines (human), **273,** 370
  - Hap1 activating, heme regulatory elements in, functional analysis, **273,** 584
  - in hepatocytes, control functions of prostaglandin $F_{2\alpha}$ receptor gene 5′-flanking region (rat), **278,** 278
  - histo-blood group *ABO* glycosyltransferase gene enhancer activities (human), **273,** 459
  - homeoprotein-encoding *YHP1,* positive regulation by Sln1 in *Saccharomyces cerevisiae,* **278,** 344
  - homeostatic control of membrane lipid composition, review, **273,** 1
  - hypertrophy-sensitive genes, silencing in neonate cardiomyocytes by tetracycline-inducible CaM kinase II (rat), **274,** 803
  - ICAM-1 gene, NF-κB binding in, glucocorticoid effects (U937 cells), **273,** 1008
  - KAI1 metastasis suppressor gene, regulatory role of p53, **278,** 499
  - liver carnitine palmitoyltransferase I gene, regulation by thyroid hormone (rat), **279,** 81
  - MIP-1γ gene in ANA-1 murine macrophages, induction by endotoxin and NO, **277,** 617
  - modulation by rat nuclear scaffold protein P130, rat highly repetitive DNA component, or animal and plant matrix or scaffold attachment regions, **279,** 282
  - p21$^{(Waf1/Cip1/Sdi1)}$ gene, repression by c-jun via Sp1 site, **270,** 303
  - p53, inactivation by deletions and single amino acid changes in murine mot-1 protein, **279,** 602
  - PMCA1 gene, downregulation by 1,25-dihydroxyitamin D_3, mediation by gene promoter region, **277,** 722
  - prepronociceptin gene, regulation (human), **276,** 710
  - px_2 gene characterization to enhance inducible expression of adjacent *nodF* (*Rhizobium leguminosarum*), **275,** 91
  - regucalcin gene, regulation, role of hepatic nuclear factor I binding motif, **269,** 270
  - regulation
    - in DT40 chicken B cell line, individual roles of histone H1 variants, **268,** 501
    - in liver cells, effects of hepatitis B virus X protein (human), **272,** 525
    - by TSC-22 after nuclear translocation concomitant with apoptosis, **278,** 659
  - Sin3A and 3B repressing, mammalian, expression during aging and replicative senescence, **275,** 455
  - StAR gene, effect of phosphoprotein phosphatases on, role in steroidogenesis regulation, **273,** 35
  - thyroid-specific genes, suppression by class II transactivator, **278,** 58
  - TT virus in bone marrow cells from infected individual, **279,** 700
  - UDP-glucose dehydrogenase gene, start site mapping (human), **275,** 981
  - urokinase receptor, regulation by Ras- and Rho-family GTPases, **270,** 892
- Transcriptional interference
  - between NF-κB RelA and p53, p300/CBP-dependent and -independent processes, **272,** 375
- Transcriptional repressor
  - promoter-specific DNA-binding-independent, thyroid transcription factor 2 characterization as, **275,** 203
- Transcription factor A
  - mitochondrial, binding to four-way DNA junction (human), **271,** 492
- Transcription factors
  - basal, formation of complex with mammalian proteasomal ATPase MSS1, **279,** 568
  - Cbfa1, for bone and cartilage (mouse), **276,** 813
  - GCMa/GCM1, gene encoding, genomic organization, chromosomal localization, and complete 22-kb DNA sequence (human), **278,** 134
  - maintenance in serum-free long-term cultures of human hepatocytes, **269,** 46
  - Qin, targeting of Qik serine–threonine kinase, **276,** 564
- Transcytosis
  - peptide-mediated, phage display vectors in MDCK cells, **276,** 251
- Transdifferentiation
  - associated mRNAs and proteins, AGE-mediated induction by LECs in bovine lens epithelial explants, **275,** 53
- Transfection
  - small c-myc DNA sequence, morphological effects on X-ray-induced partially transformed human cells, **272,** 887
- Transfer RNA
  - precursor tRNA^{Phe} bearing single mismatch in acceptor stem, *E. coli* RNase P catalysis with, effects of C5 protein, **268,** 136
- Transformation
  - fibroblasts by hepatitis C virus NS4B in cooperation with Ha-*ras* oncogene (NIH3T3 cells), **267,** 581
  - and genetic method, combined technique for verification of protein–protein interactions in yeast two-hybrid system, **277,** 589
  - X-ray-induced, suppression by extremely low-frequency magnetic fields (C3H10T1/2 cells), **271,** 323
- Transforming growth factor α
  - gene expression in liver regenerative models (rat), **272,** 591
- Transforming growth factor β
  - age-related effects on proteoglycan synthesis in articular cartilage (horse), **274,** 467
  - effect on pRB phosphorylation and pRB–E2F complex formation (human), **276,** 930
  - expression in cell lines positive for HPV-16 oncoproteins, **277,** 55
  - matrix proteins induced by, modulation of cellular response to cytotoxic effect of TNF in L929 fibroblasts, **267,** 194
  - related gene from T84 intestinal cells, identification (human), **276,** 660
  - secretion by vascular endothelial and smooth muscle cells, effect of homocysteine, **272,** 182
  - sensitivity of Cdk4-overexpressing mink lung epithelial cells to, restoration by pyridopyrimidines, **272,** 794
- Transforming growth factor β1
  - enhancement of lectin-like oxidized LDL receptor-1 expression (bovine, mouse), **272,** 357
  - expression
    - association with *in vivo* sciatic nerve regeneration enhanced by conditioning lesion to contralateral nerve (rat), **267,** 715
    - in liver regenerative models (rat), **272,** 591
    - suppression of, effects on cell cycle and β-1,4-galactosyltransferase 1 gene expression in hepatocarcinoma cells (human), **273,** 833
  - inhibition of BRCA1 expression via pRb-dependent pathway, **276,** 686
  - mediation of suppression of dipeptidyl peptidase IV mRNA expression in pokeweed mitogen-stimulated T cells by DP IV inhibition (human), **274,** 410
  - modulation
    - of $\alpha5\beta1$ integrin expression and integrin-mediated signaling in hepatocarcinoma cells (human), **274,** 519
    - of membrane-bound and soluble RANKL expression (mouse), **275,** 768
    - of urokinase production and cellular invasiveness in transformed keratinocytes, role of Ras/MAPK signaling pathway, **273,** 521
  - mRNA, ribozyme to, inhibition of vascular smooth muscle cell proliferation (human), **278,** 401
  - promotion of glioma cell migration via upregulation of $\alpha_V\beta_3$ integrin expression, **268,** 607
  - regulation of HGF/SF expression in fibroblasts (MRC-5 cells), **271,** 203
- Transforming growth factor β2
  - promotion of glioma cell migration via upregulation of $\alpha_V\beta_3$ integrin expression, **268,** 607

Transgenes
  encoded by adenoviral vector, effect on vector cytotoxicity, **274,** 767
  site-specific integration by adenovirus/adeno-associated virus vector using Cre/*loxP*-expression-switching system, **273,** 473
  T cell receptor, glucocorticoid resistance in thymocytes from mice expressing, **276,** 189
Transgenic mice
  Cre-mediated gene mutation in mouse brain restricted to cerebellum and hippocampus, **269,** 149
  effects of multiple copies of β-lactoglobulin promoter (mouse), **272,** 284
  Emx1-specific expression of foreign genes using knock-in approach, **270,** 978
  expressing dominant negative form of retinoic acid receptor, accelerated growth of hepatocytes in association with cyclin E upregulation, **278,** 229
  overexpressing Csx/Nkx2-5, upregulation of natriuretic peptides in ventricle, **270,** 1074
  spermatocyte-specific gene excision by targeted expression of Cre recombinase, **272,** 125
Transglycosylation
  6-*O*-α-glucopyranosyl-glucopyranose synthesis, **274,** 99
trans-Golgi network
  retention of ADAM 12-L (human), **275,** 261
Transition metal ions
  water-soluble free radical sources, induced lipid peroxidation in small and large phospholipid unilamellar vesicles, **273,** 72
Transketolase
  conformation, effects of substrates, **275,** 968
  gene expression during development, alterations in metallothionein-null mice, **270,** 458
Translation
  apolipoprotein B48 and B100, comparison in cells with increased endogenous Apo B mRNA, **273,** 1156
  CAT mRNA in *Escherichia coli,* epsilon as initiator of, **273,** 528
  cell-free, inhibition by quinqueginsin isolated from American ginseng roots, **269,** 203
  defects, in *Escherichia coli* mutants deficient in Um$_{2552}$ 23S rRNA methyltransferase RrmJ/FTSJ, **271,** 714
  enhancing activity of ε in *Escherichia coli* and *Agrobacterium tumefaciens,* **269,** 508
  heterologous RNA, enhancement by region in 3′ UTR of MnSOD RNA, **272,** 164
  in vitro extracts supporting, preparation from *Drosophila* ovaries and embryos and characterization, **270,** 473
  SOCS-1 major open reading frame, repression by upstream ORF, **268,** 255
Translation initiation factor
  eIF4G, overproduction, effect on cap- and IRES-dependent protein synthesis in mouse mammary carcinoma cells, **277,** 117
Translin
  partial localization in centrosomes during mitosis *(Xenopus),* **276,** 515
Transmembrane domain
  induction of expression of mammalian genes with, growth suppression of *E. coli* by, **268,** 553
Transmembrane proteins
  five-span, M83, gene cloning and chromosomal mapping (human, mouse, rat), **276,** 244
Transplantation
  normal and DMD myoblasts expressing telomerase gene in SCID mice, **272,** 362
  retinal progenitors into subretinal space, survival and differentiation *in vitro* (rat), **268,** 842
  tumor, hepatic zinc response via metallothionein induction after, **270,** 1140
Transport
  p-aminohippuric acid at renal apical membrane, mediation by human inorganic phosphate transporter NPT1, **270,** 254
  endosomes containing LDL in brain astroglial cells, digital fluorescence imaging, **269,** 25
  glucose, insulin-stimulated, implications of quantitation of SNARE protein levels in 3T3-L1 cells adipocytes, **270,** 841
  GSH into mitochondria, role of voltage-dependent anion channels (yeast), **276,** 940
  oocyte, regulation by SepOvotropin *(Sepia officinalis),* **276,** 1013
  sodium-dependent multivitamin transport, electrogenic nature (rat), **270,** 836
Transposition
  Tn5, stimulation by magnetic field in *E. coli* via induction of DnaK/J synthesis, **270,** 745
Transthyretin
  with met30 mutation, expression in HepG2 cells, inhibition using inosine$^{15.1}$-hammerhead ribozymes, **279,** 970
  two variants with protective effects on familial amyloidotic polyneuropathy, comparison, **270,** 1024
  wild-type, role in formation of cardiac amyloid in familial amyloid polyneuropathy patients, **274,** 702
βTRCP2 gene
  on chromosome 5q35.1, molecular cloning and genomic sequence (human), **269,** 103
Trefoil factor 3
  antianoikic function on intestinal epithelial IEC-18 cells, signaling by NF-κB, **274,** 576
Tributyltin
  effect on apoptosis in PC12 cells, **272,** 557
Trichosanthin
  interaction with and entry into cells via LDL receptor family members (JAR cells), **270,** 453
  mini-trichosanthin with lower antigenicity, engineering by deletion of C-terminal domain, **270,** 279
Trichostatin A
  inhibition of IL-1-dependent induction of haptoglobin, role of CCAAT/enhancer-binding protein isoforms (IEC-6 cells), **276,** 673
Triglycerides
  intracellular, increase in C$_2$C$_{12}$ muscle cells transfected with human lipoprotein lipase, **270,** 997
  serum, lowering by fenofibrate and rosiglitazone (mouse, rat), **271,** 445
Triiodothyronine
  regulation of rat liver carnitine palmitoyltransferase I gene transcription, **279,** 81
2,7,8-Trimethyl-2-(δ-carboxymethylbutyl)-6-hydroxychroman
  secretion by HepG2 cells and excretion in human urine, **269,** 580
Trimethylpsoralen
  and UV and ethyl methanesulfonate, mutations induced in *Caenorhabditis elegans* by, **269,** 64
Tripeptidyl peptidase-I
  endopeptidase activity, characterization, **268,** 904
TrkA
  gene expression in lead nitrate-induced hepatic hyperplasia (rat), **275,** 472
TrkB
  gene expression in lead nitrate-induced hepatic hyperplasia (rat), **275,** 472
  T1 isoform, TTIP identification as protein interacting with, **279,** 925
TrkC
  gene expression in lead nitrate-induced hepatic hyperplasia (rat), **275,** 472
Tröger base
  proflavine-derived, enantiospecific recognition of DNA sequences, **273,** 681
Troglitazone
  effect on vascular endothelial growth factor expression in vascular smooth muscle cells (human), **271,** 571

  - effect on vascular smooth muscle cell activation by angiotensin II (rat), **273,** 1144
  - inhibition of aromatase in ovarian granulosa cells (human), **271,** 710
  - inhibition of lung cancer cell growth via induction of apoptosis (human), **270,** 400
  - repression of TNF-α-induced E-selectin expression, role of LRF-1/ATF3 (human), **275,** 406
- Trophoblastic cells
  - hypoxia-induced expression of 43-kDa protein PROXY-1 (human), **276,** 321
  - Na-K-Cl cotransporter in, identification and biochemical localization (BeWo cells), **274,** 43
- Tropomyosin
  - –actin, activation of myosin-ATPase, role of actin residues 230 and 236, **275,** 428
  - –troponin, actin binding, effect on filament bending stiffness (rabbit), **276,** 1225
- Troponin
  - –tropomyosin, actin binding, effect on filament bending stiffness (rabbit), **276,** 1225
- Troponin I
  - isoform switching, role in pH sensitivity of Ca^{2+} regulation in developing cardiac muscle (rabbit), **267,** 912
  - phosphorylation by protein kinase A, effect on length dependence of tension activation in skinned cardiac muscle fibers, **272,** 104
- *Trypanosoma brucei*
  - RNase HI domain organization, functional analysis, **270,** 336
- *Trypanosoma cruzi*
  - cruzipain, inhibition by nitric oxide, **270,** 437
  - sensitivity to α-difluoromethylornithine and metabolic turnover of ornithine decarboxylase, **279,** 663
- Trypanosomatid protozoa
  - sensitivity to α-difluoromethylornithine and metabolic turnover of ornithine decarboxylase, **279,** 663
- Trypsin
  - activation of prorenin, role of prosegment, **267,** 577
  - bovine pancreatic, cleavage of proteinase-activated receptor-2, **275,** 77
  - chromogenic substrates based on proteinase binding loop of *Cucurbita maxima* trypsin inhibitor, synthesis, **269,** 81
- Trypsin-2
  - extrapancreatic, cleavage of proteinase-activated receptor-2 (COLO-205 cells), **275,** 77
- Trypsin inhibitor
  - Kunitz family, identification in skin secretions of tomato frog, **279,** 961
  - mini-trypsin inhibitor derived from oil rape proteinase inhibitor type III, expression, purification, and oxidative refolding, **275,** 817
  - proteinase binding loop, trypsin chromogenic substrates based on, synthesis (*Cucurbita maxima*), **269,** 81
- Trypsin-like serine protease
  - hippostasin, kallikrein-like, expressed in human brain and prostate, **272,** 205
- Trypsinogen
  - autoactivation, inhibition by high affinity binding of calcium (rat), **275,** 668
  - cationic, autoactivation, enhancement by gain-of-function mutations associated with hereditary pancreatitis (human), **278,** 286
- Tryptophan
  - and derivatives, fluorescence, effects of pressure, **269,** 681
  - in proximity to His and Cys, as essential to active site of alkaline protease, **270,** 910
  - residue 67 in $VPAC_1$ receptor, role for VIP binding (human), **276,** 654
  - role in copper reduction by prion protein N-terminal tandem repeat region (human), **269,** 491
  - side chains in dimerization and hinge regions of HIV-1 protease tethered dimer, unfolding kinetics by real-time NMR, **269,** 387
- Tryptophanamide
  - fluorescence, effects of pressure, **269,** 681
- Tryptophan 2,3-dioxygenase
  - induction in endometrium during implantation (mouse), **274,** 166
- Tryptophan octyl ester
  - fluorescence emission properties, effects of reverse micellar environments, **277,** 13
- *Tsc2* gene
  - Eker mutant rat model of renal cell carcinoma, *Erc* gene preferentially expressed in, mapping and cDNA sequence, **275,** 134
  - and *Nthl1* gene, bidirectional promoter between, identification of functional elements in, **273,** 1063
- TSC-22
  - nuclear translocation concomitant with apoptosis, transcriptional regulatory activity after, **278,** 659
- TSH, *see* Thyrotropin
- T/t antigen
  - SV40, induction of hepatocarcinogenesis in transgenic mice, association with *mac25* gene methylation and downregulation, **267,** 109
- TTIP
  - identification as protein interacting with truncated T1 TrkB neurotrophin receptor, **279,** 925
- TT virus
  - DNA, replicative forms in human bone marrow cells, **270,** 657
  - highly divergent European isolates, complete sequences, **271,** 837
  - human, genotype 1a, transmission to chimpanzees with fecal supernatant or serum from acutely infected patients, **278,** 470
  - mRNA, detection in bone marrow cells from infected individual, **279,** 700
  - particles recovered from sera and feces of infected humans, visualization, **279,** 718
- TUBA8
  - cloning and sequencing: tissue-specific α-tubulin isoform highly conseved in human and mouse, **270,** 1111
- Tubulin
  - association with heat shock protein 27 in HeLa cells, **271,** 164
  - decreased vincristine binding to, in vinca alkaloid-resistant DC-3F Chinese hamster cells, association with overexpression of α and β tubulin isoforms, **269,** 21
- β-Tubulins
  - cold-adapted, conferral of cold tolerance to microtubules (human), **269,** 787
- Tubulointerstitial nephritis antigen
  - molecular cloning, expression, and chromosomal localization (human), **268,** 225
- Tubulointerstitial nephritis antigen-related protein
  - gene cloning, characterization, and expression (human), **271,** 474
- Tumor cells
  - antibiotic activity of CRAMP analogues without hemolytic effect, **275,** 904
  - antiproliferative and preapoptotic activities of apomine, **270,** 240
  - apoptosis, induction by conjugated eicosapentaenoic and docosahexaenoic acids *in vitro,* role of lipid peroxidiation (human), **270,** 649
  - Bax-σ expression (human), **270,** 868
  - *REIC* gene downregulation (human), **268,** 20
  - various human cell lines, Down syndrome critical region gene 2 expression, **272,** 156
- Tumorigenesis
  - hepatic, in SV40 T/t antigen transgenic mice, association with *mac25* gene methylation and downregulation, **267,** 109
  - human papillomavirus-associated, mouse fibroblast model for study of, **270,** 119
  - renal cancer, possible role of phospholipase D2 (human), **278,** 140
  - in transgenic mice expressing Reg I, **278,** 368

Tumorigenicity
  suppression in HeLa cells by chronic IFN-α exposure, **277,** 410
Tumor necrosis factor
  apoptosis induced by, NF-κB signaling events in suppression of, regulation by PI3-K/AKT (MCF-7 cells), **271,** 342
  cytotoxicity, cellular response to, modulation by TGF-β-induced matrix proteins in L929 fibroblasts, **267,** 194
  β2-integrin upregulation on neutrophils induced by, intracellular signaling pathways, **270,** 858
  mouse L929 cells induced by, localization of active form of caspase-8, **270,** 972
  NF-κB signaling pathway induced by, block by E-73, **277,** 330
Tumor necrosis factor α
  apoptosis induced by
    enhancement by immobilized arginine-glycine-aspartate (rat), **277,** 293
    resistance of lung cancer cells to, role of NF-κB activation, **273,** 140
  cell death induced by, attenuation by overexpression of protein kinase C-η (MCF-7 cells), **279,** 103
  endothelial cell apoptosis induced by, protective effect of high-density lipoprotein (human), **272,** 872
  endothelial VCAM-1 induction by, reduction by K-7174 via regulation of GATA (human), **272,** 370
  expression in cell lines positive for HPV-16 oncoproteins, **277,** 55
  gene expression, stress-induced activation in murine pancreatic acinar cells, **268,** 485
  human umbilical vein endothelial cells stimulated with, accumulation of phosphodiesterase 4D and 7A mRNA, **274,** 415
  and IFN-γ, synergistic induction of apoptosis in hepatoma Hepa1-6 cells, **272,** 674
  and IL-4, synergistic effects on expression of thymus- and activation-regulated chemokine in human corneal fibroblasts, **279,** 1
  and IL-6, LPS-induced production in mouse peritoneal neutrophils, differential modulation by prostaglandin E_2 receptors EP2 and EP4, **278,** 224
  induction
    by endothelin-converting enzyme-1 upregulation in response to *Helicobacter pylori* lipopolysaccharide (mouse), **267,** 801
    in mammalian cells by macromolecular from *Enterococcus hirae,* **273,** 164
  LPS-stimulated secretion, mRNA levels, and mRNA stability in macrophages, augmentation by IgG-coated erythrocytes, **271,** 70
  macrophage inflammatory protein-2 expression induced by, inhibition by dexamethasone (mouse), **271,** 364
  modulation of membrane-bound and soluble RANKL expression (mouse), **275,** 768
  NF-κB activation dependent on, in human osteoblastic HOS-TE85 cells, effect of vector-averaged gravity using clinostat rotation, **279,** 258
  NF-κB activation in MCF-7 breast cancer cells induced by, inhibition by 17β-estradiol by increasing NF-κB p105 level, **279,** 47
  NF-κB and MCP-1 expression activation dependent on, in human aortic SMCs, effects of pyrrolidine dithiocarbamate, **276,** 88
  release by human neutrophils, effects of HDL, apo AI, and serum amyloid A, **268,** 405
  secretion by vascular endothelial and smooth muscle cells, effect of homocysteine, **272,** 182
  E-selectin expression induced by, repression by PPAR activators, role of LRF-1/ATF3 (human), **275,** 406
  stimulation of MCP-1 expression, mediation by Akt/PKB signal transduction pathway (HUVEC), **276,** 791
  tumor cell vascular endothelial cell sensitivity to, *in vitro* study, **268,** 809
  upregulation of angiopoietin-2 in human umbilical vein endothelial cells, **269,** 361
Tumor necrosis factor receptor
  p55, activation of ERK1/2 and cytosolic phospholipase A_2, role of FAN (mouse), **274,** 506
  type 1, interaction with HIPK2 in 293T cells, **277,** 513
Tumor necrosis factor receptor-associated factor 2
  translocation, regulation of apoptotic threshold of cells (HEK293 cells), **272,** 936
Tumor necrosis factor receptor-associated factor 3
  amino- and carboxy-terminal domains, negative regulation of NF-κB activation induced by OX40 signaling, **272,** 856
Tumor necrosis factor-related activation-induced cytokine, *see* Osteoclast differentiation factor
Tumors
  extracellular cAMP-dependent protein kinase as marker of, biochemical characterization, **278,** 679
  growth, DNA fragmentation in skeletal muscle during, relationship to cancer cachexia (mouse, rat), **270,** 533
  metastasis, regulation by thromboxane A_2 (mouse), **267,** 245
  vasculature, monoclonal antibody TES-23 targeting, recognition of human activated CD44, **269,** 671
Tumor suppression
  by Fhit protein (human), **278,** 205
  protein-tyrosine phosphatase HD-PTP gene as candidate gene for, analysis (human), **278,** 671
Tumor vascular endothelial cells
  remodeling *in vitro* with conditioned medium from tumor cells, and sensitivity to TNF-α, **268,** 809
Tunichromes
  biosynthetic origin, analysis with plicatamide (*Styela plicata*), **270,** 421
TWEAK
  mRNA, downregulated expression in acute and chronic inflammatory pathologies, **279,** 162
Two-pore channel 1
  with structure related to voltage-gated sodium and calcium channels, molecular cloning (rat), **270,** 370
Ty1 retrotransposon
  life cycle, effects of mutations in yeast *DBR1* gene, **268,** 112
Ty3 retrotransposon
  life cycle, effects of mutations in yeast *DBR1* gene, **268,** 112
Tyk2 kinase
  formation of complex involving Vav and Ku80, promotion by IFN-α signaling, **267,** 692
Tyramine oxidase (FAD-containing)
  purification, cloning, and 3D structure (*Micrococcus luteus*), **268,** 293
Tyrosinase
  endoplasmic reticulum-associated degradation, role of oligosaccharide trimming, **271,** 22
  expression cassettes, flanking with chicken β-globin 5′HS4 insulators: reduction of variability in transgenic founder mice, **273,** 1015
Tyrosine
  catalytic role of Tyr-180 in D-xylose/dihydrodiol dehydrogenase, **278,** 333
  functional role in PepT1, **272,** 726
  nitration and phosphorylation, alteration by nitrite inhalation (rat), **275,** 335
  residues in p53, nitration by nitric oxide in MCF-7 cells, **267,** 609
  RON receptor tyrosine kinase C-terminal Y1330 and Y1337, role in epithelial cell scattering and migration, **267,** 669
Tyrosine hydroxylase
  for catecholamine synthesis, effects of orexins in cultured PC12 cells, **274,** 310
  gene promoter, Nurr1 response element activating, identification in cultured cells, **274,** 590
  identification as autoantigen in autoimmune polyendocrine syndrome type I (human), **267,** 456

- Tyrosine phosphorylation
  - ACK1-dependent, activation of guanine nucleotide exchange factor Dbl following, **268,** 141
  - adhesion-dependent, Enabled in *Drosophila* neuronal cell line, **270,** 482
  - alteration by nitrite inhalation (rat), **275,** 335
  - CrkII adaptor protein, role in differential interaction with platelet-derived growth factor α and β receptors, **270,** 28
  - focal adhesion kinase, stimulation by sphingosine 1-phosphate in endothelial cells via G_i protein-linked PLC pathway, **268,** 47
  - Gab1 and Gab2, induction by Flt3 ligand, **277,** 195
  - H_2O_2-induced, protein kinase Cδ independently of protein-tyrosine phosphatase inhibition (CHO, COS-7 cells), **273,** 960
  - induction by contortrostatin by pathway differing from that for ERK2 activation, **274,** 142
  - induction by ubiquitin-like polypeptide in T helper clone type 2 (mouse), **274,** 565
  - myelin P_0, implications for signal transduction, **267,** 820
  - $p125^{FAK}$ and paxillin in pancreatic acini, stimulation by NO (rat), **274,** 635
  - in RBL-2H3 mast cells, effect of diphenyleneiodonium (rat), **276,** 742
  - receptor protein-tyrosine phosphatase α, induced by pervanadate, role of membrane distal catalytic domain, **267,** 96
  - role in inhibition by epigallocatechin gallate of histamine release from basophilic leukemia RBL-2H3 cells, **274,** 603; *erratum,* **276,** 391
  - STATs induced by cytokines of IL-6 family, inhibition by parthenolide, **267,** 329
- Tyrphostin AG-490
  - JAK2 blockade by, effect on antigen-induced eosinophil recruitment into mouse airways, **270,** 209

U

- *U2afbp-rs/U2af1-rs1*
  - oocyte-specific methylated region, role in imprinted methylation, **268,** 590
- U5-15kD/dim1p
  - interaction with PQBP-1/Npw38 via C-terminal domain, **273,** 592
- U0126
  - anti-inflammatory response *in vivo* (mouse ear), **268,** 647
- U937 cells
  - differentiated, VEGF production, upregulation by prostaglandins via distinct pathways, **273,** 485
  - differentiation and apoptosis induction by recombinant modulin P48 derived from *Mycoplasma fermentans,* **269,** 284
  - electroporated, apoptosis induction by introduced DNA, **270,** 94
  - α1,3-fucosyltransferase 4 gene expression and transcriptional regulation, **273,** 370
  - raft membrane microdomains, association of aminopeptidase N/CD13 with, **269,** 143
  - secretion of 92-kDa gelatinase *in vitro,* effects of *p*-nonylphenol, **279,** 270
- U-74389G
  - prevention of gp120-induced apoptosis in neocortex (rat), **274,** 664
- Uba80
  - and pseudogene, structure (human), **270,** 1106
- Ubc9
  - interaction with Fas-binding protein Daxx, **279,** 6
- Ubiquinol–cytochrome-*c* oxidoreductase
  - combined enzymatic complex I and III deficiency associated with mutations in nuclear-encoded *NDUFS4* gene, **275,** 63
- Ubiquitin
  - identification as immunophilin, **277,** 325
  - –proteasome proteolytic pathway, in heart and skeletal muscle, effect of acute diabetes (rat), **276,** 1255
  - *Ubc* gene expression, evaluation: characterization of rat promoter and 3′ mRNA sequence, **274,** 537
- Ubiquitin carboxyl-terminal hydrolase
  - 26S proteasome-associated, identification in fission yeast, **272,** 270
- Ubiquitin-conjugating enzymes
  - noncanonical family structurally related to yeast UBC6, identification, **269,** 474
- Ubiquitin fusion gene
  - Uba80, and pseudogene, structure (human), **270,** 1106
- Ubiquitin ligase E3
  - associated activity of *Drosophila* von Hippel-Lindau tumor suppressor complex, **276,** 355
- Ubiquitin ligase E3α
  - gene expression upregulation in skeletal muscle during sepsis, and role of glucocorticoids (rat), **267,** 504
- Ubiquitin-like polypeptide
  - induction of protein tyrosine phosphorylation in T helper clone type 2 (mouse), **274,** 565
- Ubiquitin-like protein
  - Nedd8, modification of cullin, enhancement of SCF^{skp2} activity toward $p27^{kip1}$, **270,** 1093
- UDPglucose dehydrogenase
  - gene cloning and transcription start mapping (human), **275,** 981
- UDPglucose 4-epimerase
  - ldlD cells deficient in, glycosylation, effect on translocation of integrin, Src, and caveolin into or out of glycolipid-enriched microdomain, **273,** 159
- UDPglucose pyrophosphorylase
  - overexpression, rescue of galactose-1-phosphate uridyltransferase-deficient yeast, **271,** 392
- UDP-glucuronosyltransferase
  - association with cytochrome P450 1A1, **273,** 1048
  - isoforms in small bowel and Caco-2 cell monolayers, immunochemical identification (human), **273,** 1053
  - *UGT2B7* gene isolation and characterization (human), **272,** 616
- UDP-sugar hydrolase
  - gene cloning and characterization (*Enterobacter aerogenes*), **269,** 526
- UEA 1
  - mode of recognition of L-fucose (*Ulex europeus*), **268,** 262; *erratum,* **270,** 329
- *UGT2B7* gene
  - isolation and characterization (human), **272,** 616
- UL37 protein
  - HSV-2, nuclear export signal identification, **276,** 1248
- Ulcers
  - buccal mucosal, healing, endothelin-converting enzyme-1 suppression during, effect of chronic alcohol ingestion (rat), **271,** 318
- Ultralow-light imaging
  - reactive oxygen species in live mouse skin exposed to UVA, **269,** 131
- Ultramicro-enzyme-linked immunosorbent assay
  - chimeric synthetic peptide evaluation as antigen for diagnosis of HIV-1 infection, **272,** 259
- Ultrasound
  - low-intensity pulsed, anabolic response of mouse ST2 bone marrow-derived stromal cells, **268,** 216
- Ultraviolet light
  - genes sensitive to, detection by differential mRNA display and role of Rheb in UV susceptibility (human), **274,** 859
  - induction of stress-activated protein kinase p38γ activation in melanoma cells (human), **278,** 724
  - and trimethylpsoralen and ethyl methanesulfonate, mutations induced in *Caenorhabditis elegans* by, **269,** 64
  - UVA
    - induction of heme oxygenase-1 in lens epithelial cells, relationship to *cis*-aconitase activity, **270,** 324
    - live mouse skin exposed to, reactive oxygen species in, chemiluminescence detection and imaging, **269,** 131

- Ultraviolet light (*continued*)
  - UVB
    - induction of cell cycle arrest in G2/M phase in immortalized skin keratinocytes with defective p53, mechanism, **277,** 107
    - sensitivity of duckweed, **276,** 970
    - suppression of apoptosis: survival signaling via PI3-kinase/Akt pathway (NIH3T3 cells), **279,** 872
- Umbilical artery
  - effect of endothelin-1 (1-31) (human), **270,** 622
  - homocysteine-induced vasoconstriction, protective effect of melatonin (human), **277,** 470
- Umbilical vein
  - eicosanoid gene expression and metabolite production, effects of shear stress, in biomechanical perfusion model (human), **269,** 257
  - intact, vascular endothelial growth factor regulation by exposure to laminar fluid shear stress and pressure, (human), **272,** 490
- 2′-UMP
  - ribonuclease MC1 complexed with, crystal structure: structural basis for uridine specificity (bitter gourd), **275,** 572
- 3′-UMP
  - ribonuclease MC1 complexed with, crystal structure: structural basis for uridine specificity (bitter gourd), **275,** 572
- Uncoupling protein 1
  - gene expression, effect of disruption of *klotho* gene (mouse), **278,** 665
  - mRNA expression in lipomas from patients bearing pathogenic mitochondrial DNA mutations, **278,** 800
- Uncoupling protein 2
  - expression in 3T3-L1 preadipocytes, upregulation by dietary fatty acids, **277,** 541
  - gene regulation in brain during cold exposure and aging (rat), **278,** 691
- Uncoupling protein 3
  - expression in cultured fetal brown adipocytes, synergistic activation by PPARα and PPARγ ligands (rat), **273,** 560
  - mRNA levels in skeletal muscle and adipose tissue, increase after systemic EGF administration (rat), **279,** 914
- Uncoupling proteins
  - UCP1 and UCP3 chimeric proteins, in analysis of UCP1 activation by fatty acids (human, rat), **276,** 642
- Unfolded protein response
  - gene regulation during, in human cells, **278,** 530
  - induction by Kar2p/BiP dissociation from Ire1p in yeast, **279,** 445
- Unfolding kinetics
  - tryptophan side chains in dimerization and hinge regions of HIV-1 protease tethered dimer, real-time NMR study, **269,** 387
- Unnatural amino acids
  - sense codon-dependent introduction into multiple sites of protein, **270,** 1136
- Uracil
  - DNA containing, excision repair in oocyte mitochondrial extract (*Xenopus laevis*), **278,** 395
- Urea
  - bovine serum albumin unfolding induced by, analysis with domain-specific ligands, **277,** 83
  - and hyperosmotic NaCl, synergistic regulation of UT-A2 urea transporter expression in mIMCD3 cells and rat, **271,** 368
- Urea cycle enzymes
  - gene regulation in rat liver in endotoxin shock, **268,** 221
- Urea transporter
  - UT-A2, expression in mIMCD3 cells and rat, synergistic regulation by hyperosmotic NaCl and urea, **271,** 368
- Uridine
  - ribonuclease MC1 uridine specificity for, structural basis (bitter gourd), **275,** 572
- Urine
  - concentrating of, defect in, induction by disruption of aldose reductase gene (mouse), **277,** 281
  - excretion of 5′-carboxychroman metabolite of γ-tocopherol in, analysis (human), **269,** 580
  - 6-furfuryladenine identification (human), **279,** 69
  - serotonin metabolite levels, effect of volitional ethanol consumption (Syrian golden hamster), **271,** 823
- Urokinase plasminogen activator receptor
  - soluble, promotion of cell adhesion and tyrosine-92 role in activation of p56/59^{hck}, **278,** 440
  - transcription, regulation by Ras- and Rho-family GTPases, **270,** 892
- Urokinase-type plasminogen activator
  - mRNA, 3′ untranslated region, binding of 50-kDa protein, induction by TCDD, **272,** 441
  - production in transformed keratinocytes, modulation by TGF-β_1, role of Ras/MAPK signaling pathway, **273,** 521
- Uterus
  - genes involved in implantation, determination by application of GeneChip (mouse), **272,** 531
  - genistein treatment, effective dosage: comparison with bone in ovariectomized mouse, **274,** 697
  - immunoglobulin binding factor mRNA expression in cervix, hormonal control (human), **279,** 898
  - tetrodotoxin-resistant voltage-gated sodium channel α subunit NaT/Scn11a expression (mouse), **267,** 271
- 3′-UTR
  - *ctgf* 3′-UTR segment mediating repressive regulation of gene expression, characterization (mouse), **278,** 119
  - α-globin mRNA, stability element in, proteins recognized by, differentiation-dependent cytoplasmic distribution and *in vivo* RNA association in erythroleukemic cells, **279,** 40

V

- V3 peptide
  - gp120, activation of FPRL1 in monocytes, CCR5 phosphorylation and attenuated selected chemokine responses by, **272,** 276
- Vacuolar H$^+$-ATPase
  - 16-kDa subunit, overexpression in 10T1/2 fibroblasts, enhancement of invasion with concomitant MMP-2 induction, **278,** 390
  - role in refilling of thapsigargin- and agonist-mobilized Ca^{2+} stores (mouse), **271,** 311
  - subunit D, VPATPD gene encoding, structure (human), **279,** 543
  - subunit G2, association of L-type calcium channels with, **277,** 611
- Vacuolar protein sorting 29
  - human homologue of yeast protein, **277,** 622
- Vacuolar protein sorting 35
  - human homologue of yeast protein, **277,** 622
- Vacuolating toxin
  - GST–VacA fusion, analysis: exotoxin C-terminal ~100-residue segment role in binding to HeLa cells, **278,** 449
- VAMP-7
  - expression in granule membranes of basophilic leukemia cells (rat), **271,** 36
- Vanadate
  - complexes with hydroxamic acids, inhibition of serine amidohydrolases, **274,** 732
  - effect on ATP hydrolysis by cystic fibrosis transmembrane conductance regulator, **271,** 518
- Vanadocene dichloride
  - spermicidal activity, boar sperm as model system for study of, **270,** 826
- Vanadocenes
  - spermicidal activity mechanism, boar sperm as model system for study of, **270,** 826

- Vancomycin
  - *Staphylococcus aureus* strains Mu3 and Mu50 resistant to, up- and down-regulated genes in, identification, **269,** 485
- Vanin-3
  - gene expression during development, alterations in metallothionein-null mice, **270,** 458
- VAP27
  - plant VAP33 homologue with major sperm protein domain, molecular cloning and characterization, **270,** 286
- Vascular apoptosis-inducing protein 1
  - cDNA cloning and characterization (*Crotalus atrox* venom), **278,** 197
- Vascular cell adhesion molecule-1
  - endothelial, induction by inflammatory cytokines, reduction by K-7174 via regulation of GATA (human), **272,** 370
  - expression in vascular endothelial cells, selective inhibition by α-tocopherol (human), **274,** 609
- Vascular endothelial growth factor
  - expression
    - analysis in mouse fibroblast model of HPV-associated tumorigenesis, **270,** 119
    - in cell lines positive for HPV-16 oncoproteins, **277,** 55
    - by oncogene-transformed cell lines, differential regulation by ERK and p38 kinase pathways (rat), **270,** 108
    - in vascular smooth muscle cells, increase by peroxisome proliferator-activated receptor γ agonists (human), **271,** 571
  - expression and secretion in rat ventricular myocytes, effects of LPS, **268,** 657
  - and hepatitis B virus X protein role in hypoxia-induced angiogenesis, **268,** 456
  - improved expression by naked DNA in mouse skeletal muscles, **272,** 230; *erratum,* **276,** 390
  - mRNA, expression in GI-707A and HL-60 cell lines, **270,** 709
  - production, upregulation by prostaglandins via distinct pathways in differentiated U937 cells, **273,** 485
  - regulation in intact conduit vessels exposed to laminar fluid shear stress and pressure (human), **272,** 490
  - secretion
    - from murine HECa10 endothelial cells, effects of somatostatin and octreotide, **268,** 567
    - by prostate and breast cancer epithelial cells, inhibition by silymarin, **276,** 371
  - transcriptional activation induced by hypoxia, inhibition by serum, **267,** 334
- Vascular endothelial growth factor receptor-2
  - response of Kaposi's sarcoma cells of different origin to HIV-Tat through, **273,** 267
- Vascular smooth muscle cells
  - activation by angiotensin II, effects of thiazolidinediones (rat), **273,** 1144
  - antimitogenic effects of estradiol, estrogen receptor-independent mediation by methoxyestradiols (rat), **278,** 27
  - aortic, angiogenin internalization and processing *in vitro* (human), **267,** 719
  - AT1 receptor internalization and cell growth, effects of ATRAP (rat), **279,** 938
  - calponin expression *in vitro,* increase by angiotensin II (rat), **279,** 965
  - endothelin ET-1 (1–31) biological activity in, analysis (pig), **275,** 595
  - lectin-like oxidized LDL receptor-1 expression, increase by TGF-β_1 (bovine), **272,** 357
  - linkage between Jak/STAT signaling pathway and α_1-adrenergic receptor (human), **268,** 25
  - monocyte chemoattractant protein-1 expression, effect of nonenzymatically glycated albumin (rat), **269,** 666
  - nitric oxide production and nitric-oxide synthase expression, effect of hypoxia (rat), **268,** 329
  - nitric-oxide synthase 2 expression, inhibition by retinoic acid through RARα (rat), **270,** 846
  - nuclear protein binding to antioxidant/electrophile response element, activation by benzo[*a*]pyrene (mouse), **267,** 12
  - PAI-1 and tPA gene expression and secretion, effect of homocysteine (human), **272,** 182
  - proliferating, inositol 1,4,5-trisphosphate receptor subtype expression and distribution (rat), **273,** 907
  - proliferation
    - associated expression of procollagen COOH-terminal proteinase enhancer (rat), **270,** 1049
    - induced by AGEs, inhibition by resveratrol in stroke-prone spontaneously hypertensive rat, **274,** 61
    - inhibition by ribozyme to TGF-β1 mRNA (human), **278,** 401
  - proliferation and phenotype, control by integrin signaling through focal adhesion kinase (pig), **272,** 298
  - proline-rich tyrosine kinase 2/cell adhesion kinase β in, as redox-sensitive kinase (rat), **270,** 761
  - RAMP1 and CRLR mRNA expression, increase by dexamethasone (human), **270,** 1063
  - TNF-α-dependent activation of NF-κB and MCP-1 expression, effects of pyrrolidine dithiocarbamate (human aorta), **276,** 88
  - vascular endothelial growth factor expression, increase by peroxisome proliferator-activated receptor γ agonists (human), **271,** 571
- Vasoactive intestinal peptide
  - activation of G_s and G_{i3} in rat alveolar macrophages and G_s in HEK293 cells transfected with human $VPAC_1$ receptor, **272,** 922
  - binding, role of $VPAC_1$ receptor tryptophan 67 (human), **276,** 654
  - inhibition of osteoclast formation, association with osteoprotegerin upregulation and RANKL and RANK downregulation, **271,** 158
- Vasoactive intestinal peptide receptor
  - VIP-1, expression in microisolated osteoclasts (mouse), **274,** 400
  - $VPAC_1$
    - HEK293 cells transfected with, G_s activation by VIP (human), **272,** 922
    - tryptophan 67, role for VIP binding (human), **276,** 654
- Vasoconstriction
  - endothelin-1-induced, modulation by cholesterol by stimulation of pro-inflammatory pathway (rat), **274,** 553
  - umbilical artery, homocysteine-induced, protective effect of melatonin (human), **277,** 470
- Vasodilation
  - NO-dependent pial arteriolar, in female rat, effects of chronic estrogen depletion and repletion, **269,** 165
- Vasopressin V1a receptor
  - signaling in choroid plexus cell line (rat), **275,** 322
- Vaults
  - MVP/LRP gene promoter, cloning and initial analysis (human), **278,** 125
- Vav
  - nucleus-to-cytoplasm redistribution and formation of complex involving Ku80 and Tyk2, promotion by IFN-α signaling, **267,** 692
- VDUP1
  - interaction with thioredoxin in HeLa cells, detection in yeast two-hybrid system, **271,** 796
- Vector-averaged gravity
  - clinostat-generated, effect on TNF-α-dependent activation of NF-κB in human osteoblastic HOS-TE85 cells, **279,** 258
- Vectors
  - with hidden cloning sites, **271,** 534
  - of Shannon information, from Fourier signals characterizing base periodicity in genes and genomes, **268,** 289
- Velocity
  - single kinesin molecule, temperature dependence, **272,** 895

Ventricle
  cardiac, of Csx/Nkx2-5 transgenic mice, upregulation of natriuretic peptides, **270,** 1074
Ventrolateral thalamic nucleus
  fibroblast growth factor 23 expression (mouse), **277,** 494
Verapamil
  analogs modulating MRP1-mediated transport of leukotriene C_4 and reduced glutathione, structure–activity studies, **275,** 795
  downregulation of putative P-glycoprotein expression by arsenite-resistant *Leishmania donovani,* **271,** 615
v-ErbA oncoprotein
  activity, mimicry by exogenous c-Kit and EpoR signaling, **275,** 292
Vesicles
  catecholamine-containing, heterogeneity in PC12 cells, **270,** 625
  COP1, formation, implications of structure of p23 cytoplasmic domain in solution, **271,** 401
  small and large unilamellar, lipid peroxidation induced by water-soluble free radical sources, **273,** 72
Vesicular stomatitis virus
  inactivation by anilinonaphthalene sulfonates, **275,** 955
Vesl-1L/Homer 1c
  interaction with syntaxin 13, **272,** 466
v-Ha-Ras
  apoptosis dependent on, prevention by PDGF coordinates in phosphorylation of ERK and Akt (human), **267,** 33
Vibrio fischeri
  peptide transport and resistance to antimicrobial peptides, *sap* genes required for, identification and analysis, **269,** 743
Vibrio harveyi
  lux-specific thioesterase, mutation of nucleophilic elbow in, **275,** 704
Video-enhanced differential interference contrast microscope
  exocytosis in dissociated pancreatic acinar cells (guinea pig), **277,** 134
Vimentin
  binding of acetylated and oxidized LDL, **267,** 49
Vinca alkaloid resistance
  DC-3F Chinese hamster cells with, decreased vincristine binding to tubulin in, association with overexpression of α and β tubulin isoforms, **269,** 21
Vincristine
  decreased binding to tubulin in vinca alkaloid-resistant DC-3F Chinese hamster cells, association with overexpression of α and β tubulin isoforms, **269,** 21
Vinculin
  cells deficient in, cell mechanics, single-cell analysis with magnetic tweezer (F9 cells), **277,** 93
Virtual Transcribed Sequence project
  identification of human genes, **272,** 801
Visceral obesity
  tissues of rat model with, differential expression of lipoprotein lipase gene, **277,** 423
Viscoelasticity
  cell nucleus, properties (pig), **269,** 781
Viscumin
  recombinant, fusion protein with recombinant bFGF, cytotoxicity to B16 melanoma cells, **277,** 499
Visual imaging
  ion distribution in human epidermis, **272,** 134
Vitamin B_6
  peroral or ip, effects on intracellular cathepsin activities and immune responses (mouse), **272,** 151
Vitamin C
  modulation of repair of oxidatively damaged DNA in systemic lupus erythematosus (human), **273,** 894
  supplementation with, effects on protein oxidation (human), **273,** 729
Vitamin C transporter
  SVCT1, molecular cloning (human), **267,** 488
Vitamin D
  promoter activity dependent on, increase by zinc in osteoblasts (rat), **271,** 1
  responsiveness, and VDR expression, suppression by apigenin in human keratinocytes, **268,** 237
  upregulation of keratinocyte growth factor in MCF-7 breast cancer cells, **273,** 675
Vitamin D_3
  metabolism by CYP27A1 (human), **273,** 977
Vitamin D analogs
  inhibition of dendritic cell differentiation and maturation, **270,** 701
Vitamin D receptor
  expression
    in relation to cell cycle control in human keratinocytes, **279,** 89
    and vitamin D responsiveness, suppression by apigenin in human keratinocytes, **268,** 237
  related hormonal nuclear receptors, regulation of carbonic anhydrase II gene expression in HD11 monocytic cells, **271,** 481
  two subtypes in flounder, cDNAs encoding (*Paralichthys olivaceus*), **270,** 40
Vitamin D_3 receptor
  constitutive expression in leukemic mast cells (human), **273,** 1104
Vitamin D receptor/retinoid X receptor coactivator
  AF-2-dependent, 170-kDa, highly expressed in osteoblasts, detection and interactions in multimeric receptor complex, **267,** 813
Vitamin E homologue
  2,2,5,7,8-pentamethyl-6-hydroxychromane, myeloperoxidase-catalyzed phenoxyl radicals of, and HL-60 cell oxidative stress, **270,** 1086
Vitreous humor
  thrombospondin-1 detection (human, rat), **267,** 257
Vmel$^+$ locus
  epigenetic control leading to variegated monoallelic expression, **279,** 884
v-*myc*
  transformed cell lines, vascular endothelial growth factor expression in, differential regulation by ERK and p38 kinase pathways (rat), **270,** 108
Volatile compounds
  herbivory-induced, gene responses induced by, in bean leaves, **277,** 305
Vomeroglandin
  strong expression in glands associated with mouse vomeronasal organ, **268,** 275
Vomeronasal organ
  associated glands, strong association of vomeroglandin/CRP-ductin (mouse), **268,** 275
von Hippel-Lindau tumor suppressor complex
  Drosophila, E3 ubiquitin ligase activity, **276,** 355
von Willebrand factor
  immobilized, under flow conditions, targeting of liposomes carrying recombinant fragments of platelet membrane glycoprotein Ibα to, **270,** 755
VPATPD gene
  encoding vacuolar proton ATPase subunit D, structure (human), **279,** 543
Vpr protein
  HIV-1, intranuclear binding, role of cytosolic factors, **270,** 1055
  promotion of bystander cell depletion and prolonged survival of HIV-infected cells, **267,** 677
v-Raf
  oncogenic signals, phospholipid D activity elevated in response to, restriction to caveolin-enriched membrane microdomains, **273,** 77
v-*raf*
  transformed cell lines, vascular endothelial growth factor expression in, differential regulation by ERK and p38 kinase pathways (rat), **270,** 108

- v-Ras
  - oncogenic signals, phospholipid D activity elevated in response to, restriction to caveolin-enriched membrane microdomains, **273,** 77
- v-*ras*
  - transformed cell lines, vascular endothelial growth factor expression in, differential regulation by ERK and p38 kinase pathways (rat), **270,** 108
- v-Src
  - activation of human carbonic anhydrase II gene promoter: Ras-dependent and -independent pathways, **272,** 808
  - oncogenic signals, phospholipid D activity elevated in response to, restriction to caveolin-enriched membrane microdomains, **273,** 77
- VX
  - hydrolysis by organophosphorus hydrolase, enhancement by enzyme mutagenesis, **279,** 516

W

- Water
  - bulk, oxygen exchange with ligated oxometalloporphinates, **272,** 551
  - effect on Fe^{3+}/Fe^{2+} reduction potential of heme, **268,** 683
- WAVE
  - Arp2/3 complex-independent actin regulatory function, **272,** 386
- WDR6 gene
  - molecular cloning, expression analysis, and chromosome mapping (human), **274,** 117
- *WFS1/wolframin* gene
  - Wolfram syndrome, missense variations in Japanese patients: possible role in type 1 diabetes, **268,** 612
- WHI-P131
  - effect on survival of transgenic murine model of amyotrophic lateral sclerosis, **267,** 22
- Wilms' tumor suppressor protein
  - WT1, physical and functional interaction with human cytomegalovirus IE2 protein, **267,** 59
- WISP-2
  - as estrogen-responsive gene in human breast cancer cells, **275,** 108
- Wnt
  - regulation of *mtx2* gene expression (zebrafish), **271,** 603
  - signaling in L cells, role of posttranscriptional regulation of α-catenin expression, **277,** 691
  - signaling pathway
    - interaction and function, role of axin and Disheveled domains (yeast), **276,** 1162
    - regulation of β-catenin signaling in, **268,** 243
- *WNT-2B/WNT-13* gene
  - alternative splicing (human), **275,** 209
- Wnt-16a
  - identification and differential expression in human tissues, **278,** 814
- Wnt receptors
  - *frizzled-10A* and *frizzled-10B* genes encoding, isolation and expression in adult tissues and embryos (*Xenopus laevis*), **278,** 377
- Wolfram syndrome
  - *WFS1/wolframin* gene causing, missense variations in Japanese patients: possible role in type 1 diabetes, **268,** 612
- Wortmannin
  - effects on amylase secretion from pancreatic acini (rat), **269,** 792
  - promotion of insulin secretion from pancreatic β cells through cAMP-dependent pathway, **270,** 798
- Wound healing
  - cutaneous, associated modulation of expression of keratinocyte-derived chemotactic cytokines *in vivo* (mouse), **274,** 689
- WT1
  - physical and functional interaction with human cytomegalovirus IE2 protein, **267,** 59
- WW domain
  - gene containing, hWW45, cloning, expression, and mapping (human), **276,** 990
- WY14,643
  - downregulation of 11β-hydroxysteroid dehydrogenase type 1 in liver (mouse), **279,** 330
  - and rosiglitazone, synergistic activation of UCP-3 expression in cultured fetal brown adipocytes (rat), **273,** 560

X

- Xanthine oxidase
  - reduction of organic nitrites to nitric oxide catalyzed by, **270,** 880
  - role in HSP72 induction in lung by pancreatitis (rat), **273,** 1078
- Xenoestrogen
  - bisphenol A, estrogen receptor-mediated effects on preimplantation mouse embryos, **270,** 918
- Xenografts
  - human cancer, chemotherapy, potentiation by sphingomyelin, **268,** 603
- Xeroderma pigmentosum complementation group A protein
  - as processivity factor, **271,** 782
- Xeroderma pigmentosum F gene
  - expression in nonmelanoma skin cancers, assay (human), **273,** 454
- X,K-ATPase
  - β subunit isoform in skeletal muscle, immunochemical demonstration (human), **277,** 430
- *Xlim-1* gene
  - expression in *Xenopus* embryos, RNA interference with, **274,** 434
- X-linked lymphoproliferative disease
  - SH2D1A mutations in, structural basis, **269,** 124
- XLRS1 gene
  - 4-base pair insertion at codon 55, X-linked juvenile retinoschisis associated with, **268,** 370
- *Xmn*I fragment
  - transcription modulation by: rat highly repetitive DNA component, **279,** 282
- X protein
  - hepatitis B virus
    - expression in hepatocellular carcinomas (human), **276,** 885
    - mediation of hypoxia-induced angiogenesis in hepatocarcinogenesis, **268,** 456
- X radiation
  - induced mutations, enhancement by magnetic field exposure in NF-κB-inhibited cells, **276,** 238
  - partially transformed human cells induced by, morphological alteration by transfection with small c-myc DNA sequence, **272,** 887
  - transformation of C3H10T1/2 cells, suppression by extremely low-frequency magnetic fields, **271,** 323
- X-ray analysis
  - aldehyde oxidoreductase isolated from *Desulfovibrio desulfuricans,* **268,** 745
- X-ray crystallography
  - pokeweed antiviral protein-II after reductive methylation of lysine residues, **275,** 549
- XRCC1
  - BRCT region, DNA end binding activity with multimerizing feature, **279,** 678
- D-Xylose dehydrogenase
  - catalytic function, roles of His-79 and Tyr-180, **278,** 333

Y

- Y-27632
  - effect on migration and *in vivo* dissemination of prostate cancer cells (human), **269,** 652

- *yam8*$^{+}$
  - *Schizosaccharomyces pombe:* potential homologue of *Saccharomyces cerevisiae MID1* gene, **269,** 265
- YB1/p50
  - identification as component of FMRP-associated mRNP particle (mouse), **279,** 904
- YC-1
  - stimulation of vascular cGMP and inhibition of neointima formation (rat), **279,** 646
- Yeast
  - GCN2-mediated pathway, functional complementation by wheat eIF2α in, **279,** 468
- Yeast cadmium factor 1
  - and multidrug resistance associated protein 1, expressed in Sf21 cells, functional comparison, **270,** 608
- Yeast three-hybrid system
  - CUG-binding protein binding to UG dinucleotide repeats, **277,** 518
  - detection of peptide segment specifically binding to 3′-untranslated region of NF-IL6 mRNA, **276,** 101
- Yeast two-hybrid system
  - detection of thioredoxin–VDUP1 interaction in HeLa cells, **271,** 796
  - interactions of Fanconia anemia proteins, **268,** 73
  - NifH and NifM protein interaction demonstrated, **270,** 863
  - protein–protein interactions, combined transformation and genetic technique verification of, **277,** 589
  - receptor isoform-specific interaction of prostaglandin EP3 receptor with muskelin, **276,** 350
  - suppressor of cytokine signaling-3 interaction with insulin-like growth factor-1 receptor, **278,** 38
- *yellow-B*
  - *Drosophila,* cDNA analysis, **270,** 773
- *YHP1* gene
  - homeoprotein-encoding, transcription, positive regulation by Sln1 in *Saccharomyces cerevisiae,* **278,** 344
- YLL-224
  - effects on microvascular endothelial cell growth (human), **274,** 780
- Yolk syncytial layer
  - *mtx1* and *mtx2* gene expression (zebrafish), **271,** 603
- YVKM/YFIP motif
  - direct recognition, absence in SHP-2 binding to CTLA-4, **269,** 279

Z

- ZAK
  - cloning and expression (human), **274,** 811
- Zap1
  - related *ZRC1* expression induction by Zn-starvation stress (yeast), **276,** 879
- *ZDS2* gene
  - identification as gene conferring cisplatin resistance in *Saccharomyces cerevisiae,* **269,** 767
- ZFH-4 protein
  - homeodomains and zinc fingers (mouse), **273,** 686
- Z-filaments
  - torque in, in mechanical model of actin filament rotation, **270,** 677
- Zinc
  - binding residues, role in copper chaperone for SOD1 (human), **276,** 999
  - effect on *ZRC1* expression (yeast), **276,** 879
  - embryo deficient in, caspase-3-like activity and apoptosis (rat), **271,** 250
  - hepatic response via metallothionein induction after tumor transplantation (mouse, rat), **270,** 1140
  - hippocampal deficiency, acceleration of brain aging (rat), **279,** 505
  - inactivation of hypoxia-inducible factor 1: accumulation of HIF-1α and inhibition of HIF-1β nuclear translocation, **268,** 652
  - intracellular labile, role in suppression of DEVD-caspase activity in human neuroblastoma cells, **268,** 148
  - ions, high levels of, induction of loss of mitochondrial potential and Bcl-2 protein degradation in prostate epithelial cells *in vitro* (human), **279,** 607
  - modulation of activity of vitamin D-dependent promoters in osteoblasts (rat), **271,** 1
  - thymulin bound to, immunomodulatory potential in alveolar epithelium (human), **274,** 500
- Zinc-binding protein
  - Zn^{2+}-mediated structure formation and compaction of natively unfolded prothymosin α (human), **267,** 663
- Zinc finger proteins
  - deduced BTB/POZ-ZF protein myoneurin highly expressed in muscle, cloning (human), **273,** 385
  - TIS11, transactivation by, negative regulation by phorbol ester (PC12 cells), **274,** 526
  - transcript, expression at specific stages of spermatogenesis (mouse), **273,** 398
  - ZFH-4, number of homeodomains and zinc fingers (mouse), **273,** 686
- Zinc–histidine complexes
  - as nucleation centers for growth of ZnS nanocrystals, **272,** 29
- Zinc sulfide
  - nanocrystals, zinc–histidine complexes as nucleation centers for growth of, **272,** 29
- Zinc transporter 3
  - hippocampal deficiency, acceleration of brain aging (rat), **279,** 505
- *ZRC1*
  - expression induction by Zn-starvation stress (yeast), **276,** 879
- zVAD-fmk
  - effects on experimental autoimmune encephalomyelitis (mouse), **267,** 826
- Zymography
  - fluorometric, endochitinase and exochitinase (*Photorhabdus luminescens*), **268,** 302
